

Magick in the Modern World

Yesterday's magick is today's science. Will today's magick be tomorrow's science?

There is a magick that is transcendental science. There is a magick that is transcendental art. These are the two that make the zero. The zero is the magick. It has no beginning and no end, and no measure in the past, present or future. The magick in the modern world is the same as past and future, for one is the magus and twain his forces. The 'one' is the perimeter of the circle with no defined size. Two is the manipulation of force by good and evil, science and art, fire and water. All these are the same in the magick mirror of the vision of no difference. This is the formula of $0=2$.

'Art is magick and magick is art'. Styles change, become 'modern' - that is art. The *magick* of the art remains constant. Science changes, becomes 'modern' - magick is constant.

In the beginning was magick, at the end was magick, yet there was no beginning or end for magick is 0 and it's formula is 2. Modern computer graphics with pictures of magickal things, miles of communications, miles of rituals, all these are not magick; they are art and science and the manipulation of mind.

MAGICK is an age old formula that is the same at the Equinox of the Alpha and the Omega.

P.L.A. - Mirum Occultum - Kether.

A.P.L. - Thick Darkness.

A.L.P - Aleph - a thousand.

This also is $0=2$.
