made a prediction for this day for equally sinister events, although she is so paranoid about nuclear war occurring she is building an entire underground city out there in the Big Sky country of Montana. In my opinion, when psychics who have done a pretty good job channeling philosophy, which both she and JZ Knight have done in the past, and then begin making dire predictions that get many entities all shook up, then these channels somehow have allowed dark forces to use them. I do hope that more members, particularly the new ones, will examine carefully the basic premise they are accepting when they rush in these questions about disasters that some channels are putting out. I have been in this business of keeping an eye on various channels for about 25 years now and I can number the fingers on one hand of those channels I can take even remotely serious. As for the so-called 'ascended master,' and more recently the 'space brothers', who seem to be channeling through just about everybody these days, these are probably the worst of these dire forecasters, and one should dismiss their 'channelings' as pure, unadulterated horse manure in 90% of the cases. Awareness tactfully refers to some of it as 'spiritual marshmallows,' but 'meadow muffins' would be more appropriate in my opinion.

Great truths do not require flowers; great truths are presented simply and directly and are understandable to the masses. Remember these facts and use them as a guide-line when assessing channeled communications in particular. The 'Lord's Prayer contains 56 words. Lincoln's Gettysburg Address has 268 words. The Declaration of Independence is 1,322 words long. Federal regulations governing the sale of cabbages are 26,911 words long.

WHY ARE THE POTATO CROPS DYING?

(MORE ON THE OZONE LAYER)

Q:

A question from S.G., Moses Lake, Washington. She writes: "We raise russet potatoes here in the basin. Would you please ask Awareness why they are dying out so early? And is there anything we can do to prevent this in the future years?" She adds: "We do own a a Sweeps 3 (evidently some kind of machine) and have used it slightly, and did that cause the problem? Other farmers are having this problem too, and they don't use one."

COSMIC AWARENESS:

This Awareness indicates there has been, over the years, a considerable use of fertilizer for plant life and an ignoring of the soil factor. That in this regard, the soil has been greatly depleted of humus; that had there been more care for the soil instead of the crop, the soil would have more nutrients. This Awareness indicates that humus in the soil as that which creates the proper balance of nutrients, and wherein entities ignore the soil and simply pump in fertilizer,--chemical fertilizer for the plants, the plants grow, but the soil, over a period of time begins to lose its value as farmland. This Awareness indicates that humus, which develops from the decay and rot of plants and also comes from organic manure, organic fertilizer, can be quite valuable in that it balances out the soil.

This Awareness indicates that likewise, hydrogen peroxide comes from decaying plants and plants which are in the soil as they mature, emitting hydrogen peroxide, forming more oxygen in the soil; that this is beneficial to the growing of most crops. This Awareness suggests that you may also benefit from radionics devices placed in a field, set at a frequency to be helpful to the plants. This Awareness suggests there are many who are now turning to radionics and turning away from pesticides, for the pesticides can gradually create problems in the crops and the radionics devices can help the crops to grow healthy so that there is no attraction for the pests.

This Awareness indicates that most insects are drawn to infra-red radiation from plants which are not healthy, and the radionics devices help to keep the plants healthy throughout their growing period, until harvest, and this prevents the bugs and pests from being attracted to those plants. This Awareness suggests that there also of course, is that influence of a depleting ozone shield which allows the planting to be burnt by rays which come through the ozone field. This Awareness indicates this is seen also as a growing problem not mentioned in the previous reading regarding the ozone field; that crops too will be highly damaged in future years and the ozone fields and oxygen levels decrease.

This Awareness suggests that you may grow better crops by spraying small amounts of hydrogen peroxide on your plants, and in the soil, to enhance the oxygen release. This Awareness suggests this be mixed with water, diluted considerably.

HOW TO CLEAN UP THE GROUND WATER

(FOLLOW-UP QUESTION):

She had one other question: What's the best way to clean up our irrigation water in the ground? We tried a Gro-Pro Water Magnetic Aligning Vitalizer. Also, our drinking water is full of mercury and other undesirables. Should we use more than the vitalizer and DS-Cell, or will that do it?

COSMIC AWARENESS:

This Awareness indicates that a good filter, which is frequently changed will be sufficient. This Awareness suggests also that you may wish to consider a distiller for your drinking water. That in terms of cleaning up your irrigation, it appears that a filter there could also be helpful; that you may check with various farm magazines for information on locating some kind of filter device for your irrigation system.

HOW TO DEAL WITH MERCURY POISONING

(FOLLOW-UP QUESTION):

One final question: She wonders if the mercury in the water and other things had anything to "do with my female problems, or is this purely emotional?"

COSMIC AWARENESS:

This Awareness indicates that mercury, entering into the human system, can create absolutely terrible results. It can affect the brain, it can affect the metabolism, it can affect many different levels. This Awareness suggests that if you suspect mercury in your system and it does appear to have entered, you should consider chelation treatments to remove the toxin, the mercury,

otherwise it can create difficulties that increase as time passes. This Awareness suggests also any of your family members may need to have mercury removed from their system; that this can be checked through hair analysis; that Dr. George Shahbaz as one who can have the hair researched and examined for indication of mercury in your system. This Awareness indicates that a lock of hair, sent to this entity, as instructed for this purpose, can be sufficient to receive the information necessary to make your choice on further action.

WHY 60 WHALES ATTACKED AND SUNK A SAILING SHIP

QUESTION:

This summer there was an incredible story by a couple who were on a 40 foot, two-ton sail boat in the Pacific, off Costa Rica, and they were attacked by whales. They said later there were approximately 30 whales on each side of the boat and they butted it with their heads until the boat came apart and sunk, and these entities had to take to a life raft for 66 days, where they were attacked by sharks. They also said the whales were "angry". Could Awareness please explain what happened in this situation. We haven't heard about anything like this except in the Melville novel *Moby Dick*, where a ship was actually attacked and sunk.

COSMIC AWARENESS:

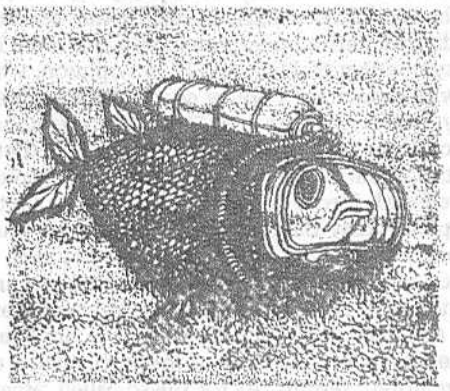
This Awareness indicates that it appears that these whales were disturbed by certain internal frustrations, partly based on their own illness. There appears to have been a certain illness in terms of pollution that has affected the brains of these animals or in some way has affected their normally docile manner to cause them to become more aggressive. In part, this effect on their energy levels came into play when something occurred in regard to the ship as an interference to their movements. This Awareness indicates that this is in part related to certain things that occur on rare occasions with animals and creatures who have been pushed into a corner, who would normally retreat, but who find themselves being pushed to a point wherein they do not wish to retreat any further. This Awareness indicates that it appears the sailing boat brought back a genetic memory of whaling boats of the past, and this memory as that which was also triggered and helped to trigger certain aggressiveness; that this would not have occurred however, had these entities been more healthy. They would have simply retreated and swam in other directions.

(Follow-Up Question): Vikki

Would that be sort of like they were hallucinating, something like that?

COSMIC AWARENESS:

This Awareness indicates this not as hallucination so much as feeling a threat based on genetic memory from whaling ships of the past. The genetic memory as that which was passed from their own parents' genes to them,



and much like animals who learned to avoid man after having experienced contact with man, tend to pass on that fear to their offspring, whereas these whales had learned genetically to avoid sailing ships because of experiences their ancestors endured.

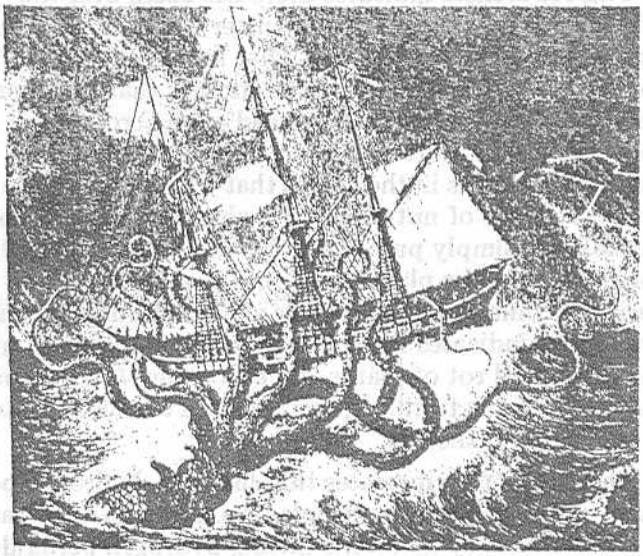
This Awareness indicates that this as having been magnified by certain frustrations that the whales are continually experiencing in this life in these modern times due to the continual environmental harassment of their domain by pollutants and by the encroaching of man into their territory, not only in terms of man alone and his general pollutants but also in terms of his electronic and microwave and weather modification influences which also distort the whales' natural domain.

(Follow-Up Question); Avaton

Could it be possible, the entities who owned the boat in a prior lifetime had been whalers and a harpooner of many many whales and somehow these whales picked up on that? Is such a thing possible?

COSMIC AWARENESS:

This Awareness indicates that this appears to be accurate; that your own channel as having tuned to this situation. This Awareness suggests the Interpreter be brought from trance; that the energy as that which is quite low at this time.



PLUTONIUM IN SPACE... THE GALILEO LAUNCH

QUESTION:

The Christic Institute has sent out an action alert called 'Chernobyl in the Sky,' the plan to launch plutonium into space, and there's going to be this Galileo launch in October, and they want it delayed because they claim that the plutonium used in the launch is the most deadliest metal known to science. Experiments many years ago were unable to find a particle of plutonium small enough not to cause lung cancer if inhaled, and the government is planning to launch this Galileo spacecraft this October. Not only the Christic Institute, but a number of organizations are putting out alerts like this. Does Awareness see this as being any threat if they do launch this Galileo probe with its plutonium?

ED'S Note: this question came near the end of a long CAC general reading and it was obvious from the long space between words that the energy was getting low. Awareness went into a rap about plutonium pollution, which was not very clear. After about 3 minutes It asked that the question be repeated; "that there is certain information that is lacking in the question."

QUESTIONER:

Okay, I'll read a little more about this from a current newspaper article. "In october of this year, the National Aeronautics and Space Administration is scheduled to launch Galileo on a journey to the planet Jupiter. Galileo is one of a series of deep space probes equipped with plutonium fuel generators designed to provide onboard electricity and warmth for instrumentation. There will be almost 50 pounds of plutonium 238 on board when the October space shuttle lifts Galileo into orbit from the Kennedy Space Center in Florida. The Florida Peace and Justice Coalition has asked the Christic Institute and a number of other national organizations to help postpone the Galileo mission. Forida residents who witnessed the explosion of the Challenger shuttle over their skies are now organizing to delay launches of plutonium powered space craft until a safe alternative source of energy is installed." I guess the basic question is: Does this really pose a threat, and should entities be alarmed about it and try to get it postponed as they are suggesting?

COSMIC AWARENESS:

This Awareness indicates that the risk in this is not great, but the risk is that which could have a great potential hazard in the event something goes wrong, such as occurred with the Challenger. This Awareness indicates that it appears that this particular selection of plutonium as the substance to use for this is such that there are certain benefits powering these instruments using the plutonium because of the long-term effect of plutonium. There is something else involved in this operation which is not clear at this time.

This Awareness indicates that this may have something to do with a projected action in the destination of the launch in order to accomplish something by which tests could then be conducted that would not be as effectively conducted were other substances used. This Awareness indicates that it does not appear that entities will be able to forestall the launch for any great period of time or to stop the launch from occurring in the near future. This Awareness indicates that the dangers of mishap are very minor in that even were it to plummet into the sea, the way it is assembled, it would not be such as to cause great immediate problems, and the likelihood of future problems is not seen, as it would eventually be retrieved before it could cause great future problems.

This Awareness indicates there does appear to be some area within this launch that is not being publicized or released to the public. It has a purpose that is not clear or is not what it purports to be; that this energy as such as to carry other purposes in the launching of this. This Awareness does not see clearly at this time what these energies suggest. This Awareness indicates that perhaps this should be worded in a different way: This Awareness does not present to the Interpreter at this time, a clarity as to what these energies suggest. This Awareness suggests however that there is some other purpose behind this launch that is not made clear.

ED's Note: This reading was given September 28, 1989. On October 9th, NASA was sued by the Christic Institute and several other environmental groups and the judge said he would make a decision shortly. If successful, this would be the first time in history that a citizen's group was able to postpone a NASA space launch. (At the time this copy is being typed up, the launch is still tied up , the fuse not yet lit to lift the rocket into space.)

HOW TO DEAL WITH MULTIPLE SCLEROSIS

QUESTION:

A health question from S.J., Port Alberni, B.C. She writes: We have a friend who was just diagnosed as having multiple sclerosis. Since I have only been a subscribing member for just over a year, do you have any information on how to help, or cure this disease? (We couldn't find any). I don't remember reading anything about it, however, I came upon, quite accidentally, something in the book *Edgar Cayce Speaks*, on MS. It was not listed in the directory in the beginning of the book. I found it while reading through the fruit section on page 189. It states: "In the diet, keep those things that heal within and without, and especially use the garden blueberry. This is a property which someone someday will use in its proper place. These should be stewed, but with their own juices. Little sugar, but in their own juices."

When I read this I got excited and would welcome any information explaining or adding to this. Our friend says that the disease is progressing and we would like to help her find something to stop it. Could the color of the blueberry be healing?"

COSMIC AWARENESS:

This Awareness indicates that this may have some healing effect to a degree on this, in that the blueberry contains certain Vitamin C, and it appears there are other trace minerals which are beneficial. However, it appears high doses of Vitamin C can be of good value in helping to cure this. This Awareness indicates

that lipotrates as seen as being valuable; that the use of cold water fish oil as seen as valuable; that there is also seen benefits from beta-carotene; that lemon, and citrus fruits, especially the lemon and lime, and also the use of kiwi is seen as beneficial; the kiwi as having approximately four times the amount of Vitamin C as orange, and this is seen as beneficial. That the Vitamin C is seen as having considerable benefits in treating this; that there can be benefits also from chelation treatment, in that it improves the circulation and helps to balance out the hormone system which in turn can affect the balancing of the metabolism and strengthen the immunity system and increase the oxygen and in general give the body a better chance. There is also seen benefits from hydrogen peroxide; there is also seen benefits from germanium, and also from L-Tryptophane. This Awareness indicates that the Interpreter needs to come from trance.

MORE ON "THE RAPTURE"...

WILL IT TAKE "LORD MAITREYA" TO BRING IN THE NEW AGE?

(WHO IS THAT LITTLE MAN BEHIND THE SCREEN?)

QUESTION:

A question from J.J. in New York. She says: "I would like to know whether Cosmic Awareness can confirm the classic Western esoteric doctrines pronounced by Benjamin Creme. Christ or not, Ben says that each New Age has its 'keynote speaker' in the form of a world teacher and that we can expect the emergence of one called Maitreya as that, and very soon now. Literature from Terra Center is fascinating in its updates on the progress of this action. This seems to parallel the Buddhist teaching that a Buddha, enlightened one, teacher, appears approximately every 2500 years to update the dharma, to expand the teachings for the more evolved souls at that later time. It is scriptural that Gautama predicted the coming of the next Buddha at just about this time and cited Maitreya as his name. Gargling aside, a lot of such teachings seem to dovetail very nicely in their essence." Would Awareness please give a little more information on this entity Maitreya, at this time?

COSMIC AWARENESS:

This Awareness indicates that this as a promotion by certain secret, semi-secret organizations, to bring about a representative, or spiritual symbol as being a representative of a new era; that this could come about because of this effort to promote this entity; that it is not something that is ordained by divine forces. This Awareness suggests that while, in the past, there have always been or frequently been entities who come forth as spiritual representatives in various countries at different times, this is not something that is destined at this time, although it could occur.

This Awareness indicates that the frequencies or vibrations that herald a New Age are not in the form of a person, though there are often individuals who will attune themselves to those changes, and speak or represent for the masses a personified image or symbol for those changes that are occurring. These changes would occur even without that entity. It is said that a leader is one who looks to see which way things are going, and then jumps out in front and says: "Follow me!" This Awareness indicates that this is another case of this kind of leadership.

This Awareness suggests that the New Age is coming, not because there is some avatar awaiting in the wings to appear, it is coming because the frequencies on the planet earth are undergoing change as it moves through certain aspects of space in its relationship to other heavenly bodies, as it moves into that position known as the Aquarian Age. These energies are changing not simply from religious points of view; they are being heralded in through technology, through flight; the invention of the airplane corresponded to the time when this energy first began; the spaceflights are part of this energy. The altruism in terms of social giving and service of people serving people as that which represents this kind of energy.

The qualities of Leo, the sign opposite of Aquarius being exhibited here and there in all elements of society; the worship of children, the importance of children, the sports, all of the various types of sports, demonstrations, show, television, all of this is part of the reflection of Leo and the influence of Leo on society; music festivals, combativeness, romance; all these games, the ego games, salesmanship; all of this is part of the Leo influence. If one wishes to check this out, all one needs to do is look in the astrology books, even books written hundreds of years ago, and you'll find these qualities still listed as qualities representing Leo.

This Awareness indicates that qualities representing Aquarius are those relating to electricity, flight, the unusual, the perverted, distorted, the sudden, the highly contrasted and the inventive expressions; all of these which includes its many expressions in society today, everything from homosexuality to spaceflights, everything from the radical, rebellious and terrorist activities that are so common, to the altruistic giving actions of groups and individuals, trying to promote or help this or that person. This Awareness indicates that all of the inventions, particularly the electronic inventions are part of the energy of Aquarius. All of the social programs are part of this energy. It is not that there is some entity standing there, waiting to come on that will bring in the New Age. The New Age is coming in with or without that entity, but there are people who will attempt to promote someone and to use someone, themselves or others, to make it look as though this entity is helping to control or bring about these events.

This Awareness indicates that there will be many messiahs, for as has been said: 'Every eye shall see him. He will come as a thief in the night.' This reference is not to some individual, it refers to the Christ Consciousness that will come to each individual as the individual attunes to the new energies, as the individual awakens to the Christ within, for that Christ within is that which is the Higher Self, is that Christ Consciousness that is reflective of the Godhead, of the Divine Being, the Divine Creator. That is the Second Coming. The avatars come and go, but that which is the Christ Consciousness, or Buddha Consciousness, whatever name you choose,--the Krishna Consciousness,--all of these refer to the same thing.

It is the Word, or vibration that helped to create all that is. It is that Light, that Divine Light that comes to every individual at some time. It is this that is the Second Coming. This is the rapture, wherein one is enraptured by the Light and lifted up by the Light,

lifted to a higher spiritual reality. This Awareness indicates that the danger of promoting an individual as a Christ for a Second Coming, is that there are many who will accept that individual, and that individual has feet in clay, just as does everyone else, and that individual is physical with his heights and depths, with the whole span of his being, whether it be divine or whether it have demonic qualities, or a combination in the entire spectrum of that entity's being, but if entities believe that being to be divine, they will project their expectations on him, whereas others who believe him to be the antichrist, will project those expectations on him, and thus the entity becomes the victim of mass expectations in conflict. This entity is more to be pitied for playing the role than to be worshipped or condemned.

WHAT ABOUT MAITREYA'S 'MIRACLES'-- HEALING THE BLIND & THOSE WITH AIDS?

(FOLLOW-UP QUESTION):

People keep sending in stories about this entity, and I'd like to ask if these are planted by the Terra Center, or if they're valid. Some of the stories are written by so-called newsmen, who claim Maitreya pops up in various places around the world, recently in Africa, that he appears and disappears almost like a puff of smoke, and that he speaks in the language of the natives of which ever country he's in, and that he walks the streets and he heals blind children and AIDS victims and so forth. I'd like to ask: Are these stories basically true or are they exaggerations that are being put out by this Terra Center to make entities think the Second Coming is just about here?

COSMIC AWARENESS:

This Awareness indicates that these are being planted; that these are not strictly from the Terra Center; that the Terra Center is also being influenced from other levels, as has been mentioned previously; this as a promotion action, to promote a future event planned for this globe at a time wherein a so-called rapture is to take place as suggested in the book *Cosmic Conspiracy* , wherein a grand staging or play for the masses will be enacted that will create a dramatic time period in which currency will be changed, systems will be changed, many technologies that have been hidden will be brought out. There will be the appearance of some kind of extraterrestrial invasion, to make people believe that a rapture has occurred.

It is intended to start a new dispensation on the earth, whereby those who are classed as enemies can be removed, and those who are cooperative will feel themselves to be divinely chosen. That this will be in conjunction with aliens and with those powers that already control the masses through banking and political organizations.

QUESTION:

Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that the energies on this plane as being such that regardless of what occurs in terms of controlled situations and motives of power, the New Age, the New Vibrations, the New Frequencies will still prevail and peace and a better age will still come into being.

****

For more information on this scheme and for more on Maitreya, please refer to 'Revelations of Awareness' issues: 80-30 (The Second Coming of Christ);82-13 (Who's Putting up the Money to Promote Maitreya?; (89-1(Predictions?); 89-7 (ET Go Home!) each $3.00 from C.A.C.

HEALING ENERGIES FROM AWARENESS NOW COMING TO YOU IN THESE MAILINGS

(Opening Message, C.A.C. General Reading)
August 5, 1989

COSMIC AWARENESS:

This Awareness wishes at this time to send healing energies to the membership. This Awareness wishes also to send healing energies to the energizers for this reading. This Awareness indicates that these energies which this Awareness shall gather and send in the healing purposes as that which shall be gathered from the resonating electromagnetic energy, the White Light, which shall be sent to entities. This Awareness indicates that in order for this to have its proper effect in terms of healing, entities will need to be receptive, to accept the energies and not to block these energies through their own negativities or through the energizing of feelings of guilt; therefore, if entities have certain hostilities, negativities or feelings of guilt, it would be beneficial that they work with these to remove these blocks so that the energies can have their healing effects.

This Awareness indicates that these energies as being intended not only to heal physically, but to heal emotionally, to heal relationships, to heal financially and to heal in terms of family life, in terms of occupation and career, the difficulties which entities may be encountering. This Awareness indicates that these energies are now being gathered, drawn together. This Awareness indicates these may be visualized as billions of tiny white lights being gathered at this time. These billions of tiny white lights being charged with this energy as expressed by the words and purposes. This Awareness indicates these billions of tiny White Light energies as that which shall be directed through the entity Avaton, through the entity Vikki, so that the energies shall follow the Aka-cord connection through the mailings, to those who receive the mailings, whether they are members or whether they are but associates who are touched by these mailings; that the energies for this healing as that which shall touch all of those who receive these and who as mentioned, open to receive the energy which this Awareness now sends.

(Long pause) This Awareness indicates that this energy as that which has been sent; that this energy, received by entities, may also be passed on through the visualization process, to their loved ones who may also need healings. This Awareness suggests the questions may begin.

ED's Note: After this reading was given, Vikki suggested we figure out how many times the both of us actually handle each CAC newsletter that is mailed out to you. Yours truly prints all the newsletters, using two presses back to back. Each ream is physically 'broken', joggled in a joggling device, put on the press, printed; side 2 goes thru the same process with the other press. Each ream is joggled once again, each fanned 4 different ways with the hands and fingers, then hand-carried to Vikki's department where she carefully fans each ream, looking for blank pages, ink splashes etc. She collates and staples the entire run, then pushes each newsletter thru a special folding machine which folds them in half. She then assembles the mailing, stuffs each newsletter into an envelope, runs the labels and personally affixes each label to the envelopes. Foreign and First Class get postages stamps . I usually run each envelope thru the sealing machine while Vikki double checks the labels. These are then piled according to zip code, each stack bound with rubber bands and then placed into post office mailing bags. If Awareness is sending healing energies thru the two of us to send on to you guys with each newsletter, you should be getting plenty!

A WORD ABOUT THE ECONOMICS OF RUNNING C.A.C.

(C.A.C. General Reading No. 5)
June 23, 1989

QUESTION:

Awareness, we're here tonight to continue the general questioning. Does Awareness have an opening message?

COSMIC AWARENESS:

This Awareness wishes to address the membership in regard to the economics involved in bringing forth these messages. This Awareness indicates that in reference to the many years in which *Cosmic Awareness Communications* has been in operation, the activities of bringing forth these messages has depended largely on the support of the membership, in their dues and in their donations. There has also been much reliance on the sale of certain products, which have helped to bring in certain amounts of income for the continuance of this work.

This Awareness indicates that from time to time, the economics involved require large outlays of money in terms of equipment, in terms of paper purchases, and in terms of other supplies; and that these occasionally are more expensive than the organization expects, particularly when there are breakdowns in equipment or such, or wherein the price of supplies is increased unexpectedly.

This Awareness indicates that in bringing forth these readings, the Interpreter is paid a certain fee, and this also can deplete the coffers of the organization. This Awareness indicates this as necessary in order that the Interpreter can devote time away from other activities to bring through these messages.

This Awareness suggests that due to this complexity of this type of activity, there are times in which the economics of running the organization are such as to pay for the activities without outside help, other than that of the usual membership fees, donations and sales of products. But there are other times in which the entity Avaton must supplement from his own pocket from other activities which he is engaged in, in terms of personal business, in order to keep the organization afloat.

This Awareness indicates that this as that which comes about because of his long years of dedication to this action. This Awareness wishes entities to be aware of this, and to realize that it is because of his personal dedication and the supplement donations and additional income which he puts into this besides his donated activities, and that of Vikki, that this organization has lasted so long.

This Awareness indicates that *It* wishes at this time to ask the membership to help in such supplement of income, so as to allow this organization to gain a momentary reprieve from a temporary depletion of funds. This Awareness indicates this in part, to help offset some of the difficulties and costs that have occurred in recent times, through the increased number of readings which the Interpreter has given through this organization. This Awareness indicates also, other expenses that have come up, as well as certain set-backs in the business levels of Avaton from his own personal incomes.

This Awareness indicates that in order for this activity to be strong and fruitful, for the organization to continue without excessive economic concern, there should be an increase in the general operating fund; and this Awareness wishes that the membership be aware of the need for donations on certain occasions.

This Awareness indicates the organization, the entities involved, are reluctant to ask for membership donations. This Awareness suggests however, from time to time, there are special needs. That it has been quite some time since a donation drive has been suggested in which there have been needs for equipment funds, or other supply funds to be increased. This Awareness suggests however, that it is not unusual for most organizations to ask their membership for occasional help in continuing their work; and this organization is exceptional, in that it rarely does ask for the membership to increase their usual voluntary donations to the organization.

This Awareness has taken it on *Itself* to make this suggestion that at this time, it would be beneficial for the organization and those involved, were the membership to assist momentarily in any donations that could be given to the organization during this period of time.

This Awareness indicates that in part, this is also due to a potentiality in the near future whereby the Interpreter may become involved in other activities, so as not to be able to have the time for giving these readings, except on rare occasions. And this Awareness wishes to have as many of these readings given to the organization at this time as is handy and available, so that the organization can continue with this new information, even though the Interpreter may be called to other activities.

This Awareness indicates that donations of any amounts which feel appropriate to you as an individual are appreciated by everyone in the organization, and this Awareness suggests that if you do not wish to contribute anything, that is all right also. It is a matter of your own personal inclination, and no one,--not this Awareness, nor any other in the organization,--will hold you in any less esteem if you decide not to contribute. It is for you to determine how valuable the work is for you, and how much you can afford to give at this time.

This Awareness indicates that in some instances, you may wish to make pledges over a period of time to spread your donations over a longer period of time; for others, you may wish to make a one-time donation. Either approach is fine.

This Awareness suggests the questions may be asked at this time.

WHAT HAPPENS WHEN YOU TELL A LIE?

...MORE ON FEAR AND GUILT

QUESTION:

A question from S.S. in Williamsville, New York. She asks: "Does the action of lying, in itself, carry its own punishment, or is it only in accordance with the degree of guilt we experience, our motivation, or both?"

COSMICA AWARENESS:

This Awareness indicates that on the karmic level, this is in regard to the motivation. That in another sense, there is the effect on an entity according to how much guilt an entity may feel from lying.

This Awareness indicates that on the essential level, all expressions are lies as well as truths.

This Awareness indicates what is true on one level, when viewed from another point, is false. That essentially, all matter is illusion, yet essentially all is matter.

This Awareness indicates that essentially, all illusion is matter.

This Awareness indicates that in essence, all is what it is, but is not what it is; is something other than that which it appears to be, yet appears as that which it is.

This Awareness indicates essentially, anything that can be said about the essence is false, for the words are not the essence. They are only reflections about the essence, and therefore, all words are lies.

This Awareness indicates in another sense, anything said is true if you look only at what is said and do not attempt to apply it to what is.

This Awareness indicates therefore, the essential level of communication in regard to truth and lies becomes very confusing and, in fact, is not possible to resolve.

This Awareness indicates this concept of lying and lies and truths are likened unto the concept of being or non-being.

This Awareness indicates that in the essential levels, to discuss truth or non-truth is meaningless. That on other levels, in a material sense, in a particular frame of reference, one can discuss truth or falsity, and as long as they stay within that frame of reference, this can be measured accurately.

This Awareness indicates that in terms of one's motivation,--that can be measured accurately by the entity; for the motivation is the 'thing',

This Awareness indicates that whether this motivation includes a lie or does not include a lie, the motivation remains what it is, and *that* creates the karma; whether this is good or detrimental depends on the motivation.

This Awareness indicates that guilt itself is but an action of the consciousness whereby an entity feels a conflict between his or her ideals and the actions. The conflict between words and ideals, actions and ideals, can create feelings of guilt, particularly wherein the entity has a belief or fear that he or she shall be punished for the failure to live to the ideal.

This Awareness indicates that many entities go after death to levels of Hades simply because they feel guilty, and believe they need to move into those realms.

This Awareness indicates that many entities prior to death, live in levels of Hades in their consciousness, simply because they are being eaten away by feelings of guilt because they have not lived up to their own ideals.

This Awareness indicates that ideals are not intended to be realities. Ideals are intended to be your movement, your goal, the light toward which you strive.

This Awareness indicates that guilt is a foolishness which is for indulging in when you have nothing better to do with your soul.

This Awareness suggests that if you have ideals and cannot live up to these ideals, this Awareness suggests that you lower your ideals to those levels which you can more easily reach.

This Awareness indicates that this is better than to spend your life feeling guilty.

This Awareness suggests that in terms of lying, because of a particular motive wherein you wish to deceive or harm another, that the motive is that which creates the karmic pattern.

This Awareness indicates that to tell a person they are looking much better, when in fact you know they aren't looking any better at all, this is not something which is punishable as a sin or a falsity; but rather, this is an action which can be very helpful to that entity, for this can be considered as a suggestion which will allow the entity to look at himself from a different perspective, and may, in fact, help the entity to feel better.

This Awareness indicates there are those statements which, by stating, create a truth.

This Awareness suggests that the statement: "I am speaking now" only is true when it is stated.

This Awareness indicates that the statement: "I am not speaking to you", by its very nature, is a lie.

This Awareness indicates that the statement which is spoken as a truth, but by the very speaking nulls the truth, may still be a form of truth.

This Awareness indicates that it is utterly impossible to avoid lying, and also utterly impossible to be totally honest.

This Awareness indicates that any time entities speak using words, there are falsities. That any time entities remain silent, there are falsities.

This Awareness suggests that when you look at someone without conveying what you feel, you have lied,--not in words, but in deed, in expression. When you look at someone and attempt to convey what you feel, you have lied for not stating that more clearly.

This Awareness indicates when you put your feelings into words, you may find that as soon as you have spoken those words, your feelings have disappeared and you have other feelings. Therefore, your words, when looked at and spoken are seen as not necessarily true.

This Awareness suggests: you not worry so much about telling the truth as what your *motives* are.

This Awareness suggests that you love one another, that you give your concern for the welfare of others; and in this manner, the words you speak will have the healing effects and will carry your motive.

This Awareness indicates that in many cases it may be necessary for you to express that, which once expressed, may be seen as false. That wherein you say, "I am extremely angry with you and never want to see you again," this Awareness indicates that often once this is spoken, the shock effect has its intended result and the entity sees the seriousness of your concern and this opens up a conversation which allows for communication. This Awareness indicates that your original statement may now no longer be true. That the concern entities may express is the concern which they feel. That it is essential for entities to put forth the effort to find the proper words to convey the feelings which are felt at the moment.

This Awareness indicates that entities are such a complex myriad of feelings, that once a feeling is expressed, it subsides and allows another feeling to arise; which, once expressed, again subsides, to allow still another feeling to rise.

This Awareness indicates that feelings move and flow, rise and fall, and really that nothing which can be said can be permanent.

This Awareness indicates that you not take each others' words too seriously; for that which is spoken at one time, may not be at all true a few moments later.

This Awareness indicates that what is essential is that you communicate in an effort, with a motive which is requesting a reconciliation, so that harmony can come into being to allow the flow of unity between entities.

"WORLD'S MOST CONTROVERSIAL PHOTO"

QUESTION:

L.K., of Granger, Indiana, sent in a copy of a photograph that appeared in a German newspaper, allegedly back in 1945 or '46, showing what the newspaper said were FBI agents, leading a silver-clad occupant of a flying saucer down an American street. No additional information has ever been published. They claim it's one of the most controversial photos ever taken, originally published by a Cologne, Germany, newspaper, and it *does* show two American-looking entities in trench coats, each holding the hand of a small entity that looks metallic, almost silver-colored from the picture, and there's something that looks sort of like wings hanging from the arms. Would Awareness indicate what that entity is or was, and if it really was an entity, or if that was a hoax, this photograph, which I'm holding here in my hands,--a large blow-up of it?

COSMIC AWARENESS:

This Awareness indicates that this as being what may be termed a hoax. This not being FBI agents, nor actually being an entity with wings; that this as being a small person; this appears to be a small child or midget, with certain attire to create an effect. This photograph appears to be taken as a kind of hoax to give an impression of something which was in fact, not accurate. The publication of this as that which came about through misrepresentation in regards to the photograph.

This Awareness indicates however, this is not to say that such space persons do not exist; that there *have* been entities who have fallen into the hands of those of the United States government; these entities being of a different humanoid type from those generally recognized on this plane.

REVELATIONS OF AWARENESS is a cosmic newsletter, published every three weeks for members of Cosmic Awareness Communications and the Universal Church of Awareness. However, you do not need to be member to subscribe. Members are encouraged to study the Awareness philosophy as well as other philosophic and secular material in their search for truth and Who in Fact they Really Are, and to integrate those 'Gems and Nuggets' they discover into their daily lifestyle and basic premise of life, and to act as role models to others. C.A.C. is a not-for-profit, tax exempt organization. Dues and donations are exempt from Federal Income Tax. All revenues are used to spread the C[illegible] philosophy to others. Donations are encouraged! We desperately need them, at this [illegible]
