

"S" Cell Report

Note: The following information on "S" Cell use was sent to CAC by a California group which is researching its uses. This information has not been checked with Awareness and is circulated only as general information.

While all members used D-Cells and charged water in personal and experimental use, about 20 members used the S-Cell to an extent that they were able to provide an observational report on them. This obvious favoritism is probably due to the concept of "white light" associated with the D-Cell, while the S-Cell emanates more of a "use with caution" aura. However, we found the S-Cell to be equally dramatic, if not more so in some instances, in comparison with the D-Cell.

INTERNAL APPLICATIONS: None

AURIC CLEANSING: Nearly all users reported remarkable results with S-Cell water when applied to the skin. In healing, its properties seemed to multiply, cleansing the aura instantly, and vitalizing the skin within minutes of application.

CHAKRA STIMULATION: Not indicated in all cases, but when used in healings with direction, the chakras responded almost immediately, but with deeper levels than when D-Cell water was applied on other occasions. For chakras, the S-Cell is more profound.

BATHING: Because of the volume of water required and charging time with a few cells, bathing in S-Cell water was done only by 2 members. Very profound reactions. While D-Cell water seems to project its energies inward, the S-Cell water seems to draw out the undesirable on and even beneath the skin. A very distinct sensation of losing something was noticed by both users, independently. They both noticed an absence of irritants, and felt 'very, very good'.

POULTICES: Used for poultices by several members, some in combination with herbs. Swelling reduced in very short time in one instance, skin irritation removed in another, stomach ache relieved, false labor cramps relieved, and numerous minor surface ailments relieved. No failures reported in any poultice application.

ATHLETES FOOT: S-Cell water used by one member for this, soaking the feet in the charged water. Reported no noticeable improvement.

SPRAYING: When sprayed in a room to clear it of negative or harmful presence, the S-Cell water cleared the etheric, but did not seem to effect anything or anyone on the astral level. We have no explanation for this.

DOUCHES: S-Cell water was used by all female members conducting the research, and all were agreed upon the beneficial effects of the water. Three of the girls reported that when a charged S-Cell was inserted vaginally, cures resulted, but one case of yeast infection required several days before disappearing.

HERPEA: This skin disease spreads very rapidly over the skin, with swelling, postules, etc. The member so afflicted used both the water and the charged cell and reported that the normal spreading was completely arrested; the postules reduced in size, and tissue replacement in the healing occurred at a very rapid rate.

MISCELLANEOUS: Cells, wet and charged, were taped to various places by members with temporary afflictions, all reported cures. Stomach cramps stopped in 15 minutes, skin infection on face disappeared in two days of intermittent cell application, dandruff eliminated, stiff neck relaxed by taping wet cell to the back of the area, tumor swelling in 20 minutes with taped cell, skin rash (3 cases) relieved by taped cell; when used to wash the face, one member reported that people told him he looked different, beard growth reported by one member, beard reduction reported by another; 5 members noticed improvement in hair texture and vitality, 2 members reported no noticeable change in hair when using cell water as rinse, used the water as rinse for brushing teeth, seemed to think it made the teeth brighter, mouth cleaner.
