

Revelations of Awareness

WEATHER FORECAST

Ralph Duby, Interpreter

Suggested the first week of September (1966) shall be that which in every way represents balance and harmony, beautiful weather, and after that time a season of storms, problems, winds and rain and a winter that will be that which entities will long remember in terms of its severity and discontent.

Life in the Earth's Center

Q. What is the truth about human life existing and carrying on within this planet Earth as in the books I have read on this subject?

A. This Awareness suggests that entities who are incarnates, those representing the poltergeists, those on the threshold are entities who in their etheric form are those who from time to time materialize on the earthly plane. This Awareness suggests the nature of these occurrences, explanation of that which is known as ghosts, elementals and those dwellers on the threshold and incarnates are those questions that This Awareness would welcome and those entities in greater understanding of the larger world of things.

Q. The two North and South Polar openings to the earth written about, is this a truth or not?

A. This Awareness indicates that there is within the center of the earth life and civilization, form and energy, but not like that which was indicated in material read and studied.

Q. Is this life of a human nature?

A. Indicated that this is in the affirmative. Suggested the ancient work Etidorpha had described in some detail that which is therein emanated. (Editors comment: Ed Young now in Hawaii, has the only copy of this book we have ever run across.)

When Your Animal Dies

Q. I know this seems of small consequence, but I had a little squirrel which I dearly loved, and the way he died and the after-affects just left me so broken hearted that I feel there is a message here that I can't find. Could you help me?

A. This Awareness blesses you, for this animal that which was brought into your care as if by chance, needing to gain certain sustance and health, and it is suggested that once this balance had been achieved that therein that kind of creature no longer able to be within the confines of other than its original environment and circumstance. This Awareness asks you not to grieve, for there was love and force given, and it is that these creatures, those spirits are those that come and go, manifest themselves time after time, that they are never lost.

ON LOVED ONES PASSED OVER

Q. Are there ever any occasions when one who remains on this plane should request one who has passed over to return?

A. It is indicated that this never should be done. That entities indeed who do solicit those who have moved on and ask that they return to those who yet wait on this plane, do commit that grievous error which in the eyes of This Awareness is one of the most serious and grievous errors that entities may make on this plane.

SHOULD CHILDREN BE TAUGHT PRAYERS?

Q. What prayer should be taught to children that would help them to understand the universe?

A. It is indicated that the minds of children are those minds which are open to those basic Laws and Tenets which have been given by This Awareness, that there can be affected that kind of simplicity wherein the Law of Love, the Law of Gratitude, those indications with reference to that dictum which indicates that you Judge Not, that You Deny Self, that you Be Humble, that these, with some careful study, be reflected in those simple prayers which may be given to children; that children should not be given those particular prayers which indicate that kind of omnipotence and that kind of anthropomorphism which is associated so much with prayers that are given to children on this plane; that those simple prayers which reflect love and gratitude, humility, unselfishness, are those prayers that are best understood by children, those which bring them closer to this Awareness.

The Shortest Opening Message

Q. Do you have a message for us tonight before we start the questioning?

A. In the name of the inner Awareness, you are now clean, whole and well.

Quality, Not Quantity Needed in Membership

Q. Will our attempt to increase our numbers to 144 be successful by our bringing those experts into our meetings?

A. Indicated that there must be that earnest attempt by all those members in the original group (those that first gathered around the Interpreter and questioned Awareness) and associate groups to bring quality, so that questioning and that information that This Awareness needs to give be given. That if you search among hundreds and find but two, that these two may accomplish more than five hundred.

On The Cosmic Night

Q. What can Awareness tell us tonight about the Cosmic Night?

A. Suggested that tides do come in and tides do go out. It is indicated that the sun does come up and the sun does come down. It is indicated that blood does flow, that there is pulse. Indicated that there is a rhythmic flow to all patterns that are positive and to all patterns that are negative. It is indicated that where there are smiles there are sometimes tears. It is indicated that the beauty of a child's face does indeed change through that collection of ignorance which is age. That for each up there is a down. That for each movement to the right, there is a left. That experience is somewhat indeed like a pendulum that does eternally swing. Indicated that, that force, that universal force in mind that constitutes that undefinable force, which is This Awareness, does wait, does sleep.

ON THE IMPORTANCE OF OUR GROUP

Q. With my limited amount of time, what should be my connection with this group?

A. It is indicated that for those who can put first things first that this group should be first. There is that opportunity rarely afforded entities on this plane to effect that awareness and that consciousness wherein the real meaning and the real purpose of their lives may be made clear. It is the responsibility of all entities to effect this awareness, to understand this direction and this purpose, that many entities will be born and die and be born again. The busy work, and the many things that happen between these two dark nights are those that do not concern this Awareness except in respect to...How?, How long?, How many?, How many times?

ON THE REAL CAUSE OF ALLERGIES

Q. What is the basic cause of allergies?

A. It is indicated that movement of the mind wherein allergic conditions are indicated is often described as those wrong answers given, those wrong answers repeated wherein there does effect from that mind power certain physical conditions that are repetitive. Those indeed who have asthmatic conditions, most bronchial conditions, those who have chronic colds, those who develop hay-fever symptomology, that those who do effect recall, re-effect through recall incidents wherein they have repressed from early traumatic experience those particular incidents which were too painful at the time to understand or to cope with. Herein lies the pattern of psychosomatic illness that is always engendered by mind force.

ON NIGHT FEARS

There are sometimes in dreams those particular signs, those images, those little pictures which come from a part of our minds which we don't use when we are awake. Entities or people use only a small part of their minds when they are awake and much of their mind most of the time is fast asleep; but in the night time that part of our mind with which we talk, with which we lie, with which we live there are shadows of things, there are little elves and gnomes and hobgoblins and these come from our memory of our having lived many times before and having done many things before. And when these elves, and gnomes and hobgoblins come to the sleeping mind, they should not be considered as things to be afraid of, but as interesting things to look at, to experience and we need to understand that if we are a little afraid that that is when we begin to learn, and when we take away the fear and we enjoy these things that come when our minds are full, then we need not walk away from these images, we need not be frightened by what we see, but enjoy and understand what happens to us.

WHY ARE PEOPLE ON EARTH?

Q. Why do people live on earth?

A. It is indicated that entities are placed on this plane of existence for specific purposes, and that although the purpose of entities in many cases differ, that general reason for life on this plane in this cosmology is to move closer and closer to that awareness which has been indicated as Cosmic Awareness. That tragedy, that suffering that alienation which constitutes each human life is a pattern, is a lesson, is a book full of things which need to be learned; and that life on this particular plane is one of opening one's minds to those greater truths, to those concepts which lie beyond this plane but at the same time understanding the importance of the here and the now.

ON RESPONSIBILITY TO OTHERS

Q. What is the truth about the responsibility that each individual has to those he associates with and those who come to him for help and those who refuse sometimes to think for themselves? What responsibility does he have to those people?

A. It has been indicated before that the responsibility that each individual has to another individual is that responsibility of outlining to the best of his ability, without interest of self, those things which are suggested for the benefit of another individual. It is also suggested that once another individual is made aware that someone considers them important enough, and loves them enough, to give them that information which is given to the best of his knowledge, his ability, and his awareness, then it becomes absolutely dependent upon the person who receives that information to act on it, and to no longer expect that the giver of information becomes a crutch on which they should lean.

ON "RESIST NOT EVIL"

...There is an alien force. There are alien forces which are rampant in the world. These forces are primary forces of error. They are existent both on the material plane and they are a part of your reality as well as a part of your actuality. They are not to be denied. They are to be accepted, to be understood. They must not be resisted. It has been stated to you before that you resist not evil. This encompasses also that understanding of those alien forces which make up those difficulties in the world which need to be understood. It is very important that all entities understand that they create those negative forces, those alien forces within their own minds. These creations exist as certainly as those creations which are good, which are benevolent, which are merciful, which are full of love. It must be understood that those creations, those concepts, those harbingers of ill will, those elves, those gnomes, those hobgoblins of the mind are creations, are existent, are more error concept, this idea which you refer to as a lifetime.

...This Awareness indicates that within a twinkling of an eye, that which is 50 million years of your time can be erased. Within the twinkling of an eye all that which has been accomplished, all that which represents the martyrdom of saints, that which represents the great monuments, that which entities have created out of the darkness all that represents beauty and life, all that entities look toward with pride, this erased within a twinkling of an eye. It is suggested that the forces of error always with those on this plane have wished to destroy that which is good. This Awareness asks entities to no longer consider that which is good and that which is in error, that which is righteous and that which is unrighteous, for it is indicated that this separateness allows the forces of error to accomplish their primeval motive, and it is indicated that for 58 million years they have within their hands the means to accomplish that which is their will within the twinkling of an eye.

Capsuled Wisdom from Awareness

...It is suggested that humility and patience are the nutrition of those who would become aware.

...humility and patience are the food that nourishes the soul. It is indicated that the Awareness of the soul is created by those thought projections of humility and patience.

...It is also indicated that where walks the moon walk I, that you shed a tear and this expresses Me. It is indicated that where sleeps the rose, there sleep I.

...It is indicated that those who fall should be told how to get up but that they should not be picked up.
