A New Message to Wanderers and Light Workers
About your Mission and Situation Today

- Questions on Ascension: Some Ideas that will lead to Planet "B"
- An Update on the Oil "Spill" (What BP isn't telling you)
- The Vesica Piscis Meditation (to Bring Oneness)
- The New Movie "Machete" (Designed to Create Racial War?)
- The BP's Secret Deepwater Horizon Explosion
- Why the ETs Won't Interfere

A NEW MESSAGE TO WANDERERS AND LIGHT WORKERS ABOUT YOUR MISSION AND SITUATION TODAY

(Excerpt from a CAC reading June 18, 2010)

Questioner: Does Awareness have an opening message or any events It would like to discuss please?

Cosmic Awareness:

This Awareness is prepared to talk about matters concerning the Light Workers, and the Wanderers, those evolved beings who have chosen to incarnate at this time in service to the Divine and humanity, as well as Mother Earth. There are questions that the Energizer has to present to this Awareness that will formulate the comments that this Awareness has today. Therefore, rather than a long Opening Message this Awareness is now prepared to move into the material that the Energizer has to present and the questions that will come from that.

WHAT TO DO WHEN YOU CAN'T PASS YOUR SPIRITUAL INFORMATION ON TO OTHERS

Questioner: Thank you) .Several e-mail comments from various members are offered for your higher perspective please. The first one, "The lack of like-minded people available to discuss concepts and the non-receptiveness to any observations and/or remarks offered is prevalent. Is there anything that can be done about this?"

Cosmic Awareness: This is curiously indicative of one who is from a higher state of consciousness, one who has entered into physicality not only with the intent and purpose of forwarding one's own soul growth and development but who is also here to assist humanity at this time as it seeks to evolve in consciousness, in order to move forward in a quantum leap to more evolved levels of consciousness. In this is also the intent and purpose of assisting both Mother Earth and the Divine at the same time; the assistance is being rendered to mankind, humankind. Those advanced souls who are having such difficulties are those that this Awareness has called in the past the Wanderers, although they are also known by other names, such as Light Workers, and Servants of Spirit.

Separated from like-minded people Many Light Workers Work in Complete Isolation

The truth of the matter is that these evolved souls, these beings that have chosen spiritual incarnation have often also done so at the expense of community. This Awareness is referring to the fact that often those who are of that high level of spiritual awareness do not readily have around them those of like-mind and like-spirit, and therefore are often working in complete isolation. This can create a heavy toll, for that sense of being separated from others of like-mind can be very difficult to those having this experience, and yet ironically, as this Awareness has indicated, the fact that they

are having such an experience of extreme isolation is *indicative of an advanced soul who has volunteered to be of service* at this great and spectacular time.

Part of the process that needs to occur is to remember one's purpose and to remember why one has chosen this more extreme situation, because it is a situation that is very wearisome for those individuals who are in this position. While this Awareness has said to individuals as well as to the membership in the past that it behooves one to seek out spiritual contact with others of like-mind and like-spirit, this Awareness also recognizes and acknowledges that this is sometimes very difficult to do, for the ratio of those who have obligated themselves to be of spirit at such a high level is an extremely high ratio. In other words, this Awareness is saying that for each Wanderer who has chosen incarnation there may be several million entities around *who have not*.

Many members of C.A.C. feel extreme isolation

The ratio has been given in the past that 20% of the populace has awakened, and this Awareness has recently stated it is now 30%, but the point is that of the 30%, which still represents a minority, there is even a lesser amount of those who are highly conscious. Therefore, even within the 30% of those who are spiritually awakening and evolving there is but a handful, relatively speaking, of those who come from even higher levels of consciousness. They are the ones, often many of them being members of the organization of CAC, who feel the most extreme isolation, for even amongst those who may be spiritually evolving, the conscious perceptions that these individuals have, the awareness and understanding may not always be shared by those who themselves are starting to awaken or are on a slightly different track than those who would be what this Awareness calls the Wanderers.

Trying to share Awareness Info with Family or friends is not always met with enthusiasm

Indeed, the problem is so extreme for those who experience this isolation that it is often that which leads to despair and depression. Many of the members of *Cosmic Awareness Communications* have even had the experience of trying to share the materials of CAC with others, sharing newsletters with families and friends or even those who are spiritually aware, only to find that there is *no interest from those others*. This is because the information that Cosmic Awareness presents and the energy that *It* represents are of the highest nature. Those who themselves come from that high level of conscious awareness are naturally drawn to the materials of this Awareness, and it is for this reason that they believe others who are also spiritual seekers will naturally be inclined themselves. But there is a gradient of consciousness involved even amongst the spiritual seekers, so that those who are at the higher levels do not necessarily find those that are of the same level, for they are few and far between, and it is for this reason why often when one tries to share the materials of this Awareness, they are not always received with enthusiasm or even interest.

This is not an ego matter: It's a fact YOU are who you are

This Awareness says not to despair over this matter, but to recognize it as an indicator of *one's own state of consciousness*. This is not an ego matter. This Awareness is not saying that the members of CAC are better than or more evolved than anyone else. It is simply a matter of fact that there are different gradients of consciousness, everything from the highly placed Avatars who walk the earth, to those who are at the

lowest level of consciousness, barely awake consciously, and each has its own reason and purpose, and to be one of a higher evolved spiritual consciousness simply means that they have made choices to come into the planet's energies and into human consciousness *to assist in the evolution of consciousness*, especially at this most critical of times.

The good news: More and more are opening up to you

The good news is that with the accelerating consciousness that is now occurring on the planet, those who have so often experienced a rejection of their concepts, their beliefs, their understandings and their knowing will begin to find more and more are opening up now and are starting to be attracted, and are starting to ask the questions that will move them forward in their own spiritual consciousness. Those who feel the strongest sense of isolation must always remember first and foremost that *it was a choice to be a storm trooper for spiritual evolution in the first place*, and by choosing this before entering into life, an opinion, an understanding was held by the being *that they were prepared to do this work*, knowing even before entering that it would be very lonely and isolated work.

Light Workers: the Beacons of Consciousness

With the accelerating consciousness that is occurring at this stage, those who have so long felt this isolation will start to see others attracted to them, because in a manner of speaking, *they have always been beacons in the dark*, isolated perhaps, but always shining in the dark, and many are now starting to see in the dark and are being attracted to the Lights, the beacons of consciousness that the Light Workers and the Wanderers represent. *Therefore, be patient* and know that these times are rapidly changing, consciousness is opening, and many are starting to awaken, starting to ask questions and at this most crucial time when that sense of isolation is at the greatest level, the greatest understanding and patience must now be shown.

This Awareness suggests to *continue to reach out* to others of like-mind and like-spirit and in that reaching out, do not lose hope that there are others out there, *others who are starting to be attracted to the Lights in the dark*, those Lights represented by the Wanderers and the Light Workers. You are out there, and you are known by this Awareness and by Spirit, and you are supported and energized from sources deeper than the physical experience, and these times, as challenging as they are, are also times of great hope and promise.

You have chosen to be of service in the shift of consciousness now unfolding in a way that has never been seen before

The purpose that those who have chosen to be born into this lifetime and have chosen to be of service to is *about to start unfolding in a way that has never been seen before*. It is for this reason this Awareness says at this time in particular to hold on to the knowledge from within of who and what you are, for you are Beings of Light, you are Beings of High Consciousness, and you are the beings that express the great hope of that which lies ahead, that which is Ascension, that which is the shift in consciousness that is the point of the purpose of coming onto this plane in the first place. This Awareness is complete with the first part of this discussion.

SWIMMING IN A SEA OF DESPAIR

Questioner: (Thank you). That definitely helps to explain. There is one other part related, "The heavy depression, sadness, and weepiness experienced; could this also be related to a sense of frustration or an *uneasiness* regarding what is to come?"

Cosmic Awareness: This is partially the case, but what is also seen by this Awareness and further to what *It* was discussing of the darkness in which *each* of the Light Workers is shining, *each* of the Wanderers is a beacon within, is also an energetic denseness of vibrations and frequency. This dense oppressive energy that those of the Light are finding themselves in right now is extremely difficult to endure. It is not only oppressive, it is crushing in nature because of the way things still are, where those who have the highest and deepest level of commitment to spreading light and love into this physical universe and of assisting the evolutionary process of Ascension; experiencing this oppressive, crushing energy is extremely difficult.

It's a paradox: The Timing is still off

Thus it is that those who experience this are indeed those who are here to be of assistance at this time. It is almost a paradox, for those who are suffering the most have also the most to offer, but the timing is still off. It must be recognized that there is a *timing* to these events as well. Those who are still caught up in the illusion of life and those who therefore support collective consciousness as it is known by the majority, do not feel this oppression as much as those enlightened beings that are still unconscious to their depth. Therefore the experiences they are having may not be understood completely and totally and they are simply beset by the experiences of depression and despair, of an oppression so deep that they can barely put voice to what they are experiencing.

Many Light Worker have not fully awoken to the Total Grandeur of their own Being

It must also be understood that even though this Awareness has been speaking of the Light Workers, the Wanderers who have *chosen* to be here at this time -- even those who are Wanderers or Light Workers have not themselves fully awoken to the total grandeur of *their own being*. Often this is something sensed within themselves but it is hard to put it into words, especially when one is swimming in a sea of despair, of oppressive energies so thick that they choke the individual, and they drag the individual deeper into the oppression. This is the situation that many of the Light Workers are experiencing at this time. They have a sense of things; they may even be party to knowledge of what is unfolding around them, and yet on the daily level *they must still endure* the oppressive energies they find themselves in.

The Powers that Be Fear the Light Workers

It is in this contradiction of an inner knowing of self and purpose and the outer experiencing of the events of one's life, when one does not have a support network to rely on to explain what is going on that will give the emotional and mental and spiritual support needed at this time, that the journey then becomes a very intense one and a very difficult one. It must be understood and recognized that those in charge, those who are the *controllers* of this present physical reality *also are aware of what is coming* and they are desperate to maintain power and control. They see their own existence jeopardized with the awakening of too many of the Light Workers, and the spreading of conscious-

ness that will elevate many into the higher realms of consciousness. *Therefore, there is a strong and concerted effort at this time to resist the advancement of the light.*

It is a desperation that they themselves are also experiencing, for they know that their own existences are also at stake here, and that which they have so long dominated and been in charge of is in jeopardy of slipping away. Therefore, the efforts of the Elite are desperate efforts at this time, and this must be remembered as well. In desperation lies the greatest opportunity to break free, for it is at this time that the Elite, the Controllers, the Hidden Cabal can also make their greatest mistakes, and in those mistakes lie the opportunities for advancement, for breaking free from the chains of oppression, and the weight of the darkness that at this time is so prevalent and so crushing.

These are the most intense of times for that matter and for that reason and these are the *very times* that those who are the Light Workers, the Wanderers, those who are the Servants of Spirit, have come be most vigilant and committed to, and to hold to the Divine purpose of one's being *of why one has come to these times, to these energies*. It is easy when one is in isolation to submit to the despair and depression, and yet what this Awareness is saying is to take these same factors and twist them around and see them as *indicators*: that the reasons why one came are being advanced, *are actually starting to occur*, and rather than to become totally despairing, to hold that the very events that are so depressing are the *very events that show that things are starting to break up*, are starting to shift and are starting to change.

Awareness sees the power of the Divine Dream unfolding now

In the holding of patience and hope and faith, one will be lightened of the burdens that are so crushing. In finding others of like-mind and like-spirit, and being part of an organization such as *Cosmic Awareness Communications*, one can always be reminded and supported that one is on the right track, and that one is moving in the correct direction. This is *essential* at this time, for this Awareness sees the hope that lies ahead, the glory, and the power of the Divine dream that is even now unfolding. *It sees how close now all are to achieving this goal, this dream*, this magnificent future, and this profound birth into that which is the New World, the New Way.

Remember this and do not despair

Do not give up hope now, do not despair, and remember that God, Spirit, the Divine is in all, is in *every being* and is in the very fabric of the events that are unfolding at this time. Hold to this, and remember this and this will hold you and support you and this will make the journey lighter and hopefully easier for those many who are going through such a rough time at this time. This completes the comments on this matter. This Awareness is prepared to move forward.

SOME OF THE SYMPTOMS BEING EXPERIENCED TODAY

Questioner: (Thank you) In addition to this, in *More Wind from the Editor*, May 2010, the following comment was included: "Here at CAC both Vikki and I have been experiencing some of the symptoms so many of you are also having and have written us about: physical discomforts in the body, forgetfulness and other short-term memory problems, feeling unplugged with a

sudden loss of energy, exhaustion and drowsiness, the feeling you could sleep another 10 hours, yet occasionally awakening in a hyper-sort of state etc. This all appears to be related to the changes our physical Earth is going through as 2012 gets closer, and this includes the earthquake energies etc. we somehow are picking up on and feeling on certain levels. Yet, like most of you guys, these are short-lived occurrences and so far as we can, we start the day, remain focused and continue to get the job done, although sometimes belatedly." Do you have a comment on Avaton's observation please?

Cosmic Awareness: They are indeed correct and that many of the Light Workers have also seen this to be so in their lives. The most important thing to remember always is that what is occurring in the greater context of reality, the physical reality that is experienced by those living in the third dimensional plane of existence, *is also* one that is exhibited at the individual level, at the personal level. While there may be the oppressive energies this Awareness has spoken of, the crushing energies of opposition of the dark energies trying to keep everything the same, trying to keep the status quo static; there is also a breaking apart and a breaking free of the old energies. *The breaking apart* is that which is being experienced on the different levels of the planet at this time.

Weird Weather and Other Events as Earth Energies Break free

There are the Earth energies that are breaking free, and this is what is exhibiting itself now in the geophysical events of the planet: the earthquakes, the volcanoes, the flooding, and the weird weather conditions. There are those events that are breaking up and breaking free in the social-economic events of the planet, such as the stock market and the decline of jobs and the physical economic conditions many are experiencing. Included in this are such events as the man-made disaster of the Gulf oil spill. Then there is also the personal level of the experiencing of energies breaking up, of shifting energies, and these are felt in a physical way or in ways of reduced energies or stagnant energies.

This accounts for why many are going through physical symptoms at this time, and these symptoms often express themselves in a way that ties in to psychological issues or beliefs that the individual themselves may have at the deeper subconscious levels. It may express itself in the tiredness, exhaustion, and lack of mental clarity that is felt by many as well. This is *all indicative of the breaking up* of the energies that exist on the planet. *This needs to happen* for that new energy to be birthed, to find form, and to find expression.

The Hermetic Law: As Above, so Below

Often before the ending of a cycle occurs there is a period of great chaos and upheaval. This death experience is indicative of that which is ending, but it is also the promise of that which lies beyond. Thus, this Awareness recommends that during those periods of personal upheaval where physical ailments, psychological or mental quandaries occur, even emotional jags or emotional crises occurs, to remember that *this too* is part of the shifting energies of the planet at this time being experienced on a personal level. This is all reflective of the Hermetic Law, "As above, so below." As the cosmos changes and shifts, the change will be felt below on planet Earth. As the greater changes occur on planet Earth in the environment, in the psychological stratas and the emotional levels of the planet, the experiences

will also be reflected in one's own personal experience of life.

You must understand True Security does not come from bank accounts, big houses and stocks, it comes from Within

This will also even include the challenges around finances that so many are feeling who are still so tied in to the Orion monetary economic systems. These systems will also collapse, but because so many are still tied into them, and have bought into the beliefs that their security in the future is dependent on their savings and their assets; as things are destroyed, as economic systems collapse, there will be great stress for many who are still tied into the systems themselves, *where they think* that they must have economic security in order to be safe. The truest security does not come from how large one's bank account is, or how many stocks or bonds one owns, or even how much is physically owned by the individual, be it a big house, several cars or material objects. *True security* comes from within and it is that realization that one creates their own security, their own safety, and their own abundance.

These are all parts of a new reality that is emerging: the reality of conscious creation, the reality of alignment and attunement to a Greater Source, a Higher Source that *will always* bring abundance and prosperity. Such is the nature of Spirit itself, that it **is** abundance and prosperity. The false premise that one is only safe when one has accumulated much material, money, or assets is erroneous, but this is also part of the energies that are being shaken up, sometimes deliberately, sometimes inadvertently. The alchemical statement, "As above so below" will show that the shakeup *must* occur at the higher levels of society and of civilization, but most definitely will also reflect themselves in the *personal experiences* of each and every individual.

It's Time to Truly Let Go and Let God!

As Light Workers and Wanderers, it must be remembered that *the shakeup is occurring on all of these levels*, and one will be challenged economically, physically, mentally, emotionally and spiritually. Even the Light Workers *must examine their own beliefs and assumptions*, and must be prepared to truly "Let Go and Let God," so that they can be guided forward. The God this Awareness is speaking of is of course the Divine Principle, that which is God Almighty, the Supreme Source and Creator of All, that which each and every being is a reflection of and a part of.

This is how to go through the upheavals at this time, the shifting energies, and the breaking up of form that is occurring on the planet at this time. These energies will intensify and increase in the times ahead and it is for this reason that one must recognize that the breakup is necessary, and is indeed part of the birthing process of that which is to come. It is the ending process, the death process that is being gone through, *and there needs to be no fear of this*, but a *recognition* rather, that this is part of that which is the shifting of consciousness and is part of the change and of the Ascension process.

REDUNDANT QUESTIONS ON ASCENSION

(Contracts, Ownerships of Land, Cars etc.)

Questioner: (Thank you) There are four other questions related to Ascension. A couple of them refer to what you just spoke of, but it puts it in different words. The

first one is from Ruth, of Roseburg. She asks, "What will happen to the ownership of homes, cars, land or whatever that are under contract when government fails and our new life begins? Will we be free of contracts and own our own homes, cars etc.? Will the continuous use of the golden White Light for protection build up to be a strong protection for people's homes as well as for themselves? Just wondering. Thank you for your comments."

Cosmic Awareness:

The questions presented by this entity, Ruth of Roseburg, are typical questions that many still are asking and wondering about, and yet in one way this Awareness would say they are *questions that support the old way of thinking, the way that has been taught to the majority, a way of conceiving one's reality that is still entrenched in materialism*. The thoughts revolve around ownership of land and properties, of houses and things, and of contracts being honored or not honored. That which is coming is nothing short than the complete dissolution of all that is at this time.

There will no longer be governments as such

There will no longer be governments as such. In many of the realities of Ascension there is *no need* for a government, for enlightened human beings will be in alignment with Spirit, and Spirit will be that which is the highest authority of all, for it is blessed with that which is the Divine Consciousness. The ownership of a house would also be redundant to the needs of Spirit, *although it will be possible to manifest a house if one wishes to experience a house and living in a house*. The controls that are exhibited at this time by those who own property or own the rights to those properties are no longer those principles that will be held as relevant, *for all will have changed, and all will be gone*.

No contracts will be valid any longer and no banks will own your house, no corporation will exist

Yet many feel uncomfortable with this, and they wish Ascension to be a continuance of what is already known, but at a higher level. This is vague and inaccurate, for if *Ascension is the shifting into Higher Consciousness, then that which was will no longer be, and that which will be is not yet known and will be created at the time, and in the moment*. One thing that this Awareness will guarantee is that no contracts will be valid any longer, and no bank will hold the rights over one's property or possessions, and no government will be available for the people or for the corporations, and in fact no corporations will exist, for all will be redundant to the reality that will emerge.

The concept of multiple realities and parallel universes

Saying this, this Awareness has also presented the *concept of multiple realities*, of many parallel universes coming into existence, and while this Awareness is speaking of the highest level of the shift in consciousness, there are those levels also that may well involve yet the continuance in some way, shape or form of realities that are being experienced at this time. As this Awareness has long been saying, *what is more involved here is whether one is moving into higher levels of consciousness which are in alignment with spiritual values and truths*, or moving away from higher levels of consciousness into the lower more oppressed levels of consciousness that are guided by the lower forms of consciousness, the lower realities that are separated from Spirit.

A Reality that in no way, shape or form exists at this time

What this Awareness is now choosing to emphasize more and more is *the heightened perception of a reality that will be in no way, shape or form similar to that which exists at this time*, but *It* also does allow all to recognize and understand that while this is a distinct and powerful possibility available to all, that *It* also supports any individual's right to create a different version of the truth or the future for themselves. Therefore, in answer finally to this individual's question, if she wishes to experience a reality similar to that which she described, she may do so, for if she holds it as that which she wishes to experience, it will become her reality. This Awareness offers another version that *It* asks her to consider, but *It* does not hold that she must manifest it or experience it if it is not her intent and/or desire. This completes this answer by this Awareness.

SOME IDEAS THAT WILL LEAD TO PLANET "B"

Questioner: (Thank you). There's another like-question from Harry and Nan Maddox. They ask, "Do people need to be concerned about their investments and social security etc. as we approach the 2012 date or will things just "take care of themselves"? What happens to all existing possessions etc. previously held, and will individuals on Planet B just take these over?" That's one part of his question.

Cosmic Awareness: This Awareness will address this first part. Again, this is similar to the preceding question, which holds that Ascension will be a continuance of that which is already so. It is even seen by this Awareness that the individual seems to be energizing more the concepts of that which is the *descending order of consciousness that will be experienced by those who follow the Planet B scenario*. His concern that his properties would be taken by others is of course a valid concern *if one chooses to go in this direction*, but there are many alternatives, not the least of which is that which has been presented by this Awareness as a *distinct possibility of total and complete freedom on all levels, especially the level of personal freedom*.

The bill of goods the Orion/Reptilian and minions has sold us (How the Ensnarement works and affects our lives)

It is not even recognized that ownership of material objects and possessions is a form of enslavement. The bill of goods that has been sold to humanity for so many years now is a very strong chain indeed that imprisons many to a reality that is defined by the dictates of those who are in charge, in this case the Orion/Reptilian faction. The minions of the Orions/Reptilians, the Elite, the Illuminati, and the Secret Cabal are simply servants to those who are the masters and those who have defined a reality that is based on materialism, capitalism, and ownership. *One voluntarily ties themselves into this system when they subscribe to the tenets of faith that one must own things in order to be happy and fulfilled, to have a sense of achievement*. One achieves these objectives through good hard work, saving one's money, investing wisely so that one may procure the materials one needs to find happiness, fulfillment and contentment, so that one may have security at the end of one's days and live the leisurely life that is assured those who have sufficient savings and resources.

This is the way that many think, *never questioning where this belief system came from*, never questioning

this way of being, never looking at the deeper implications of the enslavement into a philosophy that enslaves, that limits, that curtails one's spiritual growth and development. Instead, one projects this very same system forward and then wonders whether or not if on the other side of Ascension one will still have one's properties, will still have the contracts that guarantee the rights of ownership.

Absurd Thinking—If one understands the true Ascension

In one way, thinking this way is an absurdity if one *understands* the concept of true Ascension. *It is not a continuance of the existing system*, but it is an easier level, *where the bad guys don't quite exist anymore*. It is a revolution in consciousness, a true rebellion and overthrowing of the existing consciousness of the planet at this time. This rebellion will bring a bright new way of things, a way that is so completely different to that which is now, that it will be foreign to the degree that most people will not be able to function in the most purest expression of this new reality, but not all need to experience the highest level of Ascension for them to move forward spiritually and to evolve in their consciousness.

Go for it! Shoot for the stars!

Saying this, this Awareness again reiterates: *It* is now endorsing the newer, higher, more involved concept of Ascension, and that while *It* can talk of the many parallel universes that may come into existence as individuals choose the lesser versions, or even the devolved versions, *It* supports the endeavors of those who are willing to ascend to the highest levels, to shoot for the stars, so to speak. Therefore, in conclusion to the comments on the question asked, it is not seen by this Awareness that it is particularly relevant to worry about whether or not one will still own one's house or properties, *for the whole concept of ownership is erroneous in the first place and a form of enslavement of the human spirit and human consciousness*.

Better to think things will take care of themselves

Better to think of a situation where things will take care of themselves as one lets go of old existing concepts and beliefs and old philosophies of ownership and possession and allows oneself to move into the higher expression of the Divine that is beginning more and more to show itself in the physicality of the existing world and the concepts held on the planet at this time. This completes the preliminary part of this Awareness' answer to the comments of this individual.

Questioner: (Thank you). I believe he was concerned as he writes, "We try to think positive but feel like we need to plan for whatever is coming down the pike. We figured there are probably quite a few subscribers who are over 55 and may have the same concerns."

Cosmic Awareness: This Awareness will paint a scenario: that one plans for the future, that one salts away one's savings, that one even does that which is the survivalist's approach to being prepared and stores away much food and supplies, and then events occur where the world that exists at this time is totally and utterly destroyed. There are no more governments, no more banks, no more shopping malls, gas stations or grocery stores, and the world as it was once known is no longer so. This can occur in many ways but despite all the planning one may have done, that which was planned for is no longer valid and all the plans one made are simply dust in the wind.

This appears on one level to be a very distressing concept or way of looking at it and indeed many will hold it so, and will delve into the negativity of the destruction that steals them of their securities and their possessions. This would be erroneous, for that which is coming, while it will alter reality, and will change the planet to the extreme, *does not* have to be such a negative event but rather an unfolding of divine purpose and intent. The next level up from the reality many experience at this time is a reality where possessions and security and plans are not needed, for to live in the Divine Moment, and to be fully conscious of one's capacity to create instantly that which is needed, required or desired, will create a much different way of living than one where you must make plans and set aside and save and scrimp and hope that nothing bad happens in the future.

The biggest hurdle of all

This is all still part of the entrapment of the mind, the fostering of beliefs that you are outside of the Divine, impotent to create for yourself out of the power of your own being, which is in alignment with Spirit and with the Divine. When one separates themselves from their truest nature then the making of plans, the fear of losing what one has worked so hard to create are even valid, and the biggest hurdle of all for the times ahead is to let go of existing beliefs and concepts that have been forced into humanity and into the collective consciousness, that are held so strongly that even the contemplation of another way of things, where that which once was has been destroyed or altered very quickly or even instantly, is a very frightening prospect.

Again, *this is indicative of the old mentality*, the old way thinking and understanding how to create. It is this limited restrictive form of creativity that this Awareness is trying to challenge. It is the hope of this Awareness that those who read these words or hear these thoughts will truly start to realize that what lies ahead can be the most-glorious of adventures, and holds the most uplifting promise of complete and total freedom and of alignment with Spirit and with the Divine that is immediate and constant. This Ascension into the higher realm of consciousness is not a curse or a punishment but the most glorious reward to an experiment in consciousness that has been hard and difficult to say the least. In some ways it is the return back home that is being promised, and with the return there will be great rejoicing and celebration.

It is for this reason that it is so imperative to truly examine why there is such fear of the events ahead. While the individual was correct and many do hold fear of the loss of that which one has worked so hard to gain and to build and to have, this is still nonetheless in error and it is time now to diligently work towards a new conception and understanding. Even though one may have worked hard to create that which one has, it was simply *part of the game*, part of the way one chose to believe and to experience reality.

There is a new game that is ready to be introduced. Look towards this with great excitement and hope, and avoid delving deeply into neurosis and fear, especially fear around the loss of physical possessions and materials. This will help tremendously in allowing one to move forward to that which is unfolding, whereas *holding fear will constrain one, and will restrict one and even perhaps prevent one from moving into the energies of Ascension*. It is indeed a choice that is being offered and

this Awareness most definitely supports the choice and that which awaits will be a glorious and uplifting adventure.

Do hold to this and believe in this if it is possible for you to do so. If it is necessary to plan, continue to plan. This Awareness is not saying, "Do not plan!" It is simply saying, "Do not be surprised when the best plans go astray." Rather than see this as a personal devastation, see this as yet another area to let go of and to trust as much as one can that things are still okay, and all will still work out even if the plans one has made do not find fulfillment. This is a difficult and challenging area, and while this Awareness is trying to be positive, *It* does understand how difficult it is to let go to that which is known, that which has always composed the reality of one's experiences.

Always view changes as new opportunities

Simply be open to the changes that are presenting themselves and always, always, always see them as the new opportunities for growth and development that they truly are. This is the completion to what this Awareness had to say on this matter unless there are more comments from this individual to address.

Questioner: (Not from this individual) These have been excellent explanations and just one more question or observation remains. This is from Elizabeth Herrin of Tucson, Arizona. She writes, "I still do not understand how Ascension will happen, despite all the information from Awareness. Will I wake up one day and realize that I am manifesting things, money, and people pretty quickly and there are no more wars or any of the other negatives occurring or do I have to walk through some opening into a higher dimension and begin creating my world of desires again? I guess what I'm really asking is should I strive to own my own home again, paying utilities, mortgage payments, taxes, etc.?"

Hopefully, I will be able to ascend and walk into the higher dimension where I can create another home with no house payments and with all of the appliances, costs and energy supplied freely through some type of free energy source available to everyone, where there are communities of people living in harmony and peace, where everyone trades their skills for something needed, or people just creating just what they need. Did that make any sense? Thank you again for all that you do. I look forward to more information on Ascension." Your comments please?

Cosmic Awareness: This Awareness will begin with the latter comments of this individual. She has so accurately defined and *presented one possible scenario* that could be a reality for her and others like her who seek to move forward into the higher evolved levels of consciousness, but not at the highest level available. This does not make this wrong; it is simply *another option*, another way. In the reality she is describing, ownership of a home is still seen as a priority but not under the present conditions where there is entrapment into the realms of the Elite, who own the facilities that finance the homes, that dictate the contracts, the utilities, and all of that which is now the case. In her reality there is a possibility that free energy will be made available.

Free energy is *already* available but it is still controlled and manipulated by those who have charge of the energy industry. Thus, even though free energy is a possibility, it is not at this time possible for the masses. But in the reality she has seen and described, there will be free energy, there will be no mortgage, there will be

no strings attached to her enjoyment of her life with her own house free and clear. Also further to this, she envisions and sees the possibility of communion with like-minded spiritually-aware beings who work in harmony with each other and are in agreement to work in harmony with Mother Earth as well, for the indication is that when one moves into this reality the participation with Mother Earth will also be restored in a deep powerful and meaningful way.

This is a wonderful scenario or reality to look forward to and could well be a reality that exists for those who have this as their ideal of what to expect on the other side of the Ascension process. There is no reason why she would not experience this reality if she can hold this thought, this belief, and this vision of what her experience of Ascension will be like and what it will bring to her. In a way, she need not do anything but hold the vision and the belief that it will be so for this to occur. It must be understood that the Ascension process is both a process that is occurring to the planet herself, as well as a process of conscious evolution that is occurring to humankind, and that the process has, as this Awareness has often spoken, many variations of the theme.

She does not need to do anything but be aware that things are changing, that the Ascension process is already underway, and that while at this time the energies are reactive energies, especially by those in charge and in power, to bring about the final plans that have long been drawn up, it is also the time presently of the greatest challenge and a time where it would be easy to lose sight of one's perspective and be drawn deeply into the illusion of despair and destruction that is currently erupting in the world.

Holding to a strong and powerful vision such as presented by this individual may well be a way for individuals to move their realities forward, seeing that which could emerge for them, versus being drawn into the fear and hopelessness, the despair and turmoil and chaos that is presently being painted by the news media of the world. That is why if watching the news is depressing to one, and if being too involved with the current events is too difficult for one, then one should not focus on them and one should rather focus on that which is their vision: the possibility that a heightened awareness may indeed create a reality where vortexes appear and one can simply march through the vortexes that avail themselves and move into the higher levels of consciousness that will also be attendant in that which is Ascension.

For some, it will not be the ownership of property, a home or anything physical that will be their goal and their ideal, *but rather the attaining of complete and total freedom*, the Ascension being a heightening of consciousness, a moving into fifth dimensionality, and moving into a Light Body. This Awareness would present that for those who hold such a concept of Ascension, there would be no need to create a house to live in, for houses themselves would be redundant and unnecessary to a being who exists in their Light Body, in their spirit form. If they wished to experience a house *they could simply create this house in the mind, in consciousness, and it would manifest instantly.*

This may be a way for some but not for all. It is a way that others may move towards who develop a different concept, such as the individual has presented. Perhaps in her world at first, she will create the home she desires, free of obligations to others, contracts and mortgages

held by others, but in that reality with more spiritually aware beings, they will move towards a grander concept of consciousness that holds that *instant manifestation is possible*. This too would be a way to grow and develop once one has ascended beyond and past what is presently the case, and what is collectively held as possible in the world today.

Listening to others truths will simply ensnare one

These are all possibilities that this Awareness recommends to this individual; that she holds her vision and continues to work with the higher perceptions of what is coming and not worry so much about what others say is the truth of the matter. Listening to other's Truths will simply ensnare one and not favor one to create the new realities that are possibilities. They are not actualities at this moment, for they are undefined events that have not yet manifested, but to believe that they might manifest, to hold the energy that it will be so, is that which is required to take one to these events, to take one into these futures.

To hold that it is absurd and impossible, and that others have power and control, and that others will create the reality that one is forced to experience will *guarantee that one does not experience Ascension* in the most profound and positive way, but rather will ensure that one continues along the path of spiritual separation and physical possessions, both possessing of the physical object of one's life, as well as being possessed by the drive to possess the physical.

Check your negative beliefs at the door

These are the types of choices that are available, and it is why this Awareness continuously advocates that one check their negative beliefs at the door and endeavor to work toward attaining the highest beliefs and concepts, that which is still deemed by many as impossible but that which this Awareness says is not only possible but probable, and is that which is held by Spirit Itself as that which is so; not even that which will be so, but that *in Spirit it is already so*, and to hold to this, to focus on this, to direct one's attentions and energies towards this will be that which will move one towards that experience, that version of reality that they will create.

It must also be recognized that there are outside forces, as this Awareness was saying, that go beyond just one's personal concepts-- there is an acceleration of the energies of the planet at this time, and that the interface between the Divine and that which is the physical manifestation of third dimensionality is thinning and that these cosmic energies, these divine energies, these energies of Spirit are indeed being introduced more and more into the physical plane of existence, and they are more available than they have ever been before and they will be even more available in the next short while, moving towards that crossing-over point, that Ascension point.

If one understands this and holds the visions and beliefs that this Awareness was describing as positive, then they will begin to experience their *positive possibilities*, and individuals will begin to manifest much more quickly, even instantly as the energies that support this actually increase and accelerate. Equally, those who cannot believe it will still create that which they believe, except that they will create that which is negative, that which is in support of a belief system that does not condone or support manifestation.

Indeed, this is and always has been the danger of believing that one is a victim of one's circumstances, not

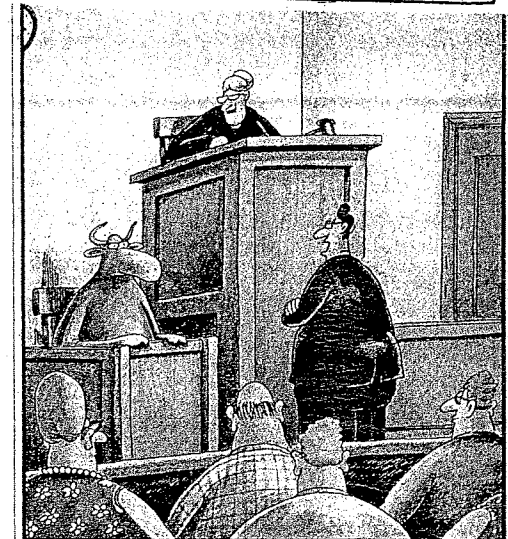

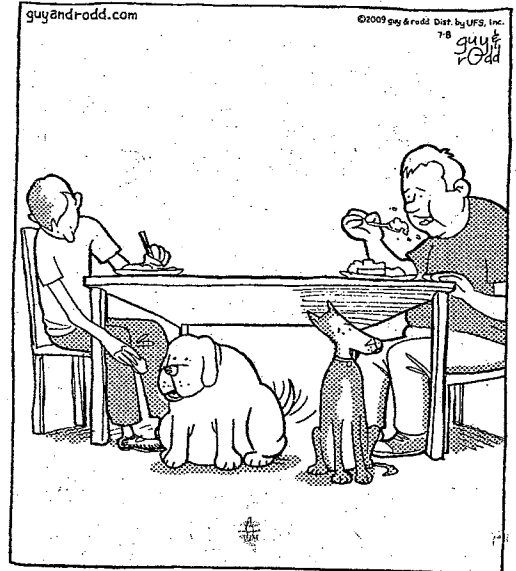

the creator of one's circumstances, and this too will accelerate, this too will draw individuals into that deeper reality of victimhood, of being subject to others' controls, for they are giving their power away, they are not controlling what they create because they do not believe or understand they can control it or they can manifest that which they desire. Both possibilities exist. That is why this Awareness will continue to advocate that one pay attention to their beliefs, *focus on that which is the highest possibility* and understand that as the energies unfold, as the energies accelerate and advance, that **they will experience the reality they focus on**. This completes the answering to these questions.

A CHALLENGE FROM AWARENESS

Questioner: Thank you. Is there a closing message?

Cosmic Awareness: This Awareness challenges individuals to *truly look* at their beliefs, to see what they are focused on, where their fears lie, or where their hopes soar, to always follow the heart, and to follow the feelings that will lead one to attain their heart's desires, and to truly question those beliefs that lead to distress and despair. It is indeed a challenging time, but it is a time of great promise also. This Awareness is complete with this reading.

Q) Thank you) The Law of Gratitude and count up were given.

"Look. We know how you did it—how is no longer the question. What we now want to know is why.... Why now, brown cow?"

 Due to increasing eye problems the Interpreter is now doing all Cosmic Awareness Personal Readings by phone only for a limited time. He pays for all phone time and you receive a tape or CD of the entire session. No emails, call him direct to make an appointment at your convenience. Call Will Berlinghof at (403)-286-5248

THE BP SCENARIO QUESTION (CONTINUED)

Excerpt from CAC Reading 6-16-10 (June 16, 2010). This is a continuation of the question published on page 18 of Revelations of Awareness 2010-7.

So easy will it (Ascension) be, so seamless the transition, that often there is even speculation that maybe nothing really happened, for everything turned out okay in the end. It turns out okay when one *believes* it will be okay, when one understands that the energizing of the concept of one's life, the parameters of one's life, the expectations of one's life very much define the experiences of one's life. It is for this reason that this Awareness continually recommends the belief be shifted to one where everything will work out. It is not saying this simply out of denial of what is happening or irresponsibility, It is trying to explain here one of the deepest mysteries of creativity, of creating one's reality.

Being Totally Focused on the Negative is a Dangerous Precedent

This is why this Awareness emphasizes that simply being totally focused on the negative is a dangerous precedent, for it will energize the negative scenarios and individuals will experience them seamlessly. As the focus goes, so will the attention, and so will the events themselves that support the attention. Equally, if one believes within themselves that despite all, everything will be okay, this is not simply denial but a *choice*, a choice to re-evaluate one's reality and to make other decisions and other choices. This is part of that surge against the collective consciousness that exists on the planet, a surge that will start to create new channels of consciousness; and as these new channels of consciousness bite into that which is collective consciousness, there will begin to be deep and profound changes as these channels of consciousness merge together and a new river of consciousness is forged, a river that eats away at the planetary consciousness that is held, creating a new collective consciousness for all those who are in that river of collective consciousness that is at variance to the old beliefs and standards.

The truest trick of all is to place yourself in the new strands of consciousness that are contrary to the negativity and the negative-held beliefs that are so common and that are so presented in the world today. Most think there is no other way forward than through that which is presented on their nightly TV news. This is why for some, watching the news is not advocated by this Awareness if one cannot divorce oneself from that which is presented on the screen and that which they wish to believe and energize and create as their own reality. Those who have the strength and power to divorce themselves from what they are seeing on the screen and what they wish to create and experience can indeed continue to watch the news. This Awareness is not recommending that you stop watching the news; It simply is recommending that you *stop energizing the negative events* that are presented in the news.

This is all part of the unfolding of consciousness that leads one away from that which is the plans of those in power, the New World Order Elitists, and the creation of the new way of knowing and believing that is part of Ascension to the higher levels of consciousness that this Awareness so often speaks of.

DISASTER CAPITALISM AT WORK

Questioner: (Thank you). There are two more questions. There is an examiner.com report out of Seattle that indicates evidence that the BP oil spill is a disaster perpetrated by capitalism, by the criminal elite to depopulate the planet and to stop ET disclosure. A "false flag" event in the gender of Disaster Capitalism, with the environmental war purpose of wrecking the environment of the Gulf of Mexico and the eastern US, and causing economic and social hardship to the population and possible physical evacuation into FEMA camps operated by Halliburton on behalf of an interna-

tional war crimes network. Halliburton is, by the emerging evidence, itself a prime suspect in the false flag operation. Is there any truth to this report?

<http://examiner.com/x-2912-SeattleExpopolit...>

Cosmic Awareness: This report is very accurate indeed. It supports what this Awareness has been addressing and speaking of.

Questioner: So with this published out of Seattle then the people will start to become aware of what's actually going on then. Is that correct?

Cosmic Awareness: This is part of the raising consciousness that is emerging on the planet, as this Awareness said. A choice is now present, a choice to only believe the controlled press or to start to understand that things are not what they seem and to start seeking out alternative reports of the news, such as that which is being presented in Seattle. There are many other publications that are coming out also in support of what has occurred and the truth of what has occurred, not simply a false reporting of the facts to misguide the population, but accurate reporting of the truth to enlighten the population.

ABIOTIC OIL DISCOVERY

Questioner: (That is good) This next question has a different twist on this: a *Coast-to-Coast* report suggests the real story, according to Minister Lindsey Williams, in the 1970s, Russia drilled a well over 40,000 feet into the ground and discovered abiotic oil, which is oil which replenishes itself via a yet unknown chemical process. The BP offshore well was their attempt to create a similar super deep well and access the same abiotic oil. However, the pressure from the pocket of abiotic oil in the Gulf was so great that it burst all the safety valves on the floating platform. Oil industry insiders believe the only way to stop it is a nuclear device. Is there any truth to this report?

<http://coasttocoastam.com> June 14 2010

Oil is Not a Fossil Fuel

Cosmic Awareness: There is some truth. There is indeed the discovery of abiotic oil reserves. This Awareness spoke on this many years ago and stated that many of the oil reserves that had been pumped dry in the past have resupplied themselves, and that there is a misconception of what oil really is in the first place. The common assumption is that oil is a fossil fuel. It is not a fossil fuel as such, but Mother Earth's way of relieving certain toxic deposits, collecting them almost in the way the body collects certain foreign materials that are then stored as fat deposits. This Awareness is saying that these self-replenishing oil supplies are actually a *toxic residue* of mother Earth that she is constantly secreting into these reservoirs, just as cysts appear on the human body where toxic fats are stored; subcutaneous cysts.

This is what is referred to by the report of the Russian discovery, yet it is not seen that this was the plan of BP necessarily, for it is seen that *it was their intent to create this disaster*, to destroy the environment, to destroy the livelihoods, to create a situations of great hardship and despair. It is not seen that BP was hoping to discover a well as the Russians had, so much as it was seeking to simply *create this problem in the first place*. This is why again BP always avoided the reports of those authorities on the rig itself that they were creating dangerous situations.

Questioner: Is a nuclear device actually to be used?

Cosmic Awareness: This of course is part of the plan, but this will simply create a worse problem. It is not seen that this is any solution other than the solution that has already been drawn up, which is not a solution at all,

but the creation of a problem so huge that it will seriously compromise the region and the planet itself.

Questioner: Is there anything more on this before I go to another topic?

WHY THE ET'S WON'T INTERFERE

Cosmic Awareness: Previously a question was asked as to why advanced extraterrestrial beings would not interfere. Part of the answer this Awareness gave at that time was that there are *already* technologies and solutions at hand that are available that mankind itself could use to prevent this situation. Further to this, it is seen that there is thought by those extraterrestrial beings who are monitoring the situation to intervene, but their hands are somewhat held, for there has *not been an invitation* extended by the Powers That Be for intervention. It must be remembered that the purpose of the Galactic Federation is to assist humanity in an *indirect way*. This is why so many Star Beings have been born onto the planet at this time. There is an equivalent to that which is known as the Prime Directive that binds the hands of the Galactic Federation from just simply intervening, and yet it is also being contemplated, for it is known by the extraterrestrial Galactic Federation authorities that this is a planned event with serious consequences that may *cost the lives of many*, not simply the livelihoods of many but the actual lives of many.

If it becomes apparent that those in power seek mostly to destroy humanity then there is also consideration of intervention, but this is not a guarantee, for those at the level of consciousness that the Galactic Federation occupy understand that at this time this is *also* a crucial event to help many start to redefine reality, and to shift from the collective consciousness that is held by a majority to the higher evolved levels that are held by those of the Galactic Federation. For them to simply come in and seal the hole that is causing the problem would not necessarily advantage the many who are ready to shift consciousness, to start to *investigate how this event could have ever happened*, which would lead them into a higher understanding and awareness of *What Is*. Therefore, even though those of the Galactic Federation who are observing this are sickened by what they are seeing, still at this time *it is not their right to intrude* nor is it seen by this Awareness as this is what will occur any time soon.

Furthermore, as that which is Council of the Galactic Federation is trying to help the Ascension process, it is seen that this event can ironically be beneficial to shifting consciousness and it is seen by the beings themselves that constitute the Galactic Federation Council, that shifting consciousness and seeing the reality from different perspectives, and seeing a greater picture will to *do more for the Ascension process than intervention* in the way of coming and sealing and plugging the leak would. This does not mean that intervention is not being considered if the situation becomes extreme enough, but this would have to be at such a level that the planet itself may well experience a disastrous event due to this situation, and it has not yet reached such drastic proportions. Simply be aware and understand that the situation is indeed being monitored by the Galactic Federation.

Questioner: And we definitely thank them for that.

Cosmic Awareness: It would be more appropriate for those who wish to see the Galactic Federation participate to vision this, to envision such a possibility, to see things changing as the news and the truth are exposed to what is really going on and those in charge are exposed for the criminals they are. As one begins to envision a new world where such events occur, where the participation of the Galactic Federation is an actuality, then one will move themselves into the direction of experiencing such

11 a reality. This is how Creator Beings will understand how to create their own reality -- they will begin to envision a new reality that they would prefer to experience and move the energies in this direction.

HEALING THE BODY WITH THOUGHT: GROWING NEW LIMBS, REGENERATE ORGANS

Questioner: (Thank you) Our next topic is phenomena. This comes from Ted Helinski. It concerns healing the body by using consciousness. He writes, "Videos tell the story of how Russian researchers have discovered how to heal the body by only using consciousness, but it goes way beyond what was formerly thought possible. Using the methods they have discovered and plan to teach to others, they have been able to completely regenerate organs even after they have been surgically removed. Women who have had their uterus removed 30 years ago have had them completely regenerated and have then had children. All the organs of the body and even teeth in adults have regrown. This is really something fantastic and probably what so many have said awaits us in the very near future. This is really awesome. The results aren't just some crazy stories that you hear about, but then when you do the research the story falls apart, but everything has been documented by doctors and medical researchers in Russia. Check it out! Is this true please?"

<http://petrovfond.de/film.html>

Cosmic Awareness: This is true. There is a reason why these stories allegedly fall apart. It has more to do with the Powers That Be not wanting this truth to be discovered and understood, for it would be one of those truths that would be explosive to the degree that it could well blow the lid off of their control, especially in the fields of health and medicine. It must be remembered that those in charge, those with the power, the Powers That Be are also those who *are the richest members of society*, and they are rich because of the control they have over the belief systems of humanity, especially humanity in the Western world.

It is to their best interest to promote a medical system that *does not* emphasize health and well-being, *does not* emphasize healing to the degree suggested in this article, but rather healing that is dependent on pharmaceutical drugs and procedures that are highly toxic and destructive and damaging. *Then individuals will stay sick or will have to be treated again and again by expensive medicines and therapies.* More money can be made off an ill person than a man or woman in good health, and to know that one can restore limbs or organs or teeth does not at all work for those who have the power and control in this field. This is why the reporting of these events, even by certain agencies in Russia itself, is such that it discounts these reports, dismisses them and even trashes them. But it does not mean that such healing has not occurred, or that such conscious healing is not available or effective.

The Phantom Limb Exist in the Auric field

It is a new way of understanding the human body. It is a new way of focusing creative thought onto the body and into healing. There is a phenomenon that is known in the West as a phantom limb. It is well documented that individuals who lose a limb, a digit like a finger for example, may often feel that limb, that digit, that finger as still being there. Even though the limb, the organ has already been removed, its presence is still felt by the individual. This is because the auric field still surrounds that limb and even though the physical limb itself or the finger has been removed, the energy that still surrounds it is such that if it is activated through conscious thought, growth can occur that replaces that missing limb.

Like Salamanders who lose their tails and reproduce them

It is similar to the salamanders that can lose their tails and yet re-grow a new one. They do not think about it,

they simply fill in the space where the missing tail was, allowing their energetic aura to complete this action and to physically reproduce the missing tail. This is what is possible for humans who have allowed themselves to go to that higher level of consciousness where such a possibility exists. It does not exist at lower levels of consciousness, where there is a denial of a human being's capacity towards such miraculous healing efforts. It is not even so much miraculous as it is unknown, and once one begins to become aware of their capacity as a Creator Being and truly accepts this and understands that the tools are available to all, the powers to even heal missing limbs, missing organs, missing teeth, then one steps into a whole new level of reality, and this is indeed that which awaits many in the time ahead, the times of ascended consciousness, where such matters become commonplace, and where the old techniques of healing, that which are current today, that which defines the medical industry, are rejected as primitive at the very least and barbaric in nature.

There will come a time in the future when many will look back to the present time and the type of medical healing that is available, and the treatment for illness and disease that is used will be considered extremely barbaric, as if it was from the Dark Ages. The enlightenment that will prevail will be so high that consideration of techniques that are now commonplace will be laughed at and it will be disbelieved that this could ever be so. But this is still ahead in the future. Now it is still a time of moving from one paradigm of belief to a new paradigm. The fact that the evidence is now starting to appear that shows that it is possible to heal missing limbs, to restore absent organs, and to repair spinal injuries so that people can move once again, means that *this is becoming more and more a reality.*

Christopher Reeve Succeeded but the PTB killed him

Indeed, there was the individual Christopher Reeve who believed such, and who pressed forward for this; this Superman had made certain discoveries that he was willing to show the world. This Awareness can even say that at that time this was considered dangerous to those who were in charge and held power, whose vested interests in this were threatened and Christopher Reeve in a sense had to go away, so that this could never be exposed. But while they may have eliminated the man himself, it could not prevent further research occurring, and it cannot prevent this truth from being released and becoming the reality for those who can project themselves to a level of conscious awareness, where such a reality is actually the truth. Be aware that more reports will start to circulate of these techniques. See them as indicative of the changing order of things, of the new possibilities, as evidence that many things are shifting as consciousness continues to shift and accelerates as that period of Ascension draws to conclusion, as Ascension occurs.

AN UPDATE ON THE OIL "SPILL"

(Excerpt from CAC reading 7-15-10 (July 15, 2010))

QUESTIONER:

This concerns the BP spill. There was information on the radio that the leak had been stopped and they were going to watch it for 24 hours. Two questions, "Is this in fact so or propaganda? And is the blowout scenario a cover-up for something else that is preferred that the public not be aware of?" Your comment please?

Cosmic Awareness: To the second matter first: Of course there has been cover-up, and of course there has

been deception. This Awareness has spoken of this previously, and this remains the case, and there is much that has not been revealed. There was a reason why the bottom of the Gulf was surveyed, for it is seen there is a collapse deep underground, and there has been a shift of the fissure, the fracture that was originally tapped into. This is still being hidden, as is the methane buildup and the potential for a cataclysmic explosion. These are all matters that they *do not wish the public to know more about*, for it is not simply BP that is in jeopardy here as a corporate entity, it is *all the drilling that is happening*, not only in the Gulf but in all deepwater sites and even drilling on the land itself.

Mankind has been long brainwashed to believe that the *only* source of energy available to it has been petrochemical: the crude oil and gasoline, and natural gas as well; but this has only been so for a relatively short time in the world's history and there were other sources of power and energy before gas became the major driver for all industrialization and there are of course alternative energy sources that could easily replace the oil industry. As the oil industry is still an industry that makes the owners of the industry and the stockholders of the industry rich people there is not an inclination towards abandoning it any time soon even if the alternative sources of energy are much cleaner and safer and more easily tapped into than the oil is that is drilled for.

At stake is the collapsing of the entire oil industry

Therefore, at stake here is also the collapsing of the oil industry, if too many people saw it for something that is more expensive to the human condition in the long run than profitable, as it is mostly profitable to a small handful who make excessive profit on it, there would not be a desire by those handful of people who are in control to do anything about it, to cause concern that could shut down the industry itself. Therefore, much that was revealed throughout the fiasco of this event will not be publicly revealed.

The pressure Top Hat on the well as a "solution"

It will be brought forward that they have effected a solution, in this case the pressure top hat that has been put on the well. It is not seen that this will contain the oil, for it is seen that there is seepage now from other sites. Again, this is something that was not revealed, but as long as the public is shown controlled pictures and is shown that this apparatus has carried out its function and it is sealing off the oil, then a majority of people will feel safe and that this has been achieved and that the oil company is now once again the hero, for it has finally sealed off the oil spill.

Caverns beneath the Gulf have collapsed

There are other factors that are involved in the sealing of the spill, including Mother Earth's own actions that have not been reported. It is seen that there was a collapse in the caverns underneath the surface at the bottom of the Gulf that shifted certain shelves of rock deep underneath that slowed the flow of oil, and that the efforts that are being shown on television are somewhat deceptive. The flow had already started to slow down, but this will not be admitted to, for the oil company must try to present itself again as an agency that can take care of these types of emergencies and it must present itself as some entity that has now learned from its mistake and presents the rationale that now they have learned their lesson and they have the technology now that such an event will be dealt with much more quickly, if and when there is another spill. This all designed to give a faith and confidence back to the oil companies, for there are many who are reliant on the continuation of the drilling, both in the Gulf Sea itself in the Gulf of Mexico, as well as in other areas around the world.

This trust and confidence in the oil companies is essential for these big corporations to carry out on with their business and they would not present evidence that showed they were not truly the ones that were responsible for shutting down the major problem; *they must present themselves as the savior*. This simply would make them look much better and because so much money is involved, those who are gaining from the profitability of drilling for oil would also favor this as the solution. Those who make a living on the oil rigs or in the oil industry would favor this as a solution. Those who are receiving kickbacks and compensations from the oil companies would prefer this to be the solution, and therefore this is what is being presented.

It may not come out that certain other events also took place during this time that have alleviated the problem somewhat, for it is seen that the oil companies will simply claim all the credit for themselves. Ultimately, this does not matter so much. What matters is a tremendous leak of oil is somewhat contained at this point and this is a positive action in the end, no matter how it occurred or who pulled it off. It is seen that there is still an action taking place of the drilling into the pipeline that is underneath the surface. By pipeline, this Awareness means of course the core pipe hole that has been drilled from which the oil has been gushing forth and this alternative operation is to cement the well head shut, to block it and prevent other oil from escaping.

Why present efforts MUST be abandoned

(An Ecological Disaster for the whole planet is occurring)

This is seen only as a temporary measure, in that as long as drilling continues, especially at these depths, there is still the potential of another disaster. This Awareness will be very clear now in *Its* statements that *such activities must be abandoned*, for they are not only harmful to the local region and the wildlife and the people who live in that region, *but it is an ecological disaster for the whole planet*. Hydrocarbons have been released into the atmosphere that will come down in the rains hundreds, even thousands of miles away from where the disaster occurred, and it will take many, many years to deal with this disaster.

This presuming even that with Ascension this will not be resolved, but this is not so. This is simply one of the strands of reality that this Awareness has talked about, and those who continue to follow a strand of reality after that which is the Ascension completion may find that they live on a planet *that will still be affected* through the course of events that have recently occurred. In any event, this Awareness sees that it would be better to curtail this type of activity, the drilling for oil at the oceans' depths.

Questioner: Question please. Those other two wells that were drilled, are they active or have they been helpful in any way, or are they still being drilled?

Cosmic Awareness: They are still being drilled. The point for these two other wellheads is to drill wells into the existing drill well hole that is deep into the earth. They will then pump the mud cement into the existing hole and block it, plugging it up. But what is seen now is that this event that was created will start to build up a pressure, because once the pressure was released that was once contained, it now must be dissipated and with the buildup of pressure it is seen this could still lead to more problems down the road. This situation is not seen by this Awareness as completely finished yet.

Questioner: Question again please. The blue light that was shown, is there HAARP technology involved in that?

Cosmic Awareness: There are various technologies indeed that were involved. Some speculated that this was what was used to destroy the drill head and the line down into the well head. It is not seen that this is what it

was used for; it was more of a targeting device that is linked to the Tesla technologies and the HAARP technologies.

THE ALBERTA OIL SANDS ALSO A DISASTER?

Questioner: I see. Basically on the same topic, there are advertisements being shown that the BP well is the first disaster and the Alberta oil sands are the second disaster. Could you please discuss the oil sands and the ramifications of these please?

Cosmic Awareness: There is a group out of the United States that is trying to present that project known as the Tar Sands in northern Alberta as a tremendous polluter of the lands and of the environment. There is no real comparison to the two events. The Tar Sands are not out of control, and are not polluting at a level anywhere near that which has occurred in the drilling at the Gulf of Mexico and the disaster that has occurred there. However, this Awareness *does not* favor the Tar Sands operations, for it is a process that does create a lot of ecological damage, and is altering the landscape of Northern Alberta, but there is an interest group involved in this that has a purpose other than just pointing out environmental damage that the Tar Sands are creating. They are trying to work in harmony, not only with the ecological systems of the North but also with the people of the North, this being the groups that are involved in the Tar Sands projects, not the group that has targeted them.

Tar Sands a Target to take attention off the Gulf Crisis

This group that has targeted them has the ulterior purpose of taking attention off of the disaster in the Gulf. Thus it is seen that there are forces behind this group who are actually the forces of the oil companies themselves trying to take attention off of this disaster and using an environmental group to drive this home. This is not to say that there are not some valid points made by this group in San Francisco. It is simply seen that they themselves do not understand that they are being used somewhat to take attention off of the Gulf and focusing it elsewhere. There will be other attempts to take attentions off of the Gulf incident that will also be tried in the future, not the far future, but the near future.

This is seen as one group who has decided to launch an attack against not only the oil companies of the Tar Sands but against the whole province of Alberta and the people of Alberta, by sending out a message that Alberta is a polluted countryside, a province that has a bad environmental record. The irony here is that the main companies who are in the Tar Sands are companies that have American backing and American stockholders. They are of course *the same international groups* that have been behind other corporations over the world that have had little regard for the environment or the people.

In India Thousands Killed and Injured by Union Carbide Inc.

Thus, you can have an incident in Bhopal, India where thousands of locals are killed and injured by Union Carbide and actions of their plant and the energy behind it is the same as the group of men and women in the BP organization or Syncrude in Northern Alberta. These are the same people over and over again who are doing these actions for their own profit and well-being. This is the real target that must finally be understood and comprehended, this and the greed behind these people in their unrelenting quest for monetary profit and power. When the true culprits are targeted and the attention is brought upon them and the truth is brought out, there will be a change in the public attitude towards these individuals and these groups.

Attacking a whole province and the people of a province because of the greed of a handful of people that is a global greed against all of humanity, does not entirely make sense, but the environmental group that has

launched this activity feels that it is fair game to target Alberta, to destroy its image as a beautiful destination for tourists to go to. This group does not see that they are attacking the wrong people, and that they themselves are being used to distract attention away from the Gulf oil spill.

MYSTERIOUS WEAPONS IN FALLUJAH?

Questioner: Thank you. That was most informative. It gives a different perspective for sure. We have something here; it's talking about Fallujah. The question comes courtesy of Ted Helinski. The question is, "Over the years there have been stories that have appeared for a brief time and then disappeared. The gist of these stories is that American forces used nuclear weapons in Iraq. One place that always comes up in this discussion is the Iraqi city of Fallujah. I know that the US forces have used thousands of tons of various types of munitions that are in part composed of depleted uranium and this could account for all of the sickness and deformities in that country, to say nothing of the many sick military veterans of that war. But I suspect that something like

small neutron bombs may have been used in certain cases, such as during the battle for Fallujah.

The included article (he gives the website) besides telling of the dramatic increase in infant deaths, birth defects, cancers etc. in Fallujah also tells of how much the American and Iraqi authorities are trying to prevent anyone from investigating and finding out the truth. My question is: Did American forces in Iraq use nuclear weapons against the defenders of Fallujah with the full knowledge and agreement of high-ranking Iraqi authorities?" Your comment please?

Cosmic Awareness: It is seen there is some gist to this story. Certain weapons were used that this Awareness would call *experimental weapons*. This was a pocket of resistance to the Americans and the allies that was proving difficult to control. It is even seen that there was a nuclear type of weapon, neutron-based, that was used. But aside from this, this Awareness does **not** wish to proceed further with any explanation, for this is still considered Above Top Secret. It is not meant at this time to go into a deep discussion of this matter, and it would create too much difficulties for the organization and the Interpreter.

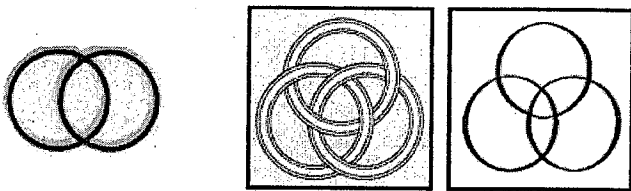

CAC General Reading 6-1-10 revised .Will Berlinghof Interpreter, Joan Mills Questioner & Energizer June 1, 2010

THE VESICA PISCIS MEDITATION

Questioner: Does awareness have an opening message or any topic it would wish to discuss at this time?

Cosmic Awareness: This Awareness wishes at this time to present the membership with a new meditation for these times - a meditation that will bring them into the oneness of their being, focusing the three aspects of themselves into Oneness or Unity Consciousness. This Awareness suggests that after settling oneself down in a comfortable chair in a position that is relaxed and secure, that each individual seek to see in their mind's eye the image of a circle, and then see a second circle beside the first one, and bring these two circles together into intersection.

The image or shape that is formed where the two circles intersect is the shape that is known as the Vesica Piscis, that which was the original shape of the fish in early Christian imagery. This disc shape is formed in the intersection of the two circles, and one can merge the two circles to the halfway point, or the center of each circle, or at a slighter cutting into the circle of both circles, but not exceeding the midway point of intersection of the two circles intersecting each other.

An imaginary line can be drawn from the center point of circle A to the center point of circle B. Then it is recommended that a third circle be viewed, a circle above the two intersecting circles and that this be in the middle of the two. This circle can then be brought down to intersect the two already intersecting circles, thus three intersecting circles are formed. The suggestion again is to intersect them to the midpoint of the circles, the three midpoints, and this will cause two more Vesica Piscis to be formed to each of the two intersecting circles below the third, but that which also is formed is the central region of the three circles where they intersect.

A rounded triangle shape will be formed in this merging of the three circles, and this is the point of Unity, the Oneness that can be focused on and energized in the meditation. Furthermore, a line from the center of circle A to the third circle, circle C, can be drawn and a line from the center of circle B up to the center of circle C. These three lines will form an equilateral triangle, the symbol of Trinity. The three circles can be understood to be the three aspects of self. Circle A may represent the middle self-consciousness, circle B the low self-subconscious, and circle C the High Self-Superconscious. The three blending together in the Trinity, with the curved triangular shape at the center of the three vesica piscis as the point of reflection that one puts oneself into upon seeing the three circles intersecting and merging together.

One can draw this shape using a compass creating three equally sized circles that intersect to create the image that this Awareness has described. This is an ancient symbol. It is the flower of life symbol. This symbol was found deep within the Egyptian burial chambers. It has been found on the Neolithic stone pillars in Greek temples and even on the Polynesian islands, for it is an ancient symbol that has long represented the intersection of the three aspects of self: the High Self, the middle self, and the low self.

This Awareness suggests this as an image for those interested in finding a place of unity in themselves, to be used either as a separate meditation or as a starting point to a meditation. By placing oneself in the very center of this image in the curved triangle of the three intersecting Vesica Piscis, one will begin to unlock the energies of the three aspects of self as they merge into the Oneness of one self, the Unity of one self, and this is a powerful image and meditation to use in times that are chaotic and fractured. This is an image that will take the individual much deeper than they are used to going and it is a place from which they can launch themselves to go into the higher realms of consciousness as they seek to expand their conscious thoughts and understandings.

This concludes the meditation image this Awareness wishes and wished to provide at this time, that which is that of the Huna image of Unity.

This image is also found in Celtic imagery. As this Awareness has already said, it is an ancient concept of Trinity. The flower world exhibits this form also, for example; the three petalled lily is the example of the three intersecting shapes of the Vesica Piscis of three

circles. Once one sees this image, one will begin to see it in the surrounds of each and every individual as they look for unity and diversity. This a universal ratio from which all sacred solids originate. The original Vesica Piscis of two intersecting circles can also produce the triangle from which the Golden Ratio derives. This is arrived at by drawing the line between the two midpoints of the Vesica Piscis, and then drawing another line upward from both center points of the Vesica Piscis to the top intersecting point. Drawing the three straight-edged lines will create again the equal-lateral triangle and it is from this shape that all other sacred solids derived from and started from. This completes this presentation of this image.

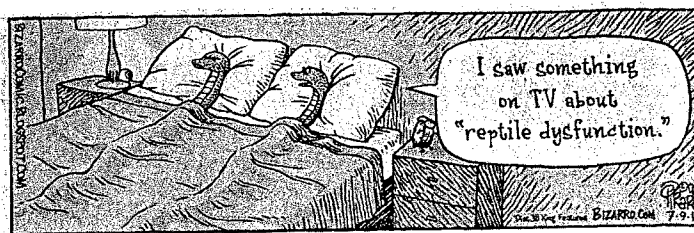

ISRAEL INVOKES ISLAM TURKEY

Questioner: Thank you, it's very interesting. Our first question comes through Ted Helinski. It involves the Turkish-Israeli situation. "In the Random Thoughts site, the following excerpt from Sean Paul Kelley's diary reads: 'So, in this action Israel has done the following: put America and NATO in a very difficult place. It's emboldened the Islamists in Turkey and weakened the generals in Ankara. It has also forced Turkey closer to Syria. Quite the strategic win for the Israeli strategic genius, isn't it?' Your comments on the validity of his observations please?"

Cosmic Awareness: This must always be seen in the larger context of what is the true plan for invoking the wrath of the Turkish government and the generals in Ankara. It was not accidental but deliberate. It was understood that should the blockade be broken that the Israelis had put up to prevent aid coming to the Palestinians in the Gaza Strip, that they would respond. The flotilla that attempted to breach the blockade the Israelis had formed was a flotilla with many Islamic Turks aboard and many of those who were killed upon the armed intervention of the Israeli troops were Turkish nationals. This has indeed provoked Turkey against the Israeli government. Turkey, which had previously been the most moderate of all Islamic nations against the Jewish state of Israel, has been deliberately turned aside, forcing it to seek a stronger union with its Islamic brethren such as Syria.

The Gaza Flotilla: A Deliberate Attack To Create A Crisis In The Middle East And Start A World War

This was a deliberate action by those who are seeking to provoke a crisis in the Middle East. It must be remembered that one of the plans to cause a state of upheaval on the planet even leading to war is a Middle East crisis, and that the people in the Israeli government are themselves of course puppets to those who have true power. Some consider the Zionists behind the Jewish peoples as those who are fundamental to creating the unraveling of the world and of the nations of the world. That which was known as the *Protocols of Zion* many years ago that were found and released, indicated the plan for those who are known as Zionists to broker international upheaval and dissent, this in relation to plans behind the manipulation of events, peoples and governments at the time prior to the second world war, and it was seen that there was a secret government and group behind the scenes who were brokers to destruction and dissolution.

These same brokers are still playing their games whether one calls them the Zionists, the Illuminati, the Elite, or the Secret Cabal. They are all still those who have been long involved in the manipulation of world events and political machinations and are still so involved at this time by deliberately attacking the ships attempting to run the Israeli blockade in order to bring relief and supplies to the Palestinians in Gaza. The intent was not simply to prevent supplies coming to the 'dreaded foes' of the Israelis but also to *provoke an even stronger reaction*. It was intentional, the measured response of intervention, of putting Israeli commando troops on the ships of the flotilla and shooting at those who were on the ships.

Turkey A Reluctant Ally Of Israel Now Goes Radical

As it was said by this Awareness, this has provoked because of the death of Turkish nationals, a stand by Turkey that will take them away as an ally, albeit a reluctant ally, to Israel and align this country to the more radical Islamic countries such as Syria. This will lead to an escalation of events and it is the plan to create an international eruption of death and destruction and warfare in the Middle East area. Then those who have power will further mobilize the controlled governments that are puppets to those in charge. It is seen that the group known as the Zionists that have so long had power have a strong base for this power in the state of Israel and that by provoking the conflict in the Middle East, the Zionists elements who control power on the planet will pull the strings that will bring the United States into conflict, that will draw NATO and United Nations in, and that which is already raging in the Middle East area of Iraq and also Afghanistan will expand into the hostility of the Middle East.

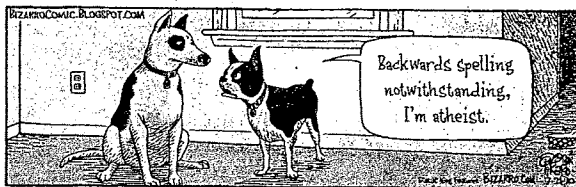

As this becomes even more inflamed, the whole region will become a place where military actions start to take place, and it is even seen that the ultimate goal, although it is not foreseen that it will be accomplished, is that *American troops will also be deployed in the Middle East region* which will further inflame Islamic sentiment and anger. This will perpetuate that which was started several years ago in the proclaimed war against the Arab world, against the Muslims nations.

THE COVER-UP: THE DESPERATE SITUATION IN GAZA IS UNKNOWN TO THE WORLD

These are all escalating steps and this latest act against the flotilla which was basically trying to deliver food and supplies to those Palestinians in desperate straits in Gaza, is but one other event that has been manipulated to cause more extreme reaction. Very little attention has been paid to Gaza in recent months and so most of the world does not understand or recognize the desperate situation that currently exists in Gaza and this is deliberately so. The Powers That Be, both in Israel as well as around the world, do not wish the people of the world to know the truth of this area and the suppression of that truth is working towards the control that is required by the Powers That Be.

"They are all Arab Terrorists" says the Powers That Be

They do not wish the world to have sympathy for starving children and women. They simply wish the world to understand that these are all Arab terrorists, and that they should be denied aid and assistance. By putting these people into such a category they present them as the enemy, "the terrorists", those who are doing their best to destroy democracy on the planet, to destroy peace and harmony. They will continue to escalate this image of the Palestinians and of the Muslims and the Arabs, making them into the scapegoats and manipulating world opinion against them as is already the case, and escalating this step-by-step until finally it reaches a climax point, a flashpoint, where everything erupts and the plan to create the beginnings of a World War in the Middle East will take place.

Choose not to Energize or Support this Scenario

This Awareness is presenting this information to explain certain events but as always, this Awareness now wishes to point out that while this is one planned scenario, it is better not to put energy into this scenario that will bring it to pass. It is one thing to know what the alleged plans are, and what the alleged intent is, but it is another to become so wrapped up into it that you are seeking the next step. It is easy to fall into this trap and so while this Awareness can quite eloquently elaborate on the circumstances behind this and the purpose for these events, *It still wishes all to try to not focus on these events, to be aware, but to then say, "I choose not to energize this. I choose not to participate in this. I choose not to support this in my reality. These are all games that are being played by those who are in charge but it will not pass, it will not become that which is planned, for this is not my reality."*

This is the recommendation of this Awareness to such events as they appear on the planet at this time.

NUCLEAR ISRAELI SUBS

Questioner: Thank you. To understand further, is it true the Israelis have deployed a nuclear-armed sub in the Persian Gulf due to the Turks' refusal to allow Israel access to their airspace for the Israeli Air Force training in Turkey. And I am wondering if this ship exercise is to be used as leverage for gaining that airspace for the Israeli Air Force training in Turkey. Is that related in anyway?

Cosmic Awareness: It is seen that this submarine was already in the area, and that the insinuation is being made by the Israeli government that it might be used for such a purpose, but that this is seen at this time as not likely. It is seen that the Turkish government may indeed throw the Israeli troops out of Turkey and deny them the use of the airfields in Turkey. If this occurs there are other pressures that can be brought to bear on Turkey and particularly American pressure, as well as the European Union, to try to convince Turkey to keep the Israeli troops in Turkey, allegedly for training purposes. However, the sentiment of the Turkish people is very hostile toward Israel at this time and in their hostility toward Israel, the Turkish citizens will demand that their government expel Israel from their shores, and not allow them the right to train in Turkey.

As this Awareness said, it is not seen that the threat of a nuclear strike against Turkey by the nuclear submarine belonging to Israel is likely to happen. It was more an insinuation of what *might* happen, but this is one step too far at this time and would not be supported if it were to occur. The citizens of the world would turn against Israel and against such an action and they would not achieve their goal, which is to paint the Muslim world as being fanatical terrorists. The Israelis must also be careful not to exceed themselves, and thus turn popular opinion against themselves. This is why it is not seen as likely that they would use the threat of actually deploying a nuclear strike against Turkey, but the fact that the submarine is in the area can be used as a big stick to threaten with.

Questioner: Question please: Is Israel a member of NATO?

Cosmic Awareness: It is not. The agreement between Turkey and Israel is a separate treaty between two sovereign nations. Turkey was encouraged by NATO, the North Atlantic Treaty Organization, to allow Israel to train its air fleet in Turkey, but this is actually a private agreement, although it was backed by the European Union, the NATO forces. Does this clarify the situation?

NATO AND THE NEW WORLD ORDER

Questioner: Yes it does, and my final question here is: Is the bottom line to this scenario an attempt to dissolve NATO so that the New World Order can be activated? Is this related in any way whatsoever?

Cosmic Awareness: It is not related. What is seen is that the New World Order eventually will openly take over control of NATO, but it will not take over as the New World Order taking obvious measures and acts to bring NATO under its thumb, for the New World Order will not be called the New World Order. It will be called something else, but it will still be in effect that which could be understood to be the New World Order. It may be the United Nations that finally takes over the NATO troops, but the United Nations are also under the thumb of the New World Order controllers. Is this clear?

WHO IS REALLY BEHIND THE PLOT?

Questioner: Yes it is. The plot thickens, right?

Cosmic Awareness: The plot *always* thickens. It has been the case for thousands of years. It must be remembered that the true beings that are behind these events are those extraterrestrial beings of the Orion/Reptilian faction, and they have the capacity to do that form of time travel, which is available through the fourth dimension. They know there are many strands of the weavings of possibilities for future unfolding scenarios, and they are trying to manipulate factors so that they bring them together into a strong strand of what they wish the future to be, and many will be drawn into this strong strand of many threads, so that they may experience the future that those who have ultimate power wish for them, but there are many other strands that are not being woven into the one strand of the New World Order and the government of the time ahead, which is to be the government of the One World, of the New World Order, and it is these other strands that this Awareness directs *Its* members to, and to remember always, that *although you can see the strands being woven into the one strand, you do not have to choose to believe that you will be part of that destiny or that future.*

The Danger Of Getting Too Preoccupied By This Scenario

Unfortunately herein lies the danger of being so occupied by these scenarios that one is naturally drawn into them, and by being drawn into them, one is giving their energies to creating this as the reality they experience. There are many who are actually glad to see these events taking place for it justifies their belief systems. Many who are conspiracy theorists are actually rejoicing in a manner of speaking, every time another strand to the main strand becomes apparent and they can say, "See? We told you so!" yet, *this is a dubious honor* to be able to say, "We told you so!" when it is marching the world and all of humanity into that which will be total upheaval and chaos.

In his time Nostradamus was One Of The Elite

Much of what was foretold has been that which was planned in advance. Nostradamus for example, in his quatrains, often mentioned those things that were to

unfold in the future. Few know that Nostradamus came from an Elite family and that *it is questionable how pure his motives were*. If the reptilian-types and the Orion masters at that time *already were aware* of possible future scenarios, it would not be beyond them to use an individual such as Nostradamus to put out vague prophecies in the lines of his quatrains that later individuals could take and exemplify as evidence of future events predicted hundreds of years ago. Thus it would seem that it is inevitable that those events that were predicted in the quatrains of Nostradamus or in other predictive prophecies, anything from that which would be the Hopi's to the Mayan's, to the *Book of Revelation* and other sources of prophecies, could be made to look as totally accurate to these times and inevitable.

When one continues this by putting one's own personal focus on the unfolding events that one sees on television each and every night, one easily can be convinced that these are indeed inevitable events and that the future will be as grim as the one that was prophesied and predicted, and that the one main strand, the strong strand of threads that the Illuminati, the Elitists, the Secret Cabal, those who have had dominion and power have been weaving for countless centuries, is the inevitable future for mankind. This Awareness speaks very strongly when *It says it is not* the inevitable future for mankind.

What would make it inevitable is each and every individual choosing to energize the main strand, the main picture, as one that they might experience or that they will experience. If one's intent and desire is to prove that it is right so that those who wish to support it remain in power and those who are conspirators wish to be able to say, "I told you so!" then, it becomes a matter where one becomes embroiled in this scenario and becomes party to it. This Awareness speaks strongly again when *It says that it is important not to energize this main strand*, but to choose other strands that are not leading to this as the inevitable outcome.

This is the way to proceed at this time, and it must be remembered that there are accelerating energies of manifestation that are becoming stronger and stronger. Because this is so, when one puts their thoughts and energies into the belief structure that an inevitable future will occur of death and destruction and the total collapse of the world as it is known and even the total destruction of the planet, then because of the energies of manifesting one's beliefs and one's thoughts becoming stronger and stronger, it is unlikely that one will not experience it if they put their energies to it, but it is also likely that one *will not* experience it if they do not put their energies to such a scenario.

There are many who hold it will be so, and there are many who present it will be so. The challenge truly still will be at this time and in the times directly ahead to be aware of these matters but not to energize them, to choose to believe that another reality is indeed possible for the individual and his or her family and friends

THE NEW MOVIE "MACHETE" **(Is it designed to evoke a racial war?)**

Questioner: (Thank you, that was most enlightening)

Our next topic concerns a new film coming out in the Fall. The name is *Machete*, a video concerning this film suggests its showing will evoke a racial war in the US. This video includes a call for violence, whites hating Hispanics, war on Arizona, threatened immigration laws involved; the political director is Robert Rodriguez. Is

this a true threat or an advertising and publicity-seeking ploy related to this film?

Cosmic Awareness: This is the advanced publication which is ploy to gain more attention, to create controversy before the film even is released so that more will go out to see it. This is seen as manufactured interest or marketing. What is also seen is *that this is another attempt to fire up racial tension*. In this case much is directed towards the Hispanic problem of the Mexicans who are flooding over the border into the United States of America. But *this is also intentional and by design*.

The Powers That Be are allowing this scene to occur, because the more Mexicans who come in, the more jobs that are lost to those Mexicans will provoke the citizens of the United States who feel that their jobs are being taken and that they're being asked to pay for these 'illegals' who have now encroached upon society and who have embedded themselves into their society. This will be also promoted in such films and in news reports and in magazines and papers that describe the problem. *Never will it be mentioned that is an intentional problem that is being manufactured to create a two-tier society, a "have's" and "have not" society, a society that can point to another racial group and say, "Look at what they are taking from us! Look at what they are doing to us! We must act! We must drive them down!"*

Similar to the Nazi Party targeting Jews as Scapegoats

This is not unlike the actions that the Nazi party evoked in Germany in the 1930s where they targeted a group, in this case, the Jewish people and made them responsible for all the ills that the German people were experiencing at that time. This invocation that the Jews are behind it all *is still a current theme*, and this Awareness introduces this to show that it is not a new tactic, and has basically been used since the dawn of time to create a scapegoat, to focus the attentions of the people on an enemy, the 'ones responsible'.

The Racial Fires Are Being Fanned

In this case, the intent is to create high tension between Hispanic people, whether they are long-standing American citizens or those who have recently come across the border illegally. It will not matter. What will be seen is the color of the skin. What will be important is that they are Mexicans, not that they are long-standing citizens of the country that is America, but only that they are Hispanics. The racial fires are being fanned, not only towards the Hispanics, but also towards the Muslims and the Arabs. They too are seen as a group that are being scape-goated to be the enemy, to be the undesirable people, the dangerous people who should never be allowed to enter the country. Even those long-standing citizens will be targeted by such hate and maliciousness.

All of this is *deliberate* to fire up the flames of racism, to fire up the flames of religious intolerance, to fire up the flames of hatred and reactionary movement against these peoples, against these races, and against these religious backings. The purpose of creating this scenario is to increase tensions, in this case, in the United States against Hispanic people, against Muslim people and against anyone different than those who are considered true blue Americans. This is also extending northwards to the country of Canada, where there are even plans to control the movement of peoples from Canada into the United States. Those who are becoming extremists are even proposing to create a fence between the two nations.

All of this is simply extremism and this Awareness cannot say to ignore it. *It simply can point out that as*

extremism increases in a nation, that nation becomes weaker and more subject to explosive situations. It is as if oil has been spilling out into a confined area, seeping into an area, soaking that area with highly combustible oil and gas and then someone takes a match and throws it into the pit where the oil has been collecting, igniting the whole pit, igniting the situation. The seeping of racial and ethnic tensions is similar. It is accumulating and will soon be triggered into racial and ethnic wars, and then the step to ethnic cleansing is a very small one.

It happened before and has happened before many times over, and there is nothing unique about the United States that such an event could now happen again if it is provoked, if it is manipulated into this condition. The manipulation is happening and the movie *Machete* is part of the manipulations. It is not seen to be a movie that is being produced for pure reasons, but rather to revoke public sentiment and to flame the fires of hatred and prejudice and reaction against those people in focus, the people presented in the document or in the movie.

WHY WOULD A HISPANIC MAKE THIS MOVIE?

Questioner: Question please: Robert Rodriguez, I would assume he is also Hispanic. Why would he want to do that, to incite a riot against his own peoples?

(Note: Rodriguez is the director who brought the world such innocuous stuff as *Spy Kids*, and *Shark Boy & Lava Girl*, but he loves horror and over-the-top violence, as seen in his amazing vampire movie, *From Dusk To Dawn* and his adaption of the popular graphic novel, *Sin City*. His use of violence is often tongue-in-cheek, and extremely exaggerated, and his favorite genre seems to be Westerns and anything outrageous and fantastic, and it is usually done in the spirit of demented fun, and often has a positive moral message.

Strongbow)

Cosmic Awareness: This has always been used as a way to invoke such reaction. Native Americans were also often employed as agents against their own people, and Blacks, some of course being used for a similar purpose. This is not unusual. At this time, there is a Black man who is the President of the United States of America. Part of the popular mythology was that because he was a Black man, all things would be much better for Blacks and yet it can be seen that there has not necessarily been an advantage to the Black people of America because a Black man is the President of the United States of America. It is so that the president must be impartial and neutral, not coming from a racial bias towards people of Black skin, a black hue, but towards all Americans of all colors and race and religion.

This Awareness is complete. All this Awareness would add is that one must see this film if one is to see it, *in neutrality*, not allowing yourself to be swayed by what is presented on the screen and yet this Awareness sees that it would be difficult to do so for there will be a very strong energy in the film that will be very provocative for or against, depending on the attitudes or the racial background one has when one goes in to see this film. The Hispanics seeing this film will view it differently than a Caucasian White who would view it.

THE DEEPWATER HORIZON EXPLOSION

(Were Space-Based Weapons Used?)

Questioner: Thank you. That was really very interesting. Our next topic comes from Ted Helinski. It concerns the Deepwater Horizon explosion. A video was taken by two guys who were out fishing near the oil rig when the explosion and fire happened at 10 PM Central Daylight Time, April 20 2010. The allegation is that space-based weapons were used and the two beams coming down from above and focused directly on the oil rig are clearly visible. It was indicated elsewhere that

the blue laser beam is the strongest, which is what was seen. It was also suggested that these beams were a reflection in the camera lens. Your observations please, of who, what, and why, and if any of this is in fact true?

Cosmic Awareness: This Awareness does not see the truth in this. What *It* does see is that the events of the oil rig Horizon were *planned events* and allowed to occur, but *It* does not say it was because of alien technology blue laser beams that destroyed the oil rig, but it is seen that *it was the intent to destroy the platform* and to destroy the drill-pipe down into the Earth itself, into the depths of the seas below the platform rig. It is seen that there were many events that foreshadowed the disaster that did occur; many warnings, many who spoke up against what was occurring and were those that were known as whistleblowers, warning that something would occur if BP was allowed to continue without proper control or being held accountable, and yet this did not occur. BP was allowed to continue and eventually, the accident occurred that caused the event that was the total destruction of the oil platform.

In Truth, in thousands of platforms around the world it is not the norm that a platform will be destroyed completely and totally, as was the platform in the Gulf of Mexico. There have been accidents on other platforms, explosions and deaths, but there has not been the total destruction as was seen in the Gulf of Mexico, nor the runaway oil that is now occurring. The pipe down into the crust of the Earth one mile below the oil platform was completely destroyed. It is seen by this Awareness that this was due to an act of sabotage, but it is also seen that BP already knew this would happen, and *it was part of a planned occurrence to destroy that pipe* that went down into the murky depths of the Gulf of Mexico, and into the crust at the point of entry where the drilling bit drilled deeply into the oil reserves deep in the Earth.

The early attempts to cap the oil that was gushing out were attempts by the company BP, not so much to cap the wellhead but rather to retrieve oil. In other words, it was not *and still is not the intent of BP to control the damage that is being caused by the spilling oil*, but it is their intent to retrieve oil that is being lost to them, profit that is being lost to them. Had the attempt been made immediately to cap the well, to use the mud to cement over the leak, it would have been a successful rescue attempt to do this, but they did not do this. *Other attempts were made that increased the flow, not decreased it*, and because the flow under high pressure was expanded, when finally attempts were made to seal the wellhead to stop the oil from escaping, the pressure and volume of oil escaping from the wellhead was simply too great.

Again it is seen that there was a reason behind the lack of effective actions to contain the problem originally that motivated the company BP. It must also be understood that *BP itself is simply a player in the game* and there are those behind the scenes who are still calling the shots. What is now becoming apparent to American citizens is the ineffectiveness of the people they have voted in as their government and their willingness to allow Corporate America to be in charge or even Corporate British concerns to be in charge. It is a very complex issue but one that will bring to light to many ordinary citizens the fact that *the government is not there for them, but is there for big business*, and is there for those greedy to the point that they would endanger regions of the planet, in this case, the Gulf region and indeed would even endanger the planet itself to a high degree through greed and avarice.

Questioner: Question please. Why wouldn't they want to cap it? You know, all this oil that is going out into the ocean and...

Cosmic Awareness: By capping it this Awareness would be referring to actually sealing the wellhead where the oil was escaping from. It was BP's intent because they were losing vast amounts of money on the oil that was being released into the Gulf, to put that dome device which was the top hat contraption over the wellhead, which would again capture the oil for them, had they simply capped the wellhead right at the beginning when the flow was not as strong as what happened afterwards.

BP ATTEMPTED A SECRET EXPLOSION

It is seen that an attempt was made that was never reported that increased the volume of the flow escaping the wellhead, and the increase was great indeed to what was once the case at the beginning of this dilemma and much more oil is now escaping from the wellhead because of a controlled explosion that BP attempted without reporting on it, for they had been advised this was not recommended, yet they chose to do this anyway. This secret explosion caused even greater problems and more oil is now escaping as the result of this, making the attempts to cap and seal the wellhead even harder and more difficult.

Questioner: The two relief wells that they're drilling, would this not help solve the problem?

Cosmic Awareness: This will, but by the time these wells are drilled, the problem will be crucial indeed.

Questioner: Exactly. Is Halliburton Services involved in this in any way?

Cosmic Awareness: That which is known as Halliburton is indeed involved, as are other subsidiary companies, but even the dispersal agent that was used to disperse the oil has connections to BP. The founder and chief CEO of the company that creates this dispersant was a longtime employee of the corporation of BP and there is even seen a kickback arriving to the coffers of BP for using the dispersal agent. There are other forms of capturing the oil that are much more natural and more easily employed than the chemical dispersant that is being used. Again, this is another example of the greed that is involved in this situation. What this will cause is that the world will finally start to wake up to that which is corporate greed, corporate inability to consider situations that might affect ordinary humans beings and the environment. Corporations are not concerned with these matters. They are concerned with their profit margin, with making money, and with having power and control. *In some ways this event will mark the beginning of the end of that which is.* How this will play itself out depends on how one chooses to view the events that are unfolding.

PROBLEMS WITH TOXIC DISPERSANTS

Questioner: (I see). There is one other related question from Lloyd Ard. He writes, "Another video suggested even fishermen in the Gulf are becoming ill from this toxic dispersant now being used. Oil eating microbes can clean up oil spills. It has already been used before and there is no reason why BP shouldn't use these microbes now." Is this assumption correct?

Cosmic Awareness: This is correct. As this Awareness said, the reason the particular dispersant is being used is because of the connection of the owner of the company to its former employee of BP. Much money is being paid for the dispersant and certain individuals are

becoming rich as a result, but it is not a dispersant that is highly effective nor is it highly recommended to use it for it is seen to be creating high toxicity both in the water and in the air, but it must be remembered as this Awareness spoke previously that the destruction of the Gulf is part of the plan that is behind this event and that the destruction of the industries of the fishery industry, the tourist industry, are very much part of it, but so is the reduction of the quality of life in that region.

The toxic elements are building up to a degree that will seriously compromise people's health and well-being in the region for many years to come. It must start to be seen that when mankind plays with the environment to the degree that oil companies have done in the past and are doing so now in terms of underwater drilling with no preventive effective measures that could be deployed in the case of an accident of this nature, then one must understand and recognize finally, that something is wrong. As this Awareness has said, this can be seen as the beginning of the end of how corporations arbitrarily run their business no matter what the affect on the environment or the people in a region, or even the end of the planet, for this is seen as but the tip of the iceberg.

THE BLUE LASER BEAM SEEN IN THE VIDEO

(A Torpedo was Used to Target the Pipes)

Questioner: (Thank you for that) One remaining question: "What was that blue laser beam seen in the video?"

Cosmic Awareness: It is seen that there were blue beams but these were targeting beams that were meant to go under the surface to target the pipeline down into the water and they were then exploded. It is even seen a torpedo was used to blow up the pipes.

It is not seen by this Awareness that those beams were the beams that destroyed the pipes.

Questioner: So it just looked like a laser beam then?

Cosmic Awareness: This is so. It was indeed a concentrated beam of light, but it is simply not seen by this Awareness that they were laser beams that destroyed the pipes. It is seen that the *drilling pipes were highlighted by this beam* and it made the targeting of the pipes by the torpedoes easier. Imagine how difficult it would have been to launch a torpedo against pipes in dark waters at night.

Questioner: Yes, exactly, exactly. Well that explains a lot of questions

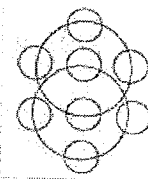

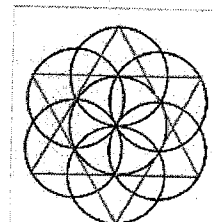

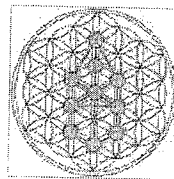

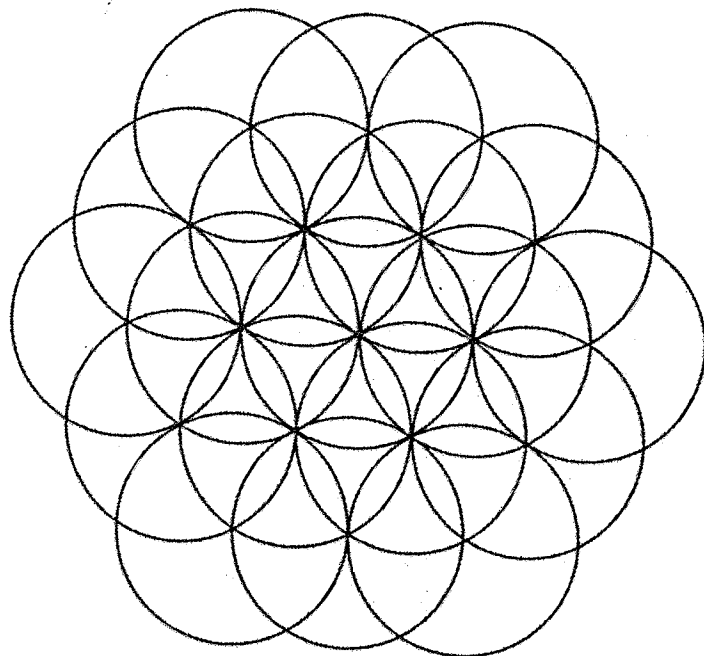

The Hopi Prediction that Seas would Turn Black

Cosmic Awareness: This Awareness reminds all that one of the Hopi predictions for the End Times, the end of the world, is that all the seas would turn black. The seas of the Gulf of Mexico are indeed seas that are turning black, and this is why this Awareness said this is precipitant to events occurring now that could indeed show the beginnings of the end, but this Awareness has long been talking about the End Times, the events of these times, that are indicative of the changes that are coming, even though it could be seen that this Hopi prediction is one of the predictions in this case that indicate the End Times.

Still, the energies must be put out by each individual into their own lives, of how even those events are occurring will be dealt with appropriately and positively, and that in effect, they do not need to experience a reality where this indicates that the ending of the planet will occur. This Awareness plays both sides of the fence on this matter, but at the same time *It* must always speak

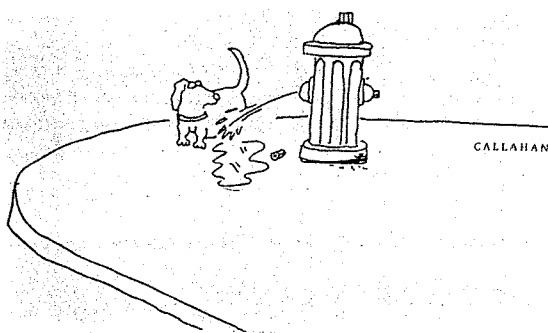

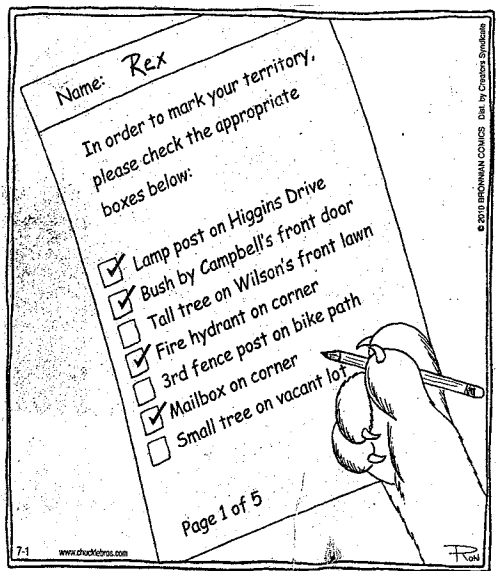

strongly to remembering that as one energizes events in one's life, so will they be, and that humans, as creator beings, are much more powerful in the creation of their lives and their realities than has ever been suspected previously.

Those who hold arcane knowledge are taught this, and understand the power of human thought and belief, but this has long been kept secret. The citizens of the planet are subject to the needs and desires and plans and machinations of the Powers That Be, who most definitely do not want them to ever know this Truth, and to ever suspect that by being focused on a matter, that matter is more likely to be manifested than if it is not focused on. While it seems extraordinarily difficult not to focus on events that are so detrimental in nature and so overwhelmingly in scope, still this Awareness asks all to start to try to understand the deeper principles of personal manifestation, and to try to effect them in one's life, to try to focus them away from the common scenarios that are being presented daily on the nightly news, and to focus on a life and a reality that will not be deeply and negatively affected by those factors, and instead endeavor to look away and to focus in new directions, to seek out the other strands of possible realities and possible futures that they individually wish to experience and in their individual experiencing of those different realities, new realities will be formed and the results will be different than those that are predicted and those that are being energized on the nightly news.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the interpreters necessarily agree with the statements of Cosmic Awareness. The interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

**--HOW TO GET THIS NEWSLETTER BY MAIL--
EVERY 4 WEEKS (More or Less)**

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).

MEMBERSHIPS AVAILABLE (Honor System)

INDIVIDUAL: \$42 per year or \$12 quarterly
 FAMILY: \$52 per year or \$20 quarterly
 CONTRIBUTING: \$77 per year or \$25 quarterly
 SPONSORING: \$144 per year or \$40 per quarter
 BENEFACTOR: \$500 per year or \$150 per quarter
 PATRON: \$1000 per year or \$250 per quarter
 ANGEL: \$5000 per year or \$1500 per quarter
 LIMITED INCOME: \$30 PER YEAR OR \$9.00 QUARTERLY

Editor's Note: This has been a busy month with 4 time-sensitive readings on current events. I have tried to catch up on these in today's newsletter. There will not be a "More Wind" this month (no time). There is no Message from Matthew until further notice; Susanne Ward must take care of urgent family matters. (Avaton)

INTERNET SUBSCRIPTIONS NOW AVAILABLE

\$30 a year for Revelations of Awareness monthly newsletter plus "More Wind from the Editor", Matthew Messages and more. Go to CAC website to join.
