For decades people have heard the term, "Knock on wood". Some people when speaking about good fortune say, "Knock on wood" and actually knock on a nearby table or wooden door.

Early Christians had a magical practice of using the tips of their fingers or their knuckles to knock or rap on wood or trees. They believed that this practice would invoke the mystic power of the cross of Christ.

As a matter of fact, there is a magical system of "conscious" rapping that is older than Christianity. This ancient magical system is still in use today, but has been a closely guarded secret of a few magicians and witches. It is time that a few more people know this secret. To my knowledge this is the first time it has appeared in writing. From now on in this presentation I will use the word "knocking" instead of "rapping".

Although this system is simple it is also powerful and effective. It is designed to attract or repel something in all cases. You will simply daydream about something for a few moments then knock on a wooden table, door, or a tree then go about your daily business. However, I must admonish you to remember the ancient oriental axiom, "be careful what you ask for". I term this, "be careful what you ask for – you may just get it". When you use this system you will knock a prescribed number of times. This will set powerful cosmic forces in motion. Therefore, if you ritual for an adoring love mate, money, powerful confidence, revenge, etc., be sure this is what you want and be willing to accept the responsibility that comes along with it.

### **1. Health and Vitality**

To increase the flow of the Universal Life Force that keeps your physical body healthy and energetic, do the following ritual. First, close your eyes and imagine that you are a picture of health. You are running or walking briskly and you feel great. Second, open your eyes when you feel the time is right then,

Perform this ritual as much as possible until you are healed of your condition, along with the first ritual to maintain good health.
