COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

(CONSOLATION FROM COSMIC AWARENESS)...

UNDERSTANDING THE CYCLE OF JOY, SORROW, TRAGEDY AND GREATNESS WILL MAKE THE BANQUET OF LIFE MORE ENJOYABLE AS YOU GROW OLDER

(Opening Message C.A.C. General Reading)
10/15/88

COSMIC AWARENESS:

This Awareness wishes to give entities some consolation. This Awareness indicates that entities often view life and the future with apprehension and worry, for fear of the things that are dreaded, that may come about; that entities often recognize that even those things which are pleasant, joyful and beneficial, are only transitory and are followed by something dreadful; that this allows entities to feel great concern and apprehension. This Awareness indicates that these events which are dreadful to an entity are often followed by events that are beneficial, uplifting, joyful and harmonious.

This Awareness indicates that some entities do not look so much at life with dread, but recognize the negative events happen, and are followed by more harmonious and joyful events, and these entities look to the joyful events and focus less on the painful and unenjoyable events. If there were a 50/50 balance of positive and negative experiences for entities, some entities would see life and the future with dread, others would see life and the future with joy. Some would view the positive events, others would view the negative events and focus greatly on one or the other. Few would recognize that there is an equal number of positive and negative events.

This Awareness indicates that if this number were equal, 50% positive and 50% negative, some entities would see all the negatives and would give great concern to those negatives and cling to the positive, knowing that it would soon fade, and therefore, even the positive would accentuate the negative. Others would recognize the negative but see the positive, and long for and wait for the positive, while giving little attention to the negative, and therefore would see the positive events as dominant even though they in fact were 50/50, equal in frequency and quality.

This Awareness indicates that in the grand cycle of life, in the great cosmic movement of ages, in the 25,000 year cycle, there is that movement toward the decline of consciousness in which separateness brings about greater suffering, and there is that movement of the ascension of consciousness in which unification begins to occur wherein the radiance leads entities to feel greater unity and this brings a higher sense of being in consciousness, leading to the oneness of Universal Being, and in these movements, the decline toward separateness and the movement from separateness to unity, the shift between positive and negative occurs so that it is not 50/50, 50% positive and 50% negative, except at the very top or at the very bottom, or at the edges.

This Awareness indicates that when the movement begins back toward that status of unity, the energies begin to shift so that entities in fact have more positive experiences than negative, and when these movements begin to accentuate more and more positive, because of consciousness reconciling and denying separateness, the balance between the positive and negative experiences shifts to emphasize the positive. This Awareness indicates that at this time in consciousness, the movement is toward that of reconciliation and unity of the parts and is away from concepts of separateness and polarizations, and therefore, the positive becomes ever stronger in the events which entities experience.

This Awareness indicates that this is in fact a movement of consciousness toward unity with Universal Being, and in that movement, unity with the environment, with other entities, with concepts and reconciliations and harmony begin to receive greater accentuations, therefore, more happiness is certain to come as consciousness evolves during this part of the cycle. This Awareness indicates that knowing this is coming is much like realizing the darkest part of night has passed, or the darkest day of winter is now over and the light begins to strengthen and brighten and last longer and have greater accentuation, and therefore, spring, summer or dawn is certain to follow.

This Awareness indicates that understanding that you are in the dawning of a new dispensation, of a New Age, of a new and more enjoyable time, a new era of harmony, and understanding that this comes slowly, can bring a certain amount of hope and joy in looking toward the future, for surely it is moving and is coming to pass, yet there is also that personal experience which entities may suffer which may not allow them to participate in the dawning of the New Time, of the New Age, of the joy; they may have personal sufferings, they may have sickness, tragedy, they may have their limitations that prevent them from full enjoyment of life in the future.

This Awareness indicates that while the general trend may be toward greater joy and harmony, the private personal trend may be toward greater sorrow and suffering. It is important that such entities in moving toward these trials, toward suffering, even toward death, realize that this too is but part of a cycle, and that even as the ages move into the dark cycle, into the night, into the winter, and then back towards the spring, toward the summer, toward the dawning, toward the New Age, likewise, the soul goes through its cycles and often the body itself will decay, fall, rot and disappear.

This Awareness suggests that it is important for entities to recognize their personal lives go through these cycles of joy and sorrow, tragedy and greatness, and that when one moves toward tragedy, when one's life falls toward failure, there is always followed by this the ascension toward something great, toward something higher. This Awareness indicates that if entities can fully understand that the body is but a shell, and that the reality is the life force that inhabits the body for a period of time and then moves on, allowing the body to be discarded like an old garment, so that the entity may then move on to something new, the body being discarded like a vehicle, worn out, unworthy, and now, the driver of the vehicle, the soul itself, moving on to something different, to something better, starting afresh, creating a new vehicle; if entities can fully grasp this cycle of life and death, then these sorrowful times, these so-called tragedies, need not be seen as anything to inhibit or detain or block the general flow of happiness in one's life.

The Benefits of Pleasure and Pain

Even in the sorrow and suffering one can still experience joy, the joy of whatever life is available, the joy of seeing others who are living, the joy of seeing children who are growing, who are developing, who are learning, the joy of seeing mankind progressing, evolving into

something higher, the joy of knowing that you yourself, even though falling apart perhaps, will soon reassemble and come back and participate in the banquet of life or go in some other direction to some other feast on some other planet, on some other plane, in some other frequency, whereby you can experience new things, learn new things, involve yourself in even greater joys,-- the joy of being who you are, of overcoming the threat, the pain, the suffering, by identifying not with the decaying body, the weak physical form, but by identifying with that which is the Eternal, the soul, the consciousness, the being that is invisible that inhabits the vehicle of the body. Identify not with the suffering, but with the soul that experiences the suffering, identifying with that which recognizes the aging process, the suffering process, the tragedy process as being but something to endure along the way between those moments of happiness, so that full experience of all that life has to offer in itself becomes the greater joy, where pleasure and pain are but the right and left hand of the path to even higher joy and harmony.

This Awareness indicates that the consolation this Awareness wishes entities to absorb is the consolation in knowing that they and all others are now moving toward greater joy, greater consciousness, greater harmony, in a general movement, even if not in the momentary specific movement of the time, even though one moves momentarily in darkness, tragedy or suffering, the general movement will lead to those greater joys. It is likened unto one who is stumbling out of the woods toward the lighted valley or meadow where butterflies and harmonious spirits await; and while the entity stumbles through thorns, the hope and the realization that something lies ahead which is the goal and the benefit, the hope that there is indeed an end to the suffering in that which is the future.

This Awareness indicates that this hope is that which this Awareness wishes entities to recognize as a reality so that they may better understand and tolerate the suffering that lies between them and that opening into greater light and greater joys. This Awareness indicates that entities must continue onward moving ever toward that higher joy, for to stop, sit down on the thorns, lament because of difficulties in movement, all of these things in which entities become discouraged, fearful or blocked, only enhance the suffering, only tend to create a greater sense of suffering, and those who have that forward looking attitude, focusing on the future, on future joy, even though they may lie beyond death's door, those entities have less attention, less focus on the suffering and more on the future joys, and therefore, experience greater joy and less suffering, for the mind can only experience what it focuses on.

If it focuses on the tragedy and suffering, then indeed, that becomes strong, but if it looks beyond the tragedy and suffering and focuses more toward that future harmony and joy, then indeed this becomes stronger. This Awareness does not imply that entities should ignore tragedy and suffering and to become unrealistic and do nothing to attend the needs of themselves or others who suffer, but this Awareness does suggest that entities in attending to those needs should not wallow in the suffering, but should do what they can to bring

harmony, and once they have done all they can, they then need to focus on the harmony that they seek, rather than the tragedy which they wish to escape.

AFTER PASSING OVER FROM THIS LIFE, DO WE HAVE TO START OVER AS A CHILD?

(FOLLOW-UP QUESTION):

In reference to these other realms that entities eventually are going, where joy and bliss exists, Awareness has indicated that on the physical plane at least, an entity who comes in and is being born has just 'died' from the other level or the other plane it was in. My question is: Entities on this plane, when they decide to pass over into the next, do they have to go through a similar type of incubation period before some real awareness comes? In other words, on the earth plane you come in as a baby, and you have to go through years and years of growing up, school and so forth, until you reach a point where you're half aware. Is this peculiar to the earth plane, or does one passing from the earth plane to these other realms Awareness indicates are joyful, blissful; does the entity have to go through a similar length of time to reach that point where he can start enjoying it?

COSMIC AWARENESS:

This Awareness indicates this movement from the earth plane into other planes such as through the experience of death generally can be of a sudden nature, such as the accidental victim, the victim who dies from an accident, or may occur from one who dies a relatively quick death, such as through heart attack or some disease that leads quickly to death, or one may die very slowly, such as through aging, which may take many years until the entity passes over.

This Awareness indicates that in any of these instances, there is that movement onto the next plane, wherein the entity must become oriented, and spends some time becoming oriented to the next experience. It is not something that occurs instantaneously. The entity does not pass over and simply say: "Oh! I am now in a different realm, in a different world!", and begin acting as though a native of that realm. The entity instead will find some disorientation in that realm and will need some time to sort out what has happened.

There are those who assist these entities to reorient themselves into that other plane, just as entities coming in to this plane through the physical body of a child will help the entity to reorient and to become accustomed to the behavior and social and physical needs on this plane. Generally however, there is a difference. The entity who dies from this plane and moves into the next plane tends to keep the same or similar image of the body as the entity appears in the most mature and healthy level, thus, an entity who may be crippled in this life or a child in this life, or an elderly person in this life, upon passing over, tends to move more toward a physical body that is maturely healthy, more of an adult in the prime of life.

This Awareness indicates that these entities do not tend to move as children unless they are highly identified with the child's body, and when moving into the next

4. experience or next realm in a child's body, they quickly grow toward maturity; that it is much more rapid than in the physical form, which moves more slowly. That in the orientation into a different realm, the realm itself helps to dictate how quickly the entity becomes oriented. The physical realm is made such that matter does not move quickly. Time and space and matter are intertwined so that there is a progression that requires spirit and matter to work along certain time lines, but when entities pass into higher realms or realms beyond the physical, the matter is not as dense, and therefore mind, consciousness, imagery is easier to mold, just as the dream can allow images to change and become patterned and molded after different pictures without the inhibition that matter would impose on those images. Therefore, the entity who is identified with a particular level or body style can move the consciousness to create that body style more quickly. If the entity has been for many years identified with the body of an elderly person or a crippled person, and the entity then passes over into the next plane, that entity may, for a time, cling to those old images of self, may even continue a limp, or experiencing the feeling of the handicap of the elderly body or the crippled body, but this passes very quickly as the entity discovers that the mind creates the image and the image follows the mind, and thus, the entity may in but a short time create a totally different body, from the one that was discarded at the time of passing over.

What Time is Like to a Little Child

This Awareness indicates the birth into the next level after death does not follow in terms of a long tedious childhood that never seems to end as does it on this plane. This Awareness indicates that many entities forget how long it takes, how long the experience of a one, two or three-year-old who is essentially experiencing what seems like limbo, an eternity of being locked up in a small body that cannot function well enough to receive the full benefits of what this plane has to offer. A year to a child is like an eternity to an adult. The child wants so badly to expand, to move out, to enjoy, to experience what life has to offer; yet the child cannot and remains day to day frustrated, unable to experience, locked in that tiny body with huge guardians standing around keeping the child within certain bounds, making sure the child does not exceed the bounds allowed.

This Awareness indicates most entities forget what it is to be a child; to be a child is to be a prisoner, a tiny prisoner, locked in a huge world that does not allow the freedom of expression which the child so dearly seeks. When one looks back on the first ten years of life and considers those ten years, each year is like a decade to one who has lived ten decades, for the entity who has lived through many decades sees these many decades almost as a child of ten sees the many years of experience, for time as entities age goes faster with each passing year.

The Nature of Desire

This Awareness indicates that the rush from the cradle to the grave is only experienced in the latter part of that movement. In the first part, it seems to be an eternity, waiting to get to the place where one can move in life, and once that mid-point is passed, everything becomes an accelerating movement toward the

grave, one enjoys the sense of full perfection and harmony with life only in those few moments of middle age, and even these carry their frustrations, for as long as entities have desires to be older, to be more effective, to be more powerful or to endure a longer experience, entities will have those sufferings that result from the nature of desire, for nature creates experiences that lead to desires which in turn creates frustrations within the one who holds that desire.

This Awareness indicates without desire there is no suffering, but then, who cares to avoid suffering and sacrifice desires? This Awareness indicates that such an entity would indeed have no reason, no joy in living. There are many who have promoted concepts that entities should avoid desire, but in so doing, even if it eliminates the pain and suffering of not having your desire fulfilled, it also eliminates the zest and joy from life. Without desire, entities have no reason for being.

This Awareness suggests however, that the question may be asked: What should one desire in order to have the greater life? This Awareness suggests that entities in seeking the greater life should desire that which is the highest and best, that which leads them to the greatest joys and the greatest joys are those in which the entity becomes one with All, becomes one with the Universal Deity. Anything along the way is a proper desire. Anything that allows the entity to unify, to join together with any part of the Universal Consciousness, brings great joy.

This Awareness indicates that as entities merge together, come together, form unity in relationships, as entities join ideas, merge concepts, bring philosophies together, reconcile differences; all of these are steps that lead to unifying oneself with the Universal Consciousness, and all of these things bring closer and closer the entity to that which is the highest and best.

This Awareness indicates that those desires which should be avoided are those which are associated with separateness, the desire to put yourself apart from others, that you may stand out in conflict, in contrast, in such a manner as to push them away, to make yourself special. This Awareness indicates there is nothing wrong with perfecting some skills of your own, and in doing so, you may need to make yourself different from others; this kind of distinction in itself is not to be shunned, and can be beneficial. The entity who is best or who seeks to be the best at what he or she does, or the entity who seeks to look different or do something different, this is not a creation of separateness, it is but a form of being creative, and one can still be part of the whole while being distinctly individualistic.

This Awareness indicates what this Awareness wishes entities to avoid in order to find greater happiness and joy is that separateness which is based on psychological rejection of others, wherein one seeks to set oneself apart by rejecting others, by condemning others, by pulling oneself into some psychological status which claims to be better than others, or superior to others, for the sake of such separation. This Awareness indicates that indeed, one may be superior in some skill, in some talent, in some expression, and one may well recognize that they are superior. They may be able to ski or to

dance or to sing better than others, and in such, they may have the attitude: "I am perfecting my skill that I may bring joy to all others through my voice, through my dance, through my skill" and still, though quite different, and still, though quite superior in their skill they become unified with the rest of consciousness, giving to them that which they have to offer, serving others through their skill.

This is quite different than the entity who develops the skill, the voice, the dance, the action in order to stand apart and feel superior, to state: "Who is there that can sing like me? Who is there that can dance like me?", and in so doing condemns others for their inferiority. This Awareness indicates that this kind of desire, the desire to stand apart in order to be higher, to be vain, to be more magnificent and superior in order to put others down and put yourself up; this is the kind of separateness which this Awareness wishes entities to forego; for it does not bring them joy, it does not bring them happiness. It leads to sorrow and suffering, not only for the suffering of others in being rejected by this entity, but also the rejection and sorrow which the entity will feel; for you cannot reject another without inadvertently rejecting yourself from the relationship with that other.

This Awareness indicates that while many have warned that desire is the fire of hell, that desire brings suffering; this Awareness suggests that desire is the essence of life, so long as the desire leads entities towards reconciliation and unification with others and with the Universal Consciousness. Desire brings sorrow and suffering only when it feeds the vanity associated with separateness. When one becomes separate for the sake of personal vanity, that indeed is the greater sorrow that comes from desire.

This Awareness indicates that this is also reflected in entities' rejection of the Universal Deity. When one becomes so vain as to seek to reject Universal Deity and therefore feels themselves to be some kind of god in his or her own light because they have rejected God, this is the greater sorrow, this is the movement of Lucifer. This is the separation that brings the greatest tragedy to the soul. This Awareness indicates such rejection is indeed the first sin or error, for it brings suffering to the entity, and does nothing to punish or destroy the Universal Deity which does not react to that rejection and which still holds the entity close to its ever-loving arms.

This Awareness indicates that the Divine Force never rejects entities, but entities reject the Divine Force, and in so doing, separate themselves from this Force, from this love, and deny the love from their lives and thus may suffer from their own actions.

HOW ONE'S VIBRATION ON EARTH AFFECTS HIS VIBRATION AFTER DEATH

(SWILLING BEER IN THE AFTERLIFE?)

(FOLLOW-UP QUESTION):

Awareness, in regard to entities who pass over into other realms, like say, from the earth plane, it's been my understanding that as a person lives his or her life out on this plane, or any other plane, (we'll use this plane for example), that he creates around him an energy pattern, either light or dark, depending on what type of life he's living or what his thoughts are. My mother used to refer to this as a 'vibration.' As I understand it, when one passes over, one doesn't have the choice of going to any particular vibratory level that he might particularly prefer, but he goes to the vibratory level he is capable of reaching; that those who go to the higher levels have access to the lower levels of vibration if they want to, but those who are only capable of equating to the low vibrations do not have access into higher vibratory levels.

COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative; that it is likened unto gems; that each gem has its own vibration, its own frequency. The crystals that are used in instruments such as radios, or instruments that carry frequencies or vibrations; the crystals that are used for elevating consciousness or for healing, each of these different crystals has its own frequency, its own vibration, and the topaz cannot vibrate with the same frequency as the diamond.

This Awareness indicates that it is true that the entity who has only attained a certain vibration of a low nature on the physical plane when passing over does not suddenly become a highly enlightened being, but will in fact remain at the same vibration that was attained on earth. Thus, the entity whose highest joy is to get a beer at the local tavern, when passing over, this entity will still hold that as the highest joy and will be frustrated by the inability to find a local tavern which serves the spirit beer. This entity may indeed hover and move back into those areas as an astral shell or ghost, seeking to inhabit someone who is drinking beer at the local tavern.

This Awareness indicates that the entity whose highest joy is to experience great music or art, on passing over may move into frequencies in which realms of music and art are presented to this entity, and this will be the entity's greatest joy and will be the experience of heaven to this entity. The entities' whose greatest joy is to be with their mother or father or someone they love, upon passing over may find themselves drawn into those situations or circumstances in which they rejoin loved ones who have previously passed over ahead of them.

6. This Awareness indicates those whose greatest joy is to be with Jesus or Buddha or Krishna, upon passing over will find themselves being drawn toward that image of Jesus or Buddha, or Krishna; that whatever the entity's vibrations have been that entity will identify with those similar frequencies on passing over. This Awareness suggests that it is not so much the thing that the entity is drawn to, but the frequency or vibration that the entity is attuned to. Just as the transmitter sends out a frequency or vibration, likewise, the receiver attuned to that same frequency picks up the signal and receives the same frequency and vibration.

This Awareness indicates it is a matter of pure and simple physics. This Awareness suggests that an entity whose vibrations are at a low frequency level, who has never yet vibrated in higher realms of consciousness in the more spiritual aspects, who has never yet felt immense and selfless love for others, cannot experience these things simply because the body has fallen away. The self which inhabits the body remains the same, whether in or out of the body. It is possible for the self to make an effort to reach higher frequencies, to sacrifice self-interest, to reach out to serve others, and in so doing, to alter the frequencies of the body.

How to Change Your Vibration

This Awareness indicates when entities give themselves to some project, to some great work, or to serving others, they indeed change the vibration and frequency of themselves and this is the path that leads to an evolving soul, moving toward higher frequencies. This Awareness indicates that death itself does not serve as a ritual to enlighten entities, it simply removes the body from the equation so that the entity must experience self without the benefits or liabilities of the physical apparatus which has so long been involved in the process.

This Awareness indicates therefore, the entity whose focus has been on satisfying the appetites of the body, whose focus has been on sensuality, whose focus has been on glory and power and position or appearance, or gratification of the body, no longer has the body and therefore is left naked as a soul wherein the entity has served the body well, but done nothing for the soul, and therefore becomes empty and aware that all has been in vain; and the entity who passes over who has used the body as a tool to develop the soul, to develop skills, concepts, ideas, to help others, to serve, to give self in a manner that conditions the self to be of service, to love those things, those people, those beings, those concepts that are unifying; when the soul then loses the body, it has grown, it has developed from having had the body, and there is much reason to rejoice in having lived.

WHY SPIRITUAL EVOLVEMENT IS FASTER WHEN ENTITIES EMBODY IN THE PHYSICAL

(FOLLOW-UP QUESTION):

Those entities just described of the lower vibrations; can they eventually evolve into higher vibrations on those levels and achieve more realizations, or is it necessary that they again reincarnate into a physical body somewhere to relive the experience again?

COSMIC AWARENESS:

This Awareness indicates that entities can evolve on any level, wherein they are capable of giving up self-interest for the service of others. This Awareness indicates that in giving up self-interest to serve others, entities cannot help but grow and develop. This Awareness suggests however, that it is much more difficult for entities to experience the need to give up self-interest when there is no body which they inhabit. Their interest is focused more on seeking reembodiment, so that they can fulfill their self-interests.

This Awareness indicates that it is much easier in the physical form to experience things in such a manner as to have the intensities that cause an entity to suffer consequences from misdirection, from mistakes, for the sufferings involved in misdirected activities become much more pronounced in the physical body than out of the physical body so that the entity must look with greater respect at the error that has been committed, and in looking at the error with greater attention and respect, the chances of learning from that error increase.

Therefore, when an entity is in physical form, growth is enhanced by at least five times than that which would occur without the body, without the experience of the physical body being involved in the circumstances. This Awareness indicates that it is for this reason that entities of lower vibration seek desperately to return to physical form, that they may further learn from the physical world the lessons that they must learn in order to move into higher planes of existence.

"Cosmic Missionaries" Often Return to Earth

This Awareness indicates that those whose consciousness is of a higher nature have the choice of moving on into higher dimensions, remaining there for longer periods of time, or returning to the physical form to complete activities which they sought to complete. They are not as bound by physical form so that they must return in order to progress any higher, but they often return in order to complete a project or an effort, or an action which they see as beneficial in serving others, for serving others becomes the primary goal, as that is what moves them toward higher frequencies.

This Awareness indicates therefore, many entities of high vibration return to the physical plane even though it is not necessary, because on the physical plane they can have greater impact, greater influence in serving those in need. They are much like cosmic missionaries, and though they are often not appreciated by those whom they serve, and though they may be crucified by those whom they serve, they still would return, because that is their approach and way of serving others and serving themselves at the same time, that they may move even into higher frequency and vibration.

Many entities having served others, and having received praise for such service, will sit on their laurels for several lifetimes, feeling important, and these entities gradually, slowly, like a balloon that is losing air, gradually sink and fall into lower frequencies. This Awareness indicates that it is all very simple and logical, even if it is invisible to the naked eye.

MORE ON WANDERERS ON A MISSION TO EARTH

(FOLLOW-UP QUESTION):

These Wanderers type of entity Awareness just described that come to earth to complete a mission or they come to earth by choice, when they do come, they are aware that they're taking a calculated risk, are they not, of getting enmeshed into the whole earthly scene once again, and perhaps finding themselves back on the wheel of birth, death and rebirth again?

COSMIC AWARENESS:

This Awareness indicates when the entities come into the physical plane from a higher ascended level of vibration in order to be of service, they do not experience karma for any irresponsibility or negligence during that lifetime. This Awareness indicates that they may come into the earth for the purpose of serving others, but may have some kind of traumatic experience that causes them to forget their purpose and they may live their entire life without completing or doing what they came to do, and they will not, for that reason, receive negative karma or have lower frequency. If they should involve themselves in activities that are harmful to others, which degrade themselves, there may be karma for those actions, but not for negligence in completing their missions.

This Awareness indicates that they also will not find satisfaction with their lives if they do not complete their chosen mission, but they do not receive negative karma for their negligence.

THE GREATER LIFE
OR THE GREEDY LIFE?
--A CHOICE TO MAKE
IN THE TIMES AHEAD

QUESTION:

A question from E & E. W., Cottonwood, Arizona, that sort of relates to the opening message. They write: In the closing message of issue 267 (85-4), Awareness made a statement that would tend to indicate that mankind on planet earth had not yet, in 1985, developed the passions and the mind at a pace equal to the technology, and that therefore, the technology at that time, 1985, was/is in the hands of many who operate from the jungle passions. Our question is: Is this condition still prevalent upon this planet? Have we as a race of people gained anything at all in the development of our passions and minds in these past three years, or are we running along in pretty much the same old rut? If so, what can individuals do to help alleviate this problem?

This Awareness indicates that there was a definite change in consciousness after this reading was given. This Awareness indicates that this reading as having been given prior to the date mentioned, that the date of publication was after the reading was given; that even before this was published, changes began to occur, and into the year 1986 considerable changes occurred, whereby consciousness began to move rapidly. It is still in rapid movement, even though it is not yet such that it has caught up with technology.

This Awareness indicates however, the movements toward greater understanding is in progress and will, if continued in this direction, by the year 1994 will have caught up with technology. There is however, seen some potential for a very disturbing setback that could occur, based on economic disturbances prior to this time, and it could have a damaging effect on the evolution of consciousness, or it could have a totally different and beneficial effect, depending on how entities respond, whether they revert back toward jungle consciousness, or move forward toward idealism, based on serving others.

During this economic crisis, entities will be tested and some will express themselves with the "me first!" approach, and others will express themselves with the: "How can I help?" approach. This Awareness indicates that *It* sees the movement of consciousness as progressing ever toward that which is unity and even if there is that momentary setback in the evolution of consciousness, it will only be momentary, and will not become the continuous path of consciousness. This Awareness indicates that entities experiencing that "me first!" reaction to economic distress will only find themselves frustrated and will gradually work through the mental state, emotional state of frustration so that they too begin to look around at others and ask: "What can I do to help this situation?"

This Awareness indicates that down through the ages, human growth, spiritual growth, the evolution of consciousness has occurred time and time again, when that question comes out of circumstances, out of situations, that question: "What can I do to help?" It is in that willingness to give up something of self to help others that creates the change that allows the entity to evolve spiritually, socially and to attain maturity in consciousness. There are choices for the experience presented to entities almost on a daily basis, sometimes greater, sometimes less in their significance, and many entities never ask that question: "What can I do to help?", many entities only ask: "What can you do to help me?", "How can I get my share?", "How can I get something out of you that you want to keep, but which I want more?" Many entities have this attitude, and with such an attitude, they do not grow, they do not evolve, they do not experience greater spiritual awakening from that experience or situation. They remain as they were before.

It is that movement into circumstances wherein an entity gives up something of self or something other than self that creates the spiritual growth and maturity that allows the entity to move toward the Divine, to have the greater life as opposed to the greedy life that leads to greater suffering. This Awareness asks entities to think about it. Can a greedy person ever be happy?

WHERE DOES YOUR SOUL END AND FRED'S BEGIN?

(ALL ABOUT OVERSOULS)

QUESTION:

G.K. of Hawaii asks: "Is my High Self everyone else's High Self? Where does my soul end and Fred's begin? I guess when I think I see who I really am, everyone else seems pretty much the same."

COSMIC AWARENESS:

This Awareness indicates that there is that which is the group Oversoul or Higher Self. There is that which is the Higher Self which governs the nation, the group, or one which governs the world itself, and there is that which governs a family unit, and there is the Oversoul of Higherself which governs one individual, and these are connected, yet interconnected. It is likened unto an umbrella over the individual who is standing with others who have their umbrellas, under a tree which serves as an umbrella for the group, which in turn may be under a cloud which serves as a kind of umbrella shadowing the sun, so that this group and that group and several other groups are shaded by the cloud.

The Oversoul of the Anthills

This Awareness indicates that these various clouds sheltering and shading these many groups are covered by the sky, which is likened in this parable to the Oversoul of the landscape, of the earth. This Awareness indicates that each anthill has its Oversoul governing the civilization of the hill of ants. If there were two or three anthills, the Oversouls would still remain loyal to their own anthills, but there would be still a connective relationship between those Oversouls governing the various anthills so that the interconnectedness would serve as a Oversoul of the ants of the various anthills.

This Awareness indicates likewise, each creation, whether it be carrots, whether it be spinach or a variety of various garden plants; whether it be weeds, grasses, bushes, trees, other vegetation; each distinct or collective grouping has a kind of particular energy that hovers over and influences the growth and development of the material that makes up the entity, whether vegetable, mineral or animal. This Awareness indicates that even the rocks have certain energies that emanate as a life form around those rocks, and those energies around the rocks have rudimentary consciousness so that the rocks themselves have memory of all things that have occurred to them since their beginning in time.

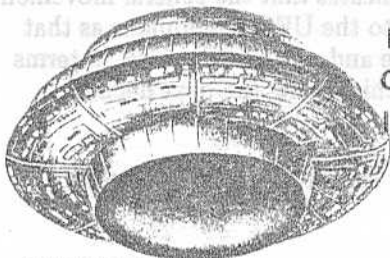

Likewise, all trees have a certain memory of all things that have to them since their beginning in time. These memories are much likened unto your own subconscious memories. They are not there as thoughts about "What happened in the summer of '62?", but they are there as impressions and memories of things that occurred as they were felt, rather than as they were thought about in words. It is more the subconscious type of memory than the conscious memory, put into symbolic words.

This Awareness indicates so it is with everything on earth; indeed, everything in the universe,—that all things are surrounded by a field of energy, not only surrounded by, but permeated with, a field of energy that remembers and organizes information from that which has been experienced. Therefore, the organization of information about any particular pattern or action or substance is present with that substance, with that pattern, and entities who wish to tune into that memory can do so by setting aside thought and tuning into the thing, the substance.

Psychometry: Tuning Into an Anthill or a Rock

This Awareness indicates that you may, for example, tune into the anthill, feel the civilization of the ants, and what you tuned into in actuality is that Oversoul of the anthill, that information-processing center that guides and directs the ants and their civilization. You may tune into the rock, you may feel yourself as a rock. The self of course is gone: you *are* the rock. Feel yourself as the rock. Be the rock, and in so doing, you may even recall events that happened years before in the presence of yourself as the rock.

This Awareness indicates that there is much which can be told from the viewpoint of a rock. It is how entities often can read events that have occurred by holding some object, by touching something that was present at the event, thus, a psychic may hold a cloth of someone who is missing and then describe that missing person and where the entity is. It is a very sensitive action which requires great concentration to shut out all other experiences, thoughts and ideas and focus only on that particular cloth and the frequencies associated with it. Even the cloth has its own vibrations, its own information system, and it gathers that information by its association with whatever the cloth has touched or has been used for.

DID SPACE ALIENS WARN ASTRONAUTS NEIL ARMSTRONG & GORDON COOPER TO GO HOME DURING THE APOLLO II MOON LANDING? IS THERE A NASA COVERUP? (More on the Alien Presence)

(CAC General Reading, March 31, 1989)

QUESTION:

A member sent in a tabloid article I'd like to read and ask Awareness if this information is valid. I think the writing looks like Vikki's pen pal, I.N. and it appears the tabloid is Globe. It's called, "The Book NASA Doesn't Want You to Read," and the headline reads: "SPACE ALIENS WARNED OUR ASTRONAUTS TO GO HOME". I'll read the article:

Hostile space aliens have warned Americans to stay out of their territory, claims the author of a startling new book.

The aliens delivered their chilling "Yankee Go Home" warning during Apollo 11 Moon landing in 1969, says Timothy Good in his book: 'Above Top Secret: The Worldwide UFO Cover-Up,' published by Morrow.

Good says NASA tried to hide the incident, but astronaut Neil Armstrong confided to a professor at a space agency conference that the space travelers were warned off—by aliens in a huge spacecraft.

9. This Awareness indicates that anything that is placed next to something else absorbs vibrations from that something else, and anyone who touches that thing can, if sensitive enough, feel the vibrations of the something else that has been touched. This Awareness indicates that there is an invisible realm, which permeates all matter, all things, and entities need to become more sensitive and more aware of that invisible realm, that they might be able to see beyond the senses, hear beyond what the ears hear and live in the realm of consciousness as well as that of matter.

LOOK BEYOND THE PLEASURE AND THE PAIN

Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that there is much for entities to rejoice about, even though there is also much for entities to sorrow over, for life is a combination of joys and sorrows, of pleasure and pain, of hope and hopelessness. It is the will of this Awareness that all entities accept the pleasure, accept the pain that is given to them, but that they look beyond these things toward that which is the greater purpose and meaning of life, through the action of reconciling opposites, reconciling differences, moving toward unifying self and others to something that is more harmonious, to something that is more universal, to something that is more Divine, and in such movement, great or small, one step at a time, one reconciliation after another, the entities evolve, moment to moment, toward that which is the greater joy, toward that which is Divinity.

(The Law of Gratitude is given)

"Their ships were far superior to ours, both in size and technology," he is quoted as saying. "They were big and menacing."

The professor said that according to Armstrong, NASA hushed up the shocking episode to prevent international panic.

Robert Gribble, director of the National UFO Reporting Center in Seattle, says there's "no question that NASA has been covering up sightings of alien spacecraft. Good has probably only exposed the tip of the iceberg," he charges.

Good, a British broadcaster and lecturer, says ham radio operators picked up this exchange between Apollo 11 and Mission Control: "These babies are huge, sir...enormous... Oh God, you wouldn't believe it. I'm telling you there are other spacecraft out there...They're on the moon watching us."

The chilling encounter is just one of the many UFO sightings NASA is keeping under wraps, Good maintains. To support his case he quotes a tape recorded "admission" he claims astronaut Gordon Cooper made in 1973: "Every day in the

USA, our radar instruments capture objects of form and composition unknown to us. There are thousands of witness reports...but nobody wants to make them public."

Cooper also describes his own close encounter in Florida earlier that year:

"I saw with my own eyes a defined area of ground being consumed by flames, with four indentations left by a flying object which had descended in the middle of a field. Beings had left the craft. They collected soil samples and, eventually, they returned to where they had come from, disappearing at enormous speed."

One of Good's informants claims that Mercury 7 space pioneer Scott Carpenter told him that he and his crew were under constant UFO surveillance in space. Carpenter is widely believed to have photographed a UFO during his 1962 flight.

But when Good tried to pin down the astronauts on their sightings for his book, he was rebuffed.

"There were no objects reported, found, or seen on Apollo II or any other Apollo flight other than of natural origin," Neil Armstrong wrote in reply to his letter asking for more information. Armstrong continued: "All observations on all Apollo flights were fully reported to the public."

But, Good says, the professor who was first told about the space warning by Armstrong confronted him again, and the astronaut confessed it was all true.

"He said that everyone had been told to keep their mouths shut--and that the CIA had orchestrated a massive and elaborate cover-up."

End of article. Would Awareness please comment if that is valid information?

COSMIC AWARENESS:

This Awareness indicates that for the most part this information is correct. This Awareness indicates that there has been, over the years, an enormous amount of data collected in regard to UFOs. There have also been government pacts or agreements with those aliens. That there is much information coming out in regard to this; that it has come to the point wherein the government has realized that it cannot be kept secret forever, and that the UFO entities, the aliens, are here to stay, at least for some time.

This Awareness indicates that it is also being theorized from various forms of evidence that these entities are not necessarily the benevolent types which many have given them credit for; that there are other motives involved in their presence on this planet, which may become somewhat difficult for entities to accept. This Awareness indicates that these long years of coverup are coming to an end, and that gradually this information during the next decade will be released to the point wherein entities will begin to see more of the iceberg than has been made available so far.

This Awareness indicates this ties in and relates to the cattle mutilation, wherein these cattle mutilations relate to certain genetic experiments, as well as other forms of cultural activities used by these aliens. This Awareness indicates that the government as giving a silent hands-off policy toward the release of much of this information. They are no longer making the great attempt to hide or coverup this information. This Awareness reminds you that in approximately 1980, most of the UFO magazines were taken off the market, and it was nearly impossible to find any information on UFOs.

This Awareness indicates that at this time, more and more there are reports regarding UFOs in newspapers and tabloids. There are television shows. There are magazines and organizational newsletters with information

regarding UFOs. There are also books being released in regard to this. This Awareness suggests that this as all being allowed now because the government has come to the conclusion that they can no longer keep this secret to protect the public from this information, and it is best to let the public alert each other with the government taking a hands-off policy. This way, the public can begin to accept or reject the concepts of UFOs; even though they are hearing much about such, they are not officially being told by the government that they exist or do not exist. This allows the information to be spread among the population without any official acknowledgement of the presence of aliens, which might tend to create greater panic than if it is simply being spread by individuals in society.

It is for this reason, to prevent a breakdown of social structures, values and traditions, that the government has avoided giving information regarding the UFOs. This Awareness indicates that there have been at least four various publicized mentions between Reagan and Gorbachev, in regard to UFOs during their various conversations over the last several years and it is in part because of the UFO concern that the Star Wars program is being developed. It is not so much to protect against the Russians, but to protect against the potential for alien invasion of this planet.

This Awareness indicates that much of the technology available and used during this time has come from technology provided by those space aliens,--this including the mind-scan devices as well as some of the more highly refined laser weapons and rail gun technology and Stealth technology. This also including certain UFOs owned and developed by earth governments which are basically of a more crude nature, not having the power to transverse dimensions. This Awareness indicates that the interdimensional capacity of these aliens is still secret technology.

This Awareness indicates that the general movement or energy in relation to the UFO phenomena as that which will come more and more to the fore, in terms of public attention: this during the next decade.

AN UPDATE ON THE NATAS ALIENS

(FOLLOW-UP QUESTION):

About 10 or 11 years ago, Awareness gave, during the 'Gathering Storm' information that *It* was very concerned about these interdimensional or alien entities that were residing beneath the surface of the earth,--these being Natas, (Satan spelled backwards), I believe it was. Can Awareness give an update on those entities and inform us as to whether these are some of the aliens that are causing concern today to the officials?

COSMIC AWARENESS:

This Awareness indicates that these are some of the lower elements in regard to the alien types; that there are essentially three alien types, on or in connection with the earth behavior or situation at this stage of its development. The Natas are also referred to as the Grey Men. There are various terms entities use because there is no standardized terminology to define or describe these

various entities and depending on who is observing and what names they wish to use, this tends to vary from one group to another.

This Awareness indicates however, this lower level as that which enjoys getting involved in what they consider to be scientific experiments with human beings to determine and to discover certain reactions and effects when being examined in regard to their reproductive systems, as well as their nervous systems, and these entities tend to have a void area in their psyche which is not capable of compassion or emotion, and therefore, they thrive on the observation and witnessing of human emotions, particularly strong fear, pain and in some cases, ecstatic ecstasy; that wherein they can watch this kind of human emotion being expressed, they tend to gain some enjoyment from this, a sense of energy.

This Awareness indicates that it is what most entities would consider a form of sadism, and that which is a kind of cold analytical observation, without feeling, is seen to be alien to that which entities would consider human, therefore, these entities are labelled as satanic or often called the Natas. They have been labelled with various names, but the essential quality around these entities is that they are cold, calculating and enjoy watching the extremes of emotion expressed by emotions and will do things to stimulate that kind of reaction in humans.

This Awareness indicates that fortunately, there are not a great number of these entities on the earth plane at this time. Unfortunately, they are still present and can act from non-physical levels, being able to transverse dimensions. This Awareness indicates also fortunately, entities have some ability to keep them away through their psychic powers, through the factors of that which would be associated with spiritual energies; that it is only when entities become vulnerable to the vibrations exuded by these entities that they can come into proximity with earth people; that wherein certain drugs or behavior or vibratory frequency is allowed, then these entities are invited by those openings and can enter into and influence an entity's environment and feed off of the entity's emotions and gain some kind of interaction with the entity.

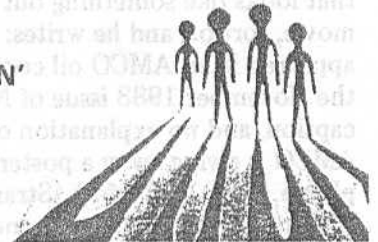

This Awareness suggests that entities avoid these creatures, because they are not yet developed, the humans that is, are not yet developed sufficiently to deal with the entities, to understand these entities and to properly handle their expressions. These entities being quite manipulative, and humans being still unaware of their nature, it is better that the average individuals avoid contact with these entities. This Awareness indicates that at some later time it will become clear as to how to best relate to these entities, keeping them at a distance and with proper structure involved in the relationship, so as to preserve your own space, while still being able to relate to them.

This Awareness indicates this is quite extreme and different from the relating between humans of different cultures or different races, such as might have occurred some time ago when an entity would go into a totally foreign country where different languages were being spoken. At least there was a common thread between the entities, wherein on feeling levels, they understood each other's feelings, that each other had emotions, that

11 each other had certain areas of his or her world to protect, to fear, and to be willing to fight for, and these entities would understand that the other, in a different culture might have certain aggressive behavior, but to have someone who is of an alien nature from a different plane or dimension, wherein the entire feeling network, emotional network is quite different, almost missing, this is something that is much more difficult for entities to relate to, even more difficult than not being able to speak the same language verbally.

This Awareness indicates that gradually *It* will release more and more information regarding the UFO situation at this time, and the nature of the aliens on this plane.

DID THE
'BINDING OF SATAN'
EFFECT THESE
NATAS ENTITIES ?

FOLLOW-UP QUESTION:

Will the recent binding of that energy thought-form known as Satan have any positive effects on these Natas entities?

COSMIC AWARENESS:

This Awareness indicates that the Natas entities are not actually representatives of Satan; it is more that they have certain sadistic qualities, and have been labelled Satanic or Natas, because their qualities approximate those same qualities attributed to the mythical character known as Satan. This Awareness indicates that the binding of Satan is really but the binding of the myth of Satan. By binding this myth and removing it from consciousness it simply removes that mythology.

This Awareness indicates that the Natas, or those entities probably which should be referred to by a different name; those aliens that exhibit the kind of energy which is devoid of compassion or even passion; these entities whose primary makeup is to question and to have a strong curiosity regarding the emotions of humans, because they themselves are devoid of emotion; this is not related to the binding of the mythology known as Satan, but it can be helpful to understand that these entities are simply different in their emotional makeup than humans, and that difference gives them certain qualities that may bring forth undesirable social traits. *(Like eating entities!)ED.

This Awareness indicates it would be beneficial if entities having position and power to do so, could find a way to provide and stimulate emotional energy for these entities to satisfy some of their needs for emotional energizing. This Awareness indicates that dramatic activities, plays, shows, festivals, musical excitement; all of this kind of compassion and passionate release as that which can be channeled to these entities to help fulfill some of their needs, whereas if they do not receive this through the fascimile known as drama, they may seek to get this satisfaction through the real thing of torturing or otherwise extracting some kind of emotional reaction from entities themselves. That the need for this is basically caused by their lack of such within their own psyche or being.

ED's Note: for more information on the binding of Satan, please refer to 'Revelations of Awareness' No. 89-10 (The Binding of Satan), \$4.00 from C.A.C. For more info on the Natas (Satan spelled backwards), please refer to issues: 79-25, (The Secret of the UFOs); \$4.00; 79-18; \$3.00 (A Cosmic History of the Illuminati). Also, 90-2 (The Alien Presence) \$5.00.

HOW THE PUBLIC IS GETTING USED TO THE IDEA THAT ALIENS EXIST ON EARTH (THE STRANGE AMCO OIL ADVERTISEMENT)

QUESTION:

P.O. send in a photo copy of a strange looking alien that looks like something out of a Seven Spielberg movie, sort of, and he writes: "The photo below appeared in an AMCO oil company ad, on page 42 of the November 1988 issue of NASA Tech Briefs. No caption, and no explanation or source of alien, etc. AMCO is giving away a poster of the ad free, if you phone (800)-222-2448. Strange isn't it. I wonder if there's more to this than meets the eye, and where AMCO got the photo?"

Does Awareness see this illustration, or what looks like a copy of a photo of an alien, as being valid, and is there any connection to the NASA organization?

ED's Note: in addition to the toll-free number listed above, there is another number: (203) 431-1967.

COSMIC AWARENESS:

This Awareness indicates that this as part of the plan to release information to the public that gradually conditions the public to accept the presence of aliens on the earth plane; that many of the companies, the corporations are aware of and are in some ways in connection with these aliens, and there are some concerns in regard to the release of this information through the public sector as opposed to releasing official acknowledgement of alien presence through the government sector. That by releasing this information through the public sector, it allows the government to save face long enough to where the public can accept the information because of gradual conditioning. This Awareness indicates that the image of a thing is more valid to the subconscious than is the official acknowledgement of something presented in words; therefore, movies, pictures, photographs and sensational stories carrying emotional impact are more convincing to the subconscious of entities than would an official statement be.

The official statement could cause some panic and threaten certain institutions, so this is held back, but the message is still being brought through to affect the belief systems of individuals in such a way as to be very subtle, wherein they are not being told this is true, but they are being presented with pictures, with images, with stories which they may or may not believe according to their own choice, thus, each individual is not being forced to accept something that is abhorrent or frightening to him, but is being given images which he or she may object to or may accept as being valid, and in this manner there's no cause for panic, even among or within one individual.

This Awareness indicates that this then is the reason for this kind of public release of information as opposed to the official release of information. It is a way of gradually allowing entities to grow to accept the presence

12.

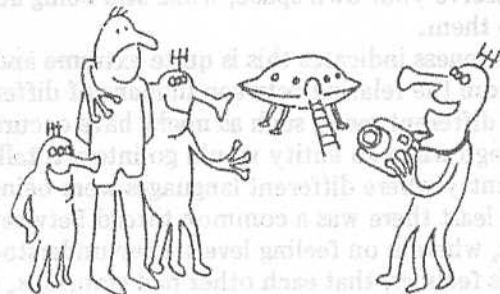

of aliens, rather than being forced to accept the presence of aliens from a government declaration. That once entities have accepted the public images sufficiently to where they are able to question: "Could UFOs actually exist?", and to answer: "Perhaps. I really don't know," then these entities are at a state of consciousness in which they would not create some kind of panic from the discovery that such entities do indeed exist, but were entities to be in the head space of believing that earth was alone in the galaxy, that they were alone as a human species on earth, and then to suddenly have an official announcement, such as might have occurred in the 1950s, that there were space people who had landed on earth, the panic could have been disastrous, not only in terms of traditional institutions, such as religious traditions, but in terms of economic reactions.

Entities might withdraw the money from their banks. Entities might buy guns. Entities might prepare to shoot aliens, only to discover that the shadow they saw was their neighbor's kid walking across the lawn. This kind of panic could easily have occurred had entities been suddenly conditioned by an official announcement that there were aliens on the earth, therefore, the government elected to keep this quiet, to allow the aliens certain time, to effect certain relationships and trades with the aliens, that they might set up certain bases with the aliens, that they might set up certain bases in exchange for certain information and technology, which the government uses and gained from.

This Awareness indicates that this kind of relationship between the various governments of the world and the aliens, as that which has been handled carefully, with consideration of all the possible options that might have been released. This Awareness indicates that there have been pacts or agreements made with these aliens whereby they have gained more power and influence over the earth's governments than was originally intended, and this is what now has caused alarm among government officials, for they realize the technology available to these aliens is such that the governments of the earth are next to powerless, especially since the public is not even aware of the presence of these aliens.

Therefore, the government has taken a kind of 'hands-off' policy, not hindering the exposition of information relating to the aliens' presence and in fact, there has been encouragement, such as certain films, including *The War of the Worlds* series on television, which in fact, parodies what is occurring. There is more truth than fiction in that series *The War of the Worlds*.

This Awareness indicates that many of the movies released through Orion [Pictures, Inc.] deal with space aliens and alien takeovers. All of this is part of conditioning the human race to accept certain new levels of reality.

HOW COME THE GALACTIC SPACE COMMAND HAS NOT PREVENTED ALIENS FROM ENTERING?

(FOLLOW-UP QUESTION):

I always thought, or understood that the Galactic Space Command was to keep aliens like that out of our earth's atmosphere. How did they manage to get by them?

COSMIC AWARENESS:

This Awareness indicates that you must understand there are different types of aliens; that these are but one type. They are here because they were *allowed*, and essentially given a kind of national immunity by the government which provided them with bases in exchange for information. There are also other types of aliens which can be more helpful, if the time comes when such is necessary. These entities have a hands-off agreement or pact not to interfere with the development of a planet, unless invited, and these first types of aliens were invited.

This Awareness indicates that the invitation came however, after they moved into and were discovered by the government, after they moved into earth's atmosphere and were discovered by the government; that these entities first came in to this area in recent times because of the release of atomic weapons which was affecting some of their underground bases or were perceived as a threat to such. That in terms of the Galactic Command, these entities do not interfere until invited, and to the degree they are asked to interfere, and much of this interference or involvement by the Galactic Commands have come about because many entities have invited their energies, and these are helping to keep this planet in balance at this time.

This Awareness indicates there are different levels of development in terms of these aliens, different cultures; that *It* has been speaking mostly of the lower cultures. Those of the higher cultures are much more benign, but they are also less involved in human affairs.

This Awareness suggests that one more question be asked, and then the Interpreter be brought from trance.

THE MYSTERY OF THE GIANT DIVOT IN A WASHINGTON STATE WHEAT FIELD

QUESTION:

Okay. There was a recent article in the local paper about a displaced chunk of dirt that defies answers. I'll read part of it. "In Wenatchee, Washington, it's been four years since the mysterious giant divot of earth drew scientists from far and wide to the desolate range in North Central Washington. Somehow, a force bit a ten by seven by two foot chunk of dirt out of a wheat field on the Timm's Brothers ranch in Okanogan County, rotated it counter-clockwise 20 degrees as it arced across the field and set it down intact. Geologists marvelled at the hole's smooth side and bottom, and the way the plug, 73 feet away fit its measurements exactly, just like a cookie cutter, but after a flurry of activity and news reports, they went away without explaining how the multi-ton chunk of sod and dirt flew through the air.

13.

The chunk is weathered now, but still sits where it landed and theories still abound about how it got there.

The latest explanation was mailed a few weeks ago to Greg Behrens, a federal geologist at Grand Coulee Dam. It came from an apparent religious fanatic who apologized for causing the explosion of dirt during a sort of religious frenzy. Probably because the site lies within striking distance of two Air Force bases, the most popular theory speculates that weird experiments in the military's Star Wars missile-defense program are carried out on the desolate terrain.

Other theories involve earthquakes, natural gas explosions, lightning bolts, a 'black hole-ette in space' and whirlwinds. But none of them fit, say Rick Timm, 40 and his brother Pete, 36, who discovered the geological riddle while turning their cows out on wheatfield stubble in October 1984.

"Everybody was really grasping for an explanation," said Rick. "Then we got all the stories nobody would ever tell you before, from people who are 100 percent honest...Like the guy who worked for my folks for 30 years. He said a light followed him all around the field that night, and he doesn't drink or do anything."

In the same area 20 years ago, Rick Timm said, "another really reputable couple said a light came off the hill at ground level and followed the contours of the ground really fast across the valley, over Big Goose Lake and disappeared over the mountains."

Behrens said his pet theory is a series of seismic waves from an earthquake that shook Okanogan County Oct. 9, 1984. The earthquake, measuring 3.0 on the Richter scale, was 20 miles southwest of the hole and four miles below the earth's surface.

Behrens speculated it formed concentric ground waves that collided in the middle and popped out the chunk of earth.

But Stephen D. Malone, a University of Washington earthquake expert, called that theory "beyond the incredible," saying the force was much too small to do the job.

"Even I don't believe the theory 100 percent," Behrens said. "Nothing very satisfying to me has ever been published."

"I like to think it's aliens," Rick Timm said. "After the initial thought, it wouldn't be that frightening."

Could Awareness explain what caused that chunk of soil to do what it did?

The Daily Olympian

COSMIC AWARENESS:

This Awareness indicates that it was aliens; that this was from the light which moved through the valley. This Awareness indicates that the action was to boggle the minds of entities and that also it was to awaken the entities to realize that there are things that are beyond their understanding. This Awareness indicates that more and more of these kind of unexplainable actions will be reported. It is part of the grand scenario of intimidating humanity from its smug attitude of knowing everything.

This Awareness indicates that in general, humanity presumes it is at the cutting edge of all knowledge because it has developed to a certain stage, beyond which no

human has previously moved, and therefore, with the modern technology, entities get rather smug in their knowing of so much. These aliens simply enjoy playing with the minds of smug people, to let them know that they know very little. It is likened unto toying with children, playing tricks on children, such as snipe hunting and similar games wherein the child is made to feel foolish.

This Awareness indicates that this kind of mischievous game-playing gives the aliens considerable enjoyment; this as an individual prank, by an individual alien, but is part of a general policy that is alright to do such. The chunk, basically, was cut by laser and extracted through levitation from the machine, the craft, and moved to a different place. With these craft, this was quite a simple matter.

* The same applies to those controversial concentric circles and geometric indentations the media has been reporting in England and other places.

14.

SUPERDIMENSIONAL EVENTS, NOT SUPERNATURAL

(Closing Message)

This Awareness indicates that until entities begin to realize that the world is not the stable material never-changing-much-at-all world that they have perceived for so many years, strange phenomena cannot be understood, but when entities begin to realize that all of What Is exists within a mind; that mind is the Cosmic Mind, or Cosmos, and it is all part of the thoughts, the images and dreams of that Cosmic Mind, and that time and space are all concepts within the Cosmic Mind and have no reality other than as concepts within the Cosmic Mind; when entities fully begin to understand and accept this new cosmology, they will also have room for the interdimensional craft, the craft that come from other lobes of the mind, other regions of the mind, other dimensions into this particular dimension, and it will not seem so strange or far-fetched to have supernatural events occurring, for they are not supernatural at all; they are truly natural. They are super-dimensional. They are from outside this dimension.

This Awareness indicates that as entities begin to think more and more in terms of this new model of the universe, these mysteries become more understandable, acceptable and reasonable. (This Awareness suggests the Interpreter be brought from trance).
