MORE ABOUT THE ECONOMICS OF THE UNIFIED STATES OF AWARENESS

(Food, Clothing, Guaranteed Income etc.)
Or, Whose Going to Do All the Work?

Question:

M.P. Of the Dena Foundation has one question which I can't quite pinpoint, but I'll read the statement. It's referring to the Unified States of Awareness as a structural pattern for the New Age government. "Since this is an area of thought and concern engaging the attention and considerable individual channeling from Cosmic Awareness on the part of numerous individuals and light centers for quite some time now, I'm sure that many of these individuals and groups will be interested in the pattern as interpreted by the channel. It is a beautiful job, very clearly defined and delineated in most respects. I feel, however, I do have one basic question to ask in regard to its actual application to the human temperament and condition on earth planes at this time.

I notice that throughout it is stressed that this system allows each entity "the basic living rights: food, shelter, clothing and health care through a guaranteed income", and that for anything above and beyond that, the individual must contribute 'talents' to the cooperative bank of these talents on an even exchange basis, meanwhile, allowing additional credits to be generated through some abstract process by which the needs of the masses are met in all areas, without additional taxation or cost to anyone. Now my question at this point is this: while money or so-called 'talents' held in reserve as payment for services, can be created out of thin air through the use of pen and ink or printing press, as you quite accurately say, the services themselves cannot be equally easily created out of thin air by printing press, but are the product of the actual sweat and blood and energies of the individuals giving those services on a regular basis. As all of us have the ample opportunity to learn from personal experiences in these areas, the actual physical, mental and emotional labor, be it a labor of love or a labor of necessity to provide food, shelter, clothing and health care for all the countless billions of humans now on earth, and the ever-increasing additional birth rate predicted in the next few years, is enormous.

Who is going to do all the construction work, farming, processing, distribution etc. of food and products necessary to provide all this free housing, food, clothing and health care to which everyone is to be "entitled" in the future, whether or not they feel like doing regular work of any kind in order to personally contribute to these basic human needs?"

Cosmic Awareness:

This Awareness wishes to point out certain areas in terms of economics. This Awareness indicates that in the so-called capitalist society, wherein the banks create the money, control the economy, without accounting for their earnings; wherein there are the independent international bankers, or the independent Federal Reserve Bank, which is privately owned, and these organizations give their money to the other banks scattered around the nation, and from these banks is distributed money through loaning procedures, lending and mortgaging procedures, the money gradually becomes distributed to the masses.

This Awareness indicates that depressions or times of inflation can be regulated, and are regulated by the prime interest rate, by turning on and off the presses which print the money, and by the stimulation of economy through projects, programs or national emergencies, such as war.

This Awareness indicates that the space program stimulated the economy and created many jobs, which allowed those employed to pay taxes and to put more money into the government, which then put more money back into society through work programs and through greater defense programs, which created more jobs and allowed more entities to pay taxes, and these taxes again went back into the government.

This Awareness indicates that the government, to finance these programs, borrows from the bank and builds up a great national debt. This Awareness indicates that the bank, being privately owned, in effect is the mortgager and the government is the mortgagee. That the United States has been mortgaged to the bank, and the national debt is so great that it becomes impossible to make payment.

This Awareness indicates that the entire system as being bankrupt, but the banks themselves are unable to collect without destroying their own purpose and the checker-board on which they play.

This Awareness indicates that the United States Government must continue appearing to be solvent in order to save face to the rest of the world and to its own inhabitants, to appear to be solvent so that the game can continue.

This Awareness indicates this as like entities who are playing Monopoly, whereby the money has been withdrawn from the board and the entities are passing about I.O.U. notes and the game continues with I.O.U. notes, and the bank continues to rake in the I.O.U. notes along with all of the original money which has been withdrawn.

This Awareness indicates there are many books on this subject that can explain the financial system which is occurring in this nation, in greater detail. *

This Awareness indicates that the situation is such that entities can work, take upon themselves a job, and the general activity of the nation is such that products can be made, can be produced at a faster rate than consumers demand. This as the supply exceeds the demand. Therefore to avoid this problem, the industrialists and the producers are encouraged to make products which wear out in a short time, so that the supply is constant and the demand is constant.

This Awareness indicates that wherein this supply becomes too great and the demand diminishes, that it then becomes necessary to sell the supply in other countries. This as the Open Door Policy, wherein you trade with other countries.

This Awareness indicates the action of ex-president Nixon going to China was to open the door with China so that trade could be carried on with that nation, to allow the excess supply to be distributed in those areas. This Awareness indicates the same thing happened with Russia.

This Awareness indicates that the actions of having a conflict with China and Russia prior to the Detente period was such that those nations and the United States could benefit by the appearance of a conflict. That wherein you are threatened by a neighbor, you build up your armaments, you build up your supplies.

This Awareness indicates the Russian nation and the Chinese nation needed to have an enemy in order to prod their people into working hard in order to build up the supplies to lift their economic status.

This Awareness indicates that the so-called threat of annihilation from an enemy became the motivation which prompted the people to work harder and do more.

This Awareness indicates that the action of the United States after World War II in giving energies to other nations to rebuild was also an action which allowed prosperity in this nation while those goods were supplied.

This Awareness indicates that wherein there is not enough of a market for these supplies, the alternative of this system is to create some kind of market. One such market was the Vietnamese war, which allowed the producers and manufacturers and the

military-industrial complex to build up many armaments, to hire people for the factories, and to destroy certain accomplishments and productive places so that they could continue having some marketplace, namely the marketplace of the theatre of war, to sell their goods.

This Awareness indicates that likewise, the space program became a marketplace. That these various programs create more jobs.

This Awareness wishes entities to look very closely at the absurdity of this entire system. This Awareness wishes you to look very closely and ask yourself: Is all this work, the sweat, blood and tears, is all this necessary just to keep a money system going?

This Awareness indicates that there has been vast amounts of sweat, blood and tears which have gone into the production of war materials. There have been mountains of paperwork, hours of study, eyes burnt out from intensive study and paper-pushing, for what? for food, shelter, and CLOTHING?

This Awareness indicates the food, shelter and clothing as being a very small cost in relation to the absurd waste which has occurred upon this plane.

This Awareness indicates that wherein children play, wherein children get together and have the opportunity to build a tree house, they do not ask who is going to pay for this? who is going to pay my labor for helping my friends build a treehouse? They simply get together and build the tree house.

This Awareness indicates that wherein entities begin to move right into the basics of living, the basic necessities, it becomes clear that many entities will be willing to give assistance, to help each other to build homes, to build roads, to make their wagons, their cars, their furnishings, simply because they enjoy doing something for others, but with the added reward of being paid for something that bears their name, their handiwork. This, then, becomes even greater incentive.

This Awareness indicates that the majority of people who do not wish to work in this present society, do not wish to work because they are either relegated to those types of jobs which are unsuitable for human behavior, or they are pushed into jobs which they do not see as being worthy and meaningful in the life of a society, and would prefer not even to have anything than to contribute to a society which gives its people 'the shaft'.

This Awareness indicates that in the Unified States of Awareness there is no military. There are no policemen. There is no great bureaucracy of paperwork. There are to be those areas where entities can choose what they wish to do, move into that position, because they enjoy that kind of work. This Awareness indicates there are certain people who, more than anything else, like to dig holes. There are other people who, more than anything else, like to talk on the telephone. There are other people who, more than anything else, like to file books.

This Awareness indicates that in the Unified States of Awareness there shall be those opportunities whereby entities have the chance to do those jobs which they enjoy doing, or be trained to do those jobs which they enjoy doing.

This Awareness indicates that when you enjoy doing a job, you may do this without the feeling of working by the sweat of the brow.

This Awareness indicates that those entities working in those jobs which are clearly defined and do not duplicate other jobs, or compete with other companies or other jobs, those kinds of organizations which are cooperative in nature can become so much more efficient in their output that the number of hours required to do the same thing is greatly lessened, and the energies expended require fewer persons.

This Awareness indicates that there will be sufficient numbers of people, sufficient energy, to raise the food, to make the clothing and to build the shelter for many.

This Awareness indicates that in 1950 it took four times as much time to raise the food on the farm as it does now. This Awareness indicates that one-fourth of the time is required at present time to raise the same food as was required in 1950. That technology and proper use of supply, with the elimination of those marketplaces such as the theatre of war, and the wasted energies, this shall allow entities much leisure and time to live and communicate, and to be free, rather than to live a life of slavery under a job which supplies them merely the trappings of a living, which prevents starvation in order that they may work.

This Awareness wishes you to consider other worlds, to consider the Kingdom of Heaven, to consider other planets and other systems, and ask yourself:

Is this the best possible world, or is there something else out there?

Is the Kingdom of Heaven capable of guaranteeing food, shelter and clothing, or is this some kind of universal fallacy whereby every entity within the Universe must work by the sweat of his brow?

This Awareness suggests you look to the lillies of the field and see how they toil not.

SOME MISCELLANEOUS CLOSING MESSAGES
FROM RECENT READINGS

This Awareness wishes entities to lift their eyes toward that shaft of light which shines forth upon this plane, which comes from that window which is called the future; for the future is now. (9/21/77)

This Awareness suggests that during these times of change, where values are in turmoil, there is one word which entities may hold, which may keep them afloat: That word is "patience". (5/19/77)

This Awareness suggests that entities at this time, in the Awareness Movement, may begin taking great stridges forward on all levels by ignoring or minimizing that which is negative and focusing and pointing toward that which is positive. This Awareness suggests that it is not necessary to be hostile toward evil in order to be good, that it is not necessary to be "down on" the enemy in order to be in favor of your group. This Awareness suggests that entities look at what is, and if a negative is seen, look and speak of that negative quickly, then move on to the positive and dwell thereon. (8/17/77)

This Awareness wishes entities to look carefully at the changes which have occurred during the past 4 or 5 years. This Awareness indicates that the land in which you live, the atmosphere of the political system as that which has tipped the scale, tipped the balance of power from the few to the many. This Awareness indicates that this as being somewhat subtle, not clearly and dramatically seen; but this Awareness wishes you to notice carefully the effects of certain changes in terms of concepts relating unto power and control, relating unto people's rights, relating unto the human rights movement which is beginning to emerge in consciousness and shall grow ever stronger with each passing day. This Awareness suggests you are witnessing the rising of the Golden Rays of the New Age. These rays which carry warmth of love and the totality of mercy shall spring forth their blessings upon this plane, and you and yours shall find peace, harmony, beauty, and joy growing abundantly in your gardens. (5/18/77)

*ED'S NOTE: we would recommend among these books, the works of Harry Browne. (How I Found Freedom in an Unfree World). Also "How you Can Profit From the Coming Devaluation". Avon paperbacks. Available in bookstores and newstands.
