Excerpt CAC Reading 2-2-1-93 Paul Shockley Interpreter

HE CAN'T SEEM TO FIND HIS PURPOSE

(Going Nowhere Fast in Search of His Mission)

Vicki received a letter from David Ard, Austin, Texas. It's a personal question, but I think it has application for probably a lot of others, so I'll read it. He writes: "Dear Vicki T., and CAC crew. Enclosed, please find my renewal. I have been a member for almost 5 years now and I have really enjoyed the newsletters and the work you guys do.

"For most of the time I have been working at dead end jobs and going nowhere fast. I can't seem to find my purpose. Awareness says to "follow your inner guidance", but I seem to have none! If I am a Wanderer with a "mission" then I am completely off track. I feel lost and confused.

"Awareness says to "look around and within to see what you really want to do with your life", but I don't see anything. Nothing stands out. I really need some guidance from Awareness to get me clear and back on track. Even if you could just ask Awareness one question: What can I do to get back on the proper course for my life and mission? What am I to do?

I'm not looking for Awareness to tell me what to do for my whole life, but I really need some help at this time because I feel I have moved off in a direction that is totally wrong for me. Every day I feel like killing myself. Can you please help me? I am begging. Of course I will not hold CAC or the Interpreter responsible for any information I receive and I free them of all liability in regard to this. Please write me back!

"PS: I realize this is an unusual request but I am in a horrible situation. Any enlightenment would be extremely appreciated."

COSMIC AWARENESS:

This Awareness indicates that you are one who recognizes the need to do something of significance with your life. You are also one who does not quite know what to do with this urge, and therefore, you feel you have wasted or are wasting yourself in doing nothing of significance. This Awareness indicates that for such a situation, you might realize that there are literally millions like yourself who do not know where they are going with their lives.

This Awareness indicates that most entities who have settled on a direction, settle on a direction because they have been hurt or injured in some way and have a need to compensate for that injury. It may be a childhood injury in terms of affection or ambition or direction, or it may be a childhood injury of sickness which leads them into a lifetime career of wanting to heal others. It may be that your philosophical interests have propelled you into a direction of wanting to share your findings with others and thus becoming a teacher of some message, either spiritual or business or relationship or other.

This Awareness indicates that each individual should look at the areas of his life that have hurt him or her the most and see if there is a way that having learned what they have learned, they can help others in similar situations. This Awareness indicates that in your particular situation you may find that you could be of great help to others in starting a counseling program to help entities find purpose and meaning in their lives.

This Awareness indicates that this does not mean that you tell them what your purpose should be, but that you, in questioning them, help them to find areas of their lives that they need to explore more deeply, whereby they may become aware of certain energies of their own that can be used to promote and help others in similar situations or to find answers for others who have similar problems.

This Awareness indicates that this can be done as a hobby while you continue to work at your normal occupation, whereby you make your living in a normal occupation, but also attend meetings or places or meet with people to discuss the philosophical areas of life that intrigue you and which also intrigue others like yourself to help each other find more meaning in life.

This Awareness suggests that you may even find a name for your activity such as the Meaning Of Life Club, or Pursuit Of Purpose Organization, or something of this nature, whereby you come together, form a group or club that allows you to discuss these things in a more wholesome manner so that each entity involved has an outlet for expression and inquiry using the collective minds to help answer the questions that individually you may have.

Entities Often Think Their Purpose in Life Eludes Them

This Awareness indicates that to give you something to start with; entities often think that there is some kind of purpose in life that eludes them, that they should know, but that they don't know. This Awareness indicates perhaps that is not the way things are. Perhaps that is the way things are for some entities, but not for yourself. Perhaps your purpose in life must simply be selected by yourself. Perhaps you must choose your purpose in life and follow your choice.

This Awareness indicates that this is not perhaps answering your question the way you would like it answered. Perhaps you would like this Awareness to tell you what your purpose in life is, but this Awareness suggests that perhaps you were not fated to have a purpose in this life, other than to work off certain karmic debts owed, and once these have been worked off, perhaps you must choose a direction and purpose for the rest of your life.

Perhaps if there is a trouble spot in your life such as the problem of trying to determine the purpose of your life, perhaps this is something that can be channeled into a kind of collective society wherein many of you or many like yourself come together with you to help each other find a purpose in life through your discussions and explorations into the question: "Why am I here? What is my purpose? Where am I going?"

What Am I Here For. Where Am I Going? The Answer:

This Awareness indicates that this is the question asked in the Awareness Development Class to begin the Development Classes. This question: What am I here for? Where am I going? is the question that all entities ask in their deepest levels of self-exploration. It is not unique to yourself. All entities ask this question.

This Awareness indicates that entities in exploring this question far enough realize that they are here to help others find a way, find a path to where the Eternal Energies are, and that in helping others to find this path, they also help themselves to find this path. This Awareness indicates that it is of course much more meaningful when you not only help yourself to find a path, but when you help others also to find that path to the Eternal forces and energies.

GOING NOWHERE FAST
(Dead-End Services to Society Are Important)

FOLLOW-UP STATEMENT:

When he says he's been working at dead-end jobs and going nowhere fast, that's sort of a pretty common complaint.

COSMIC AWARENESS:

This Awareness indicates any job that does not fulfill one's soul's purpose is more or less a dead end job. It is simply making a living, however, these dead-end jobs, these services to society, are also important. If one can change the diaper on a baby or sweep up the trash from an alley, one has given society something of value, and this is important.

Not Paying Society Back Creates Karmic Debt With Society

It is not the main purpose for which entities have come here, but it is an action that should not be down-graded or seen as meaningless. You should recognize the value of your service to society because you are taking benefits from society and it is important to give back benefits, to keep the balance sheet fair. Otherwise you will have a karmic debt to society.

This Awareness indicates that in other words continue with this service to society as long as it is necessary or until you can give a greater service to society that also fits within your need for spiritual evolution. As you begin to serve other people, helping them find their purpose and direction: for example, helping them to recognize their spiritual heritage; as you work in this manner you may gradually find that it is no longer necessary to sweep the alleys or change the diapers or whatever other activity society requests from you and that you are freed from these activities to put your entire life and devotion of energies into something that seems more meaningful and more important to you.

This Awareness indicates, however, that you must understand that the more important purposes and directions in life do not simply get handed to you by accident. There is no overseer to come in and say: "You are here to help this person or that person, and to bring about great change in your government or in your world." This just does not happen.

How Your Life Purpose Can Make Itself Known

You may find yourself instead working on a dead-end job wherein you by chance meet an individual who needs some special attention and you give that attention and find that in giving the attention you feel good about yourself and you feel concerned about the person and wish to give more attention and you may find that before long you have your life entwined with this other person's life to the point where you are giving much of your life energy to this person and perhaps it may be more than one person; it may be a family.

You find yourself giving energy to these entities and that all of a sudden you have a purpose in life that you didn't have before. If you can give even to one entity, or give to several entities, it gives your life greater meaning and greater purpose and the greater your ability to serve others or to serve another, the more meaning your life will have.

This Awareness indicates that entities whose life is centered around self-serving purposes have very little sense of general purpose in their lives. You can only go so far in serving self. After that, the activities become dead-end. This Awareness indicates that the greater your gift to others, the greater your life purpose will seem to be.

A Caution on Giving Gifts

This Awareness indicates, however, that *It* should caution you not to give a gift simply to have greater reward. You only give gifts because you want to, not because you want to be appreciated by the recipient of your gift, not because you want some kind of special recognition, or reward; for these actions would be self-serving, even though you are giving to someone else.

This Awareness indicates that any time you give a gift, give a gift because you *want* to give it, even if the gift might not be appreciated to the extent that you would desire. This Awareness suggests that in giving to those who are in need, you know that the gift is meaningful.

COULD THE WRONG DIRECTION BE RIGHT?

FOLLOW-UP QUESTION:

When entities like this person make the statement, "I feel I have moved off in a direction that is totally wrong for me", is it not true that sometimes, rather than this direction being wrong for him, it's a direction that's right for him at this particular time in his life because of particular lessons he needs to learn from that?

COSMIC AWARENESS:

This is a possibility. The entity may also have recognized that the direction he has gone which seemed right at the beginning, no longer feels comfortable and that the entity is preparing psychologically to change directions. This Awareness indicates that usually, before an entity changes directions, they sense a feeling of error in the direction they are moving.

This Awareness indicates the entity may be quite ready for a change in the direction of his life or in the change of occupation or some other factor. This Awareness indicates that dissatisfaction usually occurs prior to change, and the entity may be at a point of dissatisfaction and ready for change.

The Real Meaning of the "Suicide" Reference

This Awareness indicates the concept of his expression that he feels like committing suicide indicates the entity wishes to have a change in direction in his life. He wants this direction to die and a new direction to emerge. Therefore, the entity is likely to come to a conclusion in some path he has followed and make a sharp turn in another direction.

Perhaps the entity could benefit from going to school or studying some new line of work or taking up a hobby or a new form of research. Perhaps the entity would benefit from creating a totally different direction in his life, such as forming a group or club for entities who seek harmony with one another in finding new purposes and directions in their lives. This Awareness indicates that it appears this would be a healthy direction for this entity, whereby as he searches for his own new direction, he also brings together others in a similar search so that they altogether join in the research for purpose and meaning in life, a kind of philosopher's club, seeking new meaning and new direction for their energies.

WHY NOT MEDITATE FOR THE ANSWER?

FOLLOW-UP STATEMENT:

It seems like to me most of the questions this entity asks he could get answers for himself if he would start a meditation program and stick with it.

COSMIC AWARENESS:

This Awareness indicates that oftentimes the answers an entity seeks are very simple, but too often the entities

are too close to those questions and cannot see the simplicity and therefore, they feel themselves to be at a loss when it comes to finding an answer for their emotional or psychic or spiritual quest.

This Awareness indicates the entity could, and most entities *can* gain answers to many of their questions through meditating, but sometimes it is a fact that entities distrust their own answers, the answers that come from their own psyche, even through meditation. They do not know for certain that they have properly answered their question and thus they turn to others to ask for outside opinions.

They still will need to evaluate and come to their own conclusions after hearing the outside opinion, but often this extra input of information gives them something more by which they can then reach a conclusion that might not have been so easy to reach prior to the additional input of other information.

This Awareness indicates that it appears the entity can find purpose and direction and answers to his questions at this time through his own meditation and through the suggestions that have been given in this reading.

INDIVIDUAL VS GROUP MEDITATION

FOLLOW-UP (VIKKI):

It occurred to me that the difference between him going into individual meditation versus a group context might be compared to somebody swimming by themselves in the ocean or in a lifeboat, where a group of people banding together constitutes a boat as opposed to flailing around individually.

COSMIC AWARENESS:

This is in the affirmative. That an individual has more control over the answers, but does not have as much to draw on in order to reach a conclusion as does a group. The difference between a group reaching a conclusion and an individual reaching a conclusion is that the individual can reach the conclusion without any conflict from outside sources or from others influencing the decision, but the individual in reaching the decision has a limited amount of knowledge, a limited way of thinking, and a particularly narrow approach to answering the problem, whereas a group will have as many different ways to reach a conclusion as there are people and may have an enormously wide variety of experiences to draw on in reaching the conclusion, and the conflict itself between the individual involved may generate even further forms of reasoning and logic and methods for reaching a conclusion, even to the point where several conclusions are weighed and balanced and argued until finally, one is selected.

It does not necessarily mean that one conclusion is correct and proper, but it will have been scrutinized from many more different perspectives than if only one individual was involved in the decision-making process, who scrutinized only from his own personal experiences to reach the conclusion.

This Awareness indicates that the problem with the group involvement is that they may never agree on a single conclusion, and there are often entities who, even if they agree within that a conclusion is probably right, there are many entities who will nevertheless argue against it just in case it turns out to be wrong. Then they can say: "I told you so!"

This Awareness indicates that seldom is there a total consensus in any group, in any committee or in any gang activity, but with most individual decision-making, the individual will usually settle on a particular course of action without much internal argument, and once the entity's mind is settled or made up, the entity is not likely to change his mind without good reason.

THE ALIEN INFLUENCE OVER HUMAN MALES

(More on the Nature of Males and females)

QUESTION:

Rasma Kidd in Saint Cloud, Minnesota writes interesting letters and she sent another one I'd like to read to Awareness and ask *It* to comment. She writes: "Dear Vicki and Avaton. I would like to share with you some of my observations. Looking at earth people from an historical and social viewpoint, I notice certain attitudes that make me think that on the mental level there is and has been for a long time a strong alien mental influence.

"Women, in human society symbolize the emotional response, and the hostile, oppressive, totally insensitive attitude of men toward women appears to me as a strong alien influence. The aliens consider emotions worthless and want to eradicate them in the human race. The human male is and has been historically continuously conditioned to prize mental ability over emotional.

"If this trend would continue unchecked, we would become in time another super-intelligent, cruel, insensitive race working for the Empire, like the Greys. Now, I understand what I have seen looking at the world from above on energy levels, like dirty gray muddy streaks and swirling masses of brownish grayish blackish color.

"I see only few somewhat clear areas. There are many bright shining shimmering lights in this darkness. Lately I see many lights clustered and creating pools of light. Is there something we can do on meditative levels to create more light? It is frightening to realize how much the human race has been contaminated.

"I think that many of the souls who come as emissaries from other star systems get lost and injured in this murky gray, dark mental consciousness. I wish I would know how to recognize such people and to know how to help them recover. Perhaps I am one of the last ones myself! Thank you both very much for doing what you are doing."

My basic question on this: Is her theory on the aliens influence over human males, valid?

COSMIC AWARENESS:

This Awareness indicates that the concept of the mental aspect ruling man and the heart aspect ruling women is generally correct; that the alien influence is the mental aspect taken to extreme, this especially in reference to the Zeta-Reticuli Greys. This Awareness indicates that it does not necessarily follow that men are the created results of alien influence because they are more mental than women.

This Awareness indicates that the influence of women and men in human form has also been symbolized as Ra and Isis, with Isis symbolizing the more passive and physical aspect of humanity, and Ra as symbolizing the more assertive and aggressive expression of humanity.

These also have been symbolized by the sword, as representing mind, because it is assertive and aggressive and cuts through reality as a kind of knife. The mind being such that it cuts through reality and chops things into ideas, words and concepts. It is a kind of destructive and creative force, a doubled-edged sword, that can be both creative and destructive at the same time.

The feminine aspect of consciousness is such that it is receptive and creates and holds form, and that form itself

is different from mind; that mind is the chiseler or sculptor of form, but form itself is the results of the art, from the sculptor. This Awareness indicates that the female or form-energy in consciousness has a greater connection with reality than does the mind or mental aspect of consciousness, but the mental or mind aspect, the sword, plays a powerful role in molding the form, in sculpturing the form of reality.

They are both essential, both necessary. The form may see the sculpturing sword as cruel and insensitive, while the sculpturing sword sees its purpose as molding reality out of a kind of blob of energies, a stone, a crowd, a group; forming that stone, that crowd, that group into a statue, a shape, a civilization, a structure that takes on greater purpose and utility or meaning than a mere natural form.

Without Masculine and Feminine Energies Life Would Fail

This Awareness indicates that the nature of the female is to create new life, new form. The nature of the male is to mold that life and form into a certain structure, a certain type of life and form. One can argue as to which is more important or which is more evil or which is more good, but such arguments will not settle anything, because these forces are what they are, and they are influencing each other and even if everyone was to agree that the masculine energies had outlived its usefulness and should be done away with, it would still not satisfy the needs of life for life would simply fail without the masculine energies, just as the feminine energies are also essential to the continuation of life.

The Yin and Yang depend on each other and one can argue whether Yin is better than Yang or Yang is better than Yin, and one can criticize Yin or one can criticize Yang, or one can take an issue on positive and negative in a battery of a car and argue whether the positive pole is more important than the negative pole, but these arguments are fruitless and meaningless, for one without the other destroys the remainder.

The positive pole, if destroyed, also eliminates the usefulness of the negative pole in the battery. It is the same with men and women. They are essential to each other, regardless of whether they like each other or not. This Awareness indicates that the men or mental aspect of consciousness may have a certain kind of rationality or logic that is more precise than that which is expressed through the feminine or feeling side of consciousness wherein the feminine communication is such that many words are used to express the feeling, and the masculine expression in consciousness is such that a few words are carefully chosen to express the logic of the situation as seen by the masculine forces, and each sees himself as communicating more clearly and more meaningfully than the other.

Even With the Gender Gap we Still Keep the Species Going

Wherein the female sees the man as trying to solve the problem and all she wants to do is express the problem and does not need a solution, she simply wants to express her feelings, and the man looks and says: "Why are you telling me this if you don't want a solution? What can I do? Just sit here and absorb your feelings?" Thus the communication does not clear as it passes through each other's psyche and they think they are miles apart and incapable of accepting each other.

This is the nature of male/female impasse and thus, entities say: "I sure don't need any women in my life!", the women may say: "I certainly don't need a man to tell me what to do to solve my problems! I just need someone to talk to who will listen", and thus, the impasse remains for these entities who cannot communicate clearly with one another, and who see each other as hazards to the welfare of their own particular gender.

This Awareness indicates that in spite of all of this, these entities are the ones who carry on the species, the human race, and they do it only by getting together and creating, male and female, the offspring, and they cannot do it without each other somewhere being involved. Therefore, all the hostility expressed means nothing because it cannot change the fact of male and female necessity in continuing the race.

This Awareness indicates that it would appear that the focus should be on how these entities can communicate more harmoniously with each other and not so much on how dastardly one gender is over the other, or how inept one gender is in comparison to the other.

This Awareness indicates it is obvious that the prejudices are involved because you never seem to hear an entity of the same gender degrading his or her own gender in the argument about gender. They are always degrading the opposite gender, thus, entities should recognize these are simply prejudiced arguments and not worth continuing and should therefore, drop the whole issue and start focusing instead on how the gender gap can be narrowed so that more communication is possible.

ARE MASONS TRYING TO DRAG THE U.S. INTO THE NEW WORLD ORDER?

(How Come Masons Infect the Courts Everywhere?)

QUESTIONS:

A question from Joe Alexander, Fayetteville, Arkansas. He writes: "I have a question for Awareness. That is: Do the Masons play some significant role in dragging America into the New World Order? A fellow I know here, who managed to get himself elected to the County legislature, the Quorum Court, told me that he discovered that everyone on the court except himself is a Mason.

"He is an independent, courageous and well-meaning man, supports Bo Gritz for president, and constantly opposes other court members when they want to waste taxpayer's money on stupid unnecessary bond issues and unnecessary public works projects. When he told me this, it hit me, *every* small town in America, plus every large town too has a Masonic Lodge, one of the most prominent buildings in every small town.

"All the wealthiest, most prominent and respectable and powerful men in these towns are Masons and it's all a secret society and nobody who's not a member of the gang knows what they are up to. Does some sort of chain of command extend from Bilderbergers, Skull and Bones et cetera, right down to every small town Masonic Lodge?", he asks.

COSMIC AWARENESS:

This Awareness indicates that this is generally correct in that the Masonic lodge has a powerful influence on almost every town and city, not only within the United States, but also in other countries. This Awareness indicates that most of this control and influence is expressed through the courts.

Most of your judges in your courts are Masonic and you can see this by the rings that will be worn, and you may also recognize, if you are familiar with the Masonic handshakes and other signals, you may recognize these movements as these judges and some lawyers meet each other and greet each other in the courtroom.

Masonic Judges and Masonic Lawyers Work Together

This Awareness indicates that there is also a tendency for judges to cater more to the lawyers that are Masonic in giving them preference in their cases. This is not always true, but is generally the more common practice. It is especially so in British Columbia and in other British nations that in such situations, the Masonic lawyers and judges openly work more closely together and any lawyer that is not Masonic will have more difficulty in the courts.

Of course, this reflects likewise on their client, unless the client happens to be Masonic and makes this fact known, in which case he or she may receive some favored treatment. This Awareness indicates that not only are these entities helpful in terms of law and courtroom conflicts, helping each other, but also in terms of political and municipal positioning. They tend to work with each other in political situations and also in helping each other to rise in position in a city or county as may be appropriate to their policies of helping each other to rise to positions of influence,

Eustace Mullins book: "The Curse of Canaan"

This Awareness suggests that you might find a book by Eustace Mullins, *The Curse of Canaan*, to be of interest to you as it traces the Canaan movement down through history, which evolves eventually through the Knights Templar and into the Masonic movement and up to modern history and how the Masonic movement in early America gained control and influence in various regions of early America.

This Awareness indicates that this book has considerable amount of documented evidence relating to this matter. It has what this Awareness considers one important problem in that it is highly polarized in an extreme whereby it speaks of the events as being more or less evil to humanity but totally seems to ignore the other factors and forces in opposition to these Masonic forces, namely that of the Catholic Church, and it tends to ignore the atrocities that were being created by the Catholic church at the same time these atrocities were being created in the early history of the United States.

This Awareness indicates that it is not appropriately presented when one factor is whitewashed and the other factor is painted darker and more evil by the writer. It would be better to present a more balanced view of history in this regard.

This Awareness indicates that the presentation in this book being highly polarized detracts considerably from the acceptance of the facts, yet the facts are there, if one can read the book without being distracted by the extreme polarization and hostility on the one hand while having the other force made to appear pure and spiritual in nature without blemish. This polarization is unreal and unbalanced in the book.

This Awareness indicates, however, the book is still valuable for the information and facts that have been gathered and presented.

IS B'NAI B'RITH THE SOURCE AND CONTROL OF ALL RITUALS, INCLUDING MASONIC?

(Your Mind is Forever Controlled Once You Take the Oath)

FOLLOW-UP QUESTION (AVATON):

I've pondered for years on these conspiracy organizations, particularly the Masonic, on how they can control so many entities down through history, and the other day, member Jim Meek of Poteau, Oklahoma, sent a couple of tapes down, a discussion by some professor whose name I don't know, but it made sense and I'm going to ask Awareness if there's any truth to this.

What I remember basically on the tape was that he stated that the B'nai B'rith owns a square block or approximate of that right next to the bank of England in London and is the originator and source of all rituals, of all organizations, from the Masons, clear down to the Elks, and he says how they control is that once you take the oath, somehow these entities control the subconscious minds of all members who took the ritual and all the subconscious minds are now controlled by the ritual, including the judges and courts.

If this is true, would Awareness elaborate on this topic?

COSMIC AWARENESS:

This Awareness indicates that there is considerable truth in this. Rituals are a means by which the message contained in the ritual is placed into the subconscious mind. Rituals are used in church ceremonies for this purpose, to get the church message into the subconscious.

Rituals are also used in various non-religious ceremonies or expressions for putting other concepts into the subconscious minds of entities. This Awareness indicates that in regard to the entity's reference to a building in London that is the source of these various organizations; this appears to be true in regard to those organizations that are represented through that particular chain of ritual and secret society group or network.

It is not necessarily true in regard to all churches or in regard organizations that were not spawned from the B'nai B'rith building. This Awareness indicates that many of these rituals stem from ancient alien influences on humans through the priestcraft that was set up by the alien influence on earth, back as far as Sumer, Akkadia and Ur.

This Awareness indicates that these during the time of earlier civilization when Cro-magnon man first appeared on earth. This Awareness indicates that this during the genetic confusion of Homo Erectus, or that time known as the period of Eden or the creation of Adam and Eve prototypes.

This Awareness indicates that it was during this time that the alien presence was notably strong in the area of Persia, in that which is the Tigris and Euphrates river valleys, where these entities began the creation that became the historical birth of civilization as is now known.

How Secret Societies Evolved From Alien Contacts

This Awareness indicates the information being described suitably through the works of Sitchin, especially in the book *The Twelfth Planet*. This Awareness indicates that one of the events promoted by these aliens at this time was the creation of industry and agriculture, but along with the same creation, which began civilization anew, was the creation of a line of priests who held secrets which included writing, mathematics and philosophical doctrine that would be handed down for centuries to come through the secret works of the priests, the secret societies.

These would eventually emerge as religions, such as the Hebrew or early writings of the Greeks and Egyptians and Hebrew writings, whose origins traced back to these times in Sumer, Ur, and Akkadia.

This Awareness indicates that the secret priest organizations or secret schools or what may be termed "occult schools" (occult meaning secret) continued after the time of Christianity and up into the previous millennium and present millennium through secret schools, the Knights Templar, the Knights of Malta, the Saint John Cross of

Jerusalem, the Hospitaliters, and the Masons and a number of splinter organizations that also reflect similar secret societies.

This Awareness indicates that most of these relate to the secret philosophies handed down from ancient times, splintering off into fragments that are associated with various religious ideas and concepts, whether Christian, Moslem, Jewish or whatever, but which have the specific design and purpose of promoting through secrecy the philosophy that they represent and also of serving those forces that set up the secret school to begin with.

In the case of many of these it represents allegiance to banking and political powers so that these organizations serve the powers that help structure the societies in which they are found.

The Monetary System From Orion Maintained by Secret Societies

This Awareness indicates that as has been given previously, the monetary system of the earth came from Orion and is generally influenced and controlled to some degree by the Orion influence on earth, and much of the secret school or secret society activity is designed to protect and further the Orion economic controls that have been set up on earth.

This Awareness indicates the Rothschilds being especially connected to this Orion influence, and most other financial organizations are somehow linked under the Rothschild influence, this even including the Rockefellers who are basically small peanuts compared to the Rothschild controls and influences.

DO BLACK MAGICIANS CONTROL THE MINDS?
(Once You Have Taken Some Oath?)

FOLLOW-UP QUESTION):

Well then, can one assume that if this Professor is correct in that if you take the oath, say, of the Masons, and innocently, you wish to join for some reason or the other but you're ignorant of the ramifications, and you take this oath, that from that moment on and for the rest of your life the Dark Force or Black Magicians somewhere in the hierarchy structure can control your mind or influence your mind because you have taken that oath?

COSMIC AWARENESS:

This Awareness indicates that this is true to a certain degree, relative to whichever rituals were used in your particular pursuit. This Awareness indicates there are different types of Masonic rituals. There are some which are more open and innocent and if one belongs to that particular branch of Masonry, such as the blue or yellow branch, the rituals are less karmic in their effect or tie on the individual.

Blood Sacrifice Required From Red Branch of Masons

The entities who receive the most karmic bonding are those who belong to the red branch, for these rituals require blood sacrifice, and may eventually lead the candidates into acts of sacrificing others, either through ritual or through some initiation that is promoted in making the candidates into an agent of the violence for the particular branch.

This Awareness indicates that there are many good people who have participated in the study of Masonry and who have not involved themselves in any act indecent to humans and who think they understand Masonry, but who may not have any idea of some of the other branches of Masonry and what they are about. This Awareness indicates that the entities who inadvertently or without realizing it, get involved in Masonry, may at some point wish to perceive, to gain some kind of advantage in terms of ambition and may find themselves seeking favors from the Masonic organization, only to discover that in order to do so, they will be required to do something that can jeopardize their own soul or put themselves physically in a position where they could be coerced or blackmailed for their deed.

In other words, there are some rituals such as might involve human sacrifice, whereby if the entity participates in the ritual, he is then ever and always opened to exposure and could be held accountable for his action, and therefore becomes subject to blackmail or to coercion or to further exploitation by the government.

This Awareness indicates that then the entity's soul is basically controlled and held by the organization and the entity is no longer free. Any rebellion would be met by death or exposure, or misdeeds that are held against the entity. This Awareness indicates that in some of the higher political arenas, these bits of telltale information become checks that hold an entity in bounds so that the entity being bound may be used by the organization and if the entity attempts to break away he would be publicly exposed. There would be evidence to back up the charges against the entity and the entity then would be ruined politically.

This Awareness indicates that in this sense, many of these secret organizations attempt to get entities involved in criminal activities that can be used to control them in future times so that they may be forced to do other unethical or criminal acts in future times, if necessary and beneficial to the organization's plans.

This Awareness indicates it is best for entities to stay out of such organizations if possible, and if involving themselves in the organizations, to stay away from any unethical activity, even if it promises a reward for participation.

WITH THE ORGANIZED CONSPIRACIES ALREADY HERE, WHY FEAR ALIENS?

QUESTION:

A question from Henny Forman, Upland, California.

He writes: "I read both of your new books on the conspiracies and found both enlightening and very scary. My question is: If our fellow humans are planning such a dire future for us, why should we fear the aliens?, or does the Committee of 300 work for the alien agenda already? We have a saying in Germany: (German is read) which means: "If you dig a hole for someone else, you will fall into it yourself."

COSMIC AWARENESS:

This Awareness indicates that most of the organized conspiracies of a negative nature stem from alien influence, either from present time or from more ancient times, through the secret schools and ambitions of those who operate and run the organizations of the secret schools.

This Awareness indicates that the money system operating the world is subject to alien control and influence and it is from this money system that most of the sub-groups of conspirators operate, in efforts to further the power base of the money systems and those who control these systems.

Spiritual Forces Continue to Thwart the Efforts of the Controllers

This Awareness indicates there are forces that are not organized. There are forces that are spontaneous, operating from the influence of spiritual spontaneity that continue to thwart the efforts of those who seek to control everything. It is likened unto an entity who, by sheer will power seeks to have control over their own eating habits, but cannot control themselves because the spirit sponta-

neously frustrates the will power and causes the entity to go on an eating binge.

Students Burning Draft Cards Frustrates the Dark Force

This Awareness indicates that likewise, the Dark Forces of the world, although highly organized and working in conjunction with each other for motivated purposes or out of fear and greed often find themselves unable to complete their takeover simply because a generation of students refuse to cooperate with some political directive that has been handed down, which they expected to be followed, and the students begin burning draft cards or something else so that their control and power and structure simply falls apart before their eyes and they cannot get these entities to come into the trap, to become part of the system.

This Awareness indicates that this is generally the way the Divine Force works. It simply does not allow *Itself* to be stuffed in a box by the Dark Forces. If it is stuck into a box, it seeps out of the cracks and blows away so that when the box is opened, there is nothing in it and the Divine Force is off moving and creating more spontaneity and more haphazard activities that cannot be structured and controlled by the Dark Force, no matter how much effort and planning it puts out.

This Awareness indicates that understanding this, you may recognize that even with this power of the alien influence and the controls which it has developed through secret schools and through the various methodologies and controls of political and state institutionalized structures, there will *always* be the nonconformist, the entity who does not follow suit, does not obey the lines, the rules, the directives.

Uranus in the Sky Guarantees Defiance and Freedom

As long as there is Uranus in the sky as a planet of rebellion, astrologically speaking, as a planet of freedom and defiance, astrologically speaking, there will be a thwarting of the plans of any of these forces that seek to have totalitarian control over the masses. Therefore, try as they might they will never succeed in taking away the will of the people to be free, to express themselves individually as a free person.

This Awareness indicates that regardless of what occurs in terms of totalitarian efforts; these efforts can only last for a certain brief time. They are the influence of Saturn, but Saturn moves in the heavens and its influence diminishes eventually as it moves into another place, and Uranus, the rebel, the freedom seeker, the one who is defiant, moves in the heavens and influences the masses to become defiant, to seek freedom, to rebel, and Saturn's controls fall apart, and new freedom is born.

After awhile, Saturn begins to crystallize and structure a new society and that new society, being structured, will again reach a point of oppression and totalitarian controls will seem inevitable, but as it reaches conclusion, Saturn moving on and Uranus following and moving into another position, strikes the structure, tears it apart and starts the process over again.

This Awareness indicates therefore, there will always be a struggle between those who would suppress freedom and those who would promote freedom so that neither ever is absolutely in control. This Awareness indicates that at present time Saturn is in Aquarius. Aquarius is ruled by Uranus, therefore, Saturn the structurer is being influenced by the rebel and defiant energies of Aquarius so that the structure of this age begins to diffuse its strength and will, in the next year, break down considerably from what has been experienced during the past decade, to where more freedom begins to emerge.

This Awareness indicates that to put it another way, the conservative rule over the past 16 years has come to an end, and the more liberal rule and influence begins again to give entities more expression, more freedom and more ways to create problems for themselves. This Awareness indicates that there will be frustrations from the excessive freedom and rebellion that follows in the next 16 year cycle, but it will have a certain healthy quality in overcoming the potential of totalitarian controls that began to build 16 years ago and culminated in the year that led to its incompletion.

The totalitarian rule of nations on earth will never be stabilized for any great length of time and for most nations will never last even for short durations. Some nations tend to have greater propensity toward totalitarian rule. This may be because of stronger Saturn influences on those nations. The United States, born out of rebellion and Uranian influence is never likely to become ruled by a totalitarian government, at least not for any length of time, for rebellion would surely follow.

This Awareness indicates this is because it has, as part of its character, Uranian qualities and influences. These are much greater than any Saturnian qualities or influences.

HOW COME SO MANY PSYCHICS CLAIM TO HAVE BEEN PHARAOH IKNATON?

QUESTION:

A question from Jack Manuel, Pyramus, New Jersey. I'll read his statement here. "Awareness has indicated that the previous Interpreter, the entity David Worcester has been the worshiper of one god, the famous Egyptian Pharaoh, Iknaton, in a past life. Also, the founder, I do not recall his name, of the spiritual community, The Stell Group, in Stell, Illinois, who claims to be in contact with masters, he asserts that *he* has been Pharaoh Iknaton in past life. Also, the entity Mark Prophet, the founder of the Church Universal and Triumphant which has a close association with the so-called Great White Brotherhood, he claims the Pharaoh Iknaton as one of his incarnations with Elizabeth Clair Prophet being his wife Nefertiti then also, in that previous lifetime in Egypt.

I would like to remind Awareness that this phenomenon is wide-spread whereby different entities living in the same period of time claim to the incarnations of a famous personage from the past. In other words, this is not confined to Iknaton only. Obviously, only one claim should be the true one and the others are mistakes or are false claims.

The question is: How can this be? And whom should we accept as the one who truly has been Pharaoh Iknaton in a previous life, or has been another famous figure or personage from history?"

COSMIC AWARENESS:

This Awareness indicates the question: How can this be?, appears to refer to his observation that three entities, each making claims to being the same personage ... how can this be? This Awareness indicates that obviously, it *can* be when there are entities who make mistakes or who make false claims, as the entity indicated.

This Awareness indicates that the errors can be expressed by entities who sincerely believe they are reading energies correctly and can still be errors. What can you do to correctly decide which is in error and which is proper?

This Awareness indicates you simply have to make your choice. This Awareness suggests that you can simply ignore totally the whole situation as being unim-

portant and this Awareness will advise you to consider this option, or you can dwell on it and feel that you must make a choice, choosing either of the claims as valid, and the other two as invalid, but you can never be sure that your final conclusion is absolutely correct, when three entities claim to be the same incarnation of another ancient historical person.

You can of course hope that some one of the three will renounce his claim, which is the intent of the question to this Awareness, but this Awareness stands by *Its* earlier statement that the entity David Worcester was the Pharaoh of Egypt known as Iknaton and this Awareness indicates that *It* does not care whether you believe this or not, for it is of no real interest or concern to this Awareness whether it is accepted or recognized.

This Awareness indicates you may therefore, wish to check with the other two claimants to see if either of them will renounce their claims. If this is not forthcoming from these entities, you will have to decide whether you can live with this dichotomy and conflict or not.

This Awareness indicates that there is little this Awareness can really say to help you out of your dilemma, but *It* reminds you that your dilemma does not have to be your dilemma. You can toss it over your shoulder and let someone else play with it, concern themselves with it.

It is likened unto the Rubic cube. If you can't solve the problem, give it to a friend and let them worry about it. Pick up your life and go forward.

A THREE YEAR-OLD BOY ASTOUNDS PEOPLE BY READING BOOKS AND NEWSPAPERS

(How Can We Teach Our Kids to Do this?

QUESTION:

Nicholas Lucia of Oak Park, Illinois, sent in a letter to the columnist Ann Landers, which I'll read and then I'll ask the question. "Dear Ann Landers: Sitting in a doctor's waiting room I saw something that really blew my mind. A little boy who appeared to be no more than three sat quietly next to a man I assumed was his father. The child was reading *Time* magazine.

"I asked the father if his son was actually reading. He replied: "Yes. He's been reading since he was 22 months old. No one ever tried to teach him to read. One day he just picked up a newspaper and started to read out loud."

"I was not completely convinced, so I handed the child my paper and said: "Can you read this?" He said: "Certainly." And his pronunciation of some rather difficult words was perfect. That's not all Ann. This boy can name every state in the union and all the capitols. He can name every country in the world and the capitol city of each one. He rattled off the capitols of Malawi, Gabon and Australia as though he were reading them.

"His father asked me to pick a number from one to forty one. I chose thirty-eight. The father asked his son: "Who was the 38th president of the United States?" The boy immediately answered: "Gerald Ford." He then asked which was the 7th colony to become a state. The youngster replied: "The 5th was Connecticut, the 6th was Massachusetts and the 7th was Maryland."

"I am dumbfounded by that youngster's brilliance and would like to know if you have ever heard of anything like this? Should he be entered in the Guinness Book of World Records?"

Ann Landers gave a little rap on what she said the explanation is called "spontaneous reading."

Nicholas's question is: "A three year old boy able to read and who obviously has a photographic memory is really amazing to me. Question: Can Awareness validate this boy's authenticity and what can we do to obtain a photographic memory? Also, can Awareness explain why this remarkable boy was born so gifted?"

COSMIC AWARENESS:

This Awareness indicates that the entity had a brain that was not encumbered by traumatic experiences, either through the birth process or following. His mind was simply allowed to be open and to function without someone correcting him or hurting him. Had the entity experienced unnecessary pain or anything of any type that was inflicted upon him, his mind would not have been so capable of retrieving and understanding information.

The traumas that children endure through childhood, through babyhood, are those which hinder their capacity to learn and if they could be perfected so that their consciousness is not encumbered with unpleasantness, traumas and injuries, they will be highly intelligent creatures, capable of perceiving, of learning and remembering skills and talents even from past life training and development.

It is very rare that a child can escape excessive traumas to develop a mind that is capable of absorbing without encumbrances interfering. This Awareness indicates that the parent who can shelter the mind of the child from injuries and insults, from fears and abuses will protect that mind so that it has the opportunity of great genius, but how many parents are capable of that kind of protection of the young child?

DID KAHUNAS DIVERT A HURRICANE?

QUESTION:

During the recent hurricane that hit Hawaii, a rather strange thing occurred. It passed directly over the small island of Niihau, a tiny island about 25 miles Southwest of Kauai which was really hit hard. It's a privately owned island. No tourists get to go there, and home to 300 people whose ancestry can be traced to the first inhabitants of Hawaii.

According to the article, helicopters, after the hurricane, went around the island of Niihau and could see no sign of damage, and the newspapers said " the consensus was that somehow, Niihau had magically escaped damage."

I believe this island is the home of some Kahunas. Does Awareness see this was a freak thing happening, or did the Kahunas or some other force have something to do with protecting that island even though the hurricane went directly over it?

COSMIC AWARENESS:

This Awareness indicates it appears there was some Kahuna magic involved at the time and that it involved, on a more practical side, involved the raising of the storm, the raising of the winds to go above the island and not reach down to the earth. It appears that this was created through certain Kahuna methods which influence the winds to lift and not continue on a path of collision with the inhabitants of the island.

Prayer for Balance

Start your day and end your day by saying the following aloud:

I AM ONE WITH ALL THAT IS!

Thank you God

Is There a Connection Between The Use of Electric Razors and Leukemia?

QUESTION:

One last question. Recently in the paper it talks about how a study has found a higher incident of electric razor use among leukemia patients. They say a check of records on 114 leukemia patients ages 20 to 79 and a 130 cancer-free men showed that those with the cancerous blood disease were 2.15 times more likely to have used electric razors more than two and a half minutes a day than the control group.

Weaker correlations were found between leukemia and use of hair dryers and electrically powered massagers. What they're saying is that they are beginning to suspect that there are electromagnetic fields surrounded by these appliances and that somehow this can lead to leukemia. Does Awareness see that there is anything of significance to that research?

COSMIC AWARENESS:

This Awareness indicates that there is seen some correlation as indicated, that may have a valid connection, but there is also seen a potential for misinterpretation. This Awareness indicates that it may also be that the lifestyle of entities owning razors and hair-dryers may be different from those tested who did not use electric razors or hair-dryers and that lifestyle may be what reflects a difference.

For example, one who uses the electric razor and hair-dryer may have a tendency to be more wealthy than the one who uses the regular hand razor and if more wealthy, the entity might eat richer foods or might have a more complicated life with more stress than the other entity or may not have the same kind of exercise and physical activity as the one who uses the hand-razor.

This Awareness indicates in this sense the correlations may be insignificant as far as assuming an electrical field from the appliances is the culprit.

Wisdom of Awareness—

On Consciousness and Magic
(Why Grounding Is Necessary)

In dealing with consciousness and magic (which is the changing of consciousness), that imagery is important. Yet, any change in consciousness needs to be accompanied by a physical action which is set as a deliberate grounding of that new change of consciousness. This physical action can be anything an entity chooses, such as snapping the fingers, blinking the eyes, forming a pattern with the hands, forming a geometrical pattern or symbol with the hands, or whatever else entities desire, such as stamping a foot or turning a circle.

This physical grounding is that which transfers the image held in consciousness to the body itself, the physical body, which than allows all of the being to accept this as being fact. This in turn engages the subconscious levels of the body into accepting that which the conscious imaging has been given and has experienced. (78-38)

AMAZING NEW MASTER INDEX
NOW ON CAC'S WEBSITE:

Just think of any subject Awareness has ever talked about, type in a keyword, and before your eyes will appear a listing of almost every newsletter published that contains information on that subject. Thanks to Jon Strongbow's 25 years of research, our website has now added 95,706 new entries for your convenience. New members who need back issues can now type in the subjects they are interested in and order back issues for immediate delivery. You can order on line using Paypal ordering system or just mail your order to CAC. All back issues are $3 each and postage for any amount ordered is only $1. Check it out!

Your Higher Self—Can It Have Several Incarnations at a Time?

(More on the Oversoul)

(CAC General Reading, Jan. 3, 1997)

QUESTION:

A question from Bob C., Portland , Oregon. He writes: "I have a question regarding the Higher Self. My understanding is that our Higher Self can have several incarnations at a time. Is this true? If so, how similar are they? Would they be working out the same problems and similar karma? Would they be attracted to each other if they met and became friends, et cetera?"

COSMIC AWARENESS:

This Awareness indicates that this concept is based on the Huna concept of an Overseer or Group Soul; wherein numerous entities can have a group Oversoul or Higher Self and that Oversoul works with numerous people at the same time. This Awareness indicates that in actuality, the Higher Self as referred to in the Huna philosophy, is that which is associated with one entity, just as entities do not share the same subconscious with others or the same conscious with others, as a general rule.

The Three Minds of an Entity

There are occasionally aberrations, wherein the conscious mind of an entity may have two or three different personalities, even more, but as a general rule, there are three parts of an entity in terms of the three minds: the subconscious, the conscious and the Superconscious, or that which is termed the Higher Self.

This Awareness indicates that in the Huna philosophy of course, there is that concept of a Group Overseer or Oversoul, which helps to direct the entire group as a kind of Higher Self. This Awareness indicates that *It* does not see the validity in a single individual having a Higher Self that is working with another individual except through that other individual's higher self.

The Higher Selves of individuals can relate to other Higher Selves who work with other individuals, and in this way the mutual cooperation between Higher Selves can serve different individuals simultaneously; those that are considered the Oversoul or the Higher Self of the Higher Selves, or that which is the group Overseer; those entities who work with the various Higher Selves of individuals within the group.

This Awareness indicates that in the symbology of the Huna philosophy, the Higher Self is usually referred to as the Father or Parent. The subconscious is usually referred to as the Mother or the Holy Ghost , and the conscious mind is usually considered as the guest in the home of the host or Holy Ghost or subconscious. The conscious mind being the offspring or son or daughter of the subconscious and superconscious minds.

These are rough terminologies that are often used in discussing the Triune Self. Of course, the Huna philosophy has its own terms for these three selves, but entities speaking in regard to these selves will use a variety of names or terminologies that include those mentioned. In psychology, it is the 'ego' the 'id' and the 'superconscious or 'subconscious,' 'conscious', and 'superconscious'.

FOLLOW-UP QUESTION:

So essentially, what we're discussing is basically symbolic, and there's no chance, as in the question, that the entity would run into another aspect of himself, and they become friends or attracted to each other? Is that correct?

COSMIC AWARENESS:

This is in the affirmative. The entity might run into another entity who shares the same Oversoul through their own personal Higher Selves. In other words, the Higher Self of each entity might share an Oversoul with each other, but for the entities to share the same Higher Self is not seen as a likelihood.

The exception could of course occur in regard to Siamese Twins, where the entities are connected to each other in physical bodies.

Is Karma Carried Over by Selves?

QUESTION:

Another question from Bob C.. "In a recent reading it was said that most of our karma is incurred between ages 17 to 27, but karma is also held over from previous incarnations, isn't it?"

COSMIC AWARENESS:

This is in the affirmative.

FOLLOW-UP QUESTION:

"How is that effected, if our Higher Self has several incarnations at once? Is the karma shared among them?"

COSMIC AWARENESS:

This Awareness has previously indicated the Higher Self doesn't have several incarnations at once. This question is moot.

FOLLOW-UP QUESTION:

"Is there other aspects of an entity besides the Higher Self , that could have incarnations?"

COSMIC AWARENESS:

This Awareness indicates that there are multiple personalities that the entities can develop, which can share the same body, and these can, at the death of the entity, become split and go into different bodies elsewhere, so that they might incarnate separately into different bodies. This Awareness indicates that this may be what the entity is referring to, but these are not Higher Selves of Superconscious Minds; these are the conscious mind schisms or splits in personalities.

This Awareness indicates the entity may be getting some information that confuses the work of Jane Roberts and her channeling regarding the Oversouls of entities on different dimensions, wherein there is the individuality on one dimension that has a reflection on another dimension, in terms of a different frequency or body that is connected interdimensionally to each other, and yet appear separate from any relationship.

This Awareness indicates that these have been discussed previously and are well discussed in her works. These are the various interdimensional beings that can be considered as echoes or fragments of oneself. The more practical way of explaining this is to think of it in terms of a note. If you plunk a string on a piano by hitting a key, the harmonics of all the other strings that reflect or vibrate to that key that you plunked will vibrate in the piano, even though you did not hit those keys themselves.

Sympathetic Vibration: Recognition on Other Vibrations

This happens because of what is termed 'sympathetic vibration'. In other words, if you hit the low C, all of the C's on the piano from there up will vibrate, and you will hear all of those to a much lesser degree. This Awareness indicates that it is similar with the human in physical form. Think of the human as a vibration or note, and recognize that on other dimensions, that vibration also exists on different octaves, different frequencies, but it is in harmony with the vibration of the individual on the physical earth in the human body.

This Awareness indicates essentially, this is what Jane Roberts was speaking of, but she spoke of it in different terminologies and it appears that someone has taken her

concept to another level and attached it to the concept of the Higher Self, and assumed that the Higher Self on this earthly plane could also be echoed in other entities on the earthly plane also.

Siamese Twins the Only Exceptions

This concept is in error. This Awareness indicates *It* does, however, wish to state that Higher Selves can harmonize with each other on the earthly plane and become close associates, but they are not the same Higher Self for different entities. Each entity has his or her own unique Higher Self, just as each entity has its own personality, except in those very rare or bizarre instances, such as freaks of nature, like the Siamese Twins, wherein both parties of the shared body may share the same Higher Self.

This Awareness indicates even there, it is more likely that they will each have their own Higher Self, even though they share the same physical body in some way.

How do Wanderers Make Their Decisions?

QUESTION:

Another question from this entity Bob C. Awareness has given most of this information in bits and pieces, I'm sure, but I'll read his statement. He writes: "I have been told that I am a Wanderer. I am wondering how a Wanderer decides to go and how do they get there. Is deciding we want to go enough? When we pass over can we just go to another planet or star system if we decide we want to? What makes some entities Wanderers and others not? I mean, what do the others do, the ones that don't Wander? Do they stay on the same planet life after life till they are enlightened? What makes entities want to Wander? Is it like the Bodhysattva vow to help others"

COSMIC AWARENESS:

This Awareness indicates this question can be answered with a similar question: What makes some entities decide to go into the Peace Corps to serve their country or to serve others through the Peace Corps? Is it some karmic thing? Or is it simply something of their own choice based on a personal need or desire to be helpful to someone?

This Awareness indicates that a Wanderer simply makes a decision to go back, or to go to this or that planet to be of service. This Awareness indicates the Wanderers in general have fulfilled most of, if not **all** of their karmic debt, and have the right if they wish, to remain in a higher frequency where things are more peaceful and more comfortable; but how much comfort does one want before one seeks another adventure? How long can one sit in comfort without becoming bored?

Therefore, some entities want the adventure of reincarnating and going back to some planet somewhere that has a need for further evolvement, and these entities who make that choice are called Wanderers. This is just a term. You can call them hoboes, or you can call them missionaries or whatever term you want, but the term that has been suggested is the term "Wanderer" and it appears to be a good term to use.

This Awareness indicates essentially, Wanderers are likened unto missionaries who are sent from higher dimensions and come to places that need to be uplifted, and are born into those cultures through the normal birth process and gradually become, if things go well, reoriented into accepting their position in the culture, and begin to help raise the vibrations and create harmony in the culture so that the culture gradually benefits from their presence therein.

ON FORGIVING MISTAKES: (80-8)

"...Recognize the divinity within yourself that forgives and allows you the right to make mistakes."

Voyagers—Are They the Same as Wanderers?

FOLLOW-UP QUESTION:

Years ago, Awareness used to discuss or mention Wanderers **and** the Voyagers. Are the Voyagers any different than the Wanderers?

COSMIC AWARENESS:

Essentially these the same. It is simply a different term. "Voyager" as sailing on consciousness. It's a different analogy or metaphor, but essentially it is the same. This Awareness indicates it is different from the seeker. The seeker is trying to find some reward for self or some kind of escape for self or benefit for self, but the Wanderers and the Voyager are simply exploring certain areas and being there, give of themselves as natives of that area in the universe or in consciousness or in whatever dimension they find themselves.

This Awareness indicates that some prefer the concept of "Voyager;" others prefer the concept of the "Wanderer," but essentially they are the same, one having feet on the ground, the other sailing in a ship of the soul. The soul is often symbolized as a ship or vice versa; a ship often symbolizes the soul. Sailing is simply an act of moving, just as the Wanderer moves from place to place.

FOLLOW-UP QUESTION:

So, Wanderers, for example, after spending a lifetime on earth doing some business or mission, when they pass over, they have a choice, do they not, of rather than returning to earth for another mission, that they could choose some far distant planet in another galaxy or another vibratory rate which they'd heard about that needed assistance. Can they do this?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates as a general rule, Wanderers, having already balanced their karma before embarking on their crusade or the voyage to a particular planet, do not easily accumulate karma on that planet which requires their return. It **is** possible, if they are flagrant in their abusiveness or in violence or some other type of negative behavior, that they might develop enough karma to have to return for another life in the planet they came to help, but it is very rare that this would ever happen.

This may be considered as likened unto 'diplomatic immunity' in your world.

FOLLOW-UP QUESTION:

It's not , I assume, so easy for the Dark Force to affect a Wanderer as it is to affect other entities. Is that correct?

COSMIC AWARENESS:

This is in the affirmative. Wanderers generally have a certain amount of protection. They suffer enormously as children in the new planet, partly because they are not used to the heavy vibrations and partly because they are looked upon subconsciously by others as being weird or out of tune with the world, and therefore, they are picked on by their peers; but, as they toughen through these hard times as children, they gradually become more capable of dealing with the world, and at some point, taking on more than their own welfare and working to improve the lot of others.

As they begin working in behalf of others, their whole life then becomes more meaningful, more successful, and more helpful in its purpose as well as in the protective needs of the Wanderer himself or herself. They then become somewhat more protected in their lives.

Wanderers Never Commit Violent or Criminal Acts

This Awareness indicates it is highly suspicious for

anyone claiming to be a Wanderer to commit a violent or criminal act of a flagrant nature. Such entities very rarely would put themselves in a position of having to do anything of this nature. Therefore, if an entity does get involved in criminal activities or committing a violent act, one would have to question whether the entity was truly a Wanderer or if the entity merely misunderstood or went through some kind of heavy trauma that distorted his or her sense of purpose in this mission.

Most entities who are Wanderers are more inclined to suffer than to make others suffer, but this Awareness wishes to discourage suffering by entities if it can be avoided and simply focusing their energies on serving others rather than accepting punishment or suffering themselves.

A WANDERER'S CHILDREN—ARE THEY WANDERERS ALSO?

FOLLOW-UP QUESTION:

As a general rule, are the children of Wanderers generally Wanderers also?

COSMIC AWARENESS:

This Awareness indicates this is possible, frequently but not necessarily so. Sometimes these children are the ones the Wanderer has come to help. They may be heavy in karma and the Wanderer, being the parent is in a position to be able to help these entities overcome some of the heavy karma they must deal with.

More likely, the children **will** be Wanderers or perhaps one or more of the children will be Wanderers, if the parents are also Wanderers. But this is not necessarily so. Often Wanderers are born into families where the parents have hidden karma to work out and the children help the parents just by being who they are, and the parents, because of the children, will change their entire outlook on life, or their behavior may become much more serious and focused because of the child.

The child may endure some difficulties by having selected the heavily ladened karma of such parents, but the child generally endures and his or her life then becomes more meaningful as they mature. Wanderers are not necessarily angelic children. They can be what you would term "little brats," but as they mature, their lives take on greater meaning and purpose, and they become more focused on their purpose.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS Is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 CosmicAwareness has been communicating through carefully trained channels. This information is for those who desire to help In bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest' . Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states In any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters Interpret the energies as they see them In trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including Illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send In questions of general interest to ask Awareness for possible publication in this newsletter.

The Cosmic Laws of Cosmic Awareness

The Law of Affection

The *Law of Affection* states that affection is a beam of love which may light upon a subject and create an object of adoration. The *Law of Affection* holds closely but with open arms; one wishing to see all creatures free beings by freeing others from oneself, then from themselves, their fears, their guilts, and inhibitions, and from those blocks that hide their preciousness. The *Law of Affection* possesses not, yet sacrifices nothing of itself, for it gives without expectation—even from the joy of giving. As the sun must shine to be the sun, so affection must be given if one is to be affectionate. The *Law of Affection* cannot be manipulated or controlled, for its only purpose is to give. Nor can it be possessed or used, but when one's heart is open, it enters and possesses it and uses it to shine its warmth of love upon the world.
