IS IT TRUE THAT NOTHING COMES TO PASS WITHOUT THE PERMISSION OF THE DIVINE ?

C.A.C. General Reading, September 8, 1993

QUESTION:

A question from G.L., Lapeer, Michigan. "It has been written in a book entitled *The Spirit Book*, that *nothing* comes to pass without the express permission of God. In the Bible we read that the very birds, that every flower, and yes, even a leaf, is under God's care; that nothing happens to them except that it be by the Will of God, or the express permission of the Divine.

"Also in the Bible you can find where it says we should not condemn ourselves or others for what the Divine has allowed to happen. In light of what Awareness has constantly said about faith and hope, it sounds as if everything is moving along and unfolding according to the allowed and expressed Will of the Divine.

"My question is this: Could Awareness explain more fully for us, the "idea" that nothing comes to pass without the permission of the Divine?"

COSMIC AWARENESS:

This Awareness indicates that *It* has expressed this in various ways before; that the Dark Force is essentially a force that assists in driving entities to the Light; that when the Dark Force acts, it may perceive itself as having an innate power and may see itself as gaining in greater power, but the Divine allows this to occur only so that it can drive the entities who are confused or uncertain toward the Light, much like the wolves drive the caribou so that the weaker caribou are caught and eaten by the wolves and the herd becomes stronger in the process.

This Awareness indicates that the amazing thing about the Dark Force is that it tends to think it has control and that they are in power simply because the Forces of Light often do not do anything to stop the Dark Forces, and many entities think that the Dark Forces have great power because they are active and the Force of Light does nothing to stop them.

This Awareness indicates however, that the Force of Darkness can only see within a certain narrow range of activity, and while it may see itself within that particularly narrow range as being greater than the victim or its mischief, believe itself to be strong and powerful, it does not see the greater picture that is witnessed by the Higher Forces of the Light, of the Divine.

This Awareness indicates that only when the Dark Force has completely played its hand and has made its move, to the point of no return, does the Force of Light then turn Itself on so that the Dark Force realizes the trap it has put itself into. This Awareness indicates that the Dark Force often sees itself as moving for conquest, but once it has made its move and cannot retreat or back out, it will realize it has simply entrapped itself and there is no escape for it.

God, the Divine Force is Defined

This Awareness indicates that the Divine Force of the universe, that which entities refer to as God, is a living energy that permeates all things. It is a Life Force. It is everywhere present. It is all-knowing, and it is what entities refer to as God. God is not simply a portion of that Life Force, of that Universal Life Force, that sits in some body of a humanoid type shape that is often described or acknowledged as a kind of anthropomorphic being, sitting there with a white beard and long flowing white hair as an Einsteinian type god.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

— Paul Shockley, Interpreter

This Awareness indicates that *It* is indeed not human-shaped at all. *It* is indeed consciousness, ever-present throughout the universe, and man as image of that Divine Self is a reflection in consciousness, not in body shape of the image of God. This Awareness indicates when entities understand this they will have a more clear realization of what God is, and that God, the energy field throughout the universe, the Life Force throughout the universe, the ultra Consciousness that lives everywhere in the universe, is the Divine, and sees the Dark Force for what it is, and that this Dark Force which is a promoting force for death, is very finite, very limited, for the Life Force of the universe is eternal and continues, regardless of whatever death is caused by the Dark Force.

There is No Way the Dark Forces Can Win

This Awareness indicates when entities understand this, they will also realize there is *no way* by which the Dark Force can win, can gain control, or can rule supreme in the universe; therefore, by the very nature of existence, the very nature of consciousness in the universe, the destiny is determined. It is likened unto the seed determining the destiny of the tree that grows from the seed.

This Awareness indicates however, that this does not mean that entities should simply sit back and wait for God to take care of everything, and that they should simply avoid any responsibility for their own actions or for the actions of those around them, for the responsibility that entities learn in life is also part of the general outgrowth of the Divine Will, and if entities can learn something from this, it is indeed to their benefit.

There is a certain degree of free will involved which allows entities to have a kind of destiny based on their own actions, but regardless of the actions of individuals, the ultimate universal movement and destiny of consciousness will continue on its course, with or without the benefit of the human involvement. It is for the soul of the human individual to work toward his or her own spiritual evolution.

If an entity does not wish to do so, the entity's future destiny may suffer, but the universe itself, the Divine actions of the God, will continue *Its* flow and movement according to *Its* own destiny, even if the human cannot keep up. The suffering, in other words, of an entity who is negligent of his or her soul growth will not affect the direction and evolution of the universe, even though it may affect the personal efforts of the individual in his or her personal evolution.

This Awareness indicates that this appears to be a problem for some entities who think that there is no point in struggling to become a better person, because the wheels of the Gods continue with or without your help. This Awareness indicates the individual who puts forth effort will evolve and gain, while the individual who is negligent or negative in expression will begin a downward evolutionary cycle that will be deteriorating to the soul, even if the upward movement of humanity in general continues to evolve spiritually and physically on all other levels.

Where "Free Will" Comes In

In other words, your own destiny is not necessarily totally in the hands of God. God has given you free will to make your destiny according to your own intentions and willingness to rise to the occasion or to sink in deprivation and deteriorated evolution, if that is your choice.

This Awareness indicates in reference to free will, most activities of humans are based on their own conditioning. The conditioning is based on their experience and their programming from themselves and others, particularly from others, but there is always one area in anyone's evolution that supersedes conditioning, if one wishes to use his or her own personal free will, and that is the choice of one's attitude.

One can have an attitude that meets with each moment in a positive manner, to help the entity overcome the negative and to reach for more positive expressions, or one can have an attitude that looks for some negative to cling to, such as the entity who says, "Everything bad happens to me!," in order to gain some kind of excuse for sympathizing with self, or to get others to sympathize with self, and this attitude as that which may be of a negative unhealthy nature.

This Awareness indicates the entity has a choice of what attitude the entity wishes to experience in each moment, and the entities who choose the negative experience and who accept an attitude of negativity will have their negative reward. This Awareness indicates that with this in mind, entities who wish to have a positive outcome should recognize the importance of a positive attitude regardless of what is occurring in his or her life, for this may be the only area where you *do* have such freedom of choice.

IS GOD REALLY IN HIS HEAVEN AND ALL IS OKAY ?

(The Positive and the Negative Views of Life)

(FOLLOW-UP QUESTION):

Then essentially, when the poet Wordsworth wrote, "God's in his heaven and all's right with the world," he was stating an absolute truth?

COSMIC AWARENESS:

This Awareness indicates that this was so, particularly from his view of the world. Another entity who has a more negative attitude might say, "God is in his heaven and he has simply deserted us on earth!", and with this attitude, the entity would be making a different form of reality for himself, and if, holding that attitude, the entity should find himself in a negative world, he would feel that he has properly evaluated reality.

This Awareness indicates there are many ways that entities can interpret reality and be accurate at any given moment. One can look at reality and say: "It is a terrible experience, it is a terrible place to live!" and find reasons to prove by evidence that the world is a terrible place to live.

Another person, even living during the same time and the same place can say: "This is a beautiful place!" They can point to the flowers, to the trees, to the sky, to the sunshine, to the fresh air, all of which can be seen as evidence to prove it is a beautiful place to live.

This Awareness indicates that whatever you seek, you generally can find. If you seek evidence of negativity, that is what you will find, and you can prove the negativity you see is real, If you seek evidence of a positive joyous nature, you can find that positive and joyous evidence to indicate the reality of your positive view of things.

The question is: Which entity is going to have greater happiness? The one who proves that life is negative, or the one who proves that life is positive, and produces positive benefits? This Awareness indicates obviously, the one who can see the more joyous experiences in life will have a more joyous life. The one who sees only negatives, is likely to have more negatives as witness to his or her life.

This Awareness indicates that the realities of these two different views of life may each be true. Each, of course, is ignoring certain other elements. The negative view of life ignores the positive, the positive view of life may ignore the negative. The realistic person who witnesses both may have both negative and positive experiences in his or her life, even simultaneously. This Awareness indicates it is a question of which the entity prefers.

The entity who says: "I want both the negative and positive aspects of life to deal with!" may view everything from a very realistic level, witnessing both positive and negative experiences equally. The one who sees the negative view of life and ignores the positive will find all kinds of reasons to complain, all kinds of reasons to criticize, all kinds of reasons to point out what's wrong with life.

This Awareness indicates the entity who sees the good and ignores the negative will find all kinds of reasons to be happy, all kinds of reasons to be joyful, and many will look at him and say: "You are a foolish man! You laugh at everything. You enjoy things even when they are miserable!" And the entity might say: "Well, maybe I'm foolish, but I sure enjoy life!"

How the Collective Reality Works

This Awareness indicates that each entity has a choice of how to approach and how to create the reality that he or she lives in, and the reality is in a sense personal reality for them. There is also the collective reality that allows for all entities to have the various choices.

If all entities in that collective reality were to see the world as a positive enjoyable place to live, they would naturally keep each other happier. They would make it joyful for each other. If some of the entities see it as a negative place, they are going to make sure that others also see the negatives in life.

Thus, the collective reality can have its negative side as well as its positive side, and entities can see both the positive and the negative in life. This Awareness indicates that it is a matter of personal choice. It is a matter of collective choice as to how entities wish to experience life, but for the main part, it is matter of which attitude an entity chooses to view the world from.

If Unhappy With Your Life, Change Your Attitude!

The rose-colored glasses, in other words, are really your attitude toward which you approach the earth, the reality of your life. This Awareness suggests that you may wish to alter your perception by altering your attitude, if you are not happy with the life you live. Change your attitude, change your life. If you are unhappy with the situation you find yourself in.

If you are unhappy with all of the negatives in your life, begin to look for the positives. Look for those things that are nice, that you may have ignored. Notice the flowers that you have trampled on because you were too busy thinking of something else. Notice the children's smiles, and their innocence that you may have been annoyed by when you were so concerned about some negative consideration.

Notice the friendliness of a neighbor that may have irritated you because they seem to be meddling or giving you attention when you were busy mulling over a problem. This Awareness indicates that if you pay attention to those positives that you may have been ignoring and give less attention to the negatives that have been haunting and driving you crazy, you may find that those positives grow stronger and fill up more of your life, and more of your thinking, and the negatives diminish proportionately as time passes.

This Awareness is not trying to say that you should ignore negative experiences to the detriment of yourself. If you have a phone bill that needs to be paid, to ignore it will only complicate matters. It is better to deal with negatives and neutralize them as soon as possible, for many times the negative must be dealt with; *It* is simply saying: Do not let the negatives take over your entire life to where you are hounded by them and have no room left for the positives of life.

Find room to give more attention and to enjoy the positive sides of life. This Awareness indicates if for example, your telephone bill needs to be paid, you have the choice of spending whatever time necessary to pay the bill, or you may wish instead to resist paying it, to feel anger about paying it and to dwell upon it for several days, becoming more and more negative and hostile toward it and then paying it, or letting it go another month, until the phone is shut off, and then lamenting and being angry because your phone has been shut off.

These are ways whereby entities can deal with a situation either in a positive and direct manner, or in a manner that allows the situation to take them over and affect their emotions and their time and their money and their energies in a greater way than is necessary. This Awareness indicates that it may not be a telephone bill we are talking about, it may be some other situation in your life.

Perhaps it is a relationship with someone, and your attitude toward that relationship becomes more and more negative to the point where it is haunting your every moment, driving you into fits of rage or overwhelming depression, or you can simply deal with the relationship in a way that dispenses it from your life. For example, deciding that if you can't get along with the person, then you will simply not communicate with the person, or you'll communicate in a light way that does not call up these heavy depressing energies.

This Awareness indicates that everyone can develop problems in their life, and everyone can choose what problems they will deal with in their life, and everyone can determine whether to toy with these problems, prolong them, milk them for all there is available in the problem, to keep the problem dangling before them from day to day, never really reconciling the problem, never ending the problem, keeping it there in order to have something to do, keeping that negativity hanging in front of their eyes at all times.

Entities who do this dwell in the negativity of a problem, and if they develop this way of dealing with problems as a kind of habitual way, then their life becomes centered on that habit of making problems worse than they really need to be. This Awareness indicates that the same entity could learn to take care of a problem more quickly, dispense with the problem and move on to something else that is more enjoyable or less oppressive.

It is a matter of attitude. What attitude do you want to project toward life?, toward life's situations?

THOSE WHO VIEW LIFE AS "MEANINGLESS"

(Somewhere Between the Elephant & the Wisp of Smoke)

FOLLOW-UP QUESTION (VIKKI):

Aside from positive and negative perspectives, what about the one who sees life here as meaningless? I had an ex-member write that he sees that what humans do is irrelevant because God and earth will go on with or without mankind. I can see that is true, but I'm uncomfortable with that perspective, because what's the point of doing anything, if that's the perspective you operate from?

COSMIC AWARENESS:

This Awareness indicates that this as a kind of nihilistic approach to life, and has been the basis for many entities in their approarch; that nothing is meaningful, nothing matters, and that they might as well not exist. It is a kind of non-existent approach to life. "Why should I worry? Why should I care? Why should I apply myself to making something of my life, to helping humanity or to doing anything? Why not just kick back and watch the old world go by until the day I die?"

This Awareness indicates that this is the approach that some entities live by, and it is their choice. If they wish their life to be meaningless, then they can look at life as meaningless, and who can object to that approach? But who wants to have that approach put upon them?

This Awareness indicates that if you look at life as meaningless and you see it as meaningless, it generally reflects on your own behavior, making most of what you do relatively meaningless, and you cannot have much quality or sense of purpose or meaning in your life. Your relationships are meaningless, therefore, your relationships are shallow. You are like a butterfly, passing through the earth, a lifetime of fluttering without ever really touching anything with much pressure or gravity.

Consider that kind of fluttering life with a life of, for example, the elephant, which would be the opposite extreme. Wherein the elephant walks upon the earth, its presence is felt, its presence is known. It makes its mark with every step, leaving a track with every foot that touches the earth. The elephant's life by no means is irrelevant. It is relevant. The very fact that it moves and steps and goes from place to place is meaningful.

This Awareness indicates that it is a matter of choice, whether you want to simply be a wisp of smoke that passes through life hardly noticed and making no impact on anything, or whether you want to be somewhere in between that wisp of smoke, and the elephant. Whether you want to make a mark on life, or to be recognized for something you do, or whether you consider living as irrelevant, for indeed, as you say, the movement of the winds, the streams, the weather, the movement of the earth, the planets and stars, all this will go on with or without you.

The Beatnik Philosophy and the Hippies

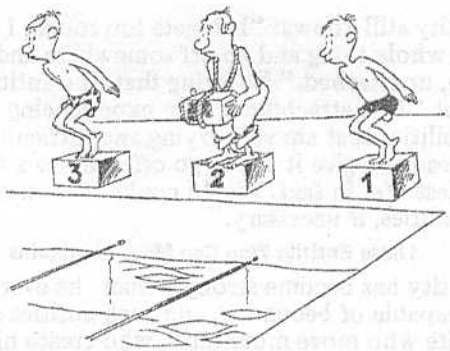
This Awareness indicates that this essentially is nothing more than the same approach and philosophy that the beatniks wrestled with, wherein they said "All life is false and phony! Why get involved? We're beaten! We might as well just forget it! Just step out of life! Step out of the mainstream of society and watch the fools go by doing their unimportant work which they think is so important!"

This approach *is* an approach that entities can use to excuse themselves from life. "Pardon me life, I didn't mean to get involved! I'll step out!" This Awareness indicates that it is one way. It is one approach. It is one philosophy which entities can take and live if they so choose. The hippie movement recognized the truth in the beatnik movement, but said: "Sure, it's perhaps all phony and meaningless, but as long as we're here, why don't we enjoy it? Why don't we have some fun with it?," and so they began working, living, doing things that they enjoyed doing.

This Awareness indicates that many of these entities in the hippie movement became involved in things and then found themselves perhaps joining society in a way that allowed them to play the game. Even though they knew it was all phoney, they could get involved with the game, become re-absorbed in society without becoming enmeshed in the facade and social activity in such a way as to become absorbed totally by it.

They kept their individuality, worked at their jobs knowing that they could walk off the job any time they chose, knowing that it was not a life and death struggle, knowing that it was simply a job and they were getting paid for it, and they enjoyed the use of the money and what it bought them.

This Awareness indicates that it is the same with any individual looking at life. You can get involved without becoming entrapped, for if you recognize that it is simply a situation and you don't have to be involved in it, if you recognize that it is a life that can be ignored, then you also should recognize



that it doesn't have to be ignored. You have the right to get involved in life, and you may enjoy the involvement, and if it becomes too heavy for you, too difficult, rather than going insane or committing suicide, you can simply step out and look at it again from an uninvolved state, from an uninvolved viewpoint.

So, you step out of life long enough to reassess your place in life, and when you have regained your balance, you can step back into life and get involved again with the relationships, with the activities, with the obligations and so forth and enjoy yourself in the game of life.

This Awareness indicates usually the person who wants to step away and not be involved with life and simply let God take care of it all, usually such a person has had an experience that was not pleasant and the entity does not like the remembrance of that experience and feels that he would like to escape, and the escape being to step aside and ignore the deeper aspects of life.

Looking for the Ideal Relationship ?

This Awareness indicates that some entities use this same approach in terms of relationships. They would like to be close enough to have the benefits of a relationship and all of the pleasure of a relationship, but they want to be free to step away from the relationship any time an obligation comes up. Thus, they want the best of two worlds and seek to find the best by involvement for pleasure and departure from any obligation or pain.

This Awareness indicates that this of course does not allow the entity the full experience of the meaningful relationship, and thereby the entity, by being shallow, unattached, except when it is beneficial, can pretend to oneself that he or she has a meaningful life, but gradually the entity will discover that such a life is nothing more than that of a butterfly, a flighty approach that has no basis for deep meaningful life involvement.

This Awareness indicates that when an entity truly gets involved in life, without being entrapped, the entity recognizes that he or she can step out of a relationship, but knows that he or she can also stay in the relationship, can stay in the reality of life and remain there, even through the pain, even through the difficulties, and gain from the experience of the deeper more meaningful levels of life, of the relationship that comes from deeper involvements.

This Awareness indicates such entities become stronger and more capable of handling these energies so that the entity who goes through life accepting the deeper levels of involvement finds this to be not a burden, but a normalcy and in those deeper involvements and the obligations that go along with such involvement, the entity's feeling of purpose is seen only as average behavior for that entity. It does not seem that he or she has extended himself excessively or become too involved or taken on too much responsibility. It just seems normal.

The entity still knows: "If it gets too rough, I can simply drop the whole thing and go off somewhere and live a quiet life, unattached." Knowing that, the entity can also know that "This attachment I am experiencing has some responsibilities that are very trying and difficult, but I'm not yet ready to give it up, to go off and live a shallow meaningless life. In fact, I feel I could take on even more responsibilities, if necessary."

Those Entities Who Can Move Mountains

The entity has become stronger than he ever imagined himself capable of becoming, and such entities are the ones in life who move mountains, who create history, who make changes for the rest of the people. This Awareness indicates that when entities accept responsibilities in ways that require almost super-human strength, the super-human strength is only normal strength for such entities and it is considered super-human by those who would not dare take on a challenge because they are inclined to avoid deep meaningful actions, pursuits or relationships or involvements.

This Awareness indicates in other words, the more an entity gets involved in the deeper meaning of life, the more normal it is for them, and the more energy they can move, and the more an entity seeks to evade or avoid deep involvement in the energies of life, the weaker they become and the less capable they are of moving energies in life, of handling responsibility. It is simply a matter of personal choice, whether your life is to be meaningful or to be shallow, unattached, allowing everything to flow without you.

In other words: Are you a piece of driftwood? Or can you swim the stream? Can you buck the current? Can you get to a particular place or goal, or do you just drift with the current? It is a matter of personal decision and choice. This Awareness suggests there is no need to become upset with the entity who only wants to drift and let life pass them by, for your feeling of disturbance is not going to really affect that entity.

This Awareness indicates if it is a close loved one, and you feel your close loved friend is wasting his or her life, then indeed you may wish to put forth the effort to shake the entity up enough to get them to see your point of view, but in this case, the entity being a member, there is little reason to get too attached, to try to wake this entity and to get the entity involved more in life.

It would be very difficult for an entity who does not really know another well and who has no contact, except through the mail, to really affect the life of such an entity who wants to remain shallow and unattached to life.

HOW THE UNINVOLVED SPIRIT CAN VIOLATE OTHERS

FOLLOW-UP QUESTION (VIKKI):

This perspective is so different for me, I just wonder, if you lived life from that perspective, wouldn't you violate people all of the time?

COSMIC AWARENESS:

This Awareness indicates that this is possible, not necessarily probable. The entity may simply want to stay away from any involvement. It is no violation to another if an entity does not want to become involved in a relationship, however, if the entity tries to use another, get involved in a relationship, then break the relationship off when it is no longer of great value and shift back to the shallow uninvolved attitude,the entity could indeed hurt another by such behavior.

This Awareness indicates that this is not uncommon. It is quite common for entities to say, "I want to be a free spirit! I can't get involved! I'll only get involved long enough to make you pregnant, or to make you fall in love with me! Then I am off to my free spirit mode.!" This Awareness indicates that this is quite common and it indeed is a karmic violation. There is no justification for such behavior.

This Awareness indicates there is no spiritual excuse for such behavior. This Awareness indicates that sometimes an entity will create an attachment to another which may exist for many years, and then the entity will switch into the shallow mode and say: "I'm tired of this relationship! It no longer satisfies my biological urges, or my psychological ambitions, or my monetary aspirations, and I think I can do better! Therefore, I am calling it quits. I am off to see the world. It has been fun, but it is enough and I am leaving now!"

Such an entity, in such a shallow behavior, to shuck off a relationship as if they were flipping off an apple core without any respect or regard for the other person, who has perhaps given him or her some of the best energies or years of his or her life, without any explanation, without any concern for feelings, without acknowledging the devotion of that person, simply flicking it away like an old apple core, such is indeed criminal in the sense of spiritual obligations.

This Awareness indicates that it is indeed sad that there are people who do this. Such irresponsibility in regard to the welfare and feelings of others; but it is common. This Awareness indicates it *does* create karma, and in some future time, those entities who behave in such a way may find themselves constantly being rejected by others. Because they have treated others in such a way, they themselves may be treated in a similar manner in future experiences, perhaps in the next lifetime.

If they have been blessed in this lifetime with good looks that allow them to treat others in such a way, they may find in their next lifetime that they are not good-looking, that they are quickly rejected by others, or that they are used, and dropped and left broken-hearted, so that they might get a feeling for the kind of things they have done to others.

This Awareness indicates it is all part of karma. It is part of the cycle of life. It is part of the learning experience, for all of life is truly a learning experience. It is not simply a situation where you can play games with being involved and jumping out of any involvement without any consequence, there are consequences to all of your actions. Karma is always being created and entities will either create good karma or negative karma, and the negative karma will extract payment, and the good karma will receive payment.

IS THERE AN "UNPARDONABLE SIN"?
(More on Cimmeria)

QUESTION:

In the August, 1993, issue of the magazine *The Plain Truth*, a Christian publication, they have an article that asks the question: Is there an unpardonable sin? Is there a sin so terrible, even God won't forgive it? And they go on and describe the various attitudes and sin and arrive at the conclusion that there *is* such a sin.

Would Awareness agree with that?

COSMIC AWARENESS:

This Awareness indicates that if there *is* an unpardonable sin, it is the sin of separation from the Divine. It is pardonable, when the entity gives up the separation from the Divine, but it is unpardonable as long as the entity continues the separation from the Divine.

This Awareness indicates if this separation continues long enough and creates negative behavior toward others for a long enough period of time to where the entity can no longer find himself capable of returning to the Divine, of surrendering to the Divine, then the sin or error becomes fixed and the soul cannot be redeemed because the soul cannot surrender to the Divine.

Such a situation leads the soul then to that realm known as Cimmeria, wherein the energies of that soul are swallowed by the seething energies of other lost souls that becomes more likened unto a subconscious sea of seething energies with no direction, purpose or individuality, whereby they are simply emotional energies melted together as a kind of sea of seething hunger.

This Awareness indicates that the Cimmeria has been described by this Awareness previously. It is a realm wherein there is no escape back to individuality, but remains as a collective energy of hunger and seething subconscious energy. The only reason it is unpardonable is because it does not have the will, the desire, or the capacity of surrendering itself to a higher frequency or vibration, to the Divine Energies.

FOLLOW-UP QUESTION:

This article included the attitudes of sin, which I'll read and ask Awareness if there is anything to this. "If we combine the principles from the Scripture we have studied, we can see several attitudes associated with the sin that will not be forgiven. (1) Rejecting the Holy Spirit. (2) Stubbornly opposing God. (3) Not willing to admit to sin or to repent. (4) Not willing to ask for forgiveness. (5) Not willing to forgive other people. (6) Deliberately, willfully rejecting Christ's sacrifice; and the last, rejecting God's definition of good and evil.... ,,

COSMIC AWARENESS:

This Awareness suggests that all of these are basically the same thing as separation from the Divine. Continue.

QUESTIONER:

It concludes: "The unpardonable sin is a deliberate hardening of the heart and a refusal to listen to anything God says. This cluster of themes, helps us to understand how serious this is and why God will not forgive it."

COSMIC AWARENESS:

This Awareness indicates it is essentially the same message given by this Awareness except that it has been restated in various ways, in various rules or terms that are of much the same meaning, but described differently, in different words. Essentially it is saying the unpardonable sin is that of separation from the Divine.

This Awareness indicates that this separation is not unpardonable by God, but it is impossible to allow the entity who does not wish to merge with the Divine to be forced into such a merger with the Divine, therefore, the entity has in separating from the Divine, created his own situation in which he is unable to align with the Divine, and that is the aspect that occurs.

It is not so much that the Divine cannot pardon him. The Divine would pardon the entity if it were of any use, but how can you pardon your child for leaving your family, if the child has no intention of returning. The pardon can be given, but it is meaningless to say that "I pardon you for not loving me," is meaningless if the child has no intent of loving.

The Unpardonable Error or Sin

The parent can, and God does pardon entities for all things, but it does not bring the entity back to the Divine, if the entity's choice and free will continues the separation, and the entity may move into greater and greater distance from the Divine until the entity is totally lost and separated and cannot find his or her way back, cannot surrender to the Divine, cannot return to the Divine, and does not wish to. That is the true concept of the unpardonable error.

It is not that God refuses to pardon the entity, it is more that the error or sin cannot be pardoned because it is a separation that cannot be forgiven. How can you forgive an entity's separation? You can forgive the entity for separating, but the separation, the unpardonable sin or error, is still there and you cannot forgive the loss or the separation, even if you forgave the entity for doing it.

If the entity does not want the return and to undo the separation, what good is a pardon? It is likened unto the entity who is in prison, and you may pardon the entity, but if the entity does not leave the prison, does not want to return to society, then what is the pardon? It is meaningless because of the entity's own choice and action.

THOSE MANY WHO ENERGIZE THE LIGHT: CAN THEY PREVENT GLOBAL CATASTROPHE?
(More on the Acceleration of Acceleration)

QUESTION:

A question from R.Y., Baltimore, Maryland. He asks: "Are there not many individuals and groups around the world, both within the various long-standing religions and traditional and outside them,who in their various ways are "energizing" light, love, peace for the world, healing for the planet, et cetera, and if so, and I believe it to be so, extrapolating from limited information, is there not a synergistic coalescence at some level that results in vary strong energy in both directions,? and if so, is this currently increasing or decreasing, and will it be enough to stave off global catastrophe?"

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative; that it will be enough to stave off global catastrophes and it is on the increase. This Awareness indicates it is a matter of how quickly this energy will spread, as to how effective it will be in curtailing the negative energies that are in motion in trying to create a particular situation.

This Awareness indicates that there is indeed this Dark Force with its plans, with its intentions. It should be understood that the Dark Force has a limited view of the total reality. It can see up to approximately two dimensions higher than do humans, thus it can see further into the future than do humans, but it cannot see as far as the Divine perspective, and the Divine Light and Perspective recognizes that the Dark Force is limited in its view of the future and that its intentions and plans will come to nothing in the long run.

It may have its brief moment of success. It may have its hopes of success, but it will not have ultimate success. The question is: How far along will it proceed before it is defeated by the Light Forces. That depends on how quickly these Light Forces continue to build. They are building very quickly at this time.

Even in the last two months there have been great strides in terms of the Light Forces, and once they start to build stronger, they grow at ever-increasing speeds. It is the acceleration of acceleration that is involved in the movement and growth of the Light Forces.

IF THE OUTCOME IS ALREADY KNOWN WHY MUST ENTITIES GO THROUGH ALL THIS?

FOLLOW-UP QUESTION (VIKKI):

So even though the long-run conclusions is already known, the reason why we're going through this, is for the people to become involved with it and they thereby grow and something along this line?

COSMIC AWARENESS:

This is in the affirmative. The more entities learn from their life experience on earth, the less they will be forced to return for more experiences. In other words, if they learn enough, they may not need to return at all. If they simply flutter through on the fringes of experience and don't really grasp what occurs or know what happens, they are likely to need to return again and again and maybe many many times, until they have involved themselves so deeply that they understand why they had to go through the experience, why they had to learn from such involvement.

This Awareness indicates once you learn a lesson, you do not have to repeat it again. Once you learn a lesson, you can go through the same experience a second time, a third time, a fourth time, and it is no longer a problem for you because you know how to get through it. You have learned the lesson before. Therefore, those who have learned certain lessons and have gone through these experiences can come back for other lessons and if in the process they have to go through lessons they have already learned, it does not matter to them anyway, because they know how to get through those particular lessons.

Therefore, they can focus on the new lessons that they need to learn. But if an entity evades learning, avoids involvement in the learning process, the entity may have to go through that learning process again and again. It is much like the entity who does not seem to catch on to a particular lesson in school and is flunked or put back to go through the same lessons again.

If the entity still does not learn and the teachers pass him simply to get him out of school, whereby the teachers cease to put him back for further learning, but the entity still has not learned, then the entity may be living the rest of his life without understanding certain principles that he should have learned in grade school, and the entity may still be trying to learn these things later in life or may be trying to avoid learning them, but in any case, there are lessons left to be learned by that entity, and if the entity doesn't get it in one lifetime, it is not likely they will get it in between lives because there is very little learning between lives, so the entity may be forced to return again to this dimension where greater learning takes place in order to learn the lesson that he or she failed to learn in the previous lifetime.

These lessons may range from very simple things to very complex things, depending on what the entity's block was and where the entity stopped learning.

IS THERE SUCH A THING AS AN "ACCIDENT OF BIRTH"?

(Who Would Want to be Born to a Thalidomide Mother?)

QUESTION:

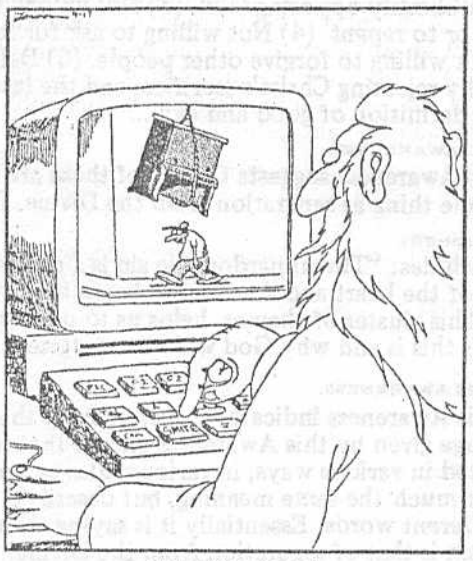
A question from J.D. in Vermont. She asks: "Is there really such a thing as an "accident of birth?" If, for example, a fetus is genetically defective or thalidomide deformed, doesn't the entity knowingly choose to enter such a one?"

COSMIC AWARENESS:

This Awareness indicates that an entity in choosing to be born may select his or her parents intuitively, and that intuitive selection will be a reflection of the entity's basic soul in terms of its evolution, and in terms of its karma or the karma it carries, and thus, if the entity's intuitive selection of a certain parent who has used a drug or who has some genetic problem, the entity chooses that parent, it becomes an externalization of the karmic energy carried by that soul, in that sense it is not an accident.

It is the result of karmic carry-over from that soul to the outer expression of the body being developed. This Awareness indicates in some instances, the entity having a certain amount of karma to carry over may select a person, a parent, so that the body becomes karmically developed with its deformities, and the parent may also terminate or abort the child when discovering that the body is deformed, and that in some cases may be enough for the child, or the soul, to have repaid any karma involved, so that the next attempt toward rebirth will select a parent that is more wholesome and suitable for the soul so that it has no deforming qualities, and the soul can enter into a normal or more normal body.

This Awareness indicates that this is not always the way it works, but in a great number of such cases, the soul will select to enter a body only momentarily in order to get rid of certain karmic obligations. In other instances, the soul may choose to select parents who go ahead with the birth and the child may live a life of handicapped expression or deformations, and the karma may carry on for the duration of that lifetime.



God at his computer

ARE MOST OF THE SIGNIFICANT EVENTS IN LIFE PLANNED BY THE ENTITY BEFORE BIRTH?
(How to Avoid Negative Astrological Forces)

QUESTION:

Another question from J.D. "Once incarnate, what percentage of significant events, like meeting a mate or finding a vocation are pre-chosen, are karmic, or just random?"

COSMIC AWARENESS:

This Awareness indicates that for the most part, these are pre-chosen by the birth time, and the astrological energies at the time of birth. There is some potential for affecting these astrological energies, much in the same way that an entity in reading an astrological chart can see certain influences and can modify those influences by appealing to higher or lower potentialities of that influence.

For example, a planetary influence might indicate on the one hand the potential for Martian or martial type of energies, such as police or institutionalization or jailing, or one might see this same energy as being that which influences fighting energies, adrenalin energies or one might see this same energy as that which would be associated with working with iron, or with weapons, and one can make a choice as to how this particular astrological influence is going to be expressed in his or her chart at that time, and by deliberately selecting a particular expression and working to express oneself in such a manner, an entity can use his or her chart at the moment for a particular activity that channels that energy of the chart so that it cannot take a more negative expression.

In other words, if there is a conjunction, for example, of Uranus and Mars, (Uranus being sudden and unexpected, and Mars being metal and martial type energies), one could expect that those energies might indicate an auto accident or a clash with the law, or a clash with soldiers or some kind of potential for sudden and surprising problems, even a sudden gunshot would be classified as under such a conjunction.

This Awareness indicates that if one saw this in one's chart and didn't want this to occur, one could appeal to different interpretations of Uranus and Mars. For example, Uranus relates to flights. It also relates to intuition in the mind, and Mars relates to energizing and adrenalin energies or arguments, thus, one could simply create an experience, artificially create an experience in which one gets into an intuitive argument that stimulates the adrenalin and perhaps argue with some theory with someone so that the energies are channeled in that direction rather than in going out in the public and perhaps getting into a fight or getting into a clash with police or an auto accident.

This Awareness indicates that likewise, Uranus relates to altruistic expression, and Mars relates to military or police or the militia; therefore, one could altruistically send a box of cookies to the police, and thus channel that energy. This Awareness indicates that these are ways of altering influences by recognizing the influence of one's astrological chart. This Awareness indicates that if one were to do this on a regular basis, one could effectively avoid some of the negative experiences that might otherwise impose themselves upon one's life from an astrological point of view.

This Awareness indicates that likewise, an entity intuitively moving into a body from the other side might wish to selectively choose to alter the influences of a negative birth by moving into those higher interpretations of the chart rather than becoming victimized by the more mundane and lower vibratory influences of the chart.

In this way, with some greater insight into these forces, an entity can enter into a physical body at the moment of birth and channel a higher vibration than was normally expressed by the astrological influences of that moment. This Awareness indicates that in other words, the more aware person, in entering into a time period for birth, can choose the higher interpretations of those astrological influences and in so doing, receive a more beneficial effect than most entities viewing the chart would expect for that entity.

This Awareness indicates if the question was not completely answered, *It* suggests it be repeated.

HOW TO RECEIVE THE HIGHER BENEFITS FROM YOUR BIRTH CHART

QUESTIONER:

I believe it was answered quite well. The question was: "Once incarnate, what percentage of significant events, like meeting a mate or finding a vocation are pre-chosen, are karmic, or are random?"

COSMIC AWARENESS:

This Awareness indicates that the pre-choosing has to do with one's astrological chart, but whether it is favorable or less favorable or unfavorable in terms of future events in the life will depend on what level of interpretation the entity intuitively follows in terms of his or her chart or astrological influences, for there are different levels.

It is as though you have a wide variety of choices within that particular astrological chart and its many influences. You can use the higher or lower interpretations of each planet, of each house, of each aspect and if one is more aware and more spiritually evolved, and if one lives a life more responsibly, then they are likely to receive the higher benefits from the chart, the higher meaning the more beneficial aspects of the chart.

This Awareness indicates if one is more negligent and irresponsible, and less spiritually inclined, then one is more likely to receive the more negative interpretations of the chart. In other words, the aspect or planet or house configuration can have many levels.

The vibrations being sent out from that particular expression in the chart, can be picked up by the individual of the chart in such a way as to have many means of expression, higher and more responsible, or lower and more irresponsible and more negligent, and depending on how the entity expresses those energies which he or she feels from his or her astrological chart will determine the outcome of that particular energy in its expression in the entity's life.

ONCE BORN, HOW MUCH CHOICE DO WE REALLY HAVE?

QUESTION:

One last question, this also from J.D. "How much of our life, once we're in incarnation, is determined by voluntary choice versus uncontrollable circumstances?"

COSMIC AWARENESS:

This Awareness indicates that most of entities' so-called choices are dictated by their conditioning. If they have been conditioned to like the color blue, if they have been conditioned to like a certain set of values, then their choices are going to reflect those conditionings.

This Awareness indicates that some times, entities choose people because the people have something about them that reminds them of someone in their past, perhaps a father, a brother or someone; certain qualities that they particularly liked on a subconscious level, and they may see similar qualities in this person. And though the person may have many other qualities that are less admirable,they are drawn to this person because of these particular qualities that are reminiscent of something in a person they admired.

This Awareness indicates that in this sense, an entity is being directed by conditioning from the past and there is more of this past conditioning influencing entities' decisions and choices than most entities would ever imagine possible. This Awareness indicates that very much occurs in terms of haphazard activities in life, haphazard or spontaneous actions of life, but entities seldom make choices based on such haphazard and unconditioned actions.

Most of entities' choices are made by conditioning, by programming, by the influences that have affected an entities emotions, feelings and subconscious desires or fears, or dislikes and likes.

EACH PHYSICAL PROBLEM YOU HAVE IS A CHANCE TO MOVE YOU INTO A HIGHER SPIRITUAL EXPRESSION

FOLLOW-UP QUESTION(VIKKI):

So that what appears to be free will is either a compulsion or conditions, or in a higher sense, a call to respond to urgencies?

COSMIC AWARENESS:

This is in the affirmative. There is really very little free will apart from one's conditionings. Many entities think that free will means they can choose the way they want to, but few realize that the way they choose or the way they want to choose has been determined by the way they were raised or the experiences they've had in the past.

CLOSING MESSAGE:

This Awareness indicates that the spiritual energies and the mundane energies are not that much different. Spiritual energies are simply higher vibrations, and the higher vibrations come about usually when there is a reconciliation of polarized vibrations from the lower frequencies. Thus, an entity moving into higher frequencies may do so at a time when lower frequencies are reconciled.

In other words, an entity may have some kind of emotional conflict, and when the entity resolves that emotional conflict to a point of reconciliation, the entity may suddenly find himself or herself in a peaceful state of higher more spiritual frequencies or vibrations.

This Awareness indicates that likewise, entities sometimes move into a more spiritual level after having been injured physically, and when the physical energy begins to reconcile and healing takes place, the higher frequencies then begin to be felt, and the energy of the entity recognizes these higher frequencies and becomes more acutely aware of such frequencies and the entity essentially has moved into a kind of higher spirituality as a result of the injury that has eventually healed.

This Awareness indicates that whenever you find yourself going through a physical difficulty, look at it as an opportunity to move into higher spiritual expression, or experience, for it will help to increase the benefits of that spiritual expression if you are aware of its inclination. And as the physical problem begins to heal and your focus is on the higher frequencies, you may find that they become ever more strong because of your conscious attendance to them.

This Awareness indicates likewise, if you are in a higher frequency and you find yourself becoming hostile and irritated and frustrated about some emotional situation that throws you into an emotional imbalance, it is not too unreasonable to expect or to experience some kind of physical accident, for the imbalance of your energies can very often bring about a physical imbalance that causes an accident, a physical imbalance.

This Awareness indicates that by being aware of the connection and relationship of the physical and the spiritual energies in their relationship to each other, one can avoid accidents by keeping the emotions balanced or bringing them back into balance quickly, and one can take advantage of any negative experience on a physical level by focusing into the spiritual energies and helping to begin a healing from a higher vibratory balance and frequency.

***

The Law of Gratitude is given.

ARE THOSE WHO ARE CREATING CROP CIRCLES REALLY ARTFUL, PLAYFUL, GRACIOUS ENTITIES?

(We Hear From One Entity Who Disagrees With Awareness)

Excerpt from a CAC Gen. Reading, June 18, 1993

QUESTION:

A couple of questions from R.R., in Denver, Colorado. He writes: "I and many others who read my copy of CAC have been unsatisfied with what you've printed of Awareness's comments on the crop circle phenomenon. I, we, feel that this is a very significant event. These seem to be the first lasting marks made by supernatural intelligence that we can really investigate.

"Southern England is beautiful and sacred land and when these formations appear overnight in a food crop field, I certainly think they are some form of communication. They are cleverly placed, artful, magnificent, and show me that a caring (the grass is not hurt), conscious intelligence is at work here and knows full well that humans are watching this magic at work, and pondering the implications and energies. (I am not talking about hoax formations which might make up 5-20% of the total).

"It seems to me after careful field study and some research and networking that what we have here is communication from some other intelligence from the greater universe.Not meaningless markers but rather meaningful symbols for us to puzzle over and meditate upon like sacred art. Let me give you some examples of what I mean.

"I joined the CSETI (Center for the Study of Extra-terrestrial Intelligence) research team at Alton Barnes in the summer of 1992. One evening a small group of us on the top of Woodborough hill sat in a circle and discussed and decided upon a shape that we would project out through focused meditation to the circle makers (whoever they are). For 30 minutes we meditated and visualized this shape (see enclosed). [He enclosed a copy of something]. We told no one of this shape and did not draw it out but rather held it in our minds. The next morning our requested design was imprinted in a field below Olivers Castle five or so miles away. The CCCS (Centre for Crop Circle Studies in England) authenticated this formation as not being hoaxed because it was too well done and had all the hallmarks of a genuine formation.

"Is this not the beginning of a dialog? What else could we have asked for? If they give us a formation we request, would they give us something serious like answers or help with some of our more pressing world problems?

"Every night I was in this part of England I saw UFO's of one sort or another, mostly unusual lights, sometimes a structured ship. My questions for Awareness are:(1) Who specifically is creating these Crop Formations? We suspect Pleiadians, not Zeta greys, as Awareness has postulated. The energies are too healing and positive to be from a negative source. We are dealing with something that is artful, playful, gracious, and the resulting formations are stunningly beautiful."

And he's got another series of questions, but perhaps Awareness could answer the first one.

COSMIC AWARENESS:

This Awareness indicates that *It* does not see this as coming from the Pleiadians, *It* sees this as coming from certain other entities of extraterrestrial origin. This Awareness has very little difference with this entity's evaluation, *It* simply does not see it as coming from the Pleiadians.

This Awareness indicates that *It* indicated previously, and apparently the entity disagrees, that these circles were symbols left in part for their own people to understand, much likened unto the Kilroy sign during World War II, it being likened unto a marker to give information to those who follow.

This Awareness indicates there is also a kind of language involved in the diagrams that is understood by these entities who communicate through these symbolic diagrams. This Awareness indicates that it appears the language is evolved from earlier Celtic symbols. They are not Celtic, but can be seen as having some similarities and are the evolved result from a Celtic origin.

This Awareness indicates it would appear that perhaps the Celtics received their symbols from entities from the ancient past who were extraterrestrial in nature. This Awareness indicates that it should be understood that the Greys, particularly those from Orion, have had contact with earthians down through the ages; that also the Pleiadians have had such contact. It just simply does not appear to this Awareness that these particular entities are Pleiadians.

How Pleiadians Make Contact With Earthlings

The Pleiadians seeking to contact humans, use a different approach: they communicate through telepathy first. After a certain amount of telepathic communication, they make themselves visible, and then by visible means, show they recognize the entity much in the way they danced in their space ships before Billy Meier's cameras.

Then, after a period of recognition maneuvers, they telepathically communicate further in regards to a direct meeting, and they meet directly with the entity. This Awareness indicates if there had been Pleiadians use of crop circles it would likely have occurred in the area where Billy Meier had his contacts also.

This Awareness indicates that the British isles have long been a center for communication from Draco or that which is called the Dragon people. There are what are termed Dragon Holes in the countryside and stories relating to the Dragon People. It is likely that this area is visited by entities from Draco or their allies and associates.

This Awareness indicates that this is easily researched in UFO lore pertaining to the area and there even existed the secret society of the Pendragon clan which was basically a secret religious order centered around the dragon, which John Adams and his family were part of; this in reference to the second president of the United States.

This Awareness indicates that the dragon also was associated with the story of King Arthur, which in turn was related to the society known as Pendragon.

This Awareness indicates it appears the Pleiadians had much of their contact in earlier times in the Middle East; also in certain areas of Europe, Asia and South America. The Pleiadians being associated also with the Caucasus mountains and down through the Middle East and into Egypt, in later times. They also had certain influences in Atlantis.

This Awareness indicates that these entities appear to have *followed after some of the earlier visits by the Draconians* and the Greys of Orion are seen as having come later. However, there was yet an earlier visit by the Orion Greys dating back to a period in Atlantis. This Awareness indicates there was also a time in the pre-Christian era of the Middle East wherein these Orion influences were expressed, particularly in the time prior to the life of Alexander the Great.

This Awareness indicates that it appears that the more recent crop circles are mostly from the Orion Greys and some relating to the Draconians, those of Draco.

FOLLOW-UP QUESTION:

Those Draconians, are these the same as Awareness indicated in the Pendragon reference, dragons? Were these *essentially Reptoids?*

COSMIC AWARENESS:

This as in the affirmative. They are also sometimes referred to as Lizard People.

FOLLOW-UP QUESTION:

Well, the basic premise this entity is building his argument on is obviously faulty, but anyway I'll read his other questions:

"How are we to integrate these shapes, these ciphers, embossed as it were, in the fields of wheat, or whatever? How do we integrate all this into our concensus reality, or even our individual reality? Doesn't this evidence change everything?"

COSMIC AWARENESS:

This Awareness indicates that *It* suggests there is something beyond the so-called normal reality, and of course it will have an effect of changing that normal reality if entities accept this as valid, which is why so many entities would prefer to think of it as hoax and why many entities will simply ignore it altogether.

Some entities would prefer to leave it as a mystery and pretend it can't be solved than to admit there are beings outside of their limited view of reality.

DO CROP CIRCLE SHAPES CONTAIN ENERGIES?

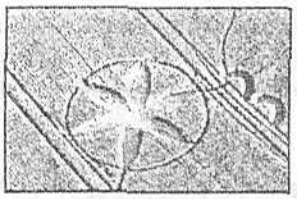
FOLLOW-UP QUESTION

His other question on this: "Many people, myself included, have reported healings and other anomalous events while inside the Circles. Are these shapes or the energies left behind by the makers acting like some sort of transformer machine? I watched as birds overhead refused to fly over the formation and split apart as a group and flew around it on both sides. And I was witness to an airplane's loss of guage readings while over *the formation. What would do this? Is this just residual electro*magnetic energy or is this beyond what we know as electromagnetic?"

COSMIC AWARENESS:

This Awareness indicates it appears there is a residual energy from the placement of the craft and that there is also some field of radiation that birds are sensitive to. This Awareness indicates it does not appear that the radiation is particularly harmful; it appears rather that it is simply a kind of mild radiation and electromagnetic energy, a kind of energy unique to these circles, not quite like anything known to man.

It is possible that some of this can be detected by instruments, if the right instruments are used.



CHILCOMBE DOWN, WILTS

WHY ARE CROP CIRCLE SYMBOLS APPEARING ON MANY ENTITIES ABDUCTED BY ALIENS ?

QUESTION:

Steve N., in Ontario, sent a clipping from some tabloid that lists a number of people who claim when they were abducted by aliens, that later, these crop circles marks appeared on their body. Does Awareness see there being any truth at all to that?

COSMIC AWARENESS:

This Awareness indicates that if one recognizes these crop circle marks as being likened unto identification symbols, such as a brand on cattle, or a brand on land to indicate some kind of rightful claim, then to have such *marks appear on a human body after an abduction, could* be a symbol for others of their group who might abduct the same person to recognize who it was that abducted this person and puts a claim on the entity.

This Awareness indicates that these are not exactly ownership claims, but that wherein one puts a chip or makes claim to the entity's sperm or eggs or a right to abduct the entity, they often do not want others interfering with their project, and by putting a mark on the entity which signifies who they are, it is much likened unto warding off other parties, warning them to "Stay away, this is *my* project!"

FOLLOW-UP QUESTION:

Okay, there *is* truth to this article then. It calls them *"UBMs", unidentified body markings, and these were* reported in 60% of the kidnaping cases over the last three years, to a hotline run by the UFO Research Institute of Canada, and it says UBMs can be easily seen under a fluorescent tube, ultraviolet lamp, and some of the abductees also reported numbness underneath parts of their skin, sometimes going deeply into muscle tissue. And the article goes on to say that "American UFO researchers conducting their own research surveys say the markings are also showing up in the skins of abductees from the U.S. The victims appear to be people who have no reason to lie and in many cases participated in these surveys with great reluctance."

COSMIC AWARENESS:

This Awareness indicates that it is further evidence of a branding type of marking or trademark symbol of those who perpetrate the abduction or who operate in a particular area to put similar marks on the earth.

ABOUT THOSE SYMBOLS ENERGIZED

FOLLOW-UP (VIKKI):

What would their motive be, to come up with the symbol that these people energized?

COSMIC AWARENESS:

This Awareness indicates that it may not have been motivated at all. It may have simply been that these entities energized a symbol, either a symbol they had already collectively agreed upon, perhaps because they had seen such a symbol, or it may have been a symbol they collectively energized that was completely unique and new, but which was telepathically received by some extraterrestrial who is basically telepathic, and they may have simply incorporated it in their design in some way, or it could well have simply been coincidental.
