Excerpt CAC Reading 5-9-2-89 Paul Shockley Interpreter

THE ZIONISTS INFLUENCE ON TV EVANGELISTS AND POLITICS

QUESTION:

Dan Chilinski recommends a book, which I haven't seen or read, but I'd like to read this and ask Awareness if this is a book for general consumption for the membership. He writes:

"I ran across another real good book on Zionism, and how it uses religion, especially the Fundamentalist type as a dark force to make war and poverty all over this planet. The title is *Prophecy And Politics*, by the author Grace Halsell, 210 pages, published by Lawrence Hill and Company, in Westport, Connecticut.

This book deals with the major Zionists of Israel, then President Ronald Reagan, and the TV evangelists Pat Robertson, Jerry Falwell, Jim Baker, Jimmy Swaggart and so forth. A sample from the inside front cover reads: "Militant TV evangelists are preaching that a nuclear holocaust is inevitable, and their message is influencing top-level government leaders in the U.S., Israel and elsewhere. Reaching an estimated 60 million Americans, charismatic war-minded evangelists insist that they have the right and power to help orchestrate not only their end of times, but doomsday for all the rest of the species.

'As the rising start of the now Christian Right and the Republican party, these militant conservatives seemingly have unlimited financial resources. A site in Israel for 'the last great battle', and a line of reasoning for a nuclear war, because God wills it, they preach, promote and actually sell Americans on the idea of building more bombs and then using them to destroy planet earth.' People are asking Awareness for information on who these 'Zionists' are, and how they operate but Awareness can only give the briefest explanation on this because of limited space in the CAC newsletter, not to mention the unbelievable amount of time Paul would have to stay in trance to put all this material in this book across.

"This book would answer their questions, and you should consider adding it to the CAC list as a regularly stocked book."

Does Awareness see this book as being factual and informative and as good as Dan seems to make it out?

COSMIC AWARENESS:

This Awareness indicates that this book does contain a considerable amount of information that would fill in many gaps for many entities in terms of information that is hard to come by through ordinary channels and sources. This Awareness indicates that very few individuals realize how much of the TV evangelists' financial base has been initiated and funded by Zionist backers. This Awareness indicates that many of these, in order to assure that the evangelists do not speak in any way that would turn Christians against them.

This Awareness indicates that traditionally, there has always been that conflict between the Christians and the Jews, and they do not want this to occur in this nation at this time, so for these television evangelists, they help to supply financial base in order to assure that they do not turn against the Zionists and Jewish people in a general sense by using terminologies and traditional arguments between Christians and Jews. Rather, they make it seem as though Christians and Jews are of the same team.

This Awareness indicates that this is relatively new to fundamental Christianity; that in the pre-television evangelistic era, most Christians churches would not be so kindred with the Jew. This Awareness indicates that the book can portray and inform, entities of many of the behind the scenes activities and connections.

Conditioning the Masses to Accept Armageddon

The greater importance of the book however, is to show how the influence of televangelism and these messages can condition the masses into accepting the Christian doctrine that the world will be destroyed, it is inevitable, but not to worry, because if you are one of the Christians you will be raptured into a more beautiful place anyway. It is the kind of conditioning that would, if accepted by the masses, contribute greatly toward the holocaust of nuclear war as a final scenario. In fact, the shocking thing in regard to the messages of some of the Christian doctrine as presented by these entities is that they actually want the end of the world to occur through nuclear holocaust, as though they then can prove somehow, that they were right.

Evangelists Have Christ's "Return" All Wrong

They contribute to the belief they preach in hopes that if they help to bring it about, Jesus will appear and save them. This Awareness indicates that they simply do not understand the true meaning behind the Biblical passages which are in effect symbolic in nature. The entire *Book of Revelation* being symbolic rather than literal, is referring not to the return on earth of the Christ to rescue his believers, but rather, the *Christ Consciousness*, returning to each individual who is ready to accept and to open to that Christ Consciousness, which is the Second Coming.

The Beast is that which is the lesser qualities, the lower qualities of humanity, that which has previously been described as structure and left-brain activity that has no compassion or mercy or goodness. This Awareness indicates that the Beast is the lower nature of humanity, and it may take on many forms of expression. This Awareness indicates that the end-of the world as described in this *Book of Revelation* actually is in reference to the end of the age.

This Awareness suggests that those who energize otherwise, in a literal sense, are attempting to bring about the literal interpretation of the *Book of Revelation* of which it was not originally intended. *The Book of Revelation* was actually a Masonic writing from the mystery schools and was put in to the Biblical composite because the priests did not understand it; it had certain threats in it and they did not know whether to leave it out, or put it in. for fear that if they left it out, there might be some kind of curse befall them.

This Awareness indicates that they also had a certain fear that they might be leaving out some important warnings that could benefit future generations, because they too saw it as literal. This Awareness indicates that in reference to this advertised book, that which the questioner is advertising or suggesting, it would be beneficial to carry copies for those entities who are interested and who have a desire to learn more about the televangelism phenomena. This Awareness indicates that much of this phenomena has had the mystique stripped away, but it still carries considerable power in terms of influence over many.

Ed's Note: The book *Prophecy and Politics: The Secret Alliance Between Israel and the U.S. Christian Right*, by Grace Halsell, is out of print. However, if you check Barnes&Noble.com or Amazon.com you will find used copies are available. CAC no longer has this book.

HOW THE MEDIA PROMOTES ORWELL'S DOUBLESPEAK AND DOUBLETHINK

FOLLOW-UP (AVATON):

In his letter to me, Dan writes a statement here. It's not in the form of a question, but I'd like Awareness to maybe comment. He says: "A month ago I heard someone on a small radio talk show in Detroit speaking on the money system and how it is used to make war and poverty all over the planet. This man was probably one of the 'patriots' Awareness refers to. I was very disappointed in the reaction of the masses to that. As soon as he hung up the phone, I heard these comments: "This guy is nothing but a radical, extremist, neo-Nazi and so forth." It is beginning to sound like the left wing extremists and the right wing extremists are sounding the same.

'Radicals equal evil, in the minds of the masses today, and no such thing as conspiracies exist, or so the media tells us day after day, year after year. The masses acted like they did not even hear what the guy was trying to say. It looks like the masses do not want to question or think on anything that may anger them or upset them from their fantasy world of sports, drugs and beer. I know the public schools in this country and the media train the masses to accept authority only, and never encourages them to question or think on their own. This serves as a very thick shield which serves the Dark Force because the masses just do not want to think or question on anything that may upset them.

'CAC or any other 'cause' organization that wants peace on this planet has to deal with this thick shield of ignorance the masses always hold up when you try to explain the things that cause their poverty and war. If you look at George Orwell's book, *1984* symbolically and not literally, it describes how the Dark Force operates through the big controlled media, and also governmentalism. Example: Criminals are victims. Victims are criminals. Slavery is freedom, and freedom is slavery. Everything is the opposite of what reality really is. This is what is presented to the masses today and is how the Dark Force operates.

'Everything is reversed the exact opposite of what it really is. Our controlled media, I remember watching it at the end of 1984, ridiculed Orwell's book *1984*, claiming it never happened. The Dark Force can and does make an angel look like a devil or a devil look like an angel to the masses by its control of the media and governmentalism. In Orwell's book, innocent people were turned into criminals and clever bureaucratic language was used to cover the violence and bloodshed to make it palatable to the masses.'

Would Awareness please comment on those statements?

COSMIC AWARENESS:

This Awareness indicates this entity has said this in quite poignant terms. The entity as being very much aware of the nature of the way whereby these descriptive use of words through the media and society can alter an appearance to be something different from what ordinary logic and reasoning would normally perceive. This Awareness indicates that in this sense you are indeed living in a time in which there are the essences of Doublespeak and Doublethink.

This Awareness indicates the concept, for example, of the Peacekeeper in terms of a killer missile. This Awareness indicates that these techniques which Orwell described for Big Brother are here and present for entities to deal with, but it is true that the masses are not

really wanting to see reality. They want to be coddled, comforted and made to feel secure and that is the main role and approach by the masses and the job of the society is to avoid excessive shocking or disturbance to their comfort.

Media Obscures Reality by Intellectualizing

This Awareness indicates that even those expressions of violence in society which would be abhorrent are pacified by the manner in which the newscasts are given, whereby the abhorrent actions are put into terms and words that elevate from reality to a mental discussion or debate or channeled analysis of the event so that it becomes intellectualized rather than felt as a reality in society. This Awareness indicates that no matter how brutal, how shocking, how disturbing an event is, it is only a matter of hours or days before it is transmuted into an intellectual concern rather than a reality which entities need to deal with, and within that intellectual concern, there are always those who try to explain the action of violence as though it were a reaction to some hurt on the part of the one perpetuating and causing the violence.

This Awareness indicates in this sense, it is likened unto the Doublespeak wherein the violator is seen as the victim. The victim, having already suffered, is then simply seen as an object of the situation which needs to be looked at through the eyes of the violator to determine how to respond to the violator. The victim, in the meantime is sort of pushed off to the side, while focus is on the violator.

This Awareness indicates that it creates a situation in which the victim receives very little comfort from society, and the violator receives great attention and debate and the intellectualizing around the act makes the entire thing seem to be more of a topic of discussion than anything else so that it becomes just another form of entertainment for the mind of the masses to concern themselves with the newest issue in the news.

This Awareness indicates that the news media is hard-pressed to deal with some of the extremities of behavior that occur in your society today, because they are geared to give information, but entities want the emotional impact and entities receiving the emotional impact then must intellectualize in order to rid themselves of the emotional impact. They do not want to carry around the fear, anger, disturbance that they feel, so they shift it into the head for argument purposes, so that they can assess it intellectually with their friends after having heard the panel discussion on television or within a newspaper article, or newspaper analysis of the incident.

This Awareness indicates that these efforts by the news media to present unbiased coverage of events creates difficulty in terms of how entities feel in regard to things that are occurring, and the main purpose it seems of these newscasts is to diminish the feeling of an event so that the masses can witness and then forget, much as occurs when the event happens, say at a school, whereby psychologists then come forth and inform the teachers as to how to speak with the students, deal with the emotional charge that they have, so that they can alleviate their fears and come back into a state of normalcy, allowing them to have the discussion of what happened, expressions being released, and a sense of normalcy.

This Awareness indicates what is seen in this pattern of behavior for school children after a critical event has caused trauma, is the same thing that newscasts do. This Awareness indicates it is essentially to perform a kind of trauma release for the viewers and allows a sense of safety to continue in a kind of mainstream of conscious-

ness. This Awareness indicates that this is necessary for a healthy society. It is necessary for there to be the middle road that does not get rattled, excited or concerned because everyone became extremists, if everyone became radical, if everyone became outraged, the energies would then be uncontrollable, and chaos could reign.

Only 5% to 10% of Those Aware Can Cause Group to Change

Therefore, in this sense, the media is performing a kind of therapeutic purpose in calming the masses so that they do not become over-distraught, but in the process of calming the masses, they tend to diminish the awareness of the masses so that they do not know too much or care too much about these things. This Awareness reminds you, however, it is not necessary that everyone understand the situation to change the direction of things. If only 5 or 10 percent of the people know what's going on and the other 90 or 95 percent of the people are asleep or ignorant, that 5 or 10 percent is sufficient to change the course and direction of the herd of those who are in movement, for it does not take 100% leadership of a group in order for that group to be moved into a different direction. It only takes a few people to change direction of a group if they know what they are doing.

This Awareness indicates therefore, most patriots, those individuals such as the man who spoke, who was perhaps ridiculed by others who followed; they know what they speak of, and the masses simply become outraged, but in a crisis, they will turn and look for people of that kind to explain what's happening. This Awareness indicates that the more there are who know, the better the chances of survival in a crisis. The more who remain ignorant of the facts, the more easily entities are manipulated and led into directions not to their benefit.

Today More Truth is Leaked Out Than Ever Before

This Awareness suggests that the movement in society at this time is such that much more than ever in history, truth is being leaked out, inadvertently in some cases, and those who would work behind closed doors in darkness, working their mischief, are finding it more and more difficult to continue their deceptions. This Awareness indicates the situation relating to the secret government, the Iran/Contra affair, the secret team which Oliver North, George Bush, Ronald Reagan, all of these high-up officials, and all of the echelon of followers and associates within that secret team and secret government; all of this is very close to being exposed, and brought into the Light of Consciousness, but even this is only one of multitudes of secret societies, secret activities and secret governments.

This Awareness indicates there are so many more things in terms of conspiracies that need to be exposed, and yet, some entities believe there are no conspiracies whatsoever, and when a conspiracy is exposed, they assume it's the last one, or the only one; that it was some kind of fluke accident that a conspiracy ever happened at all. It is part of the role of the media, at least certain elements of the media, to make entities who believe there is a conspiracy appear to be paranoid or foolish.

Conspiracies Eventually Will be Brought to Light

This Awareness indicates that this is part of the effort of the conspiracy, to keep those who know about the conspiracy off guards and without credibility. This Awareness indicates it doesn't matter how hard they may try; their own actions eventually will surface and the conspiracies will be brought to light, even in spite of their efforts to cover-up, and those entities who are closed to conspiracies, who are sleeping in the middle of

the road, who do not believe in such things; upon discovering another conspiracy has been brought to lights will never admit that they themselves ever ridiculed the concept of a conspiracy, or at least not that conspiracy. They will act as though they knew it all along.

This Awareness indicates that there is so much face-saving and so much complacency and so much self-servings and so much ignorance in which entities wish to ignore that which does not fit into their personal scenario and plan for their life. There are very few entities who actually want to become more aware. Many entities want to know more knowledge so they can impress others, but not want to become more aware, to where their comfort zone is disturbed in any way.

Readers of the Awareness Material Are More Daring

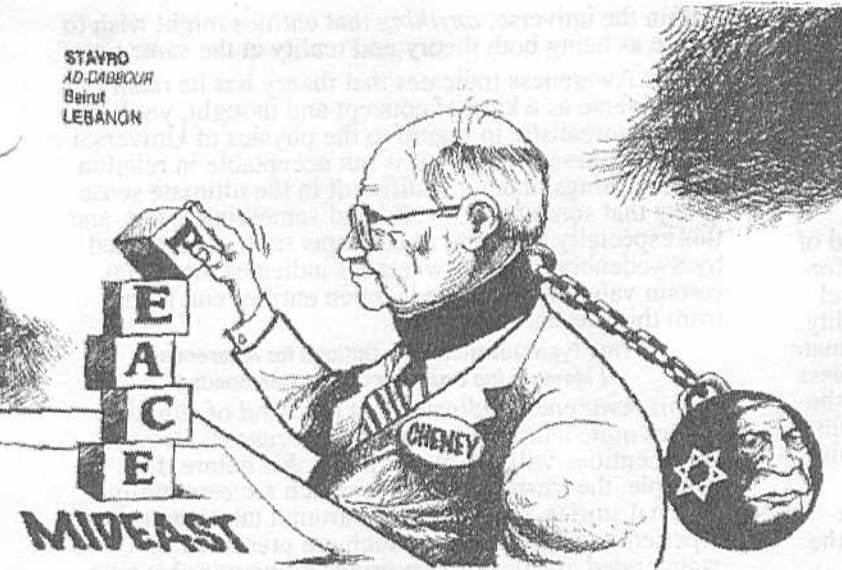

This Awareness indicates that those entities who read these readings from this Awareness are a rather rare bunch of brave entities who have something in their character that makes them a little more daring than the average entity who's only interest is security and self-promotion.

This Awareness indicates that these who read this material are somewhat more evolved than most entities and should never feel themselves to be in a fringe area or in an area off center or out of synchronization, but should feel themselves to be more deeply attuned to the reality than the majority, who are probably more superficial in their assessment of reality; it is not that you are in a fringe organization, but that you are in a more informed organization and receive more information than do most entities.

This Awareness encourages you not to rely solely on this organization for information but that you receive information from all sources that are of interest to you. It is for this reason that this Awareness has encouraged entities to pursue various books, various newsletters, writings, particular fields of study, that you might become even more informed than what you would, were you to diet only on these messages. This Awareness indicates the goal of this Awareness in giving these messages is to assist entities in becoming more aware, having more information from whence to make decisions to understand and to communicate to others that they too might have deeper and more meaningful understanding of the world in which they live, and that eventually that understanding can lead to new realities for better living.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the interpreters necessarily agree with the statements of Cosmic Awareness. The interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

WISDOM OF AWARENESS:

ON "THE WORD"

(The Importance of the Frame of Reference)

The word is that which creates the reality. The word created that which is the heaven and earth, that which is the truth from moment to moment. As you describe your experience, this is the truth for you.

This use of the word is only true within your particular frame of reference. As an example, from one frame of reference a particular type of behavior can be judged as being correct and as being right. From another frame of reference, that behavior can be seen as being evil and wrong.

It is a matter of which frame of reference you are looking through, and no communication, no clear communication, no truth can be shared by entities until they look through the same frame of reference and discuss the situation from that viewpoint.

EMANUEL SWEDENBORG'S BOOK HEAVEN AND HELL: IS IT VALID?

A question from Eugene O'leary, in Canada. He'd like to know: Is Emanuel Swedenborg's book *Heaven And Hell* written in 1778 still valid, or was it ever valid?

COSMIC AWARENESS:

This Awareness indicates that this is again a kind of material that is written within a certain frame of reference; within that frame of reference that the material may be considered as having a certain type of validity. This Awareness indicates that it is in regard to ultimate reality that this is more or less fiction. This Awareness indicates that much of what entities consider to be the belief system on which much of your religion is built is lacking in ultimate reality although in a sense, within certain frames of reference, it has validity.

This Awareness reminds you of the previous messages which this Awareness has given in regard to the fact that the universe is an information processing system and within the system of processing information, there are creations that are brought into existence, just as one can ask in television land: Is "I Love Lucy" valid or not? This Awareness indicates within its frame of reference it is a reality, but the question is: Within *what* frame of reference is it valid?, for in another frame of reference it is a fictional representation designed to make entities laugh, to bring entertainment and has no basis of reality within certain frames of reference.

This Awareness indicates that it is the same with many of your religions, philosophies, theories and even sciences. This Awareness indicates that there are ways whereby entities can create through certain types of processing of information, systems that last for many centuries as culture, and the culture can be built on premises that are created at a particular time but of some theory, and entities who build such a promise and then begin to build a philosophy which later results in the building of a culture, and sometimes in the building of an entire nation or planetary system, may presume that their system is representative of reality, but from a certain plane of reference, or frame of reference, it is built on a premise that is strictly theory.

A Premise Is an Assumption One Can Build On

On another frame of reference, if you accept the theory, then it may have certain validity, for one thing follows logically after the other within that premise. This Awareness indicates that for those who do not understand what a premise is, it is an assumption. This Awareness indicates that when you assume 'this' you may then build on that assumption, and within the acceptance of an assumption, there may be a certain amount of validity, but if you do not accept the assumption, then the validity is lacking.

This Awareness indicates that this creates different frames of reference so that something can be both true as well as false, depending on how you are looking at the thing, whether it is assumed to be true or whether the basis on which you rest your case is assumed to be false. This Awareness indicates that in regard to Swedenborg, much of his work as a kind of merging of metaphysical concepts, theories and religious dogma interpreted through his own consciousness, and it can have a certain amount and type of validity when viewed within that framework, but the entity does not base his premise on the reality of quantum physics or of the reality that the universe is a living being and it is possible to create, through the processing of information

within the universe, *anything* that entities might wish to create as being both theory and reality at the same time.

This Awareness indicates that theory has its reality in the universe as a kind of concept and thought, yet it may also be unrealistic in regard to the physics of Universal Consciousness, whereby it is not acceptable in relation to other things, thus, it is difficult in the ultimate sense to say that something is valid and something is not, and this especially in regard to concepts such as presented by Swedenborg. This Awareness indicates that it has certain value in that there is much entities can learn from this presentation.

This Type Question Very Difficult for Awareness (More on the Books of Carlos Castaneda)

This Awareness indicates that this kind of situation creates quite a difficulty for this Awareness, for many times, entities will ask questions of this nature, for example, the Castaneda books, which are essentially fictional stories, loosely woven around tales and minor experiences of the author, which are presented in exaggerated and dramatic writings along with his own theorization and some channeling on his part, and many entities will ask questions in regard to these books as though everything being spoken in the book were an absolute truth. This Awareness indicates that within the framework of the entity's presentation, this or this or this statement may be valid, but if you don't accept the total framework of the entity's presentation as a reality, then the details within are not valid.

Did Little Bo Peep Really Lose Her Sheep?

This Awareness indicates that it is the same as if someone were asking: Did Little Bo Peep actually lose her sheep and not know where to find them, or was this simply a rumor? This Awareness indicates that if an entity believed the story of Little Bo Peep to be an absolute truth then you were to tell the entity that Little Bo Peep *did* lose her sheep and did not know where to find them, the entity would presume this to be a fact, therefore this Awareness must qualify *Its* answer that based within the framework of Little Bo Peep's story it was a fact, but in regard to the overall reality, the basic premise of her having lost her sheep is questionable, for the story is but a myth, or a form of fiction.

This Awareness does not deny that there may have been some entity somewhere at some time named Bo Peep who may have had sheep, and this may have been a reality, and there may have been some moment in history in which the entity could not find where she had left her sheep, thus, there is that remote possibility that Little Bo Peep actually *did* exist and *did* lose her sheep, but this is not in reference to the Little Bo Peep who is being asked about in such a question.

This Awareness indicates therefore, many of these historical questions, questions regarding presentations by writers of history or theories of philosophy; many of these detailed questions relating to the validity of something are very difficult to define and label as being either true or false. They can have truths within them and there can be a certain degree of falseness involved in their presentation.

The Character Macbeth: Was He Real?

This Awareness indicates that in the consideration of, for example, some work of literature, were a question to be asked in regard to some character within the work, for example: Macbeth; if this Awareness were to answer the question as though it were a real entity; for example, an entity may ask a question about Macbeth, presuming it to be a true story. This Awareness would have to, in order to be honest in regard to truth, would have to distinguish between the reality of the Macbeth as

presented by Shakespeare and what is said in the story of Macbeth to answer the entity's question in relation to the story or in relation to reality, ultimate reality. In ultimate reality the Shakespearean story is fiction, therefore, the event within the story is not valid, is not true, but within the framework of the presentation, the event might be completely true.

This Awareness indicates it becomes even more complicated, because the story of Macbeth was loosely fabricated from an earlier story relating to a true character. This Awareness indicates that this story taken by Shakespeare, revised into a play, itself was partially fiction, according to the way the writer, the unknown writer was handed down the story of this king and therefore, even the story which Shakespeare took from was itself fictional. The ultimate reality, in terms of your historical Macbeth was not truly accurately recorded, therefore, there can be no clear refuting of the king or story of Macbeth. There can only be the refuting of the versions or the acceptance of the versions of the story as presented by the authors and the acceptance of certain framework as presented by these authors so that the question being asked in regard to that particular frame of reference can then be answered as true or false.

Milton's Creation of Hell the Most Accurate

Likewise, with the Swedenborg material, there is much within the book that is based on other presumptions that are not valid, but since many entities accept them as valid within the framework of such acceptance, logically there follows a certain degree of validity, and Swedenborg helps to clarify this information. This Awareness indicates that the most accurate description of heaven and hell as that which was given by Milton in equating it to the mind itself as a place which can create or make a hell of heaven, or a heaven of hell. It is essentially a creation of mind.

This Awareness indicates that this does not mean it is an hallucination anymore than your own life is an hallucination. This Awareness indicates that it does, however, mean that the mind has the final word on its nature and if one has sufficient consciousness, one can alter a state of hell into a state of heaven or vice versa. This Awareness reminds you that all is consciousness and entities are capable of merging with and using the consciousness for the highest and best if they are open and willing to merge with the highest and best, or they may sink to that which is degraded if they so identify with degraded levels of consciousness.

This Awareness indicates that it is much like the concept of the voice which sings a high note resonating at the same frequency as a glass which shatters when that frequency is sounded, whereby if an entity has the intention of raising his or her consciousness to a high enough frequency as to be attuned to the Divine Forces, then that entity will indeed experience heavenly forces, heavenly experiences, even though residing in hellish conditions. This Awareness indicates likewise, an entity can be in heavenly places but if the mind is sunk to such depths of depravity that the mind vibrates and harmonizes with those gross and debased levels of consciousness, then the entity can quickly turn that heavenly state into a hellish nightmare.

It is not so much where you dwell, but *how* you dwell on things that determines your experiences and how those experiences are perceived.

Wisdom of Awareness ON THE GOD-SELF WITHIN: (80-8)

"...the God-Self within entities does not demand perfection, it simply gives guidance and assistance so that entities may move toward perfection."

WHY DO DARK FORCES EXIST ON THE INNER PLANE?

QUESTION:

A question from Dan Chilinski again. He writes: "I would like to thank you for your cassette tape on my questions concerning the book *Spiritual Revolution*. What still disturbs me is that Awareness has never given any reasons to appeal to the common sense and the reasonable mind on why "Dark Forces" exist on the inner planes. If you do not have to worry about your rest or survival needs on the inner plane, then why is there a Dark Force there? In what way is this Dark Force or Alien Force organized on the inner planes? How do they trap people there? What are their plans, purposes, and what do they want or intend to do after stealing the energies of the masses? Perhaps later you might ask Awareness to comment on these questions.

COSMIC AWARENESS:

This Awareness indicates that the tendency of the questioner, and most entities, is to think of these Dark Forces as though they were entities whose purpose is to entrap and to capture the souls of individuals, and to think of them as being some kind of separate beings who are likened unto enemies of the worst sort. This Awareness indicates that these entities, these energies, these forms, these thought-forms known as Dark Forces are but creations of consciousness created by the negativities of mind and its emanations, cast off energies from humans and other beings in the universe which then gather energy, much as has been mentioned with the experiment known as the conjuring of Philip, energized by furthering their existence through stories about them and through parading them across the screen of the public, by discussing them and by convincing the masses that they exist and that they are terrible and that they can have some terrible effect on people so that entities begin to accept them as a reality.

Dark Forces Only Exist When Entities Fear Them

This Awareness indicates that these things exist only because they are energized into existence by people who write books about them, who write stories about them, who tell stories about them, who create fear relating to them, and the energizing is that which allows furthering of their development by people who hear these stories and who are fearful of them, or who want to know more about them and who begin to delve into demonology or other studies that relate to these Dark Forces. This Awareness indicates that *It* is not saying they do not exist. That would be like saying negative thoughts don't exist. Negative thoughts *do* exist, but what this Awareness is suggesting is that they do not *need* to exist. You do not need to energize them. You do not need to feed them. You do not need to be trapped by them. You do not need to fear them. Their existence only depends on people who energize them, who feed them, who fear them.

This Awareness indicates that these forces will disperse, will weaken if ignored. This Awareness indicates they can be ignored or they can even be dispersed by the will of entities. It is in this manner that exorcism can be used to disperse a demonic possession within an individual. One can exorcise a demon out of an individual by simply that movement and intent and the will being stronger than that of the demon, the faith of the exorcist, the one who would exorcise the demon away, through the faith the entity holds in some higher power.

This Awareness indicates that if, however, the entity *believes* the demon has greater power than he or she, or the power on which the entity calls, then the demon will win in any such battle. This Awareness indicates that it

is because the entity in such an exorcism believing the demon to be more powerful, energizes the demon with greater power. This Awareness indicates when entities understand the nature of mind, the nature of consciousness, they need not fear. They only need to fear their own misuse of their own consciousness. They may call upon the Highest and Best, the Light that they believe in, the spiritual energies that are of highest and best frequency and vibration, that which they perceive to be the most Divine; they call upon these energies for protection and those lower forces, those Dark Forces will vanish. They have no power.

This Awareness indicates, however, there are many who wish to energize those Dark Forces and then do battle with them, and as they struggle, they may even attribute greater power to them than what they originally perceived that they had, so that they strengthen the demon. It is in this manner that entities can become possessed to the point where they yield, the demon overtakes them. The demon only exists in the entity's mind. The demon only exists as energy. It has no real valid existence except in the existence given by the one who projects energy and life to the demon. If others project energy and life to the demon, it has a certain degree of energy from that, and if you participate in projecting energy and life to the demon, you add your energy and your life in a manner that allows the demon to accumulate energy from yourself and others.

This Awareness indicates that these wrathful deities or demons are created from the thought-form that are emanated by those who describe and attribute qualities to them, just as shown in the conjuring up of Philip, the nonexistent being who is given certain qualities and then begins to express those qualities because the group accepts him as being a reality.

Through the Valley of the Shadow of Death

This Awareness indicates that the entity who expects to pass over and go through a realm of demons is likely to experience his or her expectations, and if the entity expects to be caught, the entity is likely to be caught, but if the entity expects to pass over and go through that realm so fast that nothing can stop the entity, or with such protection that nothing can touch the entity as the entity moves on toward the Clear Light, the White Light, the Christ Light, the Divine Light, then the entity has nothing to fear, yea, though the entity walk through the valley of the shadow of death, there is no need to fear.

This Awareness indicates it is a matter of mind, a matter of where one's focus is placed. If one is focused on the Light, the demons fade. If one is focused on the demons, the demons grow stronger. This Awareness suggests that entities remember this in all of their dealings in life. "Don't think about pink monkeys. If you think about pink monkeys, you cannot levitate." This Awareness indicates that anyone attempting to levitate who thinks about a pink monkey will not get off the ground. This Awareness indicates that by learning to control what you think about, by learning not to focus on demons, by learning to focus on the Clear Light, the demons fade and your soul levitates and moves toward that which is Highest and Best. This Awareness indicates that for those who cannot control their mind and who need to be disobedient so that when you say: "Don't think about demons," they find themselves constantly thinking about demons simply because you told them not to, these entities have a natural rebellion streak which creates a problem for them.

It is better for them to go ahead and think about demons until they got through the rebellion. It is better for

them to have the permission to look and think about the demon, but the entity may then, in order to overcome that step, may then be encouraged: "When you're through with that boring task of thinking about demons and want to get on to something else, you might try thinking about the Clear Light, about the Christ Light, about the Divine Light, and determine from that higher and better vibration for yourself, so that all of these things from heaven might be added to your life."

Then Why Does Awareness Tell Us About These Negative Energies? Why Must We Know?

This Awareness indicates that there are too many entities who become entrapped by dwelling on these demonic and negative aspects of life, yet many will say: "Then why does Awareness mention these things? Why does Awareness tell us of these dangers, of these negative experiences? Why can't we just remain in ignorance? Why must we know about these satanic energies? Why must we know about demonic energies? Why can't we remain in the bliss of ignorance, knowing that all is well and facing only that which is the Highest and the Best?"

This Awareness indicates that *It* has given entities opportunities for eons of time to think the way they wish to think, to ignore or to focus their thinking in a chosen direction, and *It* has watched entities develop with many blind spots to where they cannot understand certain areas at all because they are totally psychologically blind, whereas they can see certain things through tunnel vision, but they totally miss other areas which they wish to ignore, and therefore, they do not understand their neighbor who sees something in a different way, they do not understand their children who see things differently, they do not understand the older generation or their mate, they do not understand authorities or they do not understand people of different persuasion, different philosophies or different religions.

This Awareness is tearing away the tunnel vision, opening up those doors of perception, leading entities who are willing to look toward those areas which they have previously ignored, even into areas that are negative, so that they can become aware, and in that awareness, become more discerning, so that they can know what is and what is not, and so that there is no ignorance left, so that they are not ignoring life or realities that might threaten or influence or seek to communicate with them, and therefore, these entities are not like those who look out of a helmet filled with holes, but are like those who take off the helmet and see everything that is going on. These are the Awareness Ministers. These are the entities who are to become the New Beings. They will enter into the New Age with eyes wide open, able to understand and converse about these many different facets of life that most people would prefer to ignore.

This Awareness indicates that *It* is telling you that there are negative things, that you do not need to dwell on the negative, but you do need to be *aware* of the negative; that you want to dwell on the positive, that you want to focus and stay focused on the positive, but that you must glimpse and notice the negatives in life. You cannot ignore these things. You must look long enough at the negatives to realize that they are there and that they need to be dealt with and then you must look toward the positive for ways to deal with those negatives.

This Awareness indicates in this way you can help those who are trapped in the negatives. You can shine light from the positive level on those who are caught in negative levels, without yourself being caught in negative levels.

The Many Negative Areas Awareness Has Covered And How It Dramatically Affected the Membership

Over the many years *It* has channeled messages, this Awareness has covered many areas that have been taboo, has discussed nuclear war at times when it was most unpopular, at times in which the membership threatened to stop reading the material if these fearful messages did not cease. These entities who remained looked at the threat of nuclear war and helped to defuse that threat by their awareness.

This Awareness has spoken of the misuse of the power of money, of the power of religion, of the power associated with sexual taboos and certain controls associated with this, and these things shocked many of the readers, who, in some cases, threatened to cease in their membership, in their reading, and yet, there are those who stayed, and these things are no longer shocking. These things became defused in their emotional energy.

This Awareness has spoken of the many conspiracies that have plagued this planet, and many entities withdrew their membership, dropped away; some never returned, some returned after discovering perhaps years later, from other sources, that the conspiracies did indeed exist, and the energy, the emotion, the charge, then was erased, defused so that they could come back and re-look and reassess and rediscover, and there have been those messages which this Awareness has given in regard to many different types of negative situations and many entities have responded with hostility: "I cannot stand all this negativity. I want marshmallows, cotton candy, spiritual kisses, blessings, and only praise from the Divine. I want the Divine to talk to me with flowers and spiritual marshmallows," and this Awareness has given you not that which you asked for, but that which you needed in order to become more highly aware, and it has disturbed you.

It has shaken up your emotional levels, *It* has thrown you off balance, and *It* has, in many cases, intrigued you to want more and there have been many who have become obsessed with certain areas and want to become more involved in certain areas, and this Awareness has said: "No! You have had enough of this! You are not to become obsessed with anything. You are to become aware of everything!", and this Awareness has given you information on all manner of questions that you can think of in all areas of life. This Awareness has given you information in fields that you never even thought of, that others have thought about, and in your reading of these materials, in your reading of this information, your mind has expanded, your emotions have been defused, your fixations have been blocked, your obsessions with certain areas have been curtailed and your general consciousness has been opened to see more, not to let you dwell into some tunnel vision-obsessive area, to be caught in some comfort zone of exploration that is your literal niche, but to allow you to get a general overview of life, of the universe, of the many facets of human experience, of political intrigue, of potential hazards and conspiracies and the manner in which entities deceive each other.

It has also given information of a more positive nature to help entities improve their relationships, their lives, their personal situations. This Awareness indicates that all of this is designed to open your consciousness to become the New Being, to discern more clearly that you yourself become open channels of the Light. This Awareness indicates that in this manner, it is essential that the questions continue and the focus remains ever and always moving toward expanding consciousness and that you not become fixated in dwelling upon the

negatives, but that you allow yourself the opportunity to glance, to look, to linger briefly on negatives that are part of the reality of the world in which you live.

This Awareness indicates in regard to these demonic energies, they are shadows. Their substance exists only to the degree that you give them substance, but this is so of all things. All things begin as shadows of reality, and move into substantial reality, by the energy that entities give.

FOLLOW-UP STATEMENT (AVATON):

Awareness might as well include the Satanism information....

COSMIC AWARENESS:

This is in the affirmative

Satanism Information Lost 5% of CAC Members

FOLLOW-UP STATEMENT (AVATON):

I made the mistake of informing the membership in a letter from headquarters that I was in the process of putting that information together and we lost approximately 5% of the membership before that information even went out. According to Sam, who did a layout for us on it, when we asked if that was the reason, the Tarot said clearly that was the reason: they didn't want to read anything like that.

COSMIC AWARENESS:

This Awareness indicates that this is sorrowful for the energy and information as that which would not have frightened them had they read the information; that it is something which could have been quite informative. It of course could have shaken loose certain emotional energies which would then dissolve and reconcile, and the entities would be stronger for having read the material. They would have a better understanding so that they need not continue fearing that energy.

FOLLOW-UP (AVATON):

This controversial book then, *Spiritual Revolution*, which has been updated to a book called *War In Heaven*, I believe, which allegedly was channeled to Kyle Griffith to alert entities of this threat after death and to prevent them from getting into it, and also to enlist their aid to battle this so-called 'Invisible College' while they are still alive; then actually this book is simply feeding the energies of these forces, is it not?

COSMIC AWARENESS:

This Awareness indicates that this of course does feed the energy of this force, even as the Christian religion, in focusing on Satan, feeds the energies of Satan and has led greatly to the establishment of the Satanic religion that is now growing on this plane. This Awareness indicates it is better that entities focus on the Divine energies and to let those others dissolve from lack of attention. Things can only exist if they have attention. This Awareness indicates that no entity can survive long without attention. No energy can survive long without attention.

WHY DO GOOD PEOPLE GET VIOLATED?

(All About Karmic Justice and the Biblical Story of Job)

QUESTION:

A question from Judith Jones. We asked her question back in February, and she's reasking it. She says: "In your February 2nd reading, page 10, I think my question was misapprehended. Let me rephrase it. Karma is often interpreted to mean that one who behaves kindly will be treated kindly by others, yet this is clearly not so. What, for example, is the meaning of the Biblical story of Job who was kind and good, yet endured all sorts of misfortunes? How do we understand cases of people who neither invite abuse, nor give with the expectation of

something in return, but who simply have a loving, caring, giving nature, and find themselves taken advantage of, robbed, randomly assaulted, hauled away by the Nazis or otherwise mistreated?

How can this be karmic justice?" she asks.

COSMIC AWARENESS:

This Awareness indicates that it is not a karmic justice for those who are innocent to be destroyed. This Awareness indicates there is a book called *The Murder of Christ*, by Wilhelm Reich, which speaks of this destruction of innocence. This Awareness indicates that this destruction of innocence is that which is perpetrated by the forces that are opposed or incapable of witnessing and accepting the Christ Light in others because they see it as a threat to their own negative and deranged energies, and therefore, their only option is to destroy. This Awareness indicates it gives them a certain pleasure to destroy or harm those who are innocent.

No More Martyrs. It's Time to Use Self-Defense

It is not that the innocent person is reaping karma for being innocent; rather, it is that the nature of innocence draws to it that which is its opposite: the oppressor. This Awareness indicates that entities therefore need to learn a certain kind of self-defense, a certain kind of strength within; that they not be too trusting of others; that their innocence and their goodness be protected, but not be victimized. This Awareness indicates that *It* has long said there have been enough martyrs. There have been too many martyrs. The martyrism has not succeeded in bringing about great changes on earth. It is better that entities stand up to the sadist and say: "Enough! I will take no more from you!"

This Awareness indicates that entities must learn to be firm in their right behavior, in a sense that allows them to penetrate into the heart of the Beast with a clarity, a firmness, a kind of truthfulness, rather than sitting there presenting oneself as a target, saying: "Here I am! Here's the victim you look for! What are you waiting for?" This Awareness indicates that too often, naivete draws in the oppressor, the deceiver. This Awareness indicates that in a sense, this kind of innocence creates its own karma, its own negative outcome, if it is not careful, if it does not protect itself.

This does not imply that entities should become overly paranoid, overly frightened to the point where they lose their clarity, their kindness, their generosity, but this Awareness indicates that too often, that which is called kindness, generosity, and goodness is really just an attempt to be accepted and liked, and therefore, the entity is bartering away their own interests with the intent of getting something out of someone else, so that the innocence, the generosity, is not really as generous as it might appear to be.

This Awareness indicates that the concept has been discussed before in regard to sadism and masochism; that there has been considerable information given on this. It is a complex situation, not easy to understand, yet it is important that entities understand to some degree that there does need to be a kind of firmness and realism and that you cannot simply be trusting, open, and naive to the point of extreme openness without expecting some kind of violations to occur, for there are always those who take advantage of opportunities or weaknesses in others.

This Awareness indicates that much of this openness will be seen as weakness. This Awareness indicates that it is better that entities present their light, not to the swine, but to those who appreciate, to those who are worthy. It is better that entities present their generosity to those who are worthy, and not to those who would

take advantage. If one is to be generous, if one is to be giving, if one is to open oneself, make sure that the one you open yourself to, the one you are generous to, the one you give to is worthy of such a gift, is responsive and respectful of you, and you will not be hurt. It is this discernment that entities need to learn if they are to be open, generous and giving.

This Awareness indicates this is what has been meant by the statement: "Cast not your pearls before swine." Give not that which is the highest and best of yourself to those who would not appreciate, who would trample, who would crush that gift of yours.

The Biblical Story of Job

FOLLOW-UP QUESTION:

Is that Biblical story of Job an example of what Reich was talking about; the murder of Christ?

COSMIC AWARENESS:

This Awareness indicates that this is not actually intended to relate to this. The story of Job as more along the lines of a story relating to anyone who thinks that they, by being good and innocent and righteous, have it made, for they indeed will still be tested by the realities of positive and negative forces in their life, and these testings are the trials and tribulations that all entities experience, whether they align themselves with God or not. This Awareness indicates that it was basically a story expressing the struggle and the unique situation of man on earth in his or her effort to remain attuned to the righteous path in spite of the many trials and tribulations that befall an entity's life.

This Awareness indicates whether the entity had cursed God or remained faithful to God, the entity still would have experienced the same tribulations, but the entity would have lost faith in having cursed God and the entity would have been weaker and without a sense of redemption or without a sense of appreciation for those precious things in life, had the entity cursed God, for next, the entity would have cursed his wife and his family and all other things to the point of becoming bitter toward everything. This Awareness indicates as it was, the entity received back many blessings after having lost, thus the love and loss becoming part of the experience of life which befalls everyone.

It matters not whether an entity thinks he or she is in perfect harmony with God. They still can have the love and loss in life, and then they may still be tempted and asked to curse God and die, but what would this do? It would simply deny them the one thing that gives them stability to endure.

When the Victim Offers The "Law of Grace"

FOLLOW-UP (VIKKI):

I think this area is sort of related. In relation to extending grace and the role that remorse plays, how much does the Law of Grace enter in, if the victim offers grace, but the offender still has no remorse?

COSMIC AWARENESS:

This Awareness indicates that an entity in forgiving one who has violated, may actually not alter the situation if the entity does not remove himself or herself from the situation. It can in fact allow for a repeat of a similar violation. This Awareness suggests that when entities are in a situation in which they are repeatedly violated, what good does it do to remain in the situation? It would be better if they wish to forgive the entity, to extract themselves from the situation and forgive the entity at a distance so that the violation does not need to be repeated.

This Awareness indicates that a victim can enable a victimizer by remaining a passive victim. A victim can encourage the victimizer, the oppressor, by remaining the victim. You can continue to forgive an entity for violating you, but is the entity going to learn anything? Is the entity going to be deprived, or is the entity being simply encouraged that: "It's really working! She keeps forgiving me the more I beat her!" This Awareness indicates you must be practical. This idea of martyring yourself in order to win because you are good is a fallacy. It doesn't work. It only creates martyrs and encourages the sadists. It encourages the oppressor.

What good is it to forgive another if the other doesn't seek forgiveness? It is better to forgive for your own sake, so that you do not hold the hostility, but to forgive the other just because of some rule or just because you heard it was nice to forgive others; this is not the reason for forgiving. Forgiving others helps to alleviate and remove the hostility you feel within yourself. It doesn't really affect the other, it just takes away your own hostilities. If anything, it might even annoy the other that you forgave them unless they seek forgiveness, unless they welcome forgiveness, unless they want forgiveness.

When Does the "Law of Grace" Apply?

FOLLOW-UP (VICKI):

Well, the scenario I was thinking of in this context would be if someone in your life had violated you and they had moved on or died or something, and I understand that sometimes grace can be brought in that benefits everybody involved with the forgiveness act.

COSMIC AWARENESS:

This Awareness indicates that grace is only appropriate when there is remorse; when one feels remorseful at having violated another, then the Law of Grace can be brought in to the situation, so that the entity who feels remorseful can be forgiven. Much of this is a self-forgiveness. Because of the remorse, the Higher Self of the individual, or the Christ Light of the individual emanates a forgiveness. It is the remorse that triggers the grace and forgiveness and the entity then can learn to accept the self, even though he or she has violated another and the guilt of the violation can then be dismissed because of the grace of the Higher Self, the Christ Light or the Higher Being having gracefully forgiven the entity.

This is the principle within Christianity and the salvation process. This Awareness indicates that one person in a situation having been violated by another can forgive the other, can hold no grudges against the other, and the benefits will mostly be for that individual who holds no grudges. By forgiving, the individual then released any hostility or resentment for having been violated, and the entity then becomes stronger and more healed of the circumstances. This Awareness indicates that the grace of a Higher Being cannot be easily effected for the one who violated simply because the one who was victimized forgives. The energy can, however, have an influence in breaking a kind of karmic bond between the victim and the oppressor so that the oppressor no longer feels that bond with the victim and can perhaps more easily break away and be objective about the violation to the point wherein the oppressor's Higher Self at that time might have some influence in creating remorse, but it is the responsibility of the oppressor, the violator, to seek forgiveness from the Higher Self, or the Christ Light, in order for grace to be effective on the oppressor's life, in order for the oppressor to be forgiven by the Divine Forces.

"Behold, I Stand at the Door and Knock"

This Awareness indicates one cannot be forgiven by Divine Forces if one does not seek forgiveness. If one does not ask for it, if one does not want it, the Divine Forces may forgive but it cannot affect the entity because the entity has not accepted, does not want, does not seek forgiveness, therefore, forgiveness, through the *Law of Grace* is not welcomed by the entity. It relates unto the statement: "Behold, I stand at the door and knock; if any be open, I will enter." This Awareness indicates the oppressor must be open to forgiveness; that until an entity is open to receive forgiveness from Higher Forces, the entity will not receive forgiveness. It is not that it isn't available, or that the Higher Forces aren't willing to forgive, but rather that the entity has not opened the door to accept forgiveness.

This Awareness indicates there are many entities who violate others, who do those things which they know to be wrong, but they do not ever ask for forgiveness. They may in fact enjoy having perpetrated violations toward others. This Awareness indicates each entity, to receive forgiveness, must open the door and welcome forgiveness. Entities may forgive others, but others do not need necessarily to accept that forgiveness.

New Testament Has Much Wisdom

QUESTIONER:

Thank you. Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that the energies relating to the questions in this reading are those which call forth many of the strengths and wisdom that is available within the ancient text of the Bible, particularly within the New Testament; that there are many things which can be found in these writings of great value. It is important that entities continue to expand their consciousness, and not to be put off in reading Biblical texts and studies of these ancient writings, simply because there are certain entities who distort, who use, who twist, or who interpret these writings in narrow ways, trying to coerce entities to think exactly as they do and embrace a narrow, rigid philosophy or version of Christianity.

There is much in Christian teachings that is of great value to entities when perceived in its proper framework or frame of reference and applied in proper circumstances without the rigid dogmatic view that has so distorted and misinterpreted these teachings. This Awareness indicates that there is considerable difficulty for many entities in reading the New Testament because of the programming of these rigid dogmatic teachings represented by some of the church religions, because entities tend to read with the same interpretations that they have been programmed with.

This Awareness suggests, however, that it is beneficial when you think along the lines of information, concepts, ideas, to occasionally relate back to messages from the New Testament and note how well they can apply to what is occurring in your situation. This Awareness indicates that great harm has been done to the teachings by those who interpret them in such narrow rigid formula as has been perpetrated and used down through the centuries, yet as entities become more and more open and aware, they can reread these messages, finding deeper and more meaningful levels of truth which can shed greater light on their lives and give greater meaning to the teachings contained within these writings.

THANK YOU. (The Law of Gratitude is given)

HOW TO RID YOUR HOME OF MICE

(More on Ultrasonic Pest Repellers)

QUESTION:

A question from Judith Jones, New York. She writes: "Mice have gotten into the ceiling and walls of my Vermont cabin and made tunnels through the insulation material. They keep me awake at night, scurrying about in there close to where I sleep. I want to banish them without having to kill or otherwise harm them. Is there perhaps something like cloves which I could blow into the spaces to drive them out? If so, please specify what it is and how I can install it. I've tried an ultrasonic pest repeller, and it is not effective. Incidentally, I have found an ultrasonic mosquito repeller I used to be likewise ineffective. Are these devices fraudulent or ineffective?"

COSMIC AWARENESS:

This Awareness indicates that the electronic devices may be ineffective, perhaps not working properly. This Awareness indicates that they may be weak or operating in frequencies that are not effective for their purpose. This Awareness indicates that it appears your best approach would be to hire a cat.

This Awareness indicates that a cat in your home will have greater effect on getting the mice to leave than any of these other devices. It may take a while, but the cat will make its presence known, and the mice will spread the word, and will gradually move out.

This Awareness suggests that you may need to make repairs in areas where holes have been chewed in order to keep the mice from returning once they leave.

This Awareness indicates the presence of cat in your home will do much to rid the environment of mice; that the mice will know that they are not welcome in your home.

This Awareness indicates that you may also warn the mice, talk to the mice, and inform them that you are getting a cat, and that they should leave as quickly as possible. If you can do this with the right frame of mind, in some cases they may pick up on your message.

This Awareness indicates that the use of cloves and various odors are not seen as being effective in this regard, especially not over any period of time. The odor would dissipate rather quickly, even if it was of any effect on the mice for any period.

This Awareness indicates that a week or two weeks of any kind of spice or odor out in the air or in a wall will render the odor almost odorless, especially with mouse odors present.

DID JAPANESE MAN INVENT AN ENERGY SOURCE THE SIZE OF A BOOK?

(Let's Hear It For "Enerec")

QUESTION:

Ted Helinski writes: "Ramtha has said that a Japanese inventor will develop an energy source the size of a book, that will provide all the energy needs for an individual's home. I wonder if this is the man he speaks of," and he sent in a clipping from the Fond du Lac (Michigan) Reporter, Wednesday, May 9, 1990, which shows a very grinning, toothy grinned Japanese man holding an object about the size of a thermos bottle that says on it, "Enerec," and the copy under it says, "Yoshiro Nakamutsu holds his Enerec, a device he claims will enable automobiles to run on plain water instead of gasoline, in Monroe, Pennsylvania, at the Inex Business and Innovators Convention. Nakamutsu has been called

the Edison of Japan, after inventing the floppy disc and the digital watch." Does Awareness see this as being a valid invention, and if so....

COSMIC AWARENESS (INTERRUPTING):

This Awareness indicates this is in the affirmative. This appears to be the reference issued by Ramtha in regard to this invention.

This Awareness indicates that it appears the invention uses certain chemicals that, when mixed with water, will create a gas and the gas can be controlled, as water is added or removed in the carburetor-type action, so that there is continual control over the manufacturing of the gas needed for the fuel of the automobile. It appears that this principle has been used before in variation forms. It is questionable as to whether this entity will be able to market the invention, with all of the political, economic ramifications in reference to the powers that seek to control energy, for there have been other inventions of energy devices which were either destroyed, bought up and locked away, or wherein the inventors simply disappeared. It is questionable whether this one will ever be marketed.

IS PALMISTRY AN ACCURATE SCIENCE?

(If So, How Does It Work?)

QUESTION:

A question from JD in New York. "Is hand-reading, palmistry, an accurate science, and if so, why and how does the hand signal such information?"

COSMIC AWARENESS:

This Awareness indicates it can be an accurate science if the reader truly understands the meanings of the lines and bumps and fingers when reading the hand. There have been a number of great palmists over the years who have left information on how they interpret these lines.

There have also been a number of palmists who have some degree of psychic information and confuse it with palmistry so that the palmistry lessons they have left are not necessarily true palmistry or true science because much of their work has been from psychic work rather than from palmistry itself.

Some Combine Psychic Abilities with Palmistry

If an entity is giving a palm reading and has psychic abilities, he or she may begin to read things into a line which is really nothing more than picking up on something psychically, and thus, their interpretation of the line may not be because the line is accurate, but because their psychic ability is in tune to the person for whom they drew the reading.

This Awareness indicates, however, if they continue doing the reading, using psychic ability rather than the actual palm science, they may not develop a totally accurate scientific reading using pure palmistry, and may, on occasion, miss, but for the most part, be accurate, and therefore, think that their unscientific psychic palmistry is still accurate because they are accurate most of the time.

This Awareness indicates that this can lead many entities to doubt the scientific accuracy of palmistry when they read this person's explanation of palmistry because they find it doesn't work for them, and the reason it doesn't work for them is because they do not have the same psychic ability as the palmist who wrote the book.

This Awareness indicates therefore, some of these books may be misleading and some of the books can be quite accurate. Some years ago, approximately in the Sixties, a book by an entity Chiero (this appears to be the spelling) on palmistry was printed. This entity had a relatively accurate understanding of palmistry, and many entities using this entity's method of palm-reading found great accuracy in their palm readings.

This Awareness indicates that this is one book that this Awareness can suggest entities begin with, providing it is still on the market and it appears it is still available.

This Awareness indicates that there are several other books which can be beneficial, but this Awareness suggests that you be cautious with them and that you start with the book by Chiero, for it appears to be the more accurate standard, and if the other books you read on palmistry are used for furthering your study, that these other books be explored with some questions as to the accuracy of the interpretations.

This Awareness is trying to give a title to the Interpreter; It is having difficulty in doing so. This Awareness indicates that it is the title of a book printed by Zolar, but which was written by John Brecken to whom

Zolar gives credit for help in the writing. It was actually written in total by John Brecken, who was a close friend of the Interpreter's and who spent years of research using astrology and handwriting analysis and palmistry in a combined way of gaining insight in helping to place people in jobs, for he was in charge of on-the-job-training programs and helped to create the SEGA program under Lyndon Johnson's War on Poverty.

This Awareness indicates that the entity placed people in jobs based on their astrological qualities, their handwriting analysis and his ability to interpret from their palms and hand shapes, and the entity wrote a book for Zolar to publish and received a small fee of several hundred dollars from Zolar, and Zolar gave him some statement of appreciation for his help in writing the book.

This Awareness indicates the book being called *Success At Your Fingertips*. This Awareness indicates that this can be of great value to entities who wish to study the combination of these three artistic sciences.

QUESTIONER:

The question is focusing on palmistry. She wants to know *why* and *how* the hand signals such information.

COSMIC AWARENESS:

This Awareness indicates that it has been found in research, that even upon an operation table, the palm, the lines on the palms will undergo a change when something in surgery alters a situation. This Awareness indicates that these lines may not change immediately during the operation, but over a period of days following the operation.

For example, if it shows what could be to the palmist read as a heart attack, and the entity has a heart operation to prevent such potential attack, the lines may alter within a matter of days of the operation to show that the heart attack will not occur.

The Left Hand Shows the Life Pattern One is Born With

This Awareness indicates that the general rule is that the left hand provides the information with which the entity was born, giving a kind of life pattern according to the lines in the brain. Keep in mind the brain is constantly recording events and occurrences and these have their effect on causing certain patterns to result in the hand.

Most of the patterns that change from the left-hand pattern of one's birth change on the right hand because of the cross-over from the brain to the right hand from the left side of the brain, recording onto the right hand; from the right side of the brain going over to the left hand. The right side of the brain being more the intuitive; the left side being more the rational side.

This Awareness indicates that as the brain records its wrinkles and convolutions in its reflection on the right hand, patterns and line changes may also reflect what is going on in the brain so that the palmist, understanding how to read these, can read the right-hand of the entity and get some idea as to what is going on with the entity in terms of his life, in terms of his future, because whatever goes on in your brain will affect your future.

This Awareness indicates that the fact is, the body's gait or movement, the body's physical expression also reflects the brain and what is going on in the brain so that if a person were observant enough, they could tell by the way a person walks what may occur to the entity in the future. They could see by the way the person moves whether the entity is going to have health problems, what kind of health problems the entity can expect, et cetera, et cetera.

This Awareness indicates that it is not so mysterious

as it is complex, and many entities have spent many years studying the complexities of movement, of lines, of bumps, of ways people hold their head, of lines on the face, so that there are those who can read faces and tell what the entity has experienced in recent months. This Awareness indicates that others can read the way a person holds his head and get some idea of the inner qualities of the person.

How Psychic Science Works

This Awareness indicates this is how the psychic sciences work. An entity can look at someone and get a psychic reading by simply looking at the way the muscles or the bone structure or the movement or the tilt of the head or the way an entity holds his chin or eyes, and get some insight based on previous experience, or based on a study of someone else who left a record of his or her method of reading these signs.

This Awareness indicates these sciences are art sciences. They are not the hard sciences of mathematics, but are a kind of art science, and as entities spend a lifetime of study, they may leave a book for others or teach others through word of mouth how to read these signs.

This Awareness indicates thus it is passed on for new entities to spend their lifetime studying the same art science to come up with even more data, and after many, many entities spend many, many lifetimes studying the data and putting down the information they learn or passing it to others, it becomes a relatively precise system of determining from movements, from lines, from structures, from bumps, to allow entities who are relatively novices to acquire a quick-start jump on the field of analysis, and they learn to analyze rather quickly by the clues left by others who have spent their lifetime studying and researching the work of still others before them.

Watch Out for Charlatans in the Palmistry Business

This Awareness indicates of course there are often the charlatans who know nothing or very little about what they are doing, but can put on a good show and can talk a good talk, and feed the customer's ego to make them think they are getting a good reading and spending their money for it, and these entities will hurt the science or art of the reading, but these entities are not to be considered as a proper representative of the field, any more than an inexperienced plumber should cause others to think the field of plumbing is all fraud because they once knew who a man who called himself a plumber and who couldn't even fix their leaky faucet.

When the Life-Line in the Palm is Read

QUESTION:

In palmistry, one of the favorite bits of information a typical palmist gives, is to examine the lifeline and tell the entity approximately how much longer he's got to live on this plane. However, sometimes lifelines change. I have observed this in certain people, and I was wondering why and how a short lifeline, for example, for a number of years on a child, as the child grows older, the lifeline extends or changes and becomes longer.

COSMIC AWARENESS:

This Awareness indicates that this can come about through proper living, through a diet that is influenced by a very strict parent or by behavior that develops which was not necessarily predictable by the child's birth information or genetic information.

For example, suppose a child is born of a genetic quality in which the entity would likely to become quite wild, but the entity is born in a situation in which there

is a circumstance that happens which causes the entity to come into a kind of restrictive environment, and the entity develops more self-discipline early in life rather than the normal wildness that he or she was expected to develop from the genetic qualities he or she was born with.

Suppose this entity's new restrictive self-discipline has much to do with how long the entity will live, compared to the wild qualities of his or her genetic implications, and thus the entity's self-restraint develops and grows to allow the entity to be more cautious and therefore, to live longer.

The Right Hand Shows What the Entity has Done With his Life

This may show on the entity's lifeline on his right hand, while on the left hand you may see a shorter lifeline of what the entity was given at birth, and on the right hand, what the entity has done with what he was given, so that you can see the entity has lengthened his lifeline on the right hand by whatever he or she has done with his or her life energies.

This Awareness indicates in general, however, the lifeline is not so much a measure of how long you will live, it is more in fact a measure of vitality. The vitality that you have in your being is registered as what is called the lifeline. It would be better to call it the vital line, or vitality-line, for it shows how much vitality you have. The depth of line shows greater vitality.

The length shows that vitality carrying through many years so that the vitality you carry helps to extend your life, but there can be certain events cutting across the lifeline showing problems which may result in a broken lifeline, and the broken lifeline can indicate death or the threat of death.

This Awareness indicates, for example, the broken lifeline may suggest that there is danger at a certain point in your life where you may be killed, but if you have sufficient vitality in your lifeline as you approach that particular time, and if you have a certain kind of protective energy from your philosophical meanings, and if you have a certain amount of self-discipline, perhaps you can bridge the gap in your broken lifeline and go over onto the next line and continue living beyond that point where you were destined to die.

This Awareness indicates that this so-called broken lifeline will then show a line developing over a period of time to connect the two lines that appear to have been severed so that the entity's broken lifeline now is connected by a kind of bridge, a line that bridges the two and brings them together.

The Significance of the Headline

This Awareness indicates there are many other areas that are likewise of great significance. The line that helps to show time of events is not limited only to the lifeline, but the headline also will indicate the timing of events. The headline is that which goes across the hand to a point usually under or to the side of the hand, beneath the little finger.

This Awareness indicates that sometimes this headline bends down toward the palm of the hand, which is known as the Lunar Mount, and when it goes down toward that Lunar Mount opposite the thumb in the palm of the hand, it shows that the headline is moving toward the Moon Mount and that this is an indication of a person with a strong imagination.

If an entity has a strong imagination, it usually means that life is relatively easy for the person. It can be dangerous to the person, because life is so easy, they don't have to do anything to get by, but they have mood swings, because they have time for mood-swings, they

can become very depressed very easily.

Marilyn Monroe's Headline

This Awareness indicates the entity Marilyn Monroe had such a headline. It went down toward the Moon Mount on her hand. An entity who has a straight headline going straight across the palm, usually has a considerable amount of effort involved in living. You can tell what year things will be easier for you by watching this line known as the headline.

This Awareness indicates between each finger, if you draw a line down to the headline, count it as 21 years of time, beginning with the point above the thumb, going across the palm; 21 years under each of the points where the fingers come together. Drop down to the headline and mark that as 21 years.

Determining Your 21 year Cycles From Your Headline

In your first 21 years of life, usually there are chains or what look like little weaving marks, and these are difficulties. There are usually more difficulties in youth than as one gets older. If, during any of these 21 year cycles between the fingers, the spaces between the fingers and the markings on the headline, the headline makes a turn downward, it will be a time when you will have more benefits and life will become easier, because in order for you to have that drop in the headline you will not be required to work so carefully in dealing with life and the difficulties of life.

When life is difficult, your headline must go higher, because you have to be more mental, more alert and more careful. When life gets easier, you can relax mentally and the head-line will dip. Thus, you can look at any point, every 21 years as the lines between your fingers are used for dividing your life into 21 year cycles, and you can see which of those 21 year cycles will be the easiest for you.

Keep in mind, however, that easiness in terms of practical effort, is not always the most beneficial. As in the case of Marilyn Monroe, the great ease that she lived her life with, created extreme emotional moods as symbolized by the moon, in an astrological sense.

This Awareness indicates that if entities wish to study this in great detail, the book by Chiero is one which can be of significant value in helping to get a much better understanding of the art of palmistry. It is more of an art than a science, but it is not a superstition by any means.

Lines on Hand are Determined Before Birth?

QUESTION:

Then, with all of the detailed information, a good palm-reader can find on a person's hand, this indicates that these patterns, and these paths were all worked out before the entity became embodied. Is that correct?

COSMIC AWARENESS:

This Awareness indicates they are worked out and recorded on the left hand. The changes that the entity makes during his or her lifetime are recorded on the right hand, and the right hand continues to record the events and changes that may occur for the entity. Therefore, you read in general the right hand, to determine which is actually happening to the entity. You read the left hand to determine what the entity was given as a fate in the life he was allowed.

In other words, the left hand is a map given at birth. The right hand is what you do with that map, how you change it, how you modify and live your life in reality, and the effects that it portends in the future; the effects of those changes.

A Bulbous Thumb and Other Concerns in Palmistry

This Awareness indicates there are also other con-

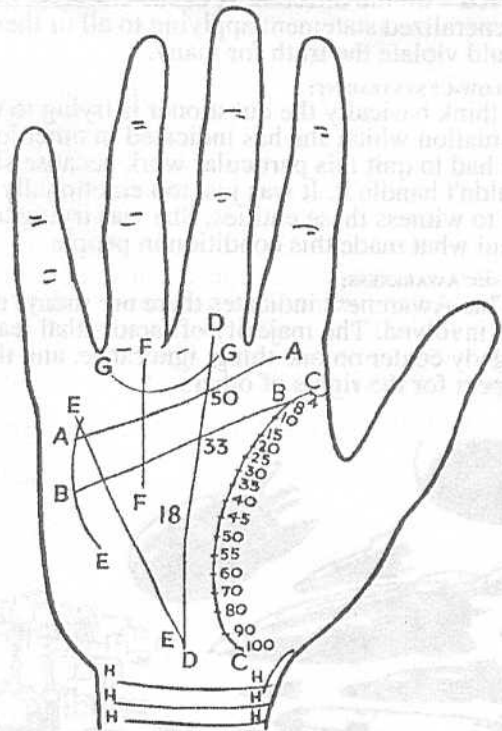

cerns in palmistry such as the length of the fingers, the shapes of the fingers, and the general shape of the hand, whether it is conic hand, a square hand, or other type of hand; these things will indicate certain character qualities regarding the person.

A bulbous thumb for example, can mean one thing. There is that which is also called a "Murderer's Thumb," and this is a large bulbous thumb, but it is not necessarily the thumb of a murderer. This Awareness indicates that it can simply be a sign that the entity needs to work in certain heavy type constructions. This Awareness indicates that one palmist, for example, suggested that this entity who had what he thought was a pure Murderer's Thumb, should work in a slaughterhouse, and the entity found the work in the slaughterhouse to be exactly what he liked best, of all jobs he could have had.

This Awareness indicates that it was the palmist's interpretation that this entity's thumb was so clearly that which is described as the Murderer's Thumb, that he would be better off in the slaughterhouse than in other jobs on the street, because the temptations and the character of the person might be relieved in the slaughterhouse in a way that is more suitable.

This Awareness does not wish to give the wrong impression that every bulbous thumb is a Murderer's Thumb. There are different meanings for different shapes, and this Awareness wishes to be very cautious, to clarify, there is quite a difference in bulbous thumbs.

This Awareness indicates that Chiero also even discusses the shapes of the fingernails; that these have certain meanings, each individual to their own kind and shape.

She Feels the Government is Dishonest

(Some Ideals We Thought Existed Are More like Santa Claus)

QUESTION:

One other questions from Joyce Williams. She writes: "I was raised to think the United States was honest, just, a champion on rights. I know in my heart the truth of what is going on politically, but often have a difficult time reconciling the false ideal I absorbed as a child with the reality. I would appreciate help with this!", she asks.

COSMIC AWARENESS:

This Awareness indicates there are certain ideals that entities hold. There are those ideals and images that entities hold toward Santa Claus, but as time goes on, entities begin to find that these references and teachings relating to Santa Claus are not true. They are ideals and they are fun, but they are simply not true, and most of these entities in discovering that Santa Claus is but a myth, find themselves in a few years perpetuating the myth in order to preserve the pleasure and innocence and joy they experienced as a child, for their own children to experience now, and their children will grow up, discovering that they have been lied to about Santa Claus, and they will probably also want to share that glorious lie with their children so that their children may enjoy the thrills associated with the false beliefs in Santa Claus.

This Awareness indicates that entities are often taught in every country, even in Nazi Germany entities were taught that *their country was great, was wonderful, had high ideals and purposes, but there were eventually leaks in the story and entities discover their country was not as great, as ideal, as wonderful as they had been told.*

This Awareness indicates that when you come upon a person whom you hold in highest esteem, you say, "I just love this person! This person is my ideal! I would do anything for this person because the person is so good!" If you are with that person long enough, you begin to see the minor flaws. You notice the occasional bad breath, or other situations that are less than ideal, and you gradually become familiar with the person and no longer feel the person is absolutely the best fitting your highest ideals.

Thus, it is also with a nation. The ideals of a nation are embodied in its founding papers, in its history, in its behavior, in its way of treating its people, and as a child you are shown the highest and best aspects of your country, and it is rightfully so that you see the ideals first, but as you become more and more familiar with life, with reality, with your nation, you begin to see also the flaws, the ugliness, the way it treats its people, the homeless, the sick, the uncared for, the abused, those who are denied justice.

You begin to see that there are flaws in the armor of this great nation and that the laws and the systems which claim to be the best in the world may often produce tremendous errors. That entities who claim to represent the people may in fact work more for themselves, putting the cost or the blame or the burden on the people, as they themselves benefit, and you find that the reality and the ideal are nowhere near being together.

This Awareness indicates that you ask for help. Help to do what? To get back to the ideals, to believe the lie, or help to accept reality, to know the truth, to place truth above your wish for perfection in other things? You cannot have a perfect nation, you cannot have a perfect mate, you cannot have perfection in your life, but you can have a love for truth and you can pursue the truth at all costs as being your true purpose, wherever it may take you, and that truth that you pursue may then help to free you from the bonds of illusion.

Beaten and Sexually Molested Children

(Have They Deliberately Chosen Such a Miserable Life?)

QUESTION:

A question from Joyce Williams. She writes: "I recently started work in a residential treatment center with children from ages 6 to 14. Most of these children have been profoundly abused: sexual molestation, neglect, beaten earlier in life. Have these entities chosen such a lifetime for any reason?"

COSMIC AWARENESS:

This Awareness indicates that to make a blanket statement for all of these entities is unfair, and unrealistic. Some of these entities have selected circumstances into which they were born because they were willing to go through extreme difficulties to get back into the physical form to begin to work off karma. Others chose such circumstances with the realization that they would be paying off karma by suffering some of the pains that they had caused others in previous lifetimes.

Some of these entities came into these situations with a willingness to take on the karma of others in order to see those others release some of their pent-up hostility, anger and frustrations due to these choices. It may have been in some cases due to karmic affection for those who abused them and a willingness to let themselves take on the sins of others so that those others could move on and get beyond the pent-up hostilities.

This Awareness indicates that it is not possible to present a blanket statement to allow entities to judge others karmically because of events that occur to them. To be able to categorize them with some karmic classification is not necessary; it is simply a mind game. The mind does not need this information and, in fact, it cannot be given for there are so many variations involved with the differences of the children, that to make a generalized statement applying to all of these children would violate the truth for many.

FOLLOW-UP STATEMENT:

I think basically the questioner is trying to understand a situation which she has indicated in other letters that she had to quit this particular work because she just couldn't handle it. It was just too emotionally hard on her to witness these entities. She was trying to understand what made this condition in people.

COSMIC AWARENESS:

This Awareness indicates there are many, many factors involved. The majority of factors that lead to such tragedy center on one thing: ignorance, and the lack of respect for the rights of others.

HE THINKS THE COSMIC LAWS SHOULD BE EXPANDED

(The Limit on Spiritual Information Awareness Can Give)

QUESTION:

A letter from Gary Drake, in Carson City, Nevada, which isn't a question, but he suggests areas of questioning.

I'd like to read these to Awareness. I'll just read part of the letter; it's rather interesting. It's sort of a testimonial. He writes: "Dear Vikki: When I read the suggestion from Awareness in issue 92-1 that CAC needs a broader base, and that the effectiveness of generosity at this time will be greater than at any time in the past, I thought of my skinny budget, and I moaned and groaned, but when I turned in my chair toward the bookcase and counted 13 three-ring binders, one per year, full of priceless information and inspiration, I decided, to put my budget on another slim-fast diet for a couple of months.

(rest of letter is read-last sentence ...

"In closing, however, it appears to me that a series of readings on the Laws of Cosmic Awareness would be a real prize, readings that would expand on their definitions with relevant examples, their personal and practical applications, their interdependencies and so on. As the Laws are presented now, in a kind of dictionary format, I see them as gems in the rough. I think, if Awareness could bring them more to life, they would make an excellent companion to the superb Spiritual Development course. That's it for now. Sorry I'm a bit late with my renewal, but unlike our ship of state, deficit spending would sink my ship like a rock."

I'd like to ask specifically if these suggestions, particularly on the Cosmic Laws, does Awareness see this as a future questioning area?

COSMIC AWARENESS:

This Awareness indicates that this could be very beneficial to many entities to have more information on the meanings of each Law. That if the membership does not mind some redundancy in this area, it would be very helpful to many to have these laws more clearly explained.

This Awareness indicates that the Laws are the heart of the spiritual messages given by this Awareness and perhaps further elucidation would satisfy many who want more spiritual guidance. This Awareness indicates that there have been some requests for getting away from some of the conspiracy and dark aspects of the universe. This Awareness indicates that these areas need to be understood and explored but much of this, having been given, requires very little further information and those who prefer to have more spiritual information have presented this Awareness a challenge.

CAC Members Present Awareness With a Challenge

How much spiritual information is there? This Awareness has given explanations of the deepest magnitude of how things work in a spiritual sense, particularly in regard to the appearance and disappearance of the universe, every four-quadrillionths of a second, and how all of these things throughout the entire universe, appearing and disappearing, can be altered by consciousness.

From that simple understanding, entities have enough spiritual information to unravel all of the mysteries of spirit. Thus, when entities say they need more spiritual information, it puts this Awareness in a quandary as to what more can *It* say without becoming redundant. This Awareness indicates, however, perhaps these spiritual messages have been too precise and need further information for those who do not wish to unravel or think through the information, which should be more self-explanatory, if entities simply focus on it.

This Awareness indicates that it is a question of whether entities think that Awareness would be repeating *Itself*, would be redundant in going through these things and explaining them, or whether this is helpful to have these things explained further, for this Awareness could begin explaining these laws in greater detail and discover that entities are writing letters wanting something different and feel that the information is boring and redundant.

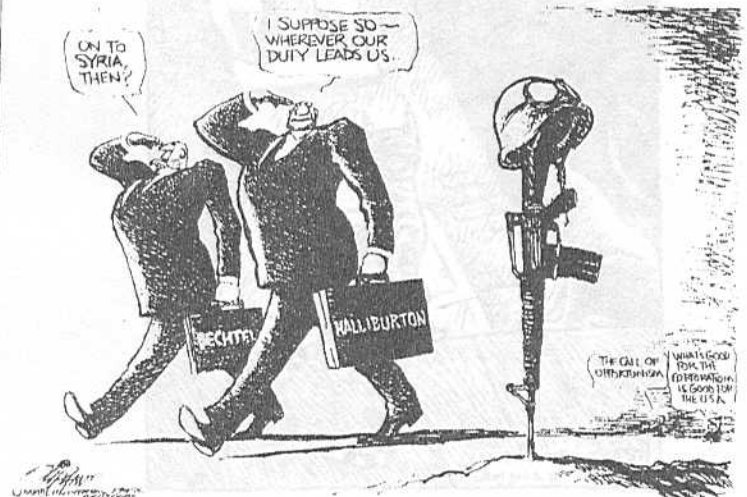

Awareness Has Given More Spiritual Information Than the New Testament Has Provided

This Awareness indicates after all, if you think about it, the New Testament only gave a small percentage of information of a spiritual nature that has been the guidance of the Western World for approximately 2,000 years and will continue on for at least another thousand years, and this Awareness has given spiritual information that has gone into extreme depth in terms of creativity, in terms of explaining the mysteries and has provided many more pages of such spiritual information than was given in the New Testament, and this Awareness is sometimes amazed when entities request more spiritual information, for this Awareness does not yet see that entities have fully understood the information that has been given, or have not applied.

If more is given, will it simply create a greater quagmire of material to prevent entities from seeing the jewels of wisdom in these messages that have already been given? Will it overwhelm entities so that they cannot find the nuggets of truth because there is so much explanation? This Awareness indicates that these are things to think about.

Sometimes it is not necessary to have a lot of explanation. Sometimes it is better to have a clear statement and to let entities extract from that statement their own explanation. This Awareness suggests that you consider these things; that if the Laws are to be expounded upon, it would be important to keep the expounded Laws in a separate place so that entities could have the more precise and concise Laws if they so choose, or could have the addition of explanations to these Laws if they so choose, so that there are two different sets of laws, one explained, the other as originally given in the concise form.

This Awareness indicates that these are things to decide. If you decide you want the Laws explained individually for separate publications then this will be acceptable to this Awareness, and this Awareness will proceed through these Laws to clarify and explain as needed.

AL BIELEK'S TIME TRAVEL

(More on the Philadelphia Experiment)

QUESTION:

A question from Dan Chilinski: He writes: "There was a long article in the magazine *UFO Universe*, Issues 9 and 10, concerning the Philadelphia Experiment, written by a survivor by the name of Alfred Bielek, born 1927, who was put into his present body by alien technology. He was previously Edward A. Cameron. He stated after he jumped into the water because of the terrible things that were happening to the crew on the ship *Eldridge*, he jumped into the water, but instead simply found himself on the grass at Mantouk Army Base on Long Island, New York, in the year 1983. He jumped off the ship in the year 1943, so there was a time gap of forty years. Also, Dr. von Neumann, who died in the year 1957, was there in the year 1983 to meet him; he was also given a new body by the alien's technology.

"Bielek stated that, 'they' cannot allow himself or his brother or Dr. von Neumann to die a natural death. I would like to know if Awareness would comment on this, who the 'they' is and why they cannot allow these three people a normal death? Bielek, in the article I read, stated he could not explain at this time the reasons for his being kept alive."

COSMIC AWARENESS:

This Awareness indicates that this information is explained in great detail on videotapes which are available from ... the name appears to be Bell, that the Interpreter may be able to supply the address for purchase of such videotape. It goes into the story with great detail, showing the location of the areas in which this and other events take place. The shipyards in 1943 became a filled-in land mass in 1983, and the entity jumped off during the time when the ship was entering into a time warp or time tunnel, and the entity was thrown forward in time.

This Awareness indicates that this as extremely complex. It is part of the physics associated with the technologies used by the aliens in which time warps or time travel is made possible, and whereby the movement from many light years away, can be accomplished in a matter of seconds, by using physics and technology.

This Awareness indicates that *It* is not sure that entities are ready for this kind of information. It is beyond the comprehension of most humans, but it is explained on the video.

This Awareness suggests that those who wish to indulge themselves in such explanations are encouraged to purchase the video.

This Awareness indicates indicate that it is much too complex to be explained by this Awareness through this Interpreter for the consumption and understanding of readers. It would take too long, require too much energy, in order to clarify the principles involved.

Ed's Note: Although this reading was given 12 years ago, the videos are still available from the Internet. Go to Google and type in "Alfred Bielek videos". There are numerous sites where these are sold. If you don't use the Internet, I found a site which has numerous videos on this subject as well as others in related fields. You can get two videos, for example, of the Montauk Project, Vol. 1 and 2, the first underground videos for \$55. Phone: 1-800-299-8036. (Al Bielek is still alive. He recently was a guest on the Jeff Rense show.)

For more on the Philadelphia Experiment please refer to "Revelations of Awareness" issues 82-24, 90-07, 80-09, 93-15: 3.00 each from CAC.

IS MARS OUR NEXT HOME?

(More on Alternative 003)

Question:

James Moran writes: "I, recently learned that the authors of *Alternative 003* have themselves disappeared. If you will recall, the third alternative was or is for the elitists to colonize Mars. The May edition of *Life* magazine features the cover story: "Mars, Our Next Home!" Would Awareness comment on whether this is significant or not?"

COSMIC AWARENESS:

This Awareness indicates that this is significant. It does appear that there is and has been considerable effort already presented to the colonizing of Mars; that there have already been Mars landings with humans on the surface and colonies established. This will not be announced and even in future times when there is a landing on Mars, it will be a kind of staged-for-public-consumption type landing.

It will occur for the publicity purpose, without informing the masses that there have already been people on Mars for some time. This Awareness indicates that this is much the way the moon landing occurred; that there were landings on the Moon approximately two decades prior to the landing that the public was told of, and there have been considerable development programs in regard to the moon with bases or colonies on the moon, long before the publicized landing.

Likewise, on Mars; there have been contacts with humans on Mars since the 1960s decade, even before the publicized moon landings people had already been on Mars. This Awareness indicates that development of stations on Mars continues to this time, and will continue further under the guise of a Mars program to put someone on Mars. This Awareness indicates you will only be informed of the trappings of such a program to make it appear that it is a fresh event, when in fact, the activities have already placed people on Mars.

Ed's Note: For more on "Alternative 003" please refer to the following *Revelations of Awareness* newsletters: 88-06, 86-13, 85-15, 82-22, 85-15, 95-07; \$3.00 each from CAC.

THE WAR IN IRAQ

QUESTION:

A question from Cecile Sonnon, Lebanon, PA. She asks: "What does Awareness have to say about this war? Will we defeat Saddam and his click? I hope so for the people over there who are innocent of h is doing. Will it bring on other wars (escalate in other words) with Iran and North Korea? You know history repeats itself and humans are not learning."

COSMIC AWARENESS:

This Awareness indicates that the present war reflects the shifting belief structures with the global consciousness concerning the nature of individuality, freedom, power, and dominant superiority. This Awareness suggests that although freedom and democracy are the espoused motives, the notions of freedom are confounded with economics interests; the actions are contradictory to the emerging global democracy and are rationalized and justified by emotional manipulation of those who harbor disempowering religious beliefs.

Euro Dollar Threat Blg Reason for War

Although terrorism is the suggested threat, the most driving "threat" is signaled by the fear that the US will no longer enjoy its historical level of superiority and economic strength, which has been based upon dominance hierarchies, and consumerism rather than liberty or equal justice. The agenda is to maintain US economic superiority by establishing the dollar in the middle East in the face of the threat of the Euro, which represents the increasing strength of the global community and the global economy. This action exhibits resistance to the natural evolutionary trend toward more sustainable egalitarian networks born of the awakening consciousness of the species, and like all resistance is creating more harm than good.

Saddam Will be Ousted but Problems Await

This Awareness suggests that the leader will be ousted, but the action will be met with much more resistance than anticipated given the religious belief systems in place and will create much more negativity against the US and will invite further acts of terrorism and anti-American sentiment. Should the US refuse to allow the global community to participate in the restructuring of the country or to take steps to rebuild the level of public trust, its empire will collapse far sooner and with much more pain than the course already set in motion.

U.S. Clinging to the Notion of "Evil" Is the Bigger Threat

This Awareness indicates that the most valid threat is the level of species consciousness concerning the nature of "good and evil" and the self-perpetuating cycles of threat and defensive retaliation. Although the beliefs are beginning to shift in these other areas, the most sweeping increases in human consciousness will only follow the shift away from the notion of "evil" others and toward the recognition of the fundamental unity of all living beings and that threat to one is threat to all.

While clinging fast to the notion of evil, the US leadership has allowed your nation to become a rogue within the global community, and one much more threatening and dangerous than a simple dictator in the eyes of the rest of the world given your formidable military arsenal. The stated agenda of "preemption" before the fact is based upon a faulty understanding of the nature of reality and a dangerous misunderstanding of the message of fear, but a clever manipulation of the terror that is

regularly instilled, stirred, and channeled to garner submissive complacency in individuals who do not recognize its true meaning.

How the Cycle of Violence is Perpetuated

This Awareness suggests that threat that is created by the mind on one side of a conflict, will be created and returned by the mind on the other, perpetuating the man-made cycle of violence and retaliation evidenced across human history—a pattern which the enlightened can perceive and must point out to the masses. Any community that houses its own weapons of mass destruction is threat to the public trust, particularly if it has a history of military force and domination, a strategy only viable until consciousness evolved sufficiently for social cooperation—an essential spiritual message that has been offered since the dawn of human religion, which has yet to be fully embraced.

Threat is the antithesis of trust which is the spiritual glue that holds together any human grouping. But trust will not emerge locally or globally until humans recognize how and why they are creating threat and disconnection themselves through fights for external dominance instead of harnessing internal empowerment and self-control.

Liberation and Dominance are Incompatible

At present the Homeland Security Agency and the media are advising just how much fear one is supposed to experience on any given day, such that citizens will be much more submissive and ready to give up their rights and make sacrifices for the stated cause. Liberation and dominance are incompatible, yet mindless submission enslaves the unaware.

This Awareness suggests that there are no innocent victims nor are there those to blame when such mass events occur. Although the leadership of the US has garnered much more power than they are spiritually or intellectually equipped to handle effectively, it has been the beliefs and complacency of the citizenry who have given over personal power to this turn of events. The masses on both sides of the issues remained conditioned to responding submissively to emotional manipulation from propaganda and religious control such that many have handed all personal power over to those willing to claim it.

Citizens routinely refraining from acting upon the angers of the injustices of ineffective political and judicial systems while enjoying the comforting superiority that victim-hood and blame offer, often do not even recognize their own enslavement or role in the creation or perpetuation of the event nor have any idea of how to reclaim and redirect their power.

This Awareness suggests that should the citizenry continue to invest in the simplistic view of 'good self and evil other' despite the interconnected nature of life and consciousness, and allow this leadership to continue to the agenda of eradicating the 'axis of evil', history will indeed continue to repeat itself.

ANY OCCULT MEANING TO THE WAR?

(A Stargate or the Lost Ark of the Covenant?)

QUESTION:

A question from Jon Lock. He writes: "There was a man on the Art Bell show recently who said there was a Stargate found in Iraq last May, that Saddam did not know how to operate it and Bush is aware of this and that is what the war is all about. Would Awareness look at this area and see if this is true. There have also been stories on the Internet that the biblical Ark of the

Covenant which contains great power is somewhere in Iraq. Is there any occult meaning attached to the war in Iraq. If not, what is the REAL reason for this war?"

COSMIC AWARENESS:

This Awareness indicates that such lines of thinking are symbolic of the acknowledgement that tremendous power has been lost, and such tales offer symbolic solutions for reclaiming it. But whether it is the Ark of the Covenant, or a Stargate, or an omnipotent God, or any other external source of power that offers salvation, humanity will remain unaware that empowerment lies within and can *only* be harnessed by taking responsibility for one's role in the *creative process* and examining and consciously redesigning one's own beliefs structures.

Supplication for divine grace is as disempowering as is blame for Luciferian evil, and wishful thinking about the former while faithfully believing in the latter invites its own punishment.

IS SADDAM DEAD OR ALIVE?

COSMIC AWARENESS:

This Awareness suggests that this leader has been most astute in harnessing primitive levels of consciousness and transforming himself into a paternalistic leader of mythological proportion. His energy and charisma have been and will be significantly enhanced by those who believe in submission to an all-powerful, punitive God as Divine Father, for the "good/evil" misassumption works in both directions. The creative energy generated by these mass beliefs have afforded this leader many lucky breaks that have allowed him to stay in power much longer than would otherwise have occurred.

Likewise the backlash from his opposers creates the misfortunes, the downside of the dramatic ups and downs this individual has experienced throughout his lifetime. He *is* alive at present and driven by fear, but is intuitively desirous of a dramatic and martyred death in order to enjoy spiritual status and well beyond his physical existence.

U.S. AT WAR BECAUSE OF ISRAEL

QUESTION:

A question from the editor: "The US is beginning to wise up that Israel is behind the long promotion of this war and that the Zionist "advisors" to Bush, along with the Zionists who control the Pentagon and the Congress and the Zionist-controlled media everywhere is now so obvious that even a moron can perceive what is going on. How will this new awareness affect the American people, the Hawks etc. Israel has already gotten Bush's promise that after Iraq is conquered we will go after Iran and Syria and other Mideast countries that Israel feels is a threat. It appears that Bush has started another Vietnam, a war that essentially never ends, and all because of Israel and the powerful and wealthy Jewish lobby,

COSMIC AWARENESS:

This Awareness indicates that those who perceive the symbolism embodied within "Zionist control" are functioning at a level of consciousness that is above the simplistic 'good-evil' dichotomy and in recognition of the issues of economic empowerment, global justice, and

the question of equality. The powerful and wealthy have traditionally been able to retain superiority by embracing and maintaining the dominance hierarchies established by religions, leading to the symbolic alignment between Judaism, Israel, and US imperialism. Those that recognize this manipulation do not succumb with simple submission, but are stirred to reclaim a degree of personal power.

This Awareness suggests that the anger experienced and the blame leveled at the 'haves' by the 'have-nots' is symptomatic of the rising global consciousness and the awareness that all humanity and all life is interconnected and of equal value and equal empowerment. This energy is best expended in personal expressions that increase justice and foster equal opportunities for all global citizens, rather than in assigning judgments and suspecting evil intentions on specific groups. US citizens who stand up and reject the simplistic imperialistic jingoism, who honor the rights and values set forth within their Constitution, who address the underlying economic and religious issues will be those reclaiming personal power as well as strengthening the global community.

From the Cosmic Laws of Cosmic Awareness...

THE LAW OF FREEDOM

The Law of Freedom is that movement which gives entities the space to expand and grow in their ability to function in a manner that will allow others their freedom and space to grow in order to free still others. Freedom is not a final state of being, but an ever-expanding action of giving each other the space to create spaces for others to create more spaces for still others yet to come. Freedom may be helped or hindered by laws, definitions, principles, descriptions, disciplines and boundaries. Universal Laws free each and every one; any law which does less is subject to the rule of a greater law. No one is free until each is free, and all are freeing each other.

--HOW TO GET THIS NEWSLETTER BY MAIL-- EVERY 4 WEEKS ! (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).
