Cosmic Awareness Communications
P. O. Box 115, Olympia Washington 98507
(Helping people to become aware)

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the New Age of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious trance levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel, what is the truth. Cosmic Awareness will only indicate and suggest. Neither C.A.C., the Aquarian Church of Universal Service, or the Interpreter, Paul Shockley is responsible for anything Cosmic Awareness may state in any of these readings, nor does C.A.C. or Paul Shockley necessarily believe or agree with the statements of Cosmic Awareness. Paul interprets the energies as he sees them in trance levels and is not personally responsible for what is said. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication.

(Opening Message, C.A.C. General Reading)

COSMIC AWARENESS:

July 28, 1980

Paul Shockley, Interpreter

This Awareness indicates there is a particular point in consciousness which is available to entities at any time or any place under any circumstance, whereby the entity's personal will can be looked at so discerningly that it comes in contact with Universal Will in a state of perfect unity. This Awareness indicates this yoke or yoga or union of individual and Universal Will is that state of perfect harmony which entities seek in their movements as individuals.

This Awareness suggests that you, as an individual having a particular will, a particular desire, a particular purpose, may look so carefully with great attention at your will, at the movement of your energies, at the movement of your purpose, watching the energies which are your conscious will moving in their direction; and in looking at this energy with greater and greater attention, becoming personally detached from the energy as you look with greater attention, watching the movement of this energy with a detachment, you will find the energy collides with the Universal Will and an experience of bliss occurs. This Awareness indicates this experience is available to entities at all times, at all places, under all circumstances wherein the entity can look clearly at his or her personal will from a detached attention that grows ever more attentive and watchful of the movement of will.

(Closing Message)

This Awareness wishes entities in meditation to consider that which is personal will and that which is Universal Will, and as a meditative experiment or action, that you place yourself in a comfortable position--lying, for example, flat upon your bed, and willfully lift your hand, letting it move somewhat as it chooses,--focusing on your will to direct that movement, focusing on your desire as you move that hand slightly, asking yourself, "Why do I move this hand in this particular direction? Why do I desire to move it in *this* direction? Why am I willing to move it this way and not that way?"--examining carefully the movement of your will, until there comes a point whereby you cease to will the movement of your hand and the Universal Will takes control of that hand and moves it for you. This Awareness indicates this be a meditation and experiment which can become symbolic of your own merging with the Universal Will of this Awareness.

(Opening Message, following reading)

THE NATURE OF WILL

COSMIC AWARENESS:

This Awareness indicates that the nature of will as that which does, at this time, need to be looked at carefully. This Awareness indicates that previously, this Awareness indicated that will served as a form of projector which could be used for individual purposes in manifesting for good or ill. This Awareness indicates also, that the universal will for good as that which would bring about harmony within the universe. The universal will for separateness as that which would bring about disharmony.

This Awareness indicates that wherein entities attune themselves to a willful position, separate from others, and seek to maintain that separateness, such entities are assisting in the efforts of that which is the disharmonious will or the will which does not create the good in the universe. This Awareness indicates those who attune themselves with the harmonious will and seek to lend their energies or serve that will for good, such entities assisting in bringing about harmony, reconciling differences, promoting unity,--such entities are in tune with the Universal Will for good, and therefore, serve as agents for harmonious results.

This Awareness indicates wherein entities attune themselves in this manner, the general movement will be toward eventual harmony with all universal forces. Those who attune themselves to willful purposes which are separative in nature, disruptive or disharmonious in principle, those entities who would destroy this or that, or separate and alienate this or that rather than reconciling with the energies,--such entities seeking separateness rather than reconciliation in order to maintain a power which comes with separation, a significance which comes with separation, such entities shall in the long run find themselves being cut off from the universal harmonies and alienated by their own separateness from that which is universal harmony.

This Awareness indicates that the energies or forces of the universe are such that entities can move and can manipulate these energies and forces according to their intentions, according to their will, according to their ability to concentrate or to scatter such energies. This Awareness indicates that those who can concentrate energies do maintain a special kind of force, for good or ill. Those who scatter energies, particularly their own energies, generally create nothing but waste of life energy or vitalities. Those who focus and concentrate their own energies in a manner which disrupts the energies of others are generally known as destructive and disruptive. This Awareness indicates those who focus their energies in a way which is constructive and beneficial for the harmonious universal or common good, those energies focused in this manner, particularly when in co-creative or cooperative efforts with others, these are the powerful forces which can lead to great works and wonder, and which can leave a lasting mark in consciousness for universal harmony.

This Awareness indicates, however, that it is possible for many entities to be cooperative in a constructive action, focusing their energies toward a particular purpose of universal harmony,--it is possible for entities to pour much energy into such creations for the joy of all, only to discover that one entity whose energies are disruptive in nature can destroy everything which has been created by the toil of many.

This Awareness indicates, therefore, in considering will, this Awareness asks that you not concern yourself simply with whether the will is strong or weak, but whether the will is in tune with universal harmony, or whether the will is off-course, toward separative, power-seeking significance at the expense of others and on-course toward some type of destructive purpose. This Awareness indicates that wherein the will is off-course, this is that action which follows the Alien Force. Wherein the will is on-course, toward universal harmony and reconciliation of the principles of unity and peace for all, the will, then, is in tune with the common good. This Awareness indicates when the will is so attuned and surrenders to that universal force, then the entity may become an agent for good. But wherein the will is attuned to separateness and power-seeking purposes, searching for personal significance, wherein this entity surrenders his will to the Force that becomes alien to the common good, that entity becomes an agent for the Alien Force.

This Awareness indicates that, therefore, wherein entities begin experimenting with the surrender of personal will to the Universal Will, it had better be done with an awareness of the difference between the two purposes: that which shall lead to universal harmony, or that which shall lead to the dark path of personal power, significance and the ultimate separation from universal harmony toward chaos. For surely, the separateness, the path of darkness and separation, leads toward that which is the chaos.

ENTITIES WHO DISRUPT (WITH GOOD INTENTIONS?)

(More on the Unified States of Awareness and the Law of One)

QUESTION:

Awareness, how would this apply to entities who disrupt certain things that others are in harmony over; yet they do evidently thinking their intentions are good? I am thinking specifically back during the early beginnings of the *Unified States of Awareness*. There were certain entities who continually disrupted the energies of the U.S. of A. child, yet they evidently were doing this with good intentions (I guess).

This Awareness indicates there are always entities who intentions are not matched by their awareness, whose motives are not accompanied by wisdom, and such entities are like children needing guidance or direction, or in some cases, chastisement, in order to realign or reaffirm or bring about a proper focusing of those intentions and energies. This Awareness indicates that such entities may make mistakes and suffer the consequences for those mistakes.

This Awareness indicates, likewise, entities may wander onto the path of darkness, self-seeking, hungering for power and self-significance, and these entities also may suffer the consequence and may yet be redeemed through eventual recognition that the path is taking them toward separate, alienated experiences away from universal harmony. This Awareness indicates when the entity realizes that the path of self-esteem and power-seeking in violation of others, in violation of the common good, is leading the entity into a path away from harmony, that entity may quickly return toward the path of harmony, or may return very gradually, through a series of shocks designed to change the course of movement back toward universal harmony. This Awareness indicates those whose will is extremely fixed toward the purpose of self-significance and personal power, those entities may move quite far in the path of separateness before they realize the error of their ways and return toward universal harmony. This Awareness indicates however, that in due time, all entities return to universal harmony or move toward total annihilation.

This Awareness indicates likewise, the Lucifer or Rhyee, which separated from unity, moved out and created separateness and power, significance and personal glories, bitterness, hostilities, suspicions, violence, and yet eventually has returned to that which is the realization of the need to be integrated with universal harmony. This Awareness indicates that at any time on any path, wherein an entity experiences the realization for such a need to be included, when any entity experiences that realization of the need to be included, that entity is on the path back toward the universal harmony.

This Awareness indicates, however, wherein the entity seeks to be included among forces which are destructive and moving away from that which would be universal in scope, which would be harmonious in purpose, when entities seek to be included in those forces which are moving toward a destructive path--the path of darkness,--these entities seeking to align themselves with that power which is moving as an Alien Force, these entities cannot find the peace and harmony which they desire, except on a temporal basis, for a time, as the power of the Alien Force moves along its destructive, chaotic path. This Awareness indicates there is no future for the Alien Force or those forces which follow the path of separateness, except further separation and annihilation or the return to that which is harmony and unity in all things.

This Awareness indicates the *Law of One* is a fixed and universal law in which those who understand the *Law of One* realize that *all* is one, and all that appears to be separate will, in the end, be nothing but an illusion to those who followed the path of the separateness which appeared as scattered fragments. This Awareness indicates wherein the universe is one totality and entities recognize that wholly universe, then entities may move into that universal harmony.

This Awareness indicates wherein entities seek to separate themselves into a fragment of that universal force, seek to find personal significance as a fragment of that universal force, such entities will only discover that the fragmentation is the source of their suffering. This Awareness indicates that in the *Law of One*, the entity realizes that the entire universe is alive and that the entity may be one with the universe. This Awareness indicates the entity following the *Law of One* may also recognize that even though it exists in a physical body which appears to be but a fragment of the universe, that physical body is a significant part of that entire mandala known as the universe, and each such fragment is essential to the whole of that mandala known as the universe, and each is as important as the other in completing the totality of that mandala known as the universe. This Awareness indicates, therefore, the fragment is as important a part as any other part of the universe. This Awareness indicates that entity has reconciled the microcosm with the macrocosm, the individual with the universe, the self with the deity.

This Awareness indicates on the other hand, the entity who identifies with the fragment and does not recognize the unity of all things and seeks to have some special significance in the universe by separating from the rest of the fragments of the universe, ceases to see the totality and concentrates on the fragments, the various individuals or forces, and enhances his own fragment, his own fragmented self in an effort to make that fragmented self more significant and powerful than any of the others. This entity is simply turning his or her consciousness away from universal consciousness into self-centeredness; and in so doing, is fragmenting and separating the self from the total harmony, the universal harmony.

This Awareness indicates in such an action, the entity is embarking on the dark path, toward that which is the Alien Force. This Awareness indicates such an action will lead the entity toward greater and greater suffering and fragmentation until the entity experiences the error in the action to such a degree that the entity realizes the error in his or her ways, and turns back toward the source of all joy, that which is unity and harmony with others and with the universal force of harmony.

This Awareness indicates this essentially is the scenario for entities that they may follow with greater understanding of their movement through life. This Awareness indicates it has been told in many stories, in many ways: the story of the prodigal son, who went out and then eventually returned; the story of Lucifer and Rhyee separating from God and eventually returning; the story of the Messiahs, who move out, make miracles, become significant, then suffer and die and resurrect and return to the universal spirit of harmony. This Awareness indicates every story of personal will which moves out in its struggle to achieve significance of power and meets with enough resistance and difficulty that it must surrender to the common decency, common good, the will of God,--every story of this nature is telling the same thing, regardless of who the characters are, how the story is told, or what the circumstances and situation may be.

SANCTIMONIOUS BROADCASTING OF ONE'S 'SPIRITUALITY'

(Self-Significance as a tool of the Alien Force)

QUESTION:

It seems rather often today that those who recite the pseudo-spiritual intonations loudest, claiming to be high, holy, New Age and spiritual, by their *actions* seem to demonstrate the dark path. Is this, in fact, more prevalent for persons studying in esoteric areas than for the common man?

COSMIC AWARENESS:

This Awareness suggests that any action wherein entities seek self-significance and separation from others, particularly when such self-significance and separation violates others, this as on the dark path. This Awareness indicates this may also be under the name of spiritual development or movements, particularly when entities seeking to move on the spiritual path are doing so on the assumption that they are therefore superior to others. The vanity of such movements along the spiritual path as that which is one of the great separations and one of the great pitfalls for entities seeking to move toward universal harmony. This Awareness indicates wherein an entity, assuming to be on the spiritual path, is confronted with personal vanity for that movement, that entity has been entrapped by that vanity, unless the entity recognizes his or her own vanity and moves again back toward the universal harmony, away from self-glory in the spiritual pursuits.

This Awareness indicates that, likewise, there are many other pitfalls which are common for those who would seek universal harmony. This Awareness indicates there are those forces which are following the dark path which herald banners of spiritual terminologies, calling forth to entities, "Follow me. I will show you the way. These are the proper paths to follow. Here are the dictates. Here are the rules. I shall lead you to the promised land. But for you to follow, you must alienate yourself from those who do not follow this path, those who do not follow my teachings." This Awareness indicates such entities are promoting separateness when they ask you to alienate or separate from others. This Awareness indicates such separations create paths that lead away from universal harmonies.

This Awareness indicates in one sense, wherein the question is asked, "What is the center of universal harmony?", and wherein you answer, "The center of universal harmony lies in perfect acceptance of all living beings,"--this Awareness indicates in that sense, you are on course. This Awareness indicates in another sense, wherein you separate yourself from the errors of those who are separating themselves from the universal harmony, this may be a necessity as you move toward that universal harmony. This Awareness asks not that you accept the errors of others who are pulling and seeking you and your energies as they move in separateness from harmonious purposes. This Awareness suggests you not follow those errors, but that you follow that path which leads to universal harmony; and in so following, that you accept all entities, regardless of their misdirection and the error in their ways. This Awareness indicates that there is a difference between accepting the individual and accepting the errors. You may accept the person and disapprove of the error which the person has expressed or committed.

This Awareness indicates the movement toward universal harmonies is that which accepts the divinity of all beings, regardless of the misdirected energies which they have expressed. This Awareness indicates as an agent for good, it becomes necessary for such entities to confront and deal with those misdirected energies, but not to associate the misdirected energies with the divinity of the agent which has misdirected his energies. This Awareness indicates briefly, to summarize: do not confuse the action with the actor, for all actors are divine, although the actions may be in error.

"Who needs a
Peace College?
I am starting
the Little School
of St. Francis".

"Unity through diversity" (More on the Unified States of Awareness)

UNITY THROUGH ORDER OR UNITY THROUGH CHAOS

(Too many chefs and ingredients make for a rancid salad)

QUESTION:

One last question along this line: In a practical, working situation, could Awareness give more specific advice on dealing with one who expresses the need to be included, but strings seem to be attached almost immediately. Perhaps the kind of guidance that was referred to in reference to the *Unified States of Awareness* action?

COSMIC AWARENESS:

This Awareness indicates in such situations wherein an entity wishes to be included in an action wherein the entity is not capable of being included,---for example, a five-year-old wishing to fly the airplane with other pilots who are taking the plane out for a test,---this Awareness indicates there are often situations of this nature wherein an entity is incapable of being in-

cluded because of the ineptitude or lack of responsibility or maturity or training or understanding. This Awareness indicates in such situations, obviously, there must be a certain standard applied for such inclusions; and whereby an entity wishes to be included, you may apply the standard, stating clearly that if you are to be included, you must live up to this particular standard, you must be capable of this type of responsibility.

This Awareness indicates the child who wishes to indulge in adult toys or privileges must first prove himself or herself capable of meeting those responsibilities which accompany the privileges of the adult. And often there are standards applied from long experience, such as by a culture, whereby after much gathering of information, observation, experience, understanding, the entire culture has concluded that the child, as a general rule, is not capable of handling this particular type of responsibility until approximately this or that particular age. Therefore, the culture may place an age limit as one of the standard requirements. This Awareness indicates that although the age limit as a standard requirement is artificial in that the child may not become responsible at the particular moment when the entity reaches that particular age and may, in fact, have become responsible three or four years earlier; still that standard, even though artificial, may remain as fixed and necessary for the general good of the society.

This Awareness indicates that in a smaller group, such as an organization, the standards demanded or necessitated by the situation may vary somewhat, according to the responsibilities involved in the purposes of the organization. This Awareness indicates that wherein standards are set according to the rules of the organization, which again may be artificially created, but may be necessarily created in order to guarantee that the organization can function properly in its responsibilities for its purposes; those rules, then, become guidelines for the behavior of those who wish to be included.

This Awareness indicates that wherein such entities fail to fit in the guidelines or fail to follow the rules, the organization then may arrange, one way or the other, to exclude that entity who wanted to be included, but was incapable of the responsibility of such inclusion. This Awareness indicates, however, that such rules of an organization must be defined in order for entities to understand when, where and how, and if they have broken the rules.

This Awareness indicates in the case of the *Unified States of Awareness*, before the information could have been completely channeled, before the rules were determined, before the organization was formulated, certain entities began quickly attempting to define the organization from their own personal will and desire for self-significance or for purposes of separating entities from the unity of all beings. This Awareness indicates this particularly in terms of racial overtones and in terms of personal significances being promoted, which were not in the proper spirit of the action and which created descriptions of the U.S. of A. which were not, in fact, harmonious to the unity of all things and the *Law of One*.

This Awareness indicates there is a great difference between the action of unifying through order and unifying through chaos. And wherein an entity seeks to include everything in his salad, including all the vegetables of the garden, all the fruit from the trees, all the scraps from the table, and the dirt from the ground, and the various types of meat, flesh, cheeses, milk and eggs and shells, and all the spices available, allowing everything into the salad and calling it "The Great Democratic Salad" wherein everything has its place and voice, and no one controls anything,---this Awareness indicates this *can* be seen as harmonious for those who want that type of salad. This Awareness indicates however, that wherein entities want something wherein there is order, which

defines a different kind of harmony, a type of placid flavor here, a peaceful flavor there, various spices which blend just right in this or that area, wherein entities seek the order to allow the harmony without chaos, then entities cannot allow the various cooks or salad-makers to reach out and grab anything off the shelf and throw it in, but must instead follow the recipe, take their time, and let the recipe unfold in its proper course and allow the dish to develop, according to the recipe which is being followed.

This Awareness indicates in terms of the *Unified States of Awareness* the recipe was started, part of the recipe was given, then the various chefs entered in and began throwing in the various substances: their favorite spices, their favorite vegetables, their favorite words, favorite concepts, favorite ideas, favorite friends, favorite hostilities, favorite insecurities, and their favorite prestige-making comments; and therefore, the salad became rancid and inedible before it was completed. This Awareness indicates therefore, the *Unified States of Awareness* was put in limbo, the recipe being half channeled. This Awareness waits until the proper time, proper entities, proper situation whereby *It* can channel the rest of the recipe for those who will follow the recipe, rather than attempt to put their own brand of spice or title on the salad.

This Awareness indicates *It* has many ways of bringing about the necessary changes upon this plane. The *Unified States of Awareness* could have been one of these ways, but is not necessarily the *only* way. This Awareness indicates, also, the Peace College can perform this action, and if this fails and if all other efforts fail, this Awareness can allow the Alien Force to have its day, so that the entities upon this earth then become aware and realize the error in the path which they follow, and willingly return to the *Law of One*.

WHAT ABOUT THOSE WHO TAKE AWARENESS MATERIAL OUT OF CONTEXT?

QUESTION:

One other question came to mind along this same line. Due to the loose structure that C.A.C. has been using, whereby the Awareness concepts and projects have been printed and put out into consciousness, a by-product has made them available to other people who take them, along with certain lines out of context, and speak about them, write about them, use these to grind their personal axes or fan their personal egos etc. Is there any further comment or advice in this area?

COSMIC AWARENESS:

This Awareness indicates that keeping the material copywrited as that which is appropriate. This Awareness indicates that the action of allowing others to quote from this material is that which assists in spreading an awareness of your organization, although it also allows fragmented understanding of your organization. This Awareness indicates essentially, the purpose of copywriting material is to allow that material to become well-established over a long period of time before being released to the public in fragmented parts or in ways whereby the information is changed in its redistribution.

This Awareness indicates that there may be a time whereby those who wish to quote the readings should be requested to have permission and to arrange the reprinting with your organization, so that these messages are properly quoted and properly redistributed. This Awareness indicates that this may become a necessity, particularly if entities continue to quote these messages along with their personal philosophy and interpretation of the messages.

This Awareness indicates that there are many, many religious organizations, all of different natures, quoting from the Bible, using the scripture to substantiate their own particular brand of religion, yet being in conflict with each other. This Awareness indicates that, likewise, these readings being given can become fragmented into various philosophical organizations, each with its own interpretation. This Awareness indicates however, that it appears to be of little lasting-significance in regards to the messages, whether these are quoted by other groups or whether this is held exclusively by C.A.C. or the Aquarian Church, or both. This Awareness indicates that at this present time, it appears that no great concern or need for further restriction on these messages is apparent.

This Awareness indicates, however, it also appears that there are certain misuses of these materials, of these readings, whereby some entities are using the readings to promote that which is separateness, to substantiate hostilities by distorting the spirit or message which this Awareness has given. This Awareness indicates that this needs to be watched and may need to be tended at some time in the future. This Awareness indicates this, at present, appears not to be of such great concern that it needs immediate attention. This Awareness suggests that this be watched, but that this not, at this time, needing rules of restriction to prevent entities from quoting the readings.

ED's Note:

C.A.C. does copyright its publications and does allow reputable people and publications to reprint much of this material. If they intend to edit the material or take certain parts out of context, they must first send the draft to C.A.C. for approval. Unfortunately, not everyone does this, even though they are breaking the copyright laws. The following are some examples:

Some time before Awareness presented the Unified States of Awareness information, Paul gave a personal reading to Fred Anthony Warren in Detroit. At the end of the personal reading, the energizer (not Warren) asked a specific question which allowed Awareness to present some initial fragments on the U.S. of A. which it intended to bring forth at a later time with different entities. The tape with this information was inadvertently mailed back to Warren (the U.S. of A. material should have been erased as it had nothing to do with the personal reading). Warren, along with his henchman, Jack Katchmar (a notorious bigot who puts out a vicious newsletter attacking Jews and Blacks) seized upon this U.S. of A. information and immediately published their personalized version in a booklet titled 'Cosmic Awareness Speaks' (a copyrighted title blatantly lifted from C.A.C. with no prior notice nor approval). Mixed within some basic information of the Beast Conspiracy, these entities lifted certain Awareness phrases out of context to make it appear that Cosmic Awareness had given them its personal permission and blessing to launch the Unified States of Awareness out of Detroit. (In the process it made Awareness appear that it was agreeing with all the intemperate, racial slurs etc. these entities were publishing). Anthony Warren even had the audacity to put out a newsletter with the title, "Unified States of Awareness Communications". This along with one Katchmar put out under the name of ASTRO, Inc. (a white supremacy hate sheet which depicts a muscular naked white man, presumably Katchmar, holding up a circle in one hand and a caduceus in the other, with the inscription "in God we trust" at the bottom. The penis in the illustration is highly exaggerated. (Similar illustrations abound in the various 'fag' magazines currently on the market). Both these entities, formerly belonging to Clare Prophets Detroit organization (she formally 'excommunicated' them because of the anti-Semitic and anti-Black propaganda they consistently promote,) blatantly lift words and phrases from C.A.C. and personal readings out of context and 'translate' this information into their own ego-promoting, sanctimonious trips which they, in turn, lay upon their readership. They live in a fantasy world believing that Detroit is God's New Age Capitol because of the 'divine work' they are doing. They plead and whine, asking the same question over and over: 'Cosmic Awareness, why does the black, Lucifer-Rothschild forces have billions of dollars and us Light Workers have to live in poverty' etc. (A question from Katchmar on this was asked and Awareness gave its response in No. 79-22 'A Petition to the Inner Planes to Bestow Riches upon Light Workers' (\$2.00 from C.A.C.) The trouble started when Awareness made the mistake of informing these entities in personal readings that Katchmar had a lifestream connection to Yok of Carpathia (an entity Katchmar researched and trumpets to his readers as the 'founder of Yoga' --probably Tantric--and Anthony Warren had a lifestream connection to Francis of Assisi. Armed with this information, Warren immediately fills his newsletters with badly-drawn illustrations of St. Francis with an ultra-sweet smiling, pansy-like photo of a boy about 19, evidently designed to mislead the reader into believing that is what Anthony Warren looks like today (about 40 years later) and commences to tout his own personal versions of what he feels to be the Cosmic Awareness principles. He and Katchmar were instrumental in vampiring off the energies of the U.S. of A. in its early stages with their ego-promoting letters and communications disrupting the energies of the newly-formed Board.

At Yorktown in 1977 Anthony Warren glad-handed, sang and danced his cheery self somehow onto the Board of the new U.S. of A. child (a decision most of the Board lived to regret). Katchmar was not accepted at all, but this did not stop him. He gained access to the U.S. of A. Board meetings evidently by reading the material sent in confidence to Warren. This resulted in months of printed tirades against the U.S. of A. Board members who were trying to energize this concept into consciousness in a manner indicated previously by Awareness. These two entities, promoting various entities from UFO groups who were now also trying to push THEIR versions of the USofA down everyone's throats, so thoroughly disrupted the energies of this new One World Government concept which Awareness had presented as the alternative to the Beast 666 One World Government, that Awareness became so upset it gave three or four complete readings to the USofA Board telling it to get this thing together, get rid of the disruptive elements etc. or the entire USofA concept would be put in Limbo. Although the Board did censure the entities disrupting it, the energies were continually sapped off, and the USofA is now in Limbo, as indicated in the above reading. Katchmar continues to lay the blame on the blacks and the Jews and is now in a campaign that his theory of 'the hole in space' Awareness mentioned depends on removing Tom McQuay from the Capstone position and replacing him with Paul Shockley, whom Awareness had previously indicated could not be in that position. In the meantime, Anthony Warren had decided to replace the entire U.S. of A. concept with his 'unity in diversity' horse manure, opening the entire thing up to all the New Age groups, with an accent on those who took their orders from 'ascended masters' and UFO aliens. Shortly after Awareness presented information on the Peace College, Anthony Warren leaped in his usual manner to gratify his ego and vampire these new energies by informing his readers that he was now establishing as an alternative, "The Little School of St. Francis". For years this editor has been convinced these entities were directed by the Alien Force to infiltrate, disrupt and sabotage the programs and concepts which Cosmic Awareness has given, but until this moment has not expressed these views in print. This is expressed at this time only because these two entities are presently engaged in a further onslaught against the U.S. of A., which although in Limbo is still the best alternative to the Beast 666 One World government which the Rockefeller-Rothschild-Zionists are at this moment trying to bring down upon a sleeping world. (Katchmar, who claims to be a world war II hero, evidently suffered brain damage while defending the Jews against the Nazis, for his communications are incoherent, abusive, insulting to the intelligence of the reader, fraught with 4-letter expletives, intemperate and deranged logic and ramblings that is commonly found in institutions where hydrocephalic idiots and low-grade morons abound, pontificating on their self-importance and delusions of grandeur. No reader could take this man seriously unless possibly the red-neck mentality who gets his jollies from persecuting and bullying minorities). Anthony Warren, on the other hand, should certainly know better. Having been in the Awareness movement for many years, this entity certainly MUST have at least learned to understand the nature of energies and at least a rudimentary knowledge of Magic, and for this reason is held accountable by this editor as the prime mischief-maker and saboteur of the various Awareness concepts which he, and his cohort Jack Katchmar, have successfully placed into a state of limbo. Anthony, who attends Roman Catholic masses 3 or 4 times weekly (he informs us) may believe he is making peace with himself as he prays to those plastic and plaster replicas of St. Francis and other idols designed for such purposes, but he is only fooling himself if he thinks his current activities are making peace with those entities who take the concepts of Cosmic Awareness seriously. (And this editor is one who does). You can sue me, little boys, but you did ask for it.

C.A.C. and this editor have been the unfortunate recipients of Jack Katchmar's and Anthony Warren's publications for almost ten years now. We have never subscribed, yet this printed imbecility just keeps arriving in the mail, each successive issue more outrageous and incoherent than the last issue. We heartily suggest that if any C.A.C. member is unfortunate enough to get on these entities mailing lists, to simply file the letter in File No. 13 (the wastebasket) without opening. It won't do you any good to write to them and ask them to take you off the mailing list--we have tried this!

(Avaton)

QUESTION:

We've had a number of questions sent in about the Electronic Electromagnetic Pulse, called EMP, information on which is being leaked out from several sources. This question from P.M. of Riverside, Cal., asks: "The June 1st edition of the Spotlight newspaper said that Russia has a weapon, EMP, that would literally burn out all electronic equipment that uses solid-state circuitry if it happens to be plugged into conventional power sources. If this is so, did the Soviets get this information from the UFO intelligences. Anyway, it seems to me that we, or the leaders of this country are the 'bad guys', and up until recent times, the Soviets are the 'good guys'. What a crazy time we live in!"

And one other piece of information on the EMP: "A sleeping dragon" says Science News magazine, "a nuclear bomb detonates 250 miles above Omaha. A type of fallout most people have never heard of bathes the entire nation, and within a fraction of a second, people coast-to-coast find themselves without power, without telecommunications, without computers, in a word 'vulnerable'. This is opposite to the Neutron Bomb. EMP cripples or kills electronic equipment, but leaves humans standing, very much alive and vulnerable. This would probably precede any attack on the United States. We are helpless!" Would Awareness comment?

COSMIC AWARENESS:

This Awareness indicates that this information is valid; that the Russians are having made dramatic advances in terms of those areas of science and physics which deal with psychic, magnetic and electronic energies. This Awareness indicates that these entities also advanced in terms of anti-gravity concepts and are approximately 25 years ahead of the United States in its developments. This Awareness indicates that in recent times it has been stated that the Russians were 20 years ahead in such developments. This Awareness indicates that in the past year certain breakthroughs have changed this so that they may be considered 25 years ahead in spite of the stepped-up efforts of those in the United States to catch up. This Awareness indicates this is the result of the efforts by those within this nation to supply information and technology to the Soviet Union when the Soviet Union was controlled by the Bolsheviks, and those within the United States were working hand-in-hand with these entities. This Awareness indicates this in particular the Rockefeller Foundation, or Rockefeller empire, and working together with the Rothschilds who were behind the Bolshevik powers in Russia.

This Awareness indicates that now the Russians have taken back the control of Russia in such a manner as to expel the Bolsheviks; and the present Skoptsis rulers of Russia now have the advanced technology and science which was to have belonged to the Bolshevik powers of Russia, while the Bolshevik powers of Russia are now back in the U.S.A. and in Europe attempting to catch up these countries with the technology which had been given away to the Russian nation. This Awareness indicates that this is, in part, the reason why Russia has advanced so greatly: also the fact that Russia was open to sharing information between scientists regarding such information as available through Tesla and other inventors which were in the West, ignored or suppressed. This Awareness indicates that the works of Wilhelm Reich also are being studied in Russia. This Awareness indicates that also there are certain extra-terrestrial energies which are assisting the Skoptsis of Russia in their present technologies.

This Awareness indicates that the Russians fly their spacecraft to Titan, and other stations in this solar system on a regular basis, having contact with other extra-terrestrial beings. This Awareness indicates that this being flown by Robotoids and certain computers with occasional human passengers on the voyage.

QUESTION:

Then from this piece of information, can one assume that the country of Russia has been accepted into the Galactic Space Command, whereby the rest of the earth is not yet ready for this acceptance due to its warlike propensities?

COSMIC AWARENESS:

This Awareness indicates that this acceptance is in a state of continued negotiation between the Skoptsis and the Intergalactic Command, whereas the Western World being controlled largely from interests of the Rockefeller and Rothschild forces, is not yet open to negotiation of a serious nature with these entities of the Intergalactic Space Command. This Awareness indicates however, situations are being created, circumstances are crystallizing whereby these forces will be brought to a condition where negotiations will be the most beneficial choice available to them.

QUESTION:

With this 25 year technological advance that Russia now holds over the United States, it would appear then that with this advantage there is no reason for them to get too excited about the current Reagan program, a crash program within the next 5 to 6 years to try to rearm the United States and put it on a war-footing production.

COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that the 25 year advantage is that which is also having a greater potential for mushrooming at an accelerated rate. This Awareness indicates that it has long been recognized that knowledge increases the opportunity for greater knowledge at an acceleration of acceleration. This Awareness indicates that wherein it would take the United States approximately 25 years to reach the evolved level of that which is now the Russian technology, the Russian technology by that time could be as much as 100 years advanced unless the United States received some kind of information or help from the increased technology of the Russians. This Awareness indicates that in terms of this 25 year lead: if the United States can, through its scientists and diplomatic sources, or through spies or other forms of communication, find some kind of opening whereby information is passed from Russia to the United States, and is unhindered, then the gap could be closed much more quickly. This Awareness indicates however, this would be recognized as it occurred and could create greater tension so that the Russians would be less inclined to be patient and might be more demanding of the United States.

This Awareness indicates that the advantage the Russians hold in terms of technology is not necessarily reflected in their understanding of sociological concerns. This Awareness indicates these entities are not as advanced in sociological concepts as are the entities of the Western World. Therefore, these entities often make blunders in the use of power, in the use of propaganda, or in the use of government. This Awareness indicates however, these entities are learning very quickly in terms of sociological programs and diplomatic methods so that they do not compound blunders or repeat mistakes without learning from them.

This Awareness indicates that the greater advantage available to the Russians is the clarity of their organizational system, communication, and motives. The advantage in the Western World is their massive experience from hundreds of years of data-collecting, methods and systems for handling different situations of diplomatic or political or military nature; and the disadvantages in the Western system is the lack of clear communication between various departments, branches or countries which are essentially intended to work together. This Awareness indicates there is much competition in the West between scientists, between agencies, between agents, between branches, between countries. This concept of competition is that which characterizes the Western World more than that of Russia. The Russians emphasize the concept of cooperation and teamwork.

CONCERNING THE "HOLE IN SPACE"
AND POWER PLAYS WITHIN THE U.S. of A.

Jack, 'ol buddy,
I'm obsessed over
that hole in space
Awareness talks about.
I think you should be
the Capstone of the
USofA, not McQuay.
Unless, of course, you
can think of someone
else who could do the
job better.

ED's Note: The reading up to this point was given in July, 1980. The following question was asked in June, 1981, after the two entities, Jack Katchmar and Anthony Warren had renewed their campaign to further disrupt the energies of the U.S. of A. with a series of 'newsletters' and phony petitions to remove Tom McQuay from the Capstone or OM position of the U.S. of A.

This is a loaded question sent in by Anthony Warren, along with about 20 others (not asked), including an imbecilic dream Anthony had about making bread which he wanted Cosmic Awareness to interpret.

Anthony, dearie, that hole in space may be closer than you imagine. I'm much too modest; I think you should be the Capstone. By the way, did you see that note from Avaton? He thinks the hole is here in Detroit and that there's a lot of hot, foul air blowing out of it. Can you imagine that?

QUESTION:

Anthony Warren has a question: "Awareness, what specifically is the 'hole in space' through which You came in 1969, to plant the circle of unity in the mummy of Paul Shockley, which evolved into the *Unified States of Awareness* in 1977?"

COSMIC AWARENESS:

This Awareness indicates that the 'hole in space' concept essentially as a 'concept', whereby energies may flow through. This Awareness indicates this not necessarily in reference to the entity Paul Shockley, or his 'mummy'. This Awareness indicates that this 'hole in space' was in reference to the opening of consciousness or opening of awareness levels within entities who were present at the time, and who were informed of the experience later. The hole in space essentially is the hole in an individual's awareness, or in the awareness of the mass mind, whereby entities can become aware of the need for a new concept of government, which serves the people, rather than that which has control over people. This Awareness indicates that the *Unified States of Awareness* was intended to exemplify and create new ways of thinking in regard to government.

This Awareness indicates the 'hole in space' essentially as an allegory, or metaphor; but also may be seen as an opening into levels of awareness. This Awareness indicates that wherein entities allow that hole to have its expression, then this energy continues to develop and grow. This

Awareness indicates that wherein entities *insist* that the 'hole in space' has to be centered in the entity Paul Shockley, and is not allowed through any other, then this is a *stifling* action, which prevents this Awareness from moving through other sources. (This Awareness indicates in fact it does *not* prevent this Awareness, but rather, would *attempt* to prevent such movement).

This Awareness indicates that this question is in reference, designed particularly to focus on the efforts of Jack Katchmar to have the entity Paul Shockley move into the position held by Tom McQuay as the OM position of the *Unified States of Awareness*. This Awareness indicates that *It* is not at this time, nor does *It* intend in the immediate future, to have this change occur. This Awareness indicates that wherein entities can simply 'back-off' long enough to allow this Awareness through *Its* various openings, to have the space to bring about the proper conditions, in terms of environment, in terms of consciousness growth, and in terms of concepts which need development; when these can be brought about according to the proper timing, then the *Unified States of Awareness* can continue.

This Awareness has great amounts of time, and can outwait anyone else upon this plane; and the impatience of certain entities to see this action started according to their interpretation and plans, and according to their directions, is simply hindering the movement: and this Awareness can wait until these entities have left this plane, if necessary, and can work through other entities in other lifetimes to come.

ED'S Note: Tom McQuay was appointed the OM or Capstone position on the Unified States of Awareness pyramid at the York Convention in 1977. He came with good credentials (Awareness informed everyone at York that Tom had previously been the entity Thomas Jefferson), and no better person could possibly qualify for this new Constitution and New Age government which Awareness was presenting as the alternative to the Beast 666 One World Government the Illuminati was in the process of creating on this plane, which would result in the enslavement of all humanity. The jealousy this created among certain entities and the venom with which they launched their attack against this entity in their attempts to persuade the U.S. of A. Board to replace him, along with their efforts to force certain heads of UFO organizations down the Board's throats, is the main reason this editor believes the Alien Force has been using these two entities, in particular, to sabotage, frustrate, delay and possibly prevent the entire USofA concept from ever coming into being.

For more information on the U.S. of A., please refer to the "Akashic Record" (\$4.00 from C.A.C.); Also the booklet, "A Magic Happening at Yorktown", \$3.00; "Yorktown, Pa. Nov. 1977"; \$3.00, also related USofA readings, (See Back Issues Catalogs).

REPERCUSSIONS FROM THE BOMBING OF IRAQ'S NUCLEAR REACTOR

(A scenario of possible things to come... "a growing tendency toward fascism in the U.S.")

QUESTION:

Recently Israel, with American-made planes, bombed a nuclear reactor in Iraq. Could Awareness give us a possible scenario, or repercussions that might come from this event?

COSMIC AWARENESS:

This Awareness indicates that this action as the beginning of the surfacing of a conflict which has been somewhat hidden, particularly in the foreign-policy approaches of the United States. This Awareness indicates that this action being that which affects both Iraq and Israel, but also reflects into the political affairs of the United States. This Awareness indicates that it should first be understood that a state of war exists between Israel and Iraq--this having been established sometime back. Although that state of war has been inactive, officially these two nations are at war with each other. This Awareness indicates that therefore, to state that the bombing of this plant was an act of war is somewhat redundant. This Awareness indicates that it is, however, a violation to this country, and although both sides have their own policy in regard to the situation, (one claiming the aggression was an act of defense; the other claiming it to be an aggressive attack, without precedence or need), the situation being such that it became a spark to ignite greater attention as well as tension in the Middle East.

This Awareness indicates that the reflection which this action has upon the policies of the United States is that which relates unto the present Administration as well as to the Bolsheviks who are presently within the United States seeking to regain certain powers which have been lost in the political structure in the United States. This Awareness indicates that it will be remembered that the large oil companies were reported by Dr. Beter in his earlier tapes, to have assisted in the financing of Iraq in its invasion of Iran. This Awareness indicates also, it will be remembered that the information also stated that the Iranians were being highly influenced by the Bolsheviks. This Awareness indicates that entities may also recall the Dr. Beter tapes stating that the major oil companies of the Rockefeller empire as having been involved in supporting Ronald Reagan in his election against ex-President Carter; whereas the Bolsheviks were those who were backing the ex-President. This Awareness indicates that entities may now recognize the connection whereby the Bolsheviks, -- in association with the counter-parts of the Zionists, and in association with Israel and Iran,--are in fact experiencing a certain kind of competition with those who have now taken much of the control of the Rockefeller oil company empire, and the oil companies who are in fact assisting, or who have assisted in backing Iraq.

This Awareness indicates that from another sense: the Bolsheviks, Zionists and Israelis all being tied in with the Rothschild empire, are experiencing a conflict with the remnants of the Rockefeller empire, which is also linked with the Iraqians. This Awareness indicates that the present Administration, in particular Ronald Reagan with his staff, as being highly influenced by this oil cartel and the Rockefeller powers. This Awareness reminds entities also of David Rockefeller's recent visits to the Middle East and certain agreements and arrangements which he made with the Arab nations. This Awareness indicates that this conflict, surfacing dramatically for the first time in this nation of the United States, whereby the Administration breaks precedence and reflects favoritism toward a *non-Zionist*, toward a non-"Jewish" nation, is that which can begin a new polarization within this United States that can focus on the insidious or hidden prejudices which exist within this country that have not surfaced within the controlled press. This Awareness indicates that essentially, there is a tendency toward fascism which is counter to the Israeli/Zionist/Bolshevik movement, and this tendency toward fascism is growing stronger and may lead to further polarity during the coming months. This Awareness indicates also however, it likewise creates a greater danger for the present leaders of this nation, in particular the entity Ronald Reagan.

HEPATITIS PLANNED FOR PRESIDENT REAGAN

This Awareness indicates that along this same line, there is a danger to this entity which is already known in certain secret circles, relating to his previous wounds from the attempted assassination; for this entity as having been given such large amounts of blood transfusion that there is a *strong* possibility, bordering on a probability, that the entity will, in a few months, contract hepatitis, which could be extremely dangerous to the entity's health. This Awareness indicates that there are *many* within certain inner circles who are aware of this probability, and who are waiting to see whether this occurs.

This Awareness indicates there also are those who within the Bolshevik arena, are hoping to see some way to remove this entity Ronald Reagan from the position of power which he holds. This Awareness indicates that these two factions,--having strong power in the Western World, within Europe and the United States, through the oil cartels of the West, and the banking establishments, and through the Rothschild establishments, the Zionists and Bolsheviks and the Israeli forces,--these are creating a kind of inner conflict within the Western World. This Awareness indicates that likewise, the secret government agencies are similarly being influenced by these forces.

This Awareness indicates that the mossad of Israel as having much influence on the FBI and in some areas infiltrating; whereas the CIA is avoiding such influence and is working more closely with the Rockefeller empire and the oil powers. This Awareness indicates that meanwhile, apart from these two major factions of the Western World, there are also those factions of Russia,--the Skoptsis and the KGB secret agencies; the Skoptsis having control of the greater military and technological power; the KGB as having influenced and moved into many areas of the Western World, so that a very well-established spy system and information-gathering network is available to the Skoptsis.

This Awareness indicates that apart from these three major powers, there are also other powers of less significance which are likewise having some powerful influences upon the face of the news. This Awareness indicates that the nations of the Middle East, particularly Iran, Iraq, Saudi Arabia, Libya, Syria, Lebanon,--these are beginning to create their own political and foreign policy systems whereby in some instances, such as with Saudi Arabia, the use of money as that which is being the major weapon of this nation to gain greater and greater power and control,--this through buying up much property in the United States and in other countries. This Awareness indicates that in some of the other Middle East countries, the continued and secret build-up of military hardware, and even efforts to build nuclear weapons and rockets; this is being stepped-up by some of these nations.

SECRET ROTHSCHILD TERRORIST GROUP BEHIND ATLANTA MURDERS

This Awareness indicates that there are also certain forces of an ultra-secret terrorist organization being linked beneath that structure of the.... This Awareness indicates there appear to be several such organizations. This Awareness indicates that the major terrorist organization as that which is linked under the structure which flows upward to the Zionist/Rothschild organization. Deep down in this structure is this terrorist organization whereby entities from many different countries under different programs have been trained in ways to create fear among the masses, and havoc among certain nations and cultures, to assist in polarizing one group against another.

This Awareness indicates that many of the social and political assassinations in this United States and in other Western World nations is in fact coming from this terrorist group. This Awareness indicates that some of the killings in the Atlanta area as related to certain Iranian influences in this nation, attempting to create greater division between the Whites and Blacks of this nation; this as part of a larger plan which is brewing under the Rothschild framework.

This Awareness indicates that in terms of the future implications of all of this; this Awareness has indicated in 1968, in a reading for the president of Lewis and Clark College, that unless Israel changed its ways, it would in fact cease to exist upon this plane. This Awareness indicates that as of present time, Israel has *not* changed its ways. This Awareness indicates however, that there is still opportunity for much to occur. This Awareness indicates that this message not intended as a censorship of individuals, but rather as information relating to the Bolshevik policies and manipulators which are using and manipulating the Jewish people for purposes other than that which is beneficial to themselves as people, or to others of the human race.

This Awareness indicates that likewise, there are other forces which are not any better (in terms of a moral evaluation) than these Zionist/Bolshevik forces (or the Rothschild forces), in that they also are feeding on the energies of lust, greed and power at the expense of others. This Awareness indicates that these forces also must change their ways if they wish to continue existing as a people or culture upon this plane: for those who cannot adapt to the *Law of One*, the *Law of Love*, the *Law of Unity*, the *Law of Mercy*,--these and other Cosmic Laws which are being brought to bear upon this planet,--those who cannot adjust to these Laws will be *broken* by these Laws.*

This Awareness indicates this time and up through 1982, and to 1986; these are very crucial, dangerous and volatile times. And *if* by chance the human race passes through this period without major and devastating wars of great holocaust as has never been seen; and *if* the human race passes through these times without great collapse of cultures, civilizations, without social upheavals that rip apart entire nations; and *if* the human race passes through these times without economic collapse and famine as has never been experienced; and *if* the human race passes through these times without loss of the present freedoms, and the increases of dictatorial controls on a global level; then indeed the human race can consider itself fortunate and living under the *Law of Grace*.

*Please refer to the "Cosmic Laws of Cosmic Awareness"(\$3.00 from C.A.C.) for a full explanation of these Laws.

Dr. Beter tapes are available from: Dr. Beter Audio Letter, Suite 5092, 1629 K St. NW, Washington, D.C. 20006. Write for free information and 'catch-up' bargain on previously-issued Audio News Letters.

"THE GREAT MONEY PANIC--HOW TO SURVIVE IT"

(You read it first 3 years ago in "The Gathering Storm")

(From a C.A.C. General Reading)
June 18, 1981

QUESTION:

A.P., one of the SPIRAL eyes, sent in a flyer she received for a book called "The Great Money Panic, How to Survive It," by Martin D. Weiss. I'd like to read a little of this to Awareness and ask if it sees what the author sees as being quite as dire as he makes it. He says:

"Will your future be impacted by any of the following crises? In the next 24 months, you will live through a crisis unlike any other crisis in human history. General Motors will go bankrupt. AT&T, Sears Roebuck, Bank of America, Chase Manhattan, Citibank and many others will close down. Before the end of 1982 President Ronald Reagan will be forced to declare a national emergency closing down the New York Stock Exchange and nearly every factory, office, bank, school or local government in the U.S. But there will be no strikes, riots, revolution or bloodshed to speak of. The crisis ahead will be entirely different from any crisis recorded in human history. You may have to decide your own fate for the rest of your life within the next six months. If you follow the advice in many crisis books, you could be wiped out of house and home. If you make the right decisions, you will survive and prosper.

Author Martin D. Weiss says we've been through credit crunches, recessions, money squeezes, and the Great Depression, but he wonders how many people are really ready for what he terms The Great Money Panic. The Panic he sees just ahead of us. The panic will derive from the illiquidity of a surprising number of corporate giants, Weiss claims. He states, whereas General Motors had managed to turn a profit in the depths of the Great Depression of the 1920s, in 1980--still not far from the peak of the greatest boom ever--it announced record losses. But Weiss isn't only picking on GM. His seering inspection is zeroed in on other giants such as: AT&T, Ford Motor, CBS, RCA, Atlantic Richfield, Coca-Cola, Mobile Oil, Republic Steel, R.J. Reynolds, etc., each one a household word. Weiss believes the Great Money Panic is not just another recession--it is far worse: a boomerang reaction to decades of accelerated expansion, a sudden contraction in consumption, production and distribution; and, most important, an explosive demand for the unavailable cash. According to Weiss, the Great Money Panic will be worse than the Great Depression. Weiss takes some pains to describe the fatal weakness of America's large corporations and financial institutions. He analyzes the 'real' price of gold and the hidden dangers in bonds and certificates of deposit, but most fascinating of all, the author has written a fictional scenario of a total financial collapse as it may unfold in the coming months."

Would Awareness comment on this book, "The Great Money Panic, and How to Survive It"?

*ED's Note: (this book available from the Atlantic Institute, Atcom Bldg., 2315 Broadway, N.Y., N.Y. 10024. Price: \$16.95)

COSMIC AWARENESS:

This Awareness indicates that this book as that which is based upon the intentions and efforts which were begun previously by those forces of the Rothschild empire. This Awareness indicates that these forces as having certain controls over many different corporations, and that these economic manipulations as that which would have such effects as described in this book if the activities intended could move as planned. This Awareness indicates however, there have been certain alterations in the movement of energies since this book was written. This Awareness indicates that the book as that which reflects previous information given by this Awareness in relation to the beginning of an economic crash which was to have begun in October of 1979. This Awareness indicates that although these energies *did* begin and the crash occurred on certain levels, the intensity which was planned has not yet been felt. This Awareness indicates that the present intentions are to make these intensities felt within the next two years.

This Awareness indicates however, there are other forces also at work which are reacting to the effects of the Skoptsis in the Soviet Union, whereby in order to counter these entities, these forces recognize the necessity to build up armaments and strength; and there is a conflict between these forces at this time as to whether it would be more beneficial to create an economic crisis in order to take over the people through this crisis, or whether it is more profitable for their interest to build-up the economies and create a war economy, industrializing for war machines in order to counter the effects of the Skoptsis influence. This conflict is that which is creating much confusion with the elements and tentacles of the Beast, and has not yet been resolved in terms of the direction which should be taken.

This Awareness indicates that it appears the present leader of the United States may not serve out his term. This Awareness indicates that this in part related to health problems which result from the previous assassination attempt and which may surface within the next few months. This Awareness indicates that this also in part from efforts by conspirators in the higher echelons of government who are seeking to gain greater control over these elements of the government in order to have the ability and power to run things according to their own desires.

This Awareness indicates that whatever occurs,--whether the present Administration can counter these forces, or will succumb to the forces--will have much to do with what occurs in the future economy. This Awareness indicates that it appears the present Administration as pushing for greater control militarily, while creating a condition which can lead to greater economic problems in the future; while those forces which would take over from this Administration would appear to seek to have greater control over the masses, and *then* create the crisis levels from which to deal with the Skoptsis and other international concerns. This Awareness indicates that either of these parties do not appear to be working for the good of the masses. This Awareness indicates however, there are higher forces at work which can use those elements or tentacles of the Beast against its own interest.

This Awareness indicates that there will be more information available regarding the future situations which will be moving rapidly to a head within the next two years. This Awareness indicates that at present, the clear direction of these energies is still not determined by the present forces on this particular frame of reference.

"Gerald is training for World War IV"

ED'S Note: For more information on the scenario, please refer to 'Revelations of Awareness' No. 79-1 (The Gathering Storm), \$4.00. For more on the economy, please refer to No. 80-16 (The Crash of 1979), \$3.00 from C.A.C.
