# INTRODUCTION.

I am happy to have been granted the opportunity to publish this work. This work has been published with the aim of the community learning & enjoying a new type of magical device.

Now, you will probably say: "Who the heck is this guy?" I am a just an average magic practitioner that have found new ways of utilizing this very natural talent.

If any of you know me, it's "Ratatoskr" of theoccult.bz community. I am a 20 years old, university student living in the one of the most modern cities, the glorious Istanbul.

I actually had no ancestor that was good at magic nor one that was a student of magic, so I thought: "Why not create a system where you pass your experience & teachings in a form of hereditary family insignia?" So that my descendants can receive my teachings & seize the power I will have left in this world.

And then; I proceeded to write this book.

I will give you plenty of advice, my research & some of my experiments' results and resources for you to create your own family insignia.

Is it not abnormal that we receive genetic information but not magical information from our ancestors? I find this not to be the case, most of the time, if any of our ancestors practiced a certain type of magic, we are bound to be better at it then

any other type of magic.

This work is undoubtedly influenced by Nordic & Germanic people's ideas & forms of magic. Guided by the Hermetic laws & truth, I found myself compelled to pass my self-knowledge onto the next generations.

I hope I will have more opportunities to innovate & pass more and more information in future to our community of sacred knowledge.

*“When the ears of the student are ready to hear, then  
cometh lips to fill them with wisdom.”*

**The Kybalion**

# I. Importance of Hereditary.

No matter what our philosophy, religion or belief says. It is the truth that hereditary is a part of life. It is what pushes the individual forward or backwards in the spiral of life. We are born with nothing but our ancestor's experience & traits into this world.

Hereditary occurs in everything living, in science this is now as the process of Meiosis. It is a natural procedure in which chromosomes from two parents combine into a new form of life.

This form of life contains traits of both parents. This natural procedure, is the evidence that we humans are evolving with every new birth, causing some of us to ascend towards the All/the Root and some of us to descend towards the grossest of form of Matter and existence.

Ancients selected certain breeds of animals and had them have new offsprings to create stronger & more evolved type of sub-species. They also have done this for plants and various types of other animals like horses & dogs.

Hereditary determines our personality from the birth, when we reach a certain age, we develop certain traits of our own, resulting from either self-development, environment or both and many other factors.

Is it not possible for our philosophical and magical studies & knowledge to pass down to our

descendants through genetics? Yes and no.

It is understood by many occultists and students of magic that experiences and feelings of ancestors pass through future generations. However, this doesn't mean that a certain type of knowledge is provided with it. It is just pure memory of experience in the form microcosmic life form.

*We are linked by blood, and blood is memory without language."*

**Joyce Carol Oates**

However, we are all fortunate for the fact that, when we do our work and study magic, we activate those old patterns of memories, experiences & feelings our ancestors that flows through and within us.

It should be important for us to make best possible use of this.

We all have our own traits that makes us unique and seperate from other individuals. Instead of focusing on our selfish selves; we should look forward to what we can do with our traits.

We must make it a goal of life for us to explore, improve & accomplish the traits our forefathers have left in us.

We should cure & expel the bad traits and further improve the good traits. We should explore and look forward to what we can provide to the world & humanity. This is the gift of human life.

## II. Importance of Thaumaturgical Insignia.

“What is Thaumaturgy?” you may ask if you're new to the magical community. Thaumaturgy means wonderworking or miracle working. It is direct imitation of phenomenons of unexplainable origins.

Basically, it is what we call, magic. While it is not true magic, it is an imitation. “True magic” is un-attainable for humans as of now.

True magic was once available during the era when Gods & humans walked & lived together. This was the Age of Gods & Mortals explained in Greek mythos.

Now, let me get back on the subject we're focusing on once again. “What is a Thaumaturgical Insignia?”; it is the device I have created to use, store & transfer the magical energy & knowledge our ancestors have passed onto us.

The purpose of this device is not only to pass our knowledge & power to our descendants but also to our pupils.

While blood is important as it is natural link between people, we're living in an age, where information is not bounded by limits.

Thaumaturgical insignia not only improves the workings of our bloodlines, it also embodies ideals, knowledge & power of us and transfer it onto people who are not of our blood.

Those insignia also break bounds that has been imposed by blood and link people's *spirit*.

So, let us explore this magnificent device.

I will go onto explain how they are created, usage, advantages & disadvantages, symbols & runes that can be used and how the modification of the insignia effects the vessel.

*“Hereditary honors are a noble and a splendid treasure to descendants.”*

**Plato**

### **III. Creation of the Insignia.**

Since the dawn of time, men have sought the feelings of belonging and acceptance, a need to be a part of something. Hunters, Gatherers, Merchants formed out groups for the very reason of survival and prosperity. As the population grew abundant, people would branch out into even more unique groups.

Within this century, it has been revealed that those groups would have different styles of art, ethics, beliefs in order to distinguish themselves from other groups. Those are the first evidences of Insignias.

By the time had the nations risen, it was expected of people and rulers to have their own symbols that could set them unique & different to other families, nations & groups of people.

The insignias weren't considered hereditary at first, wealthy families & individuals, knights, towns & lords were to choose their own insignia if they were favored by the reign of their time.

However, by time, there were just too many insignias that they caused problems for the nations & people of the time.

Insignia became far too complex and nations had to establish laws & certain authorities to deal with this problem.

However may it seem problematic, it is no doubt that Insignias became hereditary by time and was considered as something that must have

been obtained.

This fact is absolutely true for our species. We humans seek not "acceptance" but truly linking with others, through ideals, blood and service for others & ourselves.

There are various ways of creating insignias, this includes creation of heraldic coat of arms, formation of sigils, or magic squares. One may also use other forms of symbolism. Even a rune formation is able to act as an insignia.

Let's see how a coat of arms is created;  
It is composed of seven layers;

Shield,  
Helmet,  
Crest,  
Wreath,  
Mantle,  
Supporters,  
and Motto.

Shield; is hereditary and embodies the identification. They often carry certain colors, geometrical patterns and charges (such as animals or plants).

Helmet; is not hereditary and is proof of achievement, the rank of achievement determines the beauty the helmet reveals. Helmet is something that can not be passed on to another individual whatever from the blood or a pupil; it must be earned. Purpose of Helmet is to carry the Crest.

Crest; embodies the spirit of a group, the crest determines which group the person belongs to. It is not hereditary and can be changed at any time. Family Crests are worn to show pride and symbolize mainly belonging to a family.

They come in seven colors: Gold/or, silver/argent, black/sable, red/gules, blue/azure, green/vert & purple/purpure.

Which identifies the role of the family in the society.

Gold/Or; generosity and elevation of the mind.

Silver/Argent; peace and sincerity.

Black/Sable; represents the virtue of constancy.

Red/Gules; symbolizes military prowess and greatness of spirit.

Blue/Azure; represents truthfulness and honesty.

Green/Vert; symbolizes hope and joy in renewal.

Purple/Purpure; of justice and sovereignty.

Crest is placed upon the helmet.

Wreath; is a twisted silken which is worn upon the helmet and is supposed to have equal amounts of divisions. It is made up of two-colors which follows certain meanings.

Mantle; covers the helmet and flows down covering all the insignia, however it has no meaning and only has artistic value, however should either not exist or be simple if the person desires so.

Supporters; are the figures who appear at the side of the shield, holding it in place, they are often animals, humans, mythological creatures, angels etc. This is NOT hereditary, and is identified with person's achievement and status in life & society in which he lives or participates.

Motto; is a basic phrase which incorporates the value and lifestyle of the vessel/carrier, or holds family values. It is also not hereditary and can be changed as many times as desired.

If you desire to have a coat of arms, research on it because I am not sure if I have understood it's creation, this is just all I know about it.

As for sigil formation, they can be created as a family or magical family insignia. If you want to learn and create a sigil, it should be more appropriate for you to read Austin Osman Spare's books for further guidance.

Magic squares can also be used as the Thaumaturgical insignia but they are insufficient because they belong not to the vessel but to nature itself.

Most efficient Thaumaturgical insignia are created by artistic instinct, symbols individualised by the vessel herself/himself for their own liking and filled with the meaning of their own.

When you are done with creating or "finding" your Thaumaturgical Insignia of Inheritance, proceed for the rituals of creation and embedding of the insignia into the spirit and the matter.

## **a. Ritual of Consecration**

Cast a magical sigil of your favor, then put your insignia inside it (draw it on paper or draw it directly on the floor) and then cast the divine word presented below.

*“By the laws of Unknowable and Undefinable theALL, I command thee in the presence of the glorious truth and within the cricle, burn with holy flame of theALL, become as pure as the stars above, and thou shalt be holy.”*

## **b. Embedding of the Insignia into the Spirit & Matter**

Visualise the insignia turning to a burst of flame and landing upon your hand embarking itself upon and then cast the divine words presented below. Repeat as much as you like until you felt that you are comfortable with the operation.

*“By the laws of Unknowable and Undefinable theALL, I breath the flame of life unto you, the flame that penetrates the universe. As I breath, you shalt become a part of me, you shalt be of my blood.”*

Then repeat this divine words three times;  
*“You shalt dwell in my blood.” (x3)*

### **c. Linking of the Insignia**

Linking of the Insignia is a strange operation because this allows you to link with sacred object, ritual tools, books, humans who share the same insignia and many other beings of the spiritual realms.

Visualise the insignia imprinted upon your hand bursting to flames and duplicating itself in flames on the desired object/person. You and other person should be in agreement for this to work.

*“By the laws of Unknowable and Undefinable theALL, I pass the flames of knowledge unto thee.”*

*“Accept my gift, thou shalt unite thy blood with mine.” (x3)*

If the other person accepts the offer, he must also speak the divine words.

*“By the laws of Unknowable and Undefinable theALL, I accept thy gift.”*

*“From now on shalt we protect each other and be as brothers.”*

(If the practioner is a female);

*“From now on shalt we protect each other and be as sisters.”*

If this was done with an object, there would be no need for an agreement. There is no gain to be sought from making a linking with an object. It shouldn't be done unless the object is sacred and must be something important.

## **IV. Uses, Advantages & Disadvantages of the Insignia.**

### **Uses;**

\*It is used to pass on knowledge & power to descendants & pupils.

\*It is used as a link between humans, objects and other beings.

\*It uses the experiences of ancestors and amplifies their effect on the vessel/carrier.

\*It can be used as a catalyst to summon spiritual beings.

\*It can be used as a catalyst to store magical power.

### **Advantages;**

\*If used correctly, it can ease the burden of other types of magical operations as it can be linked with objects and can be used as ritual tool instead.

\*Accumulation of the magical knowledge & power within it may increase the chances of having a child with high magical potential.

\*Accumulation of the magical knowledge & power can be used to create "commands" "divine words" "accelerated recitation".

### **Disadvantages;**

\*Accumulation of the magical knowledge & power may limit the descendant to success in a particular type of magic while causing him/her to fail in

another.

\*Such accumulation of the magical knowledge & power may be hard to control.

\*Accumulated knowledge has to be activated through study and recitation, each new generation may have to memorize or study often the previous generation's works to keep the insignia inflamed/activated.

### **a. Commands aka Accelerated Recitation of Divine Words**

Commands are created when the vessel either studies often or memorizes the work of his ancestors or teachers and simplifies and shortens the sentence.

When the command is spoken upon, mind of the vessel must comprehend, understand and remember all of the said work.

This can be used to shorten spells, curses or magical workings of that kind. It is not advised to use for theurgy/ritual work.

### **b. Storing Magical Power & Knowledge**

This can be done with a ritual of your own, or the ritual presented here. There are two rituals for this, one is to be recited before the start of the study and the other at the end of the study.

Before starting the study;

*“By the laws of Unknowable and Undefinable theALL, I command thee flame of knowledge. Surround and burn within me.”*

After the end of the study;

*“By the laws of Unknowable and Undefinable theALL, I command thee, Thou shalt keep burning for ever.”*

As you can see, there is no need of any other ritual tools other than the Thaumaturgical Insignia.

**HINT** Always visualise the insignia bursting with flames and holy light during the rituals, to keep it enflamed/activated.

### **c. Amplification of Cause & Effect from the Experience of Ancestors**

*“Every cause has it's effect; every effect has it's cause; everything happens according to law; chance is but a name for law not recognized; there are many planes of causation; but nothing escapes the law.”*

**The Kybalion**

People often forget that not only this law explains the physical phenomena, but it also explains how theurgy & thaumaturgy works, rituals and techniques of magical works, creates a fake cause, which effects subject reality and if it is in

full accordance with other divine laws, it also effects the objective reality. We can use this law in accordance with Thaumaturgical Insignia of Inheritance, we're able to enhance to results of our magical workings.

You can create your own rituals or use the divine words present here, it is also considered as a spell so you can shorten it and turn it into a command.

Visualise the insignia as hinted in the previous pages. Then recite the following:

*“By the laws of Unknowable and Undefinable theALL, I command thee crest, may thou lend me the knowledge & power of my ancestors and teachers.”*

I have turned this into a command for my personal use, which have raised my chances of better manifestations of my desires as I have done in my experiments;

*“Command. Accelerate.”*

#### **d. As a Summoning Catalyst**

You have to link sacred objects with your Thaumaturgical Insignia or as I shortened “Crest”.  
Then, visualise as usual.

And follow the usual instructions which has been given in the grimoires or other magical works.

The Crest can also be used as a pact between spiritual beings and the vessel, however, they are hereditary and if pact is not abolished later on, it may pass on the descendants. Which wouldn't be a desired situation.

## V. Transferring the Insignia.

Ritual of transferring the Crest to a descendant;

*"O child, o thee pupil. By the laws of Unknowable and Undefinable theALL, I pass on thee the Crest of thy blood. May my spirit guide you even beyond death."*

*"Accept my gift, thou shalt unite thy spirit with mine." (x3)*

*In order to become a vessel/carrier, the descendant has to confirm to pact/gift;*

*"By the laws of Unknowable and Undefinable theALL, I accept thy gift. Thou shalt serve beyond death as I am of your blood."*

With this, the transferring is complete and insignia is passed on.

## **VI. Modification of the Insignia & Their Effects.**

Modification of the Crest by the new vessel may corrupt or improve the Crest. If the new vessel erases or discards something from it, accumulation of knowledge & power may become corrupted and unusable.

It will also break the connection between links. It is up to the new vessel's choice, however.

Here is the ritual for renewal and modification of the Crest.

Visualise as usual, visualise the Crest taking the new form and then recite the following;

*“By the laws of Unknowable and Undefinable theALL, I once again breath the flame of life unto you, thou shalt be renewed.”*

Then repeat this divine word three times;

*“You shalt once again dwell in my blood.” (x3)*

*“Heredity provides for the modification of its own  
machinery.”*

***James M. Baldwin***
