THE WELFARE SYSTEM IN AMERICA: "SOMETHING IS DESPERATELY WRONG! "

TODAY'S CHILDREN IN A WORKING FAMILY

C.A.C. General Reading,

June 15, 1994

OPENING MESSAGE:

This Awareness indicates that it is a time in which entities find themselves being squeezed for more energy and find it more difficult to come up with the energy that is being demanded of them. This Awareness indicates that these times are such that it requires two entities in each family to support the family, whereas in the recent past, in the Fifties and even Sixties, one wage-earner could support a family.

Now it requires two, and the two wage-earners supporting the family, often leave the children without parental help, so that they do not get the guidance and support necessary. This Awareness indicates that it also means that the parents do not get the support *they* need.

The husband does not have the foundation of the home, because the wife is working also, and the wife, being at work most of the day, cannot distribute her time to the children, who need her as much as other children of other generations have needed their mother, and yet, often there is not enough money to hire a maid or someone to assist in the home, or is there enough money to send out clothing or eat out, yet because these things cannot be afforded, the mother or the father has to pick up and maintain the home in addition to working at their job.

This Awareness indicates that this means the entities not only work jobs, but they work longer hours in having to take up the slack for their home life, and along with the work life or career life. This Awareness indicates they also neglect the children somewhat, even if they do their best to give them time.

The raising of a child needs to be one parent giving attention to each child, in quality and in time, so that the child receives sufficient attention of time, with sufficient equality of attention. TV is is not practical in today's world, so the child is slighted in his or her upbringing, and the parents are stressed out from such long hours and so much demand on their time and energy.

This Awareness indicates that wherein it is possible for entities to receive help from grandparents or some other assistant, the damage to the family can be minimized. This Awareness indicates that in such situations, it is important for a family to have some kind of organization or order, whereby the children take up some of the responsibility for themselves, and the home is, if not attended to, at least not harmed by the children's presence.

In other words, if you can train the children not to mess up the home and possibly even to give them certain duties in keeping the home clean, this can minimalize some of the stress so that you can have more time to spend with them. This Awareness indicates that it is a situation in which everyone has to not only be willing to do more than their share, but be willing to organize and create a kind of system that benefits each by the cooperation of all.

This Awareness indicates the concept of "I'll spend some time with you tomorrow if you get the home clean by the time I get here," or the concept of "We can go out and have dinner tomorrow together at a restaurant if we can avoid spending excess money for this or that project that you are asking for;" this kind of mutual decision and mutual agreement as to how to run a better ship, or more precisely, run a better family, through the cooperation and trade-off of each member, can allow for learning opportunities as well as greater enjoyment of each other's company, when entities are able to properly communicate their needs and are willing to assist each other.

This Awareness indicates of course, if you do not take care of your needs and become resentful, you become a much worse partner or parent than if you take some selfishness on your part to meet your deepest needs, and fail to sacrifice yourself. This Awareness does not advocate self-sacrifice, *It* advocates cooperation and readiness to assist each other without sacrifice, because when entities feel they are sacrificing, this can only go on for a small period of time before they become resentful and the resentment may turn to hostility and violations toward others.

The Plight of the Single Mother With Children

This Awareness indicates the single mother who has more than one child probably has the most difficult life of anyone, because to raise more than one child creates a complexity in the chemistry of a family that is extremely difficult, and the mother, especially if she has to survive without financial support from some person, father, or from parents who can help, will have an extremely difficult time trying to find income, trying to work a job while still having two or more children.

This Awareness indicates that it is a problem that entities need to consider while they are very young, before they have children. Too often, young girls, deciding what they want to do with their life, think that having a child somehow frees them of parental controls and gives them emancipation from the family, frees them from the home, lets them live out in a different place, and have personal freedom.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Obviously they are hoping someone like welfare will take[3] care of them. Too often, however, the welfare program does not attend their needs sufficiently, nor as they had hoped for, or it runs out too soon for their liking, too soon for them to get their life in order. They may hope that within a certain length of time they will find their Prince Charming, who is there to support them, to raise them, to give them money needed and to help with the problems of the child or children involved.

Too often it is simply a matter of the man helps the woman have the baby, and the woman finds the man gone to another place, or to another person, and they are left with the child, hoping that welfare will pay their way until some other fellow comes along who is willing to attend to the first man's child, and these entities then are caught in a situation they did not anticipate.

When Young Girls Go Out And Get Pregnant

This Awareness indicates that it is a problem throughout this country. Many people in other countries would also have similar problems if their country has welfare programs to take care of single parent families. This Awareness suggests it is a problem partially brought about by lack of education for such young girls and that had the girls been educated or properly raised, this may not have occurred.

Of course, there are often situations in which the parents do their best to inform the children of the dangers of their behavior, but the child knows too much and the parents are "old fogies" and the child doesn't care whether the parents like it or not, they are going to have their fun, and if they get pregnant in the process, it is just too bad for the parents.

This Awareness indicates that ten years later, the child may be angry at the parents for not stopping them from being so wild as a teenager. There are even cases where some children who were allowed the permissive behavior by the parents, will turn around and sue their parents for letting them have so much permission. There are even cases where the child defies the parents' will, goes her own way, has babies and then still comes back on the parent and tries to sue the parent for letting them get pregnant so young.

This Awareness indicates, however, even when the parents have done everything in their power to keep the girl from getting pregnant, she may still come back and claim they should have done more. This Awareness indicates that these are problems in your society today that do not seem to be going away. Partly, it is because there is the welfare dole on which the young girl can expect to fall back on, if her plans for marriage do not work out.

This Awareness indicates it is a matter of priority. Whether to prioritize marriage before babies or have a baby and hope for marriage seems to be a problem that some young girls have, and it has become very widespread in your society. This Awareness indicates that it has also led men to feel less responsibility for their role in the realm of baby-making, wherein the man can simply point and say: "Go get your money from Welfare! You should have left me alone! You entrapped me! I am not going to play your game!", and thus the man avoids his responsibility, letting welfare pick up the tab.

Some Young Girls Try to Entrap Young Men

This Awareness indicates that there is something desperately wrong with the whole scheme of things. This Awareness indicates that with the way things are at present, it is tempting for young girls to try to entrap the man by becoming pregnant, for they have the naive ideology that if they become pregnant and have this man's baby, he will surely love them and want to live with them and take care of them.

This is a very naive idea,but many young girls believe in it, because they still are closely linked to fairy tales and happy-ever-after stories. Thus, they have the slap-in-the-face awakening, when they realize that their dreams are not reality, their hopes have no substance, and they are left with a child to support and no man wants to pay for it or pay for their own welfare and they have to turn to an agency of the government and beg and grovel in hopes that the government will give them some dole, some several hundred dollars a month, whereby they can at least pay their rent and get a few meals to survive on.

Problems of Being on Welfare Doles

This Awareness indicates that being on welfare is very difficult for most entities. There is really very little that they receive in terms of the amount necessary for reasonable survival. Most do not get enough to carry them through the month, even if they are very frugal in the use of the money they receive. There is no money left over for luxuries. Most need to get extra hand-outs from family or friends.

This Awareness indicates that most need to deprive their children and themselves from certain average dietary foods, buying cheaper foods that do not add to their health, but simply fill their stomachs. This Awareness indicates that entities who envy those on Welfare should be cursed by being on Welfare long enough to realize it is not some kind of enjoyment and usually not a privilege to be on Welfare. It is barely enough to stay alive.

This Awareness indicates that the problem is not so much that there is Welfare fraud or mothers who are trying to survive on Welfare in order to avoid work; the problem is that most of these mothers have never worked, do not know how to get a job, and could not hold a job if they had one. Most of them are incapable of the responsibilities of holding a job, but are experts at taking care of children in meager situations on meager budgets.

This Awareness indicates that most of these mothers are living a life of suffering with very little hope of getting out. They look for hope through other people, seeking to find perhaps some kind of relief through the lottery or through some man, or through some group of people who are organizing for better treatment of Welfare mothers, but in general they gain very little.

This Awareness indicates that as time passes, their life becomes one of more and more apprehension. Their children are growing older, Welfare will soon be cut off. They have to get a man or get some outside income somehow, but they are incapable and they have no one to baby-sit for the baby-sitters want too much in comparison to what they can earn to pay the baby-sitter.

If they get a job at minimum wage and the baby-sitter takes minimum wage, the money goes to paying the baby-sitter, and there is little or nothing left over from the earnings. These entities are in a difficult situation. Their only logical hope, for many of these entities, is that somehow they can get pregnant again and start the Welfare cycle over with the newborn child. Thus, the Welfare mother may then have another child and have two more years on Welfare in which she can get food stamps and collect a few hundred dollars a month to take care of her children.

This Awareness indicates it is a sad situation. The government should not be involved in creating Welfare dependence. There is the question of whether a government, in taking care of a needy person, is doing any good for the person, or if the government is simply sustaining the lifestyle of that person so that the person can continue living that non-productive lifestyle, having more children and continuing to feed off the system without giving something back in return.

Does Welfare Help or Hinder the Needy?

This Awareness indicates that this is the question many people are wrestling with today: Does Welfare help or hinder the needy? Does it help them by feeding them? Or does it hurt them by encouraging them to stay on Welfare?

This Awareness indicates that there are certain efforts by some entities to change the Welfare program by cutting the limit to two years, so that an entity cannot remain on Welfare for more than two years.

This Awareness indicates there also needs to be an accompanying program in which the father of the child is expected to attend to the costs of raising that child, so that the entire burden doesn't fall on the mother and on the government alone. This Awareness indicates that to some degree, this has been incorporated into the justice department, wherein the father is found, is made to help pay for the costs of raising the child, but too often the father simply drops out of sight, refuses to work, or works underground, taking cash for labor, or somehow avoids his obligation, perhaps working under a different name or in a different state, so that no one can find him to collect on his debt to his children.

This Awareness indicates that the Welfare reform, if it comes, should include some way of tracking down the father, putting the father on notice, making the father help pay for his children and alleviating or eliminating the easy-out that fathers seem to choose after having a child so that they can't simply pick up their tent and go.

This Awareness indicates that it is a situation that you will hear more about in the coming months. It is a situation that will undergo change. It is not something that can happen overnight; it is not something that can reasonably be expected to cease. You cannot simply cut off Welfare altogether. To do so would cause extreme hardships, and probably a number of deaths of women and children who cannot survive without some help.

Perhaps Society is Responsible for Pregnancies

Yes, many of them have made poor judgments, and made decisions that have led to their needing to be on Welfare, and yes, they deserve perhaps to suffer some consequence, but perhaps this action of becoming pregnant as a young girl is not only the responsibility of the young person; perhaps it is also the responsibility of the society that does not properly educate young people or warn them of the pitfalls of sex outside of marriage.

This Awareness indicates that perhaps society has made it too easy for entities to jump into sexual relationships and motherhood without properly preparing them for the responsibilities and costs of such actions and if society is partially responsible for the misbehavior of the young people, are they not also partially responsible to help pay for the damage to the individual who is thus misinformed, or not informed, as to the dangers of sexual relationships prior to marriage?

Some Say Just Get Rid of Welfare Altogether

This Awareness indicates that these are questions that entities will be asking in the near future as the Welfare reform considerations are presented. There are some who simply and fervently advocate getting rid of all Welfare. This Awareness indicates it is a heartless position, but they feel it is right to get rid of all Welfare and let people suffer the consequences of being poor, of not being prepared and of not having a good job.

This Awareness indicates that because of this extreme attitude, which appears to be growing among more and more people, there will be many who suffer. This Awareness indicates that along with all of this, there needs to be some kind of social responsibility, a responsibility of society to redirect these Welfare victims, the people who are on Welfare so that they can have an alternative, so that they can, for example, go to school, learn a trade without being penalized or having their Welfare payments cut off before they are capable of getting some other occupation or having some other way of earning a living.

Society Must Pay for Mothers' Schooling

This Awareness indicates there are many entities who would not like to allow them the opportunity to go to school and these entities believe or see that they should be cut off of Welfare entirely if they should go to school. After all, they do not get their own schooling paid for; why should a Welfare recipient get free schooling? But this Awareness indicates that these entities have to have some kind of help after being trained to do nothing. Society has assisted them in becoming Welfare recipients, has promised them or implied to them that they can get Welfare if they have a baby or if they cannot find a job, and because of this implication, many entities have bought into the Welfare program.

Now they are finding the Welfare program drying up, and they want some kind of outlet. How do they get away from it without having all of their sustenance cut off? This Awareness indicates that many will say "Let them go the churches!", but the churches also have been hindered. The tax laws recently have depleted the donations that entities would have normally sent, because entities can no longer use the donations as tax write-offs in many situations.

This Awareness indicates that many entities do not donate to the churches in the way that they used to, and therefore, the churches are also strapped for money and cannot help many of these entities in the way churches were able to help in the Middle Ages, or in the past. This Awareness indicates that surely these entities who are so hostile to Welfare do not want those children and mothers starving to death on their front steps. They would like to see them go somewhere in some area of town where they are out of sight, nameless numbers, and let them starve in those areas.

This Awareness indicates the knowledgeable and compassionate person does not want the Welfare person starving at all, they want them to become independent, to learn to help themselves and to have reasonable comfort that any human being should have. This Awareness indicates that therefore, there will be many changes, many arguments, many concerns expressed over this issue, and this issue will be around for some time to come, and it will bring much discussion from many different corners with many different ideas and plans on how to fix the Welfare program, how to deal with the poor.

The "Military Budget" --the Greatest Welfare Program!

This Awareness wishes to point out one other aspect of this concern about the Welfare and the poor. The greatest Welfare program in this country has to do with your military industrial complex, wherein the greatest part of your budget goes to the military, and the military has to keep changing its needs in order to keep the factories going so that the new weapons are always creating a greater demand for more Welfare money from government, which is labeled "military budget."

Why is this military budget still so needful when there are few real areas of threat to this country? When there is basically no enemy of significance to this country, why does the military budget still demand so much energy and why do people support this military budget, which is really just another Welfare program for the super-rich, for the ones who manufacture weapons and arms and keep the armaments going, and keep the factories building these unnecessary weapons?

This Awareness indicates that some of these weapons are so expensive that one or two will equal almost as much as *all* of the Welfare recipients receive in a year. This Awareness indicates that there are things that are totally askew and out of balance in the way people look at what is Welfare and what is necessary. Which is of greater importance: weapons of destruction, or people who need help?

Clinton's four year military budget: $1.2 trillion

This Awareness does not mean to say that entities should be given unlimited help through Welfare, but suggests rather that they should be given sufficient help to get them into a kind of productive mode that allows them to become a more integral part of the society, even if money has to be taken from some of the military budget, so that these wealthy arms-makers do not get so much Welfare money from the government, and so that the poor get enough to where they can actually free themselves from dependency on the government.

This Awareness suggests that further questions may be asked. *It* got into this discussion partly because it is current in the news, partly because *It* digressed from previous discussion.

WOULD THE UNIFIED STATES OF AWARENESS WORK?

(Awareness Has Already Given the Alternative New Age Government)

FOLLOW-UP QUESTION

Well, this is a very important area that needs to be examined. I recall Awareness, in York, Pennsylvania, on the Unified States of Awareness readings, gave a proposal that under the Unified States of Awareness, that shelter would be provided, guaranteed for everybody, and enough food, and something else, I forget, but would it be of any help to try to get a program like that with those suggestions?

COSMIC AWARENESS:

This Awareness indicates this, of course, was a hypothetical idealistic society that was being promoted as something to energize. This Awareness indicates that it does not appear that the present society, under the present conditions, with a certain type of capitalism, in which a few families control 95% of the wealth of the world, would be the promoters or allow a situation like that described by the questioner to occur.

It appears rather, that this could be a small program that starts either from some proposal that catches on in a certain area, or that someone finances as an experimental approach. If it were promoted as an experimental program and caught on because it worked, then it might be accepted upon a more broad level in some bureaucratic aspect, so that somehow, or in time, these things could become integrated in your society, but this does not appear to be something that could occur soon

When introducing an experimental program, you need to have experts: sociology experts, psychological experts, the Ph.Ds to determine that this would be worth checking into, and of course they have to be given large amounts of money, either through government grants or through private grants to research such a potential program, and of course this research can go on for many years, because these entities now have jobs which are paying them large amounts for such research and for their opinions.

The longer they can milk the system for more money for more research, the longer they will keep this research going, and the longer it will be before anything concrete happens. Once it is decided that "Yes, there could be some value in this program!", then it will be a question of the next group trying to determine how it could be implemented, and this could go on for several years at a great cost of more money. Eventually, if the program continues to be funded, they may actually put it into practice, using certain control groups, and if this still works to their expectations and everyone feels comfortable with what is happening, it might become a pattern or model for some new governmental program.

This Awareness indicates however, just to get an idea and promote it, things do not happen that way in your society. It would have to go through the hoops before it could be tested, and once tested, if it survived all the criticisms and potential conflicts from different sides, it might be accepted or modified, and in the modification, it might be so changed that it is not much different from any other program.

America stretches its lead in Third World arms sales

WASHINGTON -- The United States increased its leading share of arms sales to the Third World last year, but overall sales to those countries continued a decline that started at the end of the Cold War, the Congressional Research Service reported on Monday.

Sales from the United States to Third World countries increased slightly to $14.8 billion in 1993 from $14.6 billion in 1992. But the share of America's sales in that period jumped to 73 percent from 56 percent of all weapons sales and sales agreements. Russia, the third-largest Third World supplier last year, behind the United States and Britain, hiked its sales to $1.8 billion from $1.6 billion in 1992, and captured 9 percent of the market. By comparison, sales from the Soviet Union reached a high of $27 billion in 1987.

It could be a new type of HUD or a new type of Welfare that evolves some 20 years from now, but this Awareness indicates it is not likely to have much impact, and it will require extremely great amounts of energy just to get to the point where it would be considered as a viable program.

ED's Note: For more information on this program, please refer to the booklet: "The Unified States of Awareness:The Structural Pattern for the New Age Government;$5.00 from CAC.

WHEN AN IGNORANT DAUGHTER GETS PREGNANT: IS HER MOTHER KARMICALLY RESPONSIBLE?

(Candidates for the Welfare System)

QUESTION:

If a mother has loose morals or has extremely liberal views in this area and does not make much effort, if any, to teach her daughters responsibility, and the daughter goes out and gets pregnant and all that entails that Awareness listed: Welfare syndrome; wouldn't there be karma involved for the parents on this?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that often the mother has strong morals, does not like what is happening to the daughter, but the daughter, being influenced by society, and society informing entities that there are ways to avoid getting pregnant, and society broadcasting advertisements on TV showing these young girls having great fun at these beer parties wherein the alcohol is advertised, with these beautiful girls and these young men, showing that the alcohol is that which brings them together and brings them happiness and other similar types of imageries, often influences these young people into thinking that it is okay to forget what your mother says and just to get out and have fun with your friends.

They do not see this as being immoral. They see it as having fun, and they think they have a right to have fun, because they have been so miserable at home, or at school with so much responsibility. This Awareness indicates there even is a song: "Girls just want to have fun!", and these songs and these words of influence have an effect on young girls who are often easily influenced.

This Awareness indicates that their idea of themselves is that they are young, they are beautiful, they are desired by many different men and that the men are responsible and can take care of them, and if they should get pregnant, the men will do the right thing. They are trusting in nature. They do not yet know that the world is filled with unscrupulous people. They have been protected and raised by honorable parents and they expect the people of the world to be honorable also.

This Awareness indicates that this is a generalization and not all women fit into such a category, but there are so many who *do* fit into this category that are simply candidates for the Welfare program or for single parent families, that these are the ones who eventually end up with a child and no father in the home. This Awareness indicates it is

not that they are bad people, nor do they necessarily have loose morals

What is Immorality ?

Usually, a person who is considered of loose morals is simply a very generous person, or who is very trusting and they do not have to think of themselves or see themselves as not having any morals. They can have very high morals, but at the same time, may just be very generous and trusting, and they give their body because they do not want to hurt or disappoint this person or that person, or that other person over there.

This Awareness indicates that they are generally quite generous in their expression and with their things. Most prostitutes are not selfish people; most of them are generous to a fault. This Awareness indicates that they do not think they are immoral, even though they are often told that they are immoral. What is immorality? Is it being excessively generous, even with your own body? Perhaps it is. But is generosity a fault, or is it a fault if they are generous with their body?

Where does generosity become a vice instead of a virtue? There is often a fine line between the sinner and the saint.

BIRTH CONTROL INFO AND CONDOMS IN THE SCHOOLS: WHY DO SOME GROUPS FIGHT AGAINST THIS?

FOLLOW-UP QUESTION:

Well, prostitutes are supposed to know and take the responsibility of birth control, but the teenage girls, even though they're taught birth control in the schools, and ironically, there is a very vocal group of entities in this country who are even against *that*, namely right-wing Christians I believe most of them are, and some of these schools that offer birth control pills to the girls and condoms to the boys and being attacked by these people even though I read recently that the latest polls show that the girls are having intercourse much younger, ages 13 and 14 now, and by 15 it's almost 50% of the girls in the class, or some figure like that. My question is: Isn't this a self-defeating thing, that people can't get together and understand what the lack of the birth control and the birth control information is creating for society?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative, in some degree. There is also the other side of the argument used by these right-wing groups that if you provide birth control, it is as though society is telling the children: "It's okay to have sex! Just be careful! It's okay to have sex, even if you are still children! But you must be careful!", and if this message is being conveyed by those who promote the use of contrqceptives, then does this not give a further message to the younger children who are nine or ten? Is it not something that they too will begin to think about, wonder about?--"I'm ten years old! When do I get to try it?"

This Awareness indicates that the argument of the conservatives is that by giving birth control to children at school it is encouraging more and more sex at younger and younger ages, and these entities would rather see things go back to the way they were in the 1950s or before, wherein entities normally did not have sex before the age of 18.

This Awareness indicates that there seems to be a problem. Regardless of which way entities go, whether they are protected with contraceptives or whether they are allowed contraceptives, it still tends to grow because entities do not seem to want to teach the hazards and responsibilities that go with having children when you are still a child yourself.

This Awareness indicates that parents do not wish to talk to their children about these things. It is embarrassing. It

6. is even hard to imagine your child having sex, even talking to them about it at such a young age. This Awareness indicates that because people do not wish to talk about it and because psychology has made it such a taboo to imply there is anything wrong or incorrect with sex as a form of personal enjoyment and expression, most parents are confused as to what to do when they find that their children's friends are having sex, and their children's friends are only 13 or 14 years of age.

Most parents don't even find out about this. This Awareness indicates that most children keep quiet because they know that their parents would not let them see these people again if their parents knew. This Awareness indicates that therefore, parents do not talk to the children. There is no one who wants to take responsibility for explaining to the children that "If you have sex and if you have a baby, it will be an extremely difficult hardship for you. You would have to get a job, work and support your child, and taking care of a baby is much more difficult than taking care of a doll."

This Awareness indicates that these children would have no idea what you were talking about. They would not be able to understand the full impact of what you are saying. To them, the image of taking care of a baby is simply putting a bottle in its mouth and rocking it back and forth. They do not comprehend the need to wake up in the middle of the night three or four times, change the baby's diapers, take care of it when it is sick, get up some way and go to work, and find someone who will take care of your baby, someone whom you trust.

They do not comprehend the problems that go along with a real live child; they simply see a baby as "This little living doll. You put the bottle in, rock the baby back and forth and its eyes close and it goes to sleep. You lay it down and go do your business." This Awareness indicates this is the way young girls visualize being a mother.

This Awareness suggests that the young girls should be given the opportunity to care for young babies before considering having a baby of their own.

ALARMING STATISTICS AND PARENTAL NEGLECT

("It's fun, fun, fun, until daddy took the T-bird away")

FOLLOW-UP QUESTION

But yet, if these statistics they keep putting out are true, these young girls are having intercourse and getting pregnant more and more at younger ages, how can, in the face of these facts, (or maybe these charts aren't correct)...

COSMIC AWARENESS:

This Awareness suggests the charts *are* correct.

QUESTIONER:

They *are* correct.

COSMIC AWARENESS:

This is in the affirmative. Also you will note that young girls are using makeup at younger and younger ages, trying to look more adult. This follows the same trend.

QUESTIONER:

So, it seems then the root of the problem is more in our society than...

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates it is not so much the parent's fault. The parents, normally, are out trying to make a living, trying to support the children they have already, trying to find ways to make enough money to pay the bills so that the electricity does not get shut off, the phone does not get shut off, the groceries can be purchased, the children can be fed, the house can be heated, and other things that are necessary for their comfortable home, can be maintained.

The parents do not really have time to spend great amounts of energy in watching what is happening to their children. The children's lives are being formed by television and by their peer groups in school, and the peer groups in school are interested in having fun, and some interest in the school - work appears for some of the students, but remains generally in school, and when they are out, they want to have fun, and it is very easy for an entity to get caught up in that enthusiasm.

This Awareness indicates that most good homes are very calm. There is little excitement in the home, and as excitement is expressed within a home, more problems also accompany that home. This Awareness indicates that as entities get excited and enthusiastic about something, they tend to create more reasons for others in the home to become jealous or to move into conflict with the entity who is excited, and this kind of home life in which there is excitement or negative excitement, can lead to more conflict within the home.

Excitement Can Create Bad Judgment & Karma

This Awareness indicates the same thing occurs in schools. As entities become more excited, such as during recess or after school, about some incident or about some entity, or whatever, the excitement tends to build, and it is out of that excitement that bad judgment occurs for many of these young people.

Most karma is created from entities who are young and excited. Their excitement can build over some action or over some incident or over some visualization so that a group gets caught up in the excitement and does something that hurts someone or leads to some problem.

This Awareneness indicates there is not much that the schools can do because the teachers are simply doing their job. They go to work, they do their job of teaching and they go home. They are not really into character building, or child raising; that is left for the parents. The parents, however, do not have time for character building, or child raising; they leave that up to the school, while they go to work, then they wonder: "What is my child learning in school, anyway?"

Parents Alone Are Responsible for Character Building!

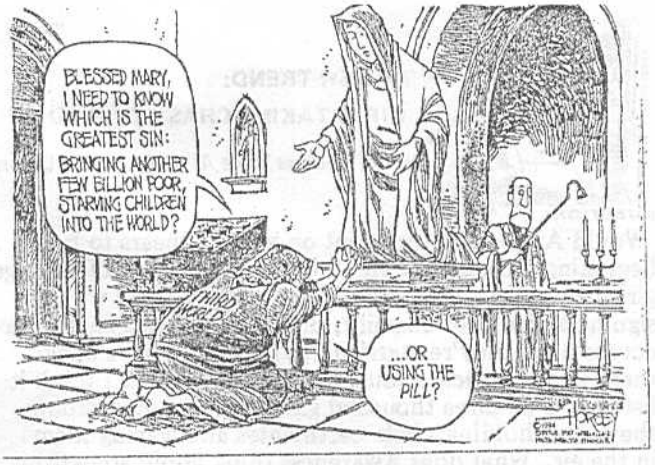
This Awareness indicates that it requires some work by the parent and some by the school, but the real responsibility for character building belongs to the parents and they cannot throw it off because they are too busy working. They are still responsible for the character of their child. If they do not like what is happening at the school, if the school tends to alter the character of their child, change it or bring it into conflict with their own values, then they should discuss this with the school, but they do have the responsibility for the character of their own children.

This Awareness indicates that it is important for them to give the child the impression that they are all working together to better things for each other. If the child understands this, there is less likelihood of the child being in conflict or defiant of the parent's values.

Parents Can't Get Dependent on Their Children

This Awareness indicates too often the parents try to get some kind of gratification from the child; the parents expect the children to look up to them, to do things for them. The parents become almost as dependent on the children as the children are on the parents, and when this occurs, it puts a great burden on the children.

Parents need to be more independent, self-contained, so that they do not make the children feel great responsibility for their welfare as a parent, because it is too big a burden to put on a child. They have not yet learned to take care of themselves. How can parents expect the child to take care of them, yet this occurs in many families.



THE VALUES OF THE PARENTS BECOMES THE VALUES OF THEIR CHILDREN

(Are the Old Morals Really "Old Hat"?)

FOLLOW-UP QUESTION (VIKKI):

Isn't the most effective way a parent teaches his child values is by looking at his or her example?

COSMIC AWARENESS:

This is in the affirmative. And this is one of the reasons why there are so many children who have embraced their parents' values and are engaging in sex at a young age with various partners. They have seen their mother or their father or are aware of their mother and father doing such, and therefore, they see this as growing into adulthood. They see this as something they must learn, and must experience.

This Awareness indicates the old morals that have been handed down were not simply rules of conduct for the sake of having rules, or of being righteous, they were also codes of society to help entities avoid some of the difficulties in life that would occur without such codes of conduct. The idea of keeping a marriage sacred, of avoiding adultery or other acts of licentious behavior was designed to keep the society from having jealousies or spreading diseases, or creating conflicts between entities avoiding responsibilities and commitment.

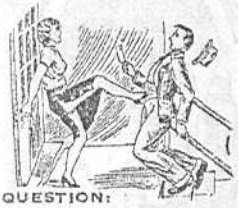
These are more like dealing with social problems ahead of time and that's essentially what these early commandments and moralities were for, to take care of the problems so they do not occur. If you did not have these mores and codes of conduct, then everything would be chaotic. People seeing your wife or spouse, your husband or your wife, would see this person as fair game at any time.

If they could simply go over and persuade the entity to come with them, families would be broken up right and left, but if entities honor a kind of social code or morality, then these families and society would remain more stable, whereby fewer fights, fewer conflicts, more social responsibility and commitments would keep people and their relationships more solid.

Evil Controllers Are Behind Society's Breakdown

All of this, of course, is undergoing a great breakdown. Society is essentially falling apart into a kind of chaotic situation. It is a chaos which can be manipulated and controlled by those who are in positions of greater power, and these entities have brought about this chaos so that they can mold and change and redirect society into a way or direction that they can more easily control than when it was based on tradition, morality and social codes as appeared in the past.

Thus, meanings and values are now confused in most people's minds, so they do not know what to value, nor do they know the meaning of life, or various aspects of life.



A NEW TREND:
GIRLS TAKING CHASTITY PLEDGE
(Will The Boys Take All This Laying Down?)

QUESTION:

Would Awareness comment on what appears to be a beginning movement here in the United States of teenage girls in certain schools and in certain churches, who are signing a pledge of chastity, that they will not have intercourse until they're married? In fact, in today's paper, there was an article about that very thing, and I think it listed two or three thousand girls in one church group; they were holding their certificates and waving them in the air. What does Awareness think about something like that?

COSMIC AWARENESS:

This Awareness indicates that it is an action that appears to be spreading. People have begun to realize the hazards of being open, loose and free in sexual expression, and many entities are waking up to the reality that it is damaging to their lives, to the lives of those who are too lacking in value systems, and some of these entities who have been educated by concerned parents are taking a stand and showing themselves to be committed to a more responsible approach in their lives.

This Awareness suggests this will gain momentum and many entities will become involved in this movement so that in due time, the entities will reject some of the efforts by those social engineers who have tried to change a working society, a society that worked, to one which is falling apart, and these entities will bring back certain values and morals that make life more meaningful and more workable for them.

This Awareness indicates there will be a new value set upon purity, chastity, and many of the young men in the future will strongly seek out those girls who have taken such a vow, seeing this as something very special, and this will help to return to society a new resurgence of certain old moralities that once were lost.

If it goes too far, and people become overly focused on sex to the point where it is something that becomes an obsession, this could become hazardous, throwing entities back into problems that are psychologically damaging to entities, but for a time, this appears to be a beneficial movement, one that helps to restore a balance to society.

FOLLOW-UP QUESTION:

I suspect the peer group of males won't take that laying down. They'll probably put a lot of pressure on these girls, wouldn't they?

COSMIC AWARENESS:

This is possible, depending on the individuals. As a group, there is likely to be a kind of challenge to these peer group men. It is likened unto throwing up a challenge and there will be many who will attempt to see what they can do to break down the will of those entities.

This Awareness indicates that if these entities continue to advertise their virginity, it could become problematic for them because it would tend to create challenges for certain men who may not have these scruples to respect their positioning on the matter. This Awareness indicates on the other hand, there could be many men who will respect these entities for their stand.

ALL ABOUT EXCITEMENT AND ENTHUSIASM

FOLLOW-UP QUESTION (VIKKI):

The recess excitement level area may account for something I've observed and could not find any reason for. For instance, is this recess syndrome the same thing that took over in Vancouver last night where hockey fans had a lot of enthusiasm and then it erupts after the excitement level reaches a certain point?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. In the case in Vancouver, however, the team--the Canucks--expected to win the series and lost, and the excitement built around the expectation of winning, and when the team lost, there was a mixture of anger and frustration and the excitement turned from elation to frustration and therefore caused many people to act negatively.

[ED's Note: thousands of Canadian fans rioted in the streets, overturned autos, smashed windows and rampaged through the downtown section of Vancouver, trashing everything in their way.]

FOLLOW-UP QUESTION (VIKKI):

It seems that celebrations over winning, and that sometimes brings violence too...there was something about judgment going out the window when excitement reached a certain point?

COSMIC AWARENESS:

This is in the affirmative; that it is very difficult for entities to be judicial when they are overly excited. You cannot think logically when you are overly excited. You must be relatively calm to be logical and objective. This Awareness suggests that entities who keep a calm household will have things run more smoothly and if entities simply watch for excitement levels starting to build and interrupt the excitement with something that is more calming in nature, they can help to prevent extreme and sudden hazardous or accidental or disruptive events from occurring.

This Awareness indicates that this excitement does not necessarily have to be negative to be harmful; even positive excitement can become distorted to the point where it creates problems. It should be watched carefully. This Awareness indicates that, for example, if someone is very excited because they got straight A's in school or accomplished some great achievement, rather than everyone getting excited and cheering and voices becoming elated, a quick response to head off that kind of excitement might be: "That's great news! Let's go out and have dinner and celebrate!"

Something of this nature, which remains calm and keeps the issue calm, while still acknowledging the benefits of the achievement can be a way of helping to congratulate the person, while still keeping the excitement level down, so that the excitement energy does not get misdirected, to cause some kind of negative reaction or response.

QUESTIONER (VIKKI):

I thought it was important to get excited about something every day, that it was something to try to do!

COSMIC AWARENESS:

This Awareness indicates that it can be helpful to the adrenalin glands; it can also create resentment from others who do not feel your same excitement and caused them to feel left out, or somehow resentful that you feel so good. This Awareness indicates that it may become contagious so that everyone gets excited and wants to do something exciting, and in that effort, someone gets over-excited and causes something to happen.

It is just a general rule that homes that are more calm have better results. Children study better, get better grades.

This Awareness indicates this being an example of why entities should be reluctant to make condemnation type judgments on others. There are always factors that are not made available, so that it is very difficult for one person to judge another, and know the judgment is correct. It is likened unto the saying: "You cannot know another person until you have walked a mile in his moccasins." This Awareness indicates actually, even that does not let you know the other person, but it is an example of a message suggesting that one who is inside the experience of another is not suitable to be his or her judge.

The only people suitable to judge are those entities who are their own selves and can judge themselves, and even these entities may have biases. This is why this Awareness suggests that entities not judge; discern as much as is possible without judgment.

THE DEVIC KINGDOMS: DO THEY REALLY EXIST?

...OUR MULTIDIMENSIONAL UNIVERSE...

QUESTION:

A question from W.E., Minneapolis, Minnesota. "I would like to ask Awareness about the nature spirits as presented in the book *Other Kingdoms,* by Hilarion. In different vibrational etheric realms coexisting amongst our physical dimension, Hilarion states there are numerous nature spirit kingdoms who have specific tasks to perform in the creative lifestream. There is a Devic kingdom, whose function is to feed spiritual energy to trees, grass, etc.; spirits of water and air, and even the kingdom of Pan, whose ruler is the god Pan, an entity who presides over a realm of centaurs, Yoda-looking entities and such, in a parallel division, but existing at a higher vibrational level. It was stated that the Devic kingdom existed to serve mankind, but the kingdom of Pan is not subservient to humankind; it is on a road of evolution similar to we humans of the third dimensional reality, learning the lessons of life and evolving toward the Creative Source. These realms are not a part of Middle Earth, but coexist in different vibratory planes, somehow intertwined with the physical dimension. Could Awareness comment and shed some light on these entities and perhaps explain how these kingdoms came into existence and their relationship to the physical dimension as far as similarities or differences in soul growth, karma and belief?"

COSMIC AWARENESS:

This Awareness indicates that these parallel universes or parallel dimensions, depending on how one wishes to term these things, are related to that which has been called the electromagnetic scale, wherein vibrations of different frequencies contain octaves that interpenetrate each other, just as in music. For example, if you hit the note 'C', middle C, not only will you receive the dominant tone of middle C, you will also, through harmonics and what are termed overtones, you will cause a vibration on all of the lower C notes and all of the higher C notes, such as on a piano or on a harp. These will vibrate out of sympathy or sympathetic vibration in which the note triggers all other notes of same frequency to vibrate in harmony, or in sympathy with the first note.

In addition, the string being struck, Middle C, will have its overtones in which both halves of the string will vibrate an octave higher and in addition, both halves

will divide into two further halves or quarters of the full string, so that still another octave is heard or vibrated, in addition, those continue to split and vibrate also, ad infinitum, so that the note C is heard on multilevels in different octaves. It is the same with regard to the physical universe which from your perspective may be seen as likened unto the note C, or in a different sense think of it as the 'do' in 'do, re, me,' and the next higher octave being 'do' again, perhaps reflecting the astral world, and then the next higher octave being another 'do,' reflecting still a higher world, an etheric world, etcetera, ad infinitum.

This Awareness indicates that it is in this manner that beings exist in multidimensional levels. It is also possible that entities in raising their vibrations high enough up the scale of the chakras, from the 'do' through the 're, me, fa so lah ti', may then peer into the next 'do', or next octave above the one in which they reside, and glimpse another dimension; that it is possible for glimpses between dimensions to occur under certain circumstances. That creations within those dimensions occur in the same manner, even if they are different, and it is also important to realize that within a dimension there are many other frequencies and notes involved that create great varieties of beings, plants, animals or other creations for that dimension to house.

The Blue Planet & the Green Planet

This Awareness indicates that the planet earth as seen in your dimension also encompasses and is seen in other dimensions, so that there can be numerous beings living simultaneously on the earth, but in different dimensions. This Awareness once indicated that entities on earth came from the Blue Planet. Sometime later this Awareness indicated when asked: "How did entities get here from the Blue Planet, and where *is* the Blue Planet?' This Awareness indicated it *is* the earth; that the earth exists as the Blue Planet as well as the Green Planet, but entities had to travel great distances through another octave to reach planet earth from the Blue Planet earth.

This Awareness indicates it is a reference to movement through these octaves. Essentially, the movement from the Blue Planet to the Green Planet as one movement of humans from etheric levels into physical form; that there are parallel worlds inhabiting the same time and space. There are people using your schools, your homes, your cities, your buildings, whom you do not see. They see these buildings from a different dimension than you see them, and they use these buildings and they assist in creating these buildings, and assume that they are building these things. There are entities who work on vegetation to make the plants grow, and in so doing, you enjoy the plants and you feel that perhaps because you planted them, they are yours, but these entities see that they have planted the plants and they may not even notice you being involved.

Likewise, you may put forth the energy to build a building, and while you are working on the building, entities from other dimensions are watching the building grow and develop, much as you watched the plant grow and develop, and when it is completed, they may move in and set up shop, even as do your own people. This Awareness indicates there is room enough for everyone in a multidimensional universe, and there is room enough to share in a multidimensional universe, but it is important that entities not destroy these levels and layers between the universes, for anytime destruction of this nature takes place, you are also affecting others in other universes which are using the same time and space.

This Awareness suggests that entities need to become aware of more than their own universe and become aware that the trees which you destroy are not only your trees, but the trees of the nature spirits; that nature spirits can become very frustrated when their work is destroyed repeatedly, repeatedly, repeatedly, so that they cease to work for humanity, if they feel it is pointless. It would be much likened unto humanity refusing to build any more buildings if storms continued to tear them down repeatedly, repeatedly and repeatedly.

PAN AND YODA-LOOKING ENTITIES?

FOLLOW-UP QUESTION:

Is that information valid? It talked about the god Pan as the entity who presides over a realm of centaurs, Yoda-looking entities and such, but existing at a higher vibratory level, and is on a road of evolution similar to humans.

COSMIC AWARENESS:

This Awareness indicates that this as being a perception by the channel of this information; that the perception as being less than accurate, but relatively meaningful. This Awareness indicates that the concept of Pan as that which developed out of Grecian mythology and has a kind of metaphorical meaning symbolized by the image of a half-man, half-goat character, simply meaning the same thing as something evolving from animal, or animal nature, into mankind, and it is symbolic of the free spirit in movement.

This Awareness indicates that it is likened unto using such symbolism to convey a picture or message or image which is based on but a symbolic premise rather than an actuality. This Awareness indicates that these things exist in as much as the mental concepts exist, but then of course, you yourself are mental concepts in existence, based on images that have developed from imaginary beginnings, so in this sense, this is accurate as a description, but if you were in the other dimension which is being described, things would not look the same to you as the description that was given.

This Awareness indicates that essentially, images and perceptions in many of the other dimensions can take on whatever feature entities wish to see. It is much likened unto a dream state; less real in some ways than the physical world because the physical world is likened unto a composite of multidimensions. Some of these other dimensions are of lesser densities and more pliable in the manner that dreams are more pliable. The realm associated with Pan by those who have created the myth and filled this imagery into a particular frequency or vibratory rate known as a dimension; that realm is not solidified to the degree as earth and therefore it can take on mental changes more quickly and easily.

In other words, the imagination can have greater control over the appearance of things in that dimension so that an entity, entering into that dimension might see things and perceive things differently than would a second entity who comes in to that dimension.

DEVASTATING THE RAINFORESTS: WHAT EFFECTS ON NATURE SPIRITS?

FOLLOW-UP QUESTION:

What effect on the nature spirits working in the rainforests, for example, will the devastation of these rainforests have on these entities?

COSMIC AWARENESS:

This Awareness indicates you must understand that the nature spirits get their sustenance from their crop and they work to bring about plant growth and then they feed on the aura or energy emitted by vitally charged plants. They do not eat the substances. They do not eat the leaves or fruit of the plant, but they absorb the energies that are emitted by healthy plants and they raise the vibration or frequency of that energy in the same manner that humans change food into energy and then they put that energy back into the plants to grow still more vitality for those plants.

If the plants are destroyed, the nature spirits are weakened, and in some cases wherein a whole forest is made desert, the nature spirits are destroyed totally. It is not that they simply go where there are more forests or living things, for their dedication is to certain areas, certain plants and if that plant is destroyed, or if all the plants in the area are destroyed, those particular nature spirits may also be destroyed. This Awareness indicates that this means that as more and more vegetable life is destroyed on this planet, there are fewer and fewer nature spirits left to attend the vegetation that remains, and in order for these nature spirits to continue to thrive and to increase, the plants of the earth also need to thrive and increase.

This Awareness indicates there are certain combinations of energies that are necessary to bring about a thriving and vital plant: temperature, water, soil, nutrients, and nature spirits are all necessary, and when any one or more of these are missing, the plants suffer, and when the plants suffer, it may affect water, atmosphere, nutrients, and weather. It can become a vicious circle so that vegetation might not receive sufficient nutrients, oxygen, weather or water, as is happening in some areas where the rainforests are being quickly turned into deserts, whereby water is being washed off rather than soaking in, whereby smoke is blocking out sunlight, whereby oxygen is being depleted, whereby nutrients are being destroyed because plant life which once put fertile nutrients into the soil has been stripped and the soils are now leached of nutrients.

CAN NATURE SPIRITS WORK WITH INSECTICIDES?

FOLLOW-UP QUESTION

Can, or do nature spirits work with crops that have been treated with insecticides and with chemical fertilizers?

COSMIC AWARENESS:

This Awareness indicates that this as in the affirmative, that they can and do; that these fertilizers and chemicals are not harmful to the nature spirits. They are more hazardous to human consumption than to the nature spirits. There is the concern that these chemicals have an effect on the energy surrounding the plant which is devoured or absorbed by the nature spirit, but that is not a problem to the nature spirit, for most of those chemicals and poisons and the fertilizers reside close to the plant and emit energy only outward, a very short distance from the powder of the chemical, and the nature spirits absorb their energies from a greater distance from these plants.

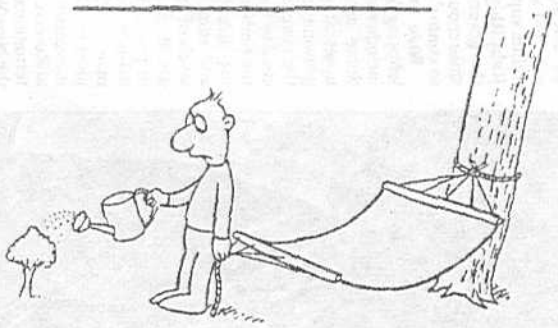
FOLLOW-UP QUESTION (VIKKI):

Hearing about what a hard time they have in a lot of spaces makes you feel like you don't want to even cut your grass. Are nature spirits happier with wild, untended areas, or does it make any difference to them?

COSMIC AWARENESS:

This Awareness indicates that they do not worry about that kind of clipping and cutting if the grass, the lawn, the bushes are trimmed for the purpose of improving the appearance and growth of the plants; that brings them into harmony with the one who is attending the yard. They see this as a suitable design. It is when entities rip out plants with disrespect for the plants, cause the plants to be butchered and torn that these nature spirits become frustrated in their purposes.

This Awareness indicates that even wherein there are those plants singled out for destruction, the nature spirits are not that upset or frustrated, so long as the *attitude* of the one attending the lawn is of good will toward vegetation, thus, when one plucks out a thorn or thistle from the lawn or a weed or crabgrass, these nature spirits are not disturbed by this action, for they recognize the need to have different types of order in regard to plant life. It is when they have spent long amounts of work tending a tree, bush or plant, and it is ripped out without any kind of meaningful reason other than some abstract energy, emanating from the person which individuals would recognize as greed, but which these nature spirits sense as being a form of hostility to the plant, that they are disturbed. To them it is likened unto watching a war.



BEWARE DRACONIAN 'ANTI-CRIME' MEASURES

Included in the so-called omnibus anticrime bill currently awaiting passage in the Congress are draconian sections, one of which, called the Feinstein Amendment, after its chief sponsor, Sen. Dianne Feinstein (D-Calif.), calls for a ban on 18 types of semiautomatic firearms and other anti-gun measures.

More ominous than that, however, are Sections 1401 and 1402, which are called "Authorizations for Rural Law Enforcement Agencies."

The text states: "Subsection (A) ESTABLISHMENT—Not later than 90 days after the date of enactment of this Act, the Attorney General, in consultation with the Governors, Mayors, and chief executive officers of State and local law enforcement agencies, shall establish a Rural Crime and Drug Enforcement Task Force in each of the Federal judicial districts which encompass significant rural lands. Assets seized as a result of investigations initiated by a Rural Drug Enforcement Task Force shall be used primarily to enhance the operations of the task force and its participating state and local law enforcement agencies."

DANGER TO FREEDOM

Subsection (B) goes on to describe the various agencies that will work within the Rural Drug Enforcement Task Forces, including the Drug Enforcement Agency (DEA), the FBI, the Immigration and Naturalization Service (INS), the Customs Service, the U.S. Marshals Service, law enforcement officers from the U.S. Park Police, U.S. Forest Service, Bureau of Land Management and any other federal law enforcement agencies that the attorney general believes are necessary.

The program of Rural Drug Enforcement Task Forces will be financed under the crime bill to the tune of $50 million per year from 1994 to 1998 and, of course, the proceeds from confiscated property.

It should be noted by all Americans that the legislation does not say property will be confiscated from those convicted of a crime but rather from those "under investigation."

In other words, if a citizen, for whatever reason, comes "under investigation" of one of the task forces, his home, automobiles, equipment, and all other possessions could be taken from him and sold to help support the task forces of what surely will represent a totalitarian state, without the citizen even being charged with a crime or given a trial.

Those who doubt the accuracy of this report might call their representative or senators for verification, asking them to explain Sections 1401 and 1402 of the crime bill, "Authorizations for Rural Law Enforcement Agencies."

And they may be wise to demand printed copies of the sections so they can form their own conclusions.

Freedom, as known by the American people, has never been closer to extinction.

HOW TO GET THIS NEWSLETTER BY MAIL
EVERY 3 WEEKS (More or less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, WA. 98507 (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will! ('How many have you served and how well?')

MEMBERSHIPS AVAILABLE (Honor System!)

INDIVIDUAL: $42
FAMILY: $52
CONTRIBUTING: $77
SPONSORING: $144
PATRON: $1000
ENDOWING: $5000

LIMITED INCOME (Broke, poor, etc.) $30 per year.

PLEASE NOTE: All dues and donations are used to spread the Awareness messages to others in an effort to awaken and prepare entities on this planet to the urgencies that must be attended to NOW!

The rise of citizen militias

In Montana and other states, fury at gun control and government sparks a call to arms

In 1938, Lee Simpson shot three people at his ranch in central Montana. Two were young men he thought had been stealing his cattle, one a deputy sent later to arrest him. After a trial, he was sentenced to death. On the gallows, just before he became one of the last men publicly hanged in America, he was asked if he had any final words. "Not that I know of," Simpson said.

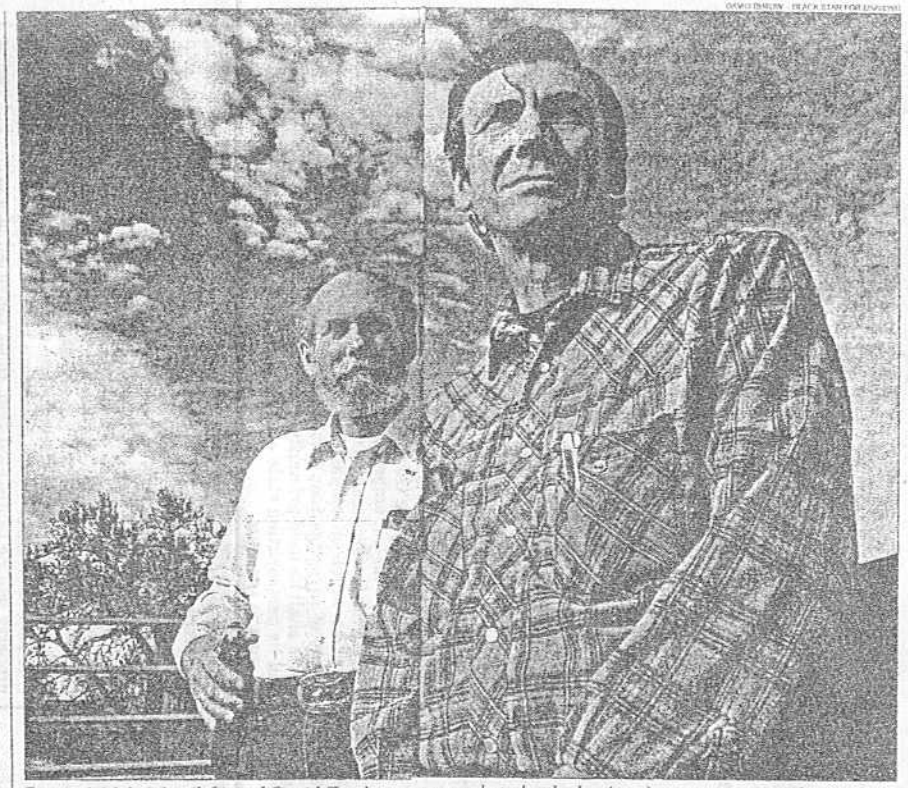
That same willingness to take the law into one's own hands is again loose in the West, especially in Montana, where there is rising resentment against government. This sentiment, of course, is shared by many Americans, but recently some Montanans have begun seeking frontier justice under the rubric of Revolutionary War-era law.

Hundreds—possibly thousands—of Montanans are joining "citizen militias." They are spurred by passage of the Brady law, which applies waiting periods to gun purchases; they fear the law is the first step toward Big Brother's confiscation of their guns. Similar organizing drives have popped up in other states, including Florida, Texas and California. Their agenda is to thwart gun restrictions and fight most government intervention in their lives. Among the claims made by more extremist militia organizers is that a secret cadre of leaders hopes to rule the world through one global government. As evidence, they cite such reports as:

- Unmarked black helicopters appearing in many locations, often threatening local residents by shining lasers into their eyes.
- Gurkha troops and Royal Hong Kong policemen regularly training in the Montana mountains.
- One-hundred-car trains filled with United Nations equipment, and cargo ships ferrying Russian and East German trucks and personnel carriers.
- The Crips, Bloods and other street gangs being recruited and trained to serve as "shock troops" and "cannon fodder" for house-to-house searches conducted by New World Order officers.

Despite these apocalyptic allegations, so far there has been no violence. Most militia organizers seem to want to keep it that way. John McGlothlen, a 47-year-old sheetrocker in Kalispell, has organized three militia meetings in the western Montana town, with peaceful turnouts of 300, 800 and 150 persons earlier this year. He dismisses the wilder rumors. "They're kind of like sasquatch," he says. Some law enforcement officers, however, are worried that more-radical groups may provoke a confrontation to win converts for their cause. Some gun-toting extremists are planning to go to Washington in mid-September to put "traitors" in Congress on trial before a "citizens" court. There's also concern that in hotbeds of discontent, extremists may elect a sheriff, giving them access to law enforcement databases and intelligence reports.

Meeting of the minds. *A Militia of Montana gathering*



Ever watchful. *John (left) and David Trochman are ready to battle the American government, if necessary.*

Militia proponents in Montana cite both the state Constitution, which allows for an unofficially organized militia, and the federal Constitution as legal bases for a citizens' militia. But state authorities dispute these interpretations. Flathead County attorney Tom Esch says militia organizers ignore other constitutional amendments and court cases, which stipulate that the National Guard is the state's only militia and that any militia must be "legally summoned" under civilian-government control.

Legalities aside, feelings are running high. In April, in Eastern Montana, 15 or so men, calling themselves "freemen," placed million-dollar bounties on a county judge, sheriff, county attorney and other local officials who they felt were infringing on the freemen's rights by seizing and auctioning land that had been foreclosed. Though not directly connected to supporters of a citizens' militia, the freemen share many of their beliefs. Four freemen were arrested on charges including disturbing the peace and threatening a peace officer. But a dozen, mainly farmers and ranchers who had lost their homesteads to foreclosure, were still at large.

Opposition to gun control is the catalyst that spawned growing support for the militias. Many of the state's 800,000 residents believe Montana's crime rate is relatively low because their weapons are a deterrent. "These people understand the Bill of Rights and the right to keep and bear arms," says Bill Boharski, a three-term Republican state legislator, "and when somebody starts infringing on those rights, they get concerned."

Militiamen and women have other reasons for long-simmering anger against government. Their fears and outrage have been inflamed by two recent incidents, called by some the Lexington and Concord of the 1990s. One is the Branch Davidian conflagration in Waco, Texas, last year; the other is the 1992 standoff in Ruby Ridge, Idaho, between Randy Weaver and federal agents, which left one agent and Weaver's wife and son dead. To some militia supporters, Waco and Ruby Ridge are evidence that the government is a tool of sinister outside forces seeking to control the United States.

Wide grievances. Groups lobbying for a citizens militia include many types of people. Some are ordinary citizens upset at what they view as growing federal intrusion into their lives and who are threatened by the economic woes in the timber, farming and mining industries. The freemen and some others believe all levels of modern government are illegitimate. Some refuse to pay income tax or carry a driver's license. Red Beckman of Billings, one of the most influential people in the movement, says, "The Federal Reserve Bank, the IMF [International Monetary Fund], the New World Order and all that gang" seek dictatorial control of the world. Some are conservative Christians who support home schooling and are particularly upset about homosexuals. Finally, there are white supremacists and neo-Nazis, whose groups have been growing in the Northwest.

In Noxon, the Trochmanns—brothers John and David and David's son Randy—have started MOM, the Militia of Montana, Alpha Unit. They attend gun shows and other militia's organizing meetings throughout the Northwest, selling their video- and audiotapes, literature and pepper-gas dispensers. Human rights activists in Montana say the Trochmanns have been members of the Aryan Nation and antisemitic Christian fundamentalist groups. The Trochmanns deny that, claiming there are Jews, Asians and blacks in their militia. Sitting in the tiny town's only cafe, the Trochmanns rail against the U.S. government.

Randy: "They've perverted the intent of the Constitution and come up with a bastardized form of illegitimate government."

David: "Three hundred families run the world and plan global conquest."

John: "We don't want bloodshed. We want to use the ballot box and the jury box. We don't want to go to the cartridge box. But we will if we have to." ■
