dioxide. But if the Soviets can manage to take it a step or two up the evolutionary ladder, there's no telling what it might do."

A spokesman for the Soviet embassy in Paris would neither confirm nor deny Genestar's report on their gene-splicing experiments."

End of article. Would Awareness comment on that story, please?

COSMIC AWARENESS:

This Awareness indicates that this is accurate. This Awareness indicates that in the United States, several years ago, the genetic engineering experiment of a similar nature took the cells of a woman and mixed this with the cells of a tomato, and created a creature of a blend between that of a woman and that of a tomato. This Awareness indicates that there are other experiments of a similar nature being conducted secretly in laboratories on both sides of the ocean, in both countries, and in other nations also.

This Awareness indicates that if things continue as they are, eventually some of these creatures will be developed and released for purposes of vile nature, such as to serve in capacities unfit for humans, as slave-like beings, or to serve as food in which entities are eating cells of humans with their vegetables. This Awareness indicates that the field of genetic engineering is open to any kind of perversion imaginable, and ethics in regard to this is not being given much concern by these scientists. The greater concern is to keep this information from the people for fear that entities might become outraged.

This Awareness indicates that eventually the information will leak out more and more on many of these experiments. This Awareness has already given information in regard to the duplication of human bodies without experiencing the process of human birth; that this in reference to the robotoids and synthetics; this through the use of genetics and reversal of polarities for growing cells, using the genes of an individual to create a body, a clone, more or less of the individual. This has been practiced for a number of years.*

This Awareness indicates that there are also many beneficial and worthwhile uses for genetic engineering experiments. That the hazard in terms of any new field of science, is that there are so many entities who are willing to do things without scruples, without any sense of ethics, without any spiritual value to guide and direct and limit their action. As long as there is no conscience as to what is right or wrong, as long as there is no concern about what is proper and improper, entities will experiment with total disrespect for propriety, ethics, or morality, just to find out if there is something that could be patented, sold, marketed or useful toward gaining power, money, or prestige.

WHAT ARE THE KARMIC REPERCUSSIONS OF THIS TYPE OF GENETIC ENGINEERING?

(FOLLOW-UP QUESTION):

From a cosmic viewpoint, what are the karmic repercussions, if any, of genetic engineering of this nature, such as creating a cabbage man, a tomato lady, and other things like that?

COSMIC AWARENESS:

This Awareness indicates that the karmic effect as that which is not imposed on the perpetrator, but which will come from *within* the perpetrator; an entity cannot behave in a certain manner, violating others, or violating spiritual principles without eventually coming face to face with oneself, and when that occurs, the entity will go through great suffering and remorse. Although this may not occur during this lifetime, it may occur after the passing over, in which case the entity will be compelled by his own judgment of self to make amends in one way or another, or to suffer an equally painful experience in order to punish himself.

This Awareness indicates that many entities involved in this kind of action have hardened part of their psyche, the emotions and feelings, and extremely cerebral. This being a kind of sadistic approach, in which they do not have any compassion, but have only the intellectual interest in the experiment itself. This Awareness indicates that such entities will eventually meet that which comes around, for what goes around, comes around, and the entity will eventually come face to face with his own karma; that entities choose the karma necessary to balance out the error they have done. It is not that spiritual forces punish them or cause them harm. It is more that *they* determine their own karma.

This Awareness indicates that this is determined from states of truth, not simply from some thought level which allows them to choose to pay karma in an action that favors themselves and helps them to cheat on the payment. There are times when every entity must come face to face with that absolute truth in regards to self, and it is at that time the karmic repayment is set for the entity's future experiences. This is generally at the moment of death, but can come about prior to that moment.

This Awareness indicates there are also plans for the use of this kind of genetic engineering, in which the military has considered using these plant men to fight battles. This being a thing where if they can find the right combination to create beings who can walk, and who can function, but who are essentially

plants, at least in part, and who can alter and regrow limbs or leaves or body; these would be ideal soldiers. They would have less intelligence, less free will, and if an arm were blown off, they could regrow the arm in a short time.

Atlantis Revisited

This Awareness indicates that these are some of the plans of future use of this type of engineering, genetic engineering research. There are many other plans for potential use of this. There are also plans to use genetic engineering for growing new forms of food, combining plant and animal tissue. This Awareness indicates that there are also potentials for mixing human and animal cells. This Awareness reminds you of the Edgar Cayce readings in regard to those experiments in Atlantis, in which those things which were known as things, were created; these being half animal and half human, and this was the downfall of Atlantis; following their experiments into this kind of genetics, this led to the eventual destruction of Atlantis.

New Laws Needed to Control Genetic Engineering

This Awareness indicates that this is not so far away, if these entities are not in some way curtailed in their genetic experiments. This Awareness indicates there needs to be some kind of standarization in the form of an ethically acceptable genetic engineering code, so that these projects which do not fit within the standard are outlawed.

THE TIME HAS COME FOR NEW RULES, NEW LAWS, NEW ETHICS FOR THOSE INVOLVED IN GENETIC ENGINEERING

(Closing Message)

This Awareness indicates that entities in this latter half of the 20th Century are living at a time in which there is an almost unbelievable change in the apparent laws of physics on the earth; that up until this latter half of the century, and to a lesser degree the first half, life went on from generation to generation, from century to century, with very little change. The behavior of nations and tribes may have been warlike and dogma may have been such as to continue a pattern. Violence and sickness may have existed from generation to generation, from century to century, but all of these things were very similar. All of the problems experienced were similar from century to century. Only the costumes and the names and the philosophies changed from century to century. Art would change, slightly, ever so subtly. Weapons would change somewhat, but in this last century, the change has been enormous. The leap from the previous century into the cutting edge of technology today is such that if seen separately by an entity who was not part of the action, it would appear to the entity that he was looking at two different planets entirely.

This Awareness indicates that you are entering into what would be, what would a hundred years ago, seem like a planet from a science fiction book. This Awareness indicates it will move even faster. The acceleration of these discoveries and of these actions, of the technology growth may be likened unto an ever-expanding mushroom cloud in the field of knowledge; knowledge increasing so fast as to be squaring itself moment by moment. This Awareness indicates that in such movement, the ability to judge right and wrong must not be left in the shuffle. The ability to keep a semblance of compassion for living things must not be thrown away.

Right and Wrong According to Awareness

This Awareness indicates when *It* speaks of right and wrong, *It* does not mean right in terms of solving a problem, or wrong in terms of missing out on the genetic or mathematical problem. *It* is speaking in terms of right as that which harms no one else, and wrong as that which harms others. This Awareness indicates that the action which is right is the action which, from a universal sense, allows the best, allows the highest and the best, for all involved.

This Awareness indicates that when any are victimized by an action, it is not right. When any are harmed by an action, it is not right. The right action is the one where all benefit, according to what they deserve. This Awareness indicates that not everyone deserves equal treatment, for some may contribute more or less, but what is truly deserved is that which is right. This Awareness indicates that in some cases, an entity deserves a lesson from an experience. Another entity deserves a reward from the same experience, depending on what each *has* done.

This Awareness indicates that an ethical approach in which entities become more concerned about the properness, the appropriateness of actions becomes a much more important factor than it has in recent generations, because, without that ethical approach, there are no laws, there are no rules to govern this future time, especially in regard to these new technologies. An entirely new set of laws needs to be developed, based on concepts of right and wrong. This Awareness indicates that in the past, the laws created in the time of the New Testament, in the time of Rome, in the time of Greece, could be examined and applied to current situations.

This Awareness indicates that these laws could develop gradually and be applied easily to different situations so that justice would be easily recognized, but when you begin mixing human and plant, when

you begin having surrogate mothers, when you begin having all of these weapons of war that can kill, such as through machines that simply send out a vibration to an unseen enemy somewhere else on earth, tuned to his or her frequency so that you do not touch the entity; these weapons, such as radionics and psionics weapons, all of these things demand new laws, new rules, new ways of control, new ethics. These ethics must be based on some kind of standard that all recognize to be fair and just.

This Awareness suggests the Interpreter be brought from trance.

"REVELATIONS OF AWARENESS"--the Cosmic Newsletter, is still going strong after more than 10 years without interruption, over 300 published issues, many of which are still available for purchase. The Cosmic Awareness movement is alive and well. The Cosmic Awareness Development Classes are now being given in many parts of the U.S. and in Canada. The philosophy given by Awareness and published by C.A.C. is the philosophy on which the New Age is being built. Now is the time to renew your dedication as a minister of Awareness. The time has come when all our energies must again unify and tune into those increased vibrations for the great work which lies immediately ahead.

COMING IN FUTURE ISSUES:(1) What you need to know about irradiation of foods now being sold in the markets.(2) The dangers of drinking the new 'ultra' pasteurized milk. (3) Masters & Johnsons controversial new book: *"CRISIS: Heterosexual Behavior in the Age of AIDS".* (4) The crisis in our environment and what to do about it. Our forests and oceans are dying, the ozone layer is being destroyed. There is little time left to save our planet, but it can be done if enough entities take action now.
