I. INTRODUCTION

In this pages you will learn how to make potions for love, health and also lots of things for you to use to be more healthy and happy. Everything is explained step-by-step for fast and easy understanding.

But, have you ever wondered where and when this science started? What if is modern medicine or chemistry? Well, the answer is found ages ago...the people have been mixing herbs or other plants and substances to get different results. Some may say that is alchemy or chemistry...but for the few of them is a secret passed to generations to come.

Even today, young girls or men go to this 'witches' to be helped in love (of course with a potion or a love spell) or even grown-up people to get help in health or even money.

Now you're about to learn about....

Love Potion 7

Needed:

7 ounces Sweet Red Wine
7 Basil leaves
7 Red Rose Petals
7 Apple Seeds
7 drops Vanilla extract
7 drops Strawberry juice
1 Ginseng root cut into 7 equal pieces

By the light of 7 red votive candles, put the 7 ingredients into a cauldron. Stir the potion 7 times with a wooden spoon, each time reciting the following incantation:

"Let the one who drinks this wine
Make his/her love forever mine"

Bring the mixture to a boil then reduce the heat and let it simmer for seven minutes. Remove cauldron from the heat and allow potion to cool. Bless it in the name Aphrodite seven times; cover and refrigerate until you are ready to serve it to the man or woman from whom you desire love and affection.

Word of warning: Do not allow anyone other than your beloved to look at, touch or partake of this potion.

PAN WINE

You Will Need:

1-Gallon Spring or Bottled water
1 Gallon White Grape Juice
3 Pounds Sugar or Honey
1/2 Package Active Dry Yeast

What you have to do:

Suspend the yeast in 1/4 cup of warm water. Then in a large pan, begin warming the juices and the water, add the sugar or honey slowly, stirring continuously until it dissolves. Allow it to get warm and then add the yeast which has been activated by soaking in the slightly warm water (Remember: if the water is too hot for the yeast it will kill it and ruin the entire recipe... it must be just slightly warm.) Cover the mixture lightly and allow to sit over night. Do not let it get too cold as the yeast will deactivate and if it gets too hot, you already know what happens, keep it room temperature.

The next morning pour it into bottles with * LOOSE * corks. These must be loose, as they will pop many times over the next few weeks of fermenting. Once the fermenting process has slowed, then the corks can be put in tightly as it continue to ferment for the next six to eight months. Test the sweetness of the wine periodically to assure that you aren't going to end up with pucker punch instead. If too tart, just return it to the stove and add enough sugar or honey to suit your taste, bring the mixture to a boil, then bottle tightly in an airtight container and store in a dark area until used.

SIMPLE INFUSIONS (Teas)

What is needed:

1 Pint of spring or bottled Water
1/2 Oz of Herb of Your Choice (See below)

DIRECTIONS:

Bring the water to a boil on the stove and then add it to your cup of chosen herbs. Let it steep for ten minutes and then strain it with a non-metallic strainer. You may chose to sweeten it with the old standard sweetener clover or orange honey, or you can use plain old honey if you wish to be less adventurous.

The Herbs:

Mugwort- clairvoyance.

Eyebright- eyelids are anointed for clairvoyant visions.

Rosemary- Poured over self in shower or bath for protection.

Rosemary can also be used as a simple to cleanse the hands before working your magick if there is no time for a ritual bath.

This tea is drunk to improve psychic powers.

“Like the camphor dispells moths, so my potion dispells your affection, leave me in peace and return to your own happiness.”

After you have finished it, use this oil when you're going on a date.

Healing Brews

Brewing Tips

Since its discovery over 5,000 years ago, tea has become an integral part of our lives. For some, brewing and drinking tea is an art form and, according to a Japanese proverb, "If man has no tea in him, he is incapable of understanding truth and beauty."

Use fresh water. Use freshly drawn cold water as water that has been reheated gives tea a flat taste. If you're unhappy with the taste of your tea, you may, in fact, dislike the taste of your water. Try making a cup of tea with water from a purifier or bottled water and taste the difference.

Heat the water to the right temperature. Bring it to a rapid boil for black or herb tea (either in a kettle or microwave) to extract the full flavor. For green tea, the water should be hot, just to the point of boiling. Water temperature will drop rapidly, so bring your pot or cup to the stove and pour as quickly as possible.

Cover your cup. Whenever possible, if brewing tea by the cup, use the saucer to cover the cup and retain the heat. Some tea mugs on the market are designed with a built-in lid for added convenience and practicality.

Watch the clock, not the color. Never brew tea by color if you want the perfect cup. Some teas brew light, others dark. Always brew by the clock - three to five minutes for green and black teas, four to six minutes for herb teas and six minutes for wellness teas.

Squeeze the bag. Some people have debated -- to squeeze or not to squeeze. Is better squeezing the bag. Why? Tea leaves can absorb up to seven times their weight in water and compressing the bag enhances color and flavor. So, give a gentle squeeze to the tea bag before removing from the cup.

LET'S GET STARTED!

Herb Tea

Place one tea bag in your favorite cup. Add boiling water and let steep 4 to 6 minutes. Sweeten if you desire -- we recommend honey!

Black Tea

Place one tea bag in your cup and pour boiling water over it, cover and steep 3 to 5 minutes, depending on desired strength. Remove tea bag. We recommend adding honey to sweeten.

Green Tea

Green tea is brewed differently from black tea because its fresh green leaf makes a slightly astringent tea. With cooler water and shorter brewing time, you get more delicate flavor from the unfermented leaf.

Place one tea bag in your cup. Pour very hot (just at the brink of boiling) water over the tea bag. Cover and steep 3 minutes. Remove tea bag and add lemon and/or sweetener if desired. Traditionally, green tea is served without milk.

For ages, the local 'wise' woman would have spent many hours preparing her "magickal potions" to help and heal the local villagers and enrich their lives. They depended on her knowledge and wisdom to heal their aches and pains and mend their broken hearts, to bring love into their lives and a good harvest to their pantry, to cleanse their skin and cleanse their soul.

Balm tea

Balm has been used from time immemorial as a wound dressing, for it is rich in ozone and therefore strongly antiputrescent. It also makes a flavorful and mildly sedative tea to aid in opening the pores to reduce fevers produced by Flu or chest colds. Other Names: Sweet balm, Lemon Balm, Garden Balm, Melissa.

Infuse 2 teaspoons dried herb in 1 covered cup boiling water for 15 minutes (Or 1-ounce herb to 1 pint boiling water if a larger quantity is required). Strain, and

flavor with sugar or honey and a twist of lemon, if desired, before drinking.

Psychic Tea

3 parts Rose Petals
 2 parts Thyme
 2 parts Yarrow
 1 part Cinnamon
 1 part Clove

Brew in boiling water for about ten minutes. Strain and add honey for taste if needed, do not add cream or milk. Use before divination psychic work, and astral travel to enhance the awareness.

HEALING Potion

You need:

2 parts Cinnamon, 2 parts Sandalwood, 1 part Rose petals, 1 part Cayenne, 1 part Ginger, 1 part Rue, blue or purple cloth, Eucalyptus oil, Camomile, White Willow bark, or Wood Betony

Mix and tie the ingredients in a blue or purple cloth. Anoint with Eucalyptus oil and wear or place near bed at night. Some herbs that are medicinally good for pain relief and magically good for healing that you might add into the sachet would be Camomile, White Willow bark and Wood Betony.

Crystals

I have always like crystals and gem stones, etc, and didn't know that they actually have healing qualities.

Crystals do have special powers and healing qualities and you can use your crystals to strengthen and to assist you in healing. Crystals can also be used to balance and cleanse your chakras.

How to pick the Right Crystal for You

I have found that it is the crystal that actually picks you as you may feel drawn to a particular crystal or color. A little something that just catches your eye or seems to jump out at you when you look at a display table full of crystals and jewelry.

In picking the crystals that is best suited to you and your needs, you are advised to use your intuition, allow yourself to be drawn to the crystal you need. Once you have been drawn to a crystal or a type of crystal, choose one that has good clarity and has no chips taken out of it and a nice point.

Hold the crystal in your hand, enclosing your fingers around it, and focus on the energy and feelings that the crystal is giving you. If it is the right crystal for you, the crystal will feel warm, comfortable and nice in your hand.

If you are choosing the crystal for someone else, focus on the person and picture them in your mind's eye then select the crystal that you feel drawn too. Visualize the person as you hold it in your hand and see how you feel.

There are several ways that you can **cleanse** your **crystals**:

SALT WATER - Soaking your crystal in salt water is a good way to get rid of any negativity and cleanse your crystal. This can be either seawater from the beach near you or natural sea salt added to fresh water.

THE MOON - The moon has excellent healing and cleansing properties of its own. Simply place your crystals in a safe place where they will not be taken or in the way and allow them to soak up the energies of the moon.

INCENSE

Incense is a mixture of dried herbs, resins, roots, gums and oils, magickally ground together and smoldered on a glowing charcoal block. The fragrant smoke that is released then purifies the air, rids the area of negative vibrations and fills it with powerful properties of transformation. Incense is burned during rituals to create an altered state of mind, and to represent the element of Air.

Tips on Incense Burning

There is nothing quite so satisfying as giving your home a good cleanse with the real stuff. So, here are the instructions as to what to do with real incense.

Incense that consists of resins, herbs and oils, need heat to burn, so most suppliers will sell charcoal blocks in packs of ten. Always include a resin such as frankincense or copal as they herbs will simply "burn" without them.

So, now you have your incense and charcoal. Now what? So, here's what to do:

Obtain a small dish such as a Chinese bowl, pate dish or similar, whatever you have available. This will be your holder. I have 2 seashells simply glued together, or you could purchase a brass incense holder or similar. Whatever you decide to use, fill your container with rock salt, earth or sand to absorb the heat from the charcoal block.

Strike a match and hold onto the side of the block until it begins to spark. If you are lucky enough to have a coal fire, simply sit the block onto a hot coal and then remove with the coal tongs (that is what I do anyway). A candle can be used in the same way as long as you have a pair of tweezers or similar to safely hold the block into the flame – remember, once it has caught, it will get hot so don't use fingers.

Once it has started to spark, leaves sat or place back on the salt or similar, and wait until it begins to glow. This is the part where the charcoal it be reduced to ash. Try to do something else in this time.

Once it resembles a glowing coal, then sprinkle some of the incense into the hollow on the top of the block. The incense will start to smolder and produce herbal smoke, which will be nothing to what you have been used to if you have only used incense sticks.

Allow the smoke to fill the room or walk clockwise around the room, with your dish of incense in your hand, to allow the smoke to fill all those little nooks and crannies. Continue around the home in a clockwise motion should you require a complete cleansing; say after cooking, or a family argument, or simply to cleanse the atmosphere. Continue adding more incense should it be required, and the charcoal should have turned completely to ash within the hour.

Remember to keep charcoal blocks in a dry place. If you feel the home really needs a lift, then choose a suitable incense, fill the house with smoke, then open all doors and windows and let out all the staleness and negativity, then repeat again, this time keeping in all the smoke to get to all the hidden away areas. It is done and all will be filled with positive, healing energies.

This incense is also very purifying to such things as crystals and gemstones, magical tools, crystal spheres etc, so don't waste your block whilst you have a hot one around. Hold items in the smoke for a few minutes, watching the negativity they have absorbed be taken away in the smoke, and give healing items etc a cleanse too. They will really appreciate this and will be able to work much more efficiently for you.

Here are 2 incenses that you can use them right-away.

Meditation Incense

Used as an aid to meditation, you'll want this to be a personal blend. Start some charcoal before mixing the incense. Add a little of each ingredient to the base powder and burn a pinch. Experiment with mixture until the scent suits you.
